Approval	70450 CT BRAIN, HEAD		< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; It is unknown if the study is being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.	1
Approval	70450 CT BRAIN, HEAD		< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; This study is requested for a new onset of seizures or newly identified change in seizure activity or pattern.	2
Approval	70450 CT BRAIN, HEAD		double vision.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring. Head Injury/Headache - Will get CT brain to rule out acute abnormalities. Rx given for Imitrex for PRN use. Patient advised to avoid ASA use for headache. F/u with worsening.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The headache is not described as a "thunderclap" or the worst headache of the patient's life.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.	1
Approval	70450 CT BRAIN, HEAD		headache has been continuous, 8/10 pain that continuous to worsen, nausea/vomiting, light and sound sensitivity (abnormal to Pt), fatigue.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Approval	70450 CT BRAIN, HEAD		memory loss / loss of feeling in the left side of face; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.	1
Approval	70450 CT BRAIN, HEAD		none; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.	1

Approval	70450 CT BRAIN, HEAD	Patient is experiencing recurring headaches on the right side of her head she's stating that she's having numbness on the right side of her body on occasion and is concerned. Patient is also having blurred vision and neck pain when these headaches occur.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
Approval	70450 CT BRAIN, HEAD	pupils appear unequal on exasm; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a recent head trauma or injury.	2
Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; There is a suspected or known brain tumor.; This study is being requested for known or suspected brain tumor, mass or cancer.	1
Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	10
Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; This is a request for a brain/head CT.; There is a suspected or known brain tumor.; There is a suspected or known brain tumor.; This study is being requested for known or suspected brain tumor, mass or cancer.; This study is being requested for known or suspected brain tumor, mass or cancer.	1
Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.; This study is being requested for a headache.	1
Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; This study is requested for known or suspected bleed such as subdural hematoma or subarachnoid bleed.	1
Approval	70486 CT SINUS, FACE,JAW,MANDIBLE, MAXILLOFACIAL NO CONTRAST	"This request is for face, jaw, mandible CT.239.8"; "There is not a history of serious facial bone or skull, trauma or injury.fct"; "There is suspicion of neoplasm, tumor or metastasis.fct"; Yes this is a request for a Diagnostic CT	1

Approval	70486 CT SINUS, FACE,JAW,MANDIBLE, MAXILLOFACIAL NO CONTRAST	This study is being ordered for a known or suspected tumor.; This is a request for a Sinus CT.; Yes this is a request for a Diagnostic CT	1
Approval	70486 CT SINUS, FACE,JAW,MANDIBLE, MAXILLOFACIAL NO CONTRAST	This study is being ordered for sinusitis.; This is a request for a Sinus CT.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year); Yes this is a request for a Diagnostic CT	1
Approval	70486 CT SINUS, FACE,JAW,MANDIBLE, MAXILLOFACIAL NO CONTRAST	This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is immune-compromised.; Yes this is a request for a Diagnostic CT	2
Approval	70486 CT SINUS, FACE,JAW,MANDIBLE, MAXILLOFACIAL NO CONTRAST	This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT	1
Approval	70486 CT SINUS, FACE,JAW,MANDIBLE, MAXILLOFACIAL NO CONTRAST	This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year); Yes this is a request for a Diagnostic CT	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	right side soar throat ,; This is a request for neck soft tissue CT.; Surgery is NOT scheduled within the next 30 days.; The patient has a suspicious infection or abscess.; Yes this is a request for a Diagnostic CT	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; Surgery is scheduled within the next 30 days.; The patient has a suspicious infection or abscess.; Yes this is a request for a Diagnostic CT	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has been recent trauma or other injury to the neck.; Yes this is a request for a Diagnostic CT	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is a suspicion of an infection or abscess.; Yes this is a request for a Diagnostic CT	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is not a suspicion of an infection or abscess.; This is not being ordered by an ENT specialist.; Yes this is a request for a Diagnostic CT	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.	1

Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; Yes this is a request for a Diagnostic CT	2
Approval	70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCONTRAST	Subtle focus of radiotracer uptake at the base of the tongue on the left in the vallecula area. Please consider a dedicated contrast-enhanced; This study is being ordered for trauma or injury.; 41 y.o.male here for complaint of headache. He states that he got into an altercation one month ago where he was physically injured in his head. He is accompanied by his mother who states that he has had surgery with screws placed in his brain as a child.; There has been treatment or conservative therapy.; Head injury, initial encounter; Injury due to altercation, initial encounter; Episodic cluster headache, not intractable; Mediastinal lymphadenopathy; imitrex	1
Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST	Subtle focus of radiotracer uptake at the base of the tongue on the left in the vallecula area. Please consider a dedicated contrast-enhanced; This study is being ordered for trauma or injury.; 41 y.o.male here for complaint of headache. He states that he got into an altercation one month ago where he was physically injured in his head. He is accompanied by his mother who states that he has had surgery with screws placed in his brain as a child.; There has been treatment or conservative therapy.; Head injury, initial encounter; Injury due to altercation, initial encounter; Episodic cluster headache, not intractable; Mediastinal lymphadenopathy; imitrex	1
Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST	Yes, this is a request for CT Angiography of the Neck.	1
Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The study is ordered for the evaluation of lymphadenopathy or mass	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	PATIENT IS HAVING SEVERE HEADACHES AND ITS CAUSING VISUAL DISTURBANCE'S.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache. Pt is having headaches and visual disturbances.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.;	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	It is unknown why this study is being ordered.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	1

Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	5
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.	2
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing fatigue or malaise.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.	2
Approval	71250 CT CHEST, THORAX	"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	2
Approval	71250 CT CHEST, THORAX	"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1

Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2/27/15; There has not been any treatment or conservative therapy.; Chest- pulmonary nodule Lumbar-sciatica pain	1
Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for known tumor.	1
Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	bronchitis and acute upper respiratory inflammation.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	COPD ON 2 INHALERS; "Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Approval	71250 CT CHEST, THORAX	FOLLOW UP OF KNOWN MASS; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	fracture.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	headache has been continuous, 8/10 pain that continuous to worsen, nausea/vomiting, light and sound sensitivity (abnormal to Pt), fatigue.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Approval	71250 CT CHEST, THORAX	It is not known if there is radiologic evidence of mediastinal widening.; There is no physical or radiologic evidence of a chest wall abnormality.; 1 month with chest pain without relief. Pt states onset due to wrestling with son. Pt prescribe Norco for pain. No relief of pain with medication. Xrays are normal; The ordering physician a is NOT a Surgeon, Pulmonologist, or Cardiologist.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.; Yes this is a request for a Diagnostic CT	1

Approval	71250 CT CHEST, THORAX	<p>It is not known if there is radiologic evidence of non-resolving pneumonia.; The patient is presenting new signs or symptoms.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT</p> <p>Patient complains of right flank pain. It has been constant for the past few weeks. It is a cramp-like pain. Also has a residual cough since January 2017. Chest x-ray on this visit shows the follow: hyperexpansion of the lung fields and flattening of the ; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.</p>	1
Approval	71250 CT CHEST, THORAX	<p>Pt has a 1.5 cm nodule in his right lung. WE need to examine this asap; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT</p> <p>Pt has a knot that showed up on the side of his chest. Right rib pain, whenever he pushes on it pain is severe.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT</p>	1
Approval	71250 CT CHEST, THORAX	<p>small subtle lesion shown on chest x-ray; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT</p>	1
Approval	71250 CT CHEST, THORAX	<p>There is no radiologic evidence of mediastinal widening.; There is no physical or radiologic evidence of a chest wall abnormality.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The ordering physician a is NOT a Surgeon, Pulmonologist, or Cardiologist.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.; Yes this is a request for a Diagnostic CT</p>	1
Approval	71250 CT CHEST, THORAX	<p>There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT</p>	1

Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Pt has left plural effusion and has had it for about a month, pain on the left side (left rib area) and shortness of breath; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	There is radiologic evidence of non-resolving pneumonia after at least 4 weeks of treatment.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	3
Approval	71250 CT CHEST, THORAX	Two noncalcified pulmonary nodules identified in the right lower hemithorax along the course of the right minor fissure, the largest of which measures 9 mm x 3 mm in diameter. These are nonspecific but most likely related to noncalcified granulomas in ; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.	2
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	back pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2/3/2017; There has been treatment or conservative therapy.; pain; educated on home exercise	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Lower extremity weakness.	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	This study is to be part of a Myelogram.; This is a request for a Cervical Spine CT	1

Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine CT.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to trauma or acute injury within 72 hours.; There is a reason why the patient cannot undergo a thoracic spine MRI.; Yes this is a request for a Diagnostic CT	1
Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.; Yes this is a request for a Diagnostic CT	3
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; numbness in the hands; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/2016; There has been treatment or conservative therapy.; pain, numbness and tingling of lower extremities; PT, medication	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2/9/17; There has not been any treatment or conservative therapy.; Numbness, pain in the shoulder, Pain in the lower neck, tingling of the right hand	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; NOVEMBER 2016; There has been treatment or conservative therapy.; PATIENT HAS CHRONIC BACK PAIN.; PATIENT HAS HAD MEDICATIONS & CHIROPRACTIC CARE.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for trauma or injury.; October 2016; There has been treatment or conservative therapy.; knee neck and shoulder pain Joint pain and headaches; Pt has completed PT and 12 weeks of conservative measures. She has been on NSAIDS for 12 weeks	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	caller requested to bypass clinicals; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; n/a; It is not known if there has been any treatment or conservative therapy.; n/a	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; It is not known if this patient had a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.; <Enter Additional Clinical Information>	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Patient had direct blow to his posterior neck with a piece of fire wood and has decreased grip strength and ROM to left hand/shoulder, has been taking naproxen for the last week without relief, symptoms continue to worsen instead of improving, MRI cervica; This is a request for cervical spine MRI; Trauma or recent injury; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pt has decreased grip strength and ROM to left hand/shoulder; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.	2
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.	2
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.	10

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy. unknown; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; numbness of the fingers.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if there is x-ray evidence of a recent cervical spine fracture.	3
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; NOVEMBER 2016; There has been treatment or conservative therapy.; PATIENT HAS CHRONIC BACK PAIN.; PATIENT HAS HAD MEDICATIONS & CHIROPRACTIC CARE.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	caller requested to bypass clinicals; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; n/a; It is not known if there has been any treatment or conservative therapy.; n/a	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	It is not known if there are documented findings of immune system suppression.; This is a request for a thoracic spine MRI.; It is not known if the patient is experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits."; <Enter Additional Clinical Information>	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	4
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	4
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/2016; There has been treatment or conservative therapy.; pain, numbness and tingling of lower extremities; PT, medication < Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 3/06/2017; There has been treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >; X RAY, MOIST HEAT FOR NECK 2 DAYS AND OVER THE COUNTER MEDS. INJECTION "TORADOL	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2/3/2017; There has been treatment or conservative therapy.; pain; educated on home exercise	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	caller requested to bypass clinicals; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; n/a; It is not known if there has been any treatment or conservative therapy.; n/a	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Patient fell off of a ladder and has trauma to her lower back. X-ray of her back is abnormal. Patient is unable to walk or sit without pain.; The study requested is a Lumbar Spine MRI.; Trauma or recent injury; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; The patient has not completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.; Gabapentin  Motrin  Demerol	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.	3
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	4
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	23
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality	10
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	9
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s); The patient has Neurological deficit(s)	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	x-ray done-mild degeneration.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Weakness in LLE, drags leg at times, frequent leg numbness.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72192 CT PELVIS WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered because of a suspicious mass/ tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; Yes this is a request for a Diagnostic CT	1
Approval	72196 MRI PELVIS	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 3/06/2017; There has been treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >; X RAY, MOIST HEAT FOR NECK 2 DAYS AND OVER THE COUNTER MEDS.	1
Approval	72196 MRI PELVIS	INJECTION "TORADOL This is a request for a Pelvis MRI.; The request is for pelvic trauma or injury.	1

Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for suspicion of tumor, mass, neoplasm, or metastatic disease?	1
Approval	72196 MRI PELVIS	will fax; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
Approval	73200 CT ARM OR UPPER EXTREMITY	This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is a history of upper extremity joint or long bone trauma or injury.	1
Approval	73200 CT ARM OR UPPER EXTREMITY	This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is a history of upper extremity joint or long bone trauma or injury.; Yes this is a request for a Diagnostic CT	1
Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	The request is for an upper extremity non-joint MRI.; This is a preoperative or recent postoperative evaluation.	1
Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is not an orthopedist.; There is a history of upper extremity trauma or injury.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2/9/17; There has not been any treatment or conservative therapy.; Numbness, pain in the shoulder, Pain in the lower neck, tingling of the right hand < Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.;	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	numbness, pain in bilateral wrist, weakness in hands , limited range of motion,; medication	2
Approval	73221 MRI JOINT OF UPPER EXTREMITY	PATIENT WITH DECREASE IN RANGE OF MOTION PROVIDER TRYING TO RULE OUT POSSIBLE ROTATOR CUFF TEAR.PATIENT DOESNT USE LEFT ARM AT ALL DUE TO PAIN. ON EXAM PATIENT UNABLE TO RAISE PAST 45 DEGREE ABD AND POSITIVE ON HAWKINS.UNABLE TO RAISE PAST 40 DEGREE FLEXI; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has not directed conservative treatment for the past 6 weeks.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Swelling	1

Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.	6
Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; &It; Enter answer here - or Type In Unknown If No Info Given. >	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The plain films were not normal.	2
Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study is being ordered for known/suspected joint infection.; The plain films were not normal.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	2
Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	unknown; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has not directed conservative treatment for the past 6 weeks.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	Unknown; The requested study is a Shoulder MRI.; The pain is not from a recent injury, old injury, chronic pain or a mass.; The request is for shoulder pain.	1
Approval	73706 CT ANGIOGRAPHY LOWER EXTREMITY	Yes, this is a request for CT Angiography of the lower extremity.	1

Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	; This study is being ordered for trauma or injury.; October 2016; There has been treatment or conservative therapy.; knee neck and shoulder pain Joint pain and headaches; Pt has completed PT and 12 weeks of conservative measures.; She has been on NSAIDS for 12 weeks	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	FELL ONTO LEFT KNEE WHILE IN FLEXION,HIT CURB.HAVING SWELLING DISTAL PATELLA AND DECREASE RANGE OF MOTION,DIFFICULTY WITH WEIGHT BEARING. ; EXAM: SWELLING AND TENDERNESS DISTAL PATELLA; XRAY: DISTAL PATELLA LATERAL VIEW VIEW CHIP VS SPUR ; DX: LEFT ; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Locking; This study is being ordered for a neurological disorder.; 2/15/2017; There has been treatment or conservative therapy.; swelling, pain and difficulty walking; PT, Inceds and steroids	2
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.	1

Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient has an abnormal plain film study of the foot other than arthritis.; The patient has used a cane or crutches for greater than four weeks.; The patient does not have a documented limitation of their range of motion.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; The study is being ordered for suspected fracture.; They had 2 normal xrays at least 3 weeks apart that did not show a fracture.; The patient has been treated with a protective boot for at least 4 weeks.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Swelling greater than 3 days	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Swelling greater than 3 days; It is not known if the member experience a painful popping, snapping, or giving away of the knee.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Locking; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Limited range of motion	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; Pain greater than 3 days	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	1

Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is taking antibiotics.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a suspected tarsal coalition.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	unknown; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.	2
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steroid therapy (Prednisone or Cortisone).	1

Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is receiving long-term steriod therapy (Prednisone or Cortisone).	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion. < Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Abdominal pain x 2 months  Pt here for c/o sharp pain midsternal and down left side x5 days she says that the gerd medication prescribed is not working 22y/o female presents c/o continued epigastric pain w/ radiation to LUQ abdomen, mildly tender. She ; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	c/o increase in right flank pain over the last month or so, feels like kidney stone, feels right flank pain that is worse when bladder is full, has Hx 6 yrs prior with one large stone removed with lithotripsy. pt states had large amount of caffeine intake; This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; This patient is not experiencing hematuria.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Mass was found by visual exam in the abdomen, upper gastric tenderness, hernia, palpable by reducible; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; The patient does not have new symptoms including hematuria, new lab results or other imaging studies including ultrasound, doppler or x-ray (plain film) findings, suspicion of an adrenal mass or suspicion of a renal mass. Patient complains of right flank pain. It has been constant for the past few weeks. It is a cramp-like pain. Also has a residual cough since January 2017. Chest x-ray on this visit shows the follow: hyperexpansion of the lung fields and flattening of the ; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	The patient has a history of hernia, had it repaired in 2011. Patient has been experiencing similar symptoms since 12/1/2016 that are worsening.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	The Pt has a mass around umbilical area.; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; The patient does not have new symptoms including hematuria, new lab results or other imaging studies including ultrasound, doppler or x-ray (plain film) findings, suspicion of an adrenal mass or suspicion of a renal mass.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; There is a known or a strong suspicion of kidney or ureteral stones.	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.	1

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT	3
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Abscess.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	TREATING FOR OVER A YEAR WITH NO RELIEF; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	unknown; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74175 CT ANGIOGRAPHY ABDOMEN	Yes, this is a request for CT Angiography of the abdomen.	2
Approval	74176 CT ABD & PELVIS W/O CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	3
Approval	74176 CT ABD & PELVIS W/O CONTRAST	Pain.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.	2
Approval	74176 CT ABD & PELVIS W/O CONTRAST	Patient is having abdominal pain and a lose in appetite.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	Provider believes patient has hernia. She has abd pressure and pain that is ongoing. Failed oral treatment.   Palpation was limited due to burn grafts.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	Pt has Rt flank pain; r/o renal stone; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	pt with hx of diverticulosis. has failed 2-3 months of outpatient abx therapy. needs ct to r/o diverticulitis; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	She is having increased cervix tenderness with lower right quadrant. Cervical Motion tenderness. She is having vomiting. Fever, chills, abdominal pain, abnormal bleeding. History of recent tubal ligation.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	2
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	2
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; The hematuria is due to Renal Calculi/kidney/ ureteral stone.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	4
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Hematuria.; Other; Yes this is a request for a Diagnostic CT	2
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Diverticulitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; <Enter Additional Clinical Information>	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; abdominal pain, diarrhea, constipation  The symptoms began 20 years ago. The symptoms are reported as being moderate. The symptoms occur randomly. The location is abdomen. Aggravating factors include nothing. Relieving factors include nothing. She states; Yes this is a request for a Diagnostic CT	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; <Enter Additional Clinical Information>; Yes this is a request for a Diagnostic CT	4
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; ABDOMINAL TENDERNESS-RIGHT MID AREA,CHANGE IN APPETITE,NAUSEA,FEVER, 1. Abdominal pain  Onset: 1 Week 3 Days. The severity of the problem is moderate. The problem has worsened. The symptoms are constant. The location is right lower quadrant. The quali; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Blood in stool; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; pain with movement increasing over past few days, had pain several weeks, palpable bulge on right side, tenderness, reducible with flat line, did ultrasound which was inconclusive,; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; pain; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone	5
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone; Yes this is a request for a Diagnostic CT	14
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT	3
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement; Yes this is a request for a Diagnostic CT	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There has NOT been a recent (within the last 3 months) Abdomen and/or Pelvis CT.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; Known Tumor, Cancer, Mass, or Rule out metastases; yes, there is a palpable or observed abdominal mass.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This request is not for follow up to abdominal and/or pelvic trauma ordered by a specialist or PCP on behalf of a specialist who has seen the patient.; There is no recent trauma with physical findings or abnormal blood work indicating either peritonitis or abscess.; There are no physical findings or lab results indicating an intra-abdominal bleed.; Trauma; <Enter Additional Clinical Information>; Yes this is a request for a Diagnostic CT unknown; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	unknown; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has NOT been completed.; The patient did not have an endoscopy.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	The Pt had a ultrasound, which showed hydronephrosis and masses on the kidney; Can't do a CT because the creatinine levels are too high, so an MRI was recommended for further evaluation.; This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A kidney abnormality was found on a previous CT, MRI or Ultrasound.; It is unknown if the patient has a renal cyst or tumor.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;" UNKNOWN	1

Approval	74181 MRI ABDOMEN 75635 CTA AA&BI ILIOFEM LXTR	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; mass on gall bladder	1
Approval	RS&I C-/C+ POST-PXESSING	Yes, this is a request for CT Angiography of the abdominal arteries.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	elevated blood pressure, pre op clearance for scheduled neck surgery; This study is being ordered as a pre-operative evaluation.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Syncope/Chest Pain/Hx Premature CAD in Family and sudden cardiac death.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	1
Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lung Cancer.	1

Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; This study is NOT being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; There has been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.	1
Approval	93350 ECHO TTHRC R-T 2D +-M-MODE COMPLETE REST&STRS		This is a request for a Stress Echocardiogram.; The patient has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The member has known or suspected coronary artery disease.	1

Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; <Enter Additional Clinical Information>; Yes this is a request for a Diagnostic CT	1
Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; DIARRHEA WITH NEGATIVE STOOL CULTURES; Yes this is a request for a Diagnostic CT	1
Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; It is not known if this is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; DEFINITE MASS OR LUMP ON THE LEFT SIDE	1
Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	unknown; This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; It is not know if this study is being requested for abdominal and/or pelvic pain.; It is not known if the study is requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The member does not have known or suspected coronary artery disease	2
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested to evaluate a suspected cardiac mass.	1
Disapproval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	Radiology Services Denied Not Medically Necessary	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.	1
Approval	70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST		This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks)	1
Approval	70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST		This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT	5
Approval	70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST		This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year)	1

Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Trauma related to MVA on 01/10/17	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is an orthopedist.	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone	1
Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; Yes this is a request for a Diagnostic CT	1
Approval	70544 Mr angiography head w/o dye	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; 2/2/2017; There has not been any treatment or conservative therapy.; PATIENT HAS RT SIDE NUMBNESS, LOSS OF TEMP DISCRIMINATION.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; 2/2/2017; There has not been any treatment or conservative therapy.; PATIENT HAS RT SIDE NUMBNESS, LOSS OF TEMP DISCRIMINATION.	1

Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Abnormal finding on cervical MRI which indicated need for additional diagnostic imaging. Recommended Imaging: Pre and Post contrast MRI of Brain.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing dizziness.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	2
Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of mediastinal widening.; There is no physical or radiologic evidence of a chest wall abnormality.; < Enter answer here - or Type In Unknown If No Info Given. >; The ordering physician a is NOT a Surgeon, Pulmonologist, or Cardiologist.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.; Yes this is a request for a Diagnostic CT	1
Approval	71550 MRI CHEST	This study is being ordered for a work-up of a suspicious mass.; There is radiographic or physical evidence of a lung or chest mass.; This is a request for a chest MRI.	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST		1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	; This study is being ordered for trauma or injury.; 2013; There has been treatment or conservative therapy.; PAIN IN NECK AND BACK; MEDS, SURGERY	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	; This study is being ordered for trauma or injury.; 2014; There has been treatment or conservative therapy.; PAIN IN NECK THAT RADIATES INTO THE BACK AND HIPS, CONSTANT SHARP PAIN IN THE BACK, NUMBNESS AND TINGLING DOWN LEFT LEG. PAIN IN BACK FROM FRACTURED BACK AND MULTIPLE SURGERIES.; SURGERY TO THE THORACIC BACKX4 RESULTING IN RODS AND SCREWS IN HIS BACK, PT, MEDICATION	1

Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	Patient is still waiting for Dr. Crabtree's office to contact him for a follow up appointment. Apparently followup had been planned following a CT myelogram both cervical and lumbar. Apparently there has been difficulty in obtaining scheduling; due to pa; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; more than 1 year ago; There has been treatment or conservative therapy.; The patient presents today for follow up. They report pain as basically stable and controlled with current medications. Denies any side effects from their medications and maintains physical activity. Requests no changes today. The patient complains of p; Treatment History: Professional caregivers seen in the past include family physician. The following tests have been done in the past: unknown testing . He has tried NSAIDs- ibuprofen, aleve, tylenol, sports creams, Zanaflex, Oxycodone; and Oxycontin in t	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	This study is to be part of a Myelogram.; This is a request for a Cervical Spine CT	1
Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST		2
Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	Pt is getting a discogram and is only required to get an MRI for it.; This is a request for a thoracic spine CT.; There is no reason why the patient cannot undergo a thoracic spine MRI.	1
Approval	72131 CT LUMBAR SPINE, LOW BACK		2
Approval	72131 CT LUMBAR SPINE, LOW BACK	; This study is being ordered for trauma or injury.; 2013; There has been treatment or conservative therapy.; PAIN IN NECK AND BACK; MEDS, SURGERY	1
Approval	72131 CT LUMBAR SPINE, LOW BACK	Patient is still waiting for Dr. Crabtree's office to contact him for a follow up appointment. Apparently followup had been planned following a CT myelogram both cervical and lumbar. Apparently there has been difficulty in obtaining scheduling; due to pa; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; more than 1 year ago; There has been treatment or conservative therapy.; The patient presents today for follow up. They report pain as basically stable and controlled with current medications. Denies any side effects from their medications and maintains physical activity. Requests no changes today. The patient complains of p; Treatment History: Professional caregivers seen in the past include family physician. The following tests have been done in the past: unknown testing . He has tried NSAIDs- ibuprofen, aleve, tylenol, sports creams, Zanaflex, Oxycodone; and Oxycontin in t	1

Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is a preoperative or recent post-operative evaluation.; Yes this is a request for a Diagnostic CT	4
Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.; Yes this is a request for a Diagnostic CT	5
Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.	3
Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.; Yes this is a request for a Diagnostic CT	11
Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; This is a request for a lumbar spine CT.; This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.; The patient does not have a history of severe low back trauma or lumbar injury.; The patient does not have a history of severe low back trauma or lumbar injury.; This is a preoperative or recent post-operative evaluation.; This is a preoperative or recent post-operative evaluation.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST		4
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	- RECOMMEND MRI CERVICAL SPINE - MRI cervical spine is being requested to further evaluate the patients persistent pain as well as the more worrisome neurologic symptoms. MRI is not typically needed prior to initiating treatment, unless there is a rapid; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; The patient complains of pain in neck, in lower back and in mid back. The patient has been experiencing this pain for Greater than 1 year.; There has been treatment or conservative therapy.; Mrs. Austin presents to clinic today on a referral from Dr. Joseph Long. She is having pain in her mid to lower back which radiates into her left hip and down her leg, anterior thigh, knee and sometimes is associated with burning/numbness and tingling. ; She is currently prescribed no pain medications. Chiropractic care, structure exercise at the gym and OTC meds have provided some relief, but she feels her pain is worsening over last 1-2 years.	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >	3
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; There has been treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >; < Describe treatment / conservative therapy here - or Type In Unknown If No Info Given >	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/10/2016; There has been treatment or conservative therapy.; Numbness Tingling; PT Medications	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/10/2016; There has been treatment or conservative therapy.; Pain, numbness an tingling, radiates to both arms and both legs; PT, Medications	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2010; There has been treatment or conservative therapy.; pain in neck radiating both arms, occasional numbness both hands, back pain radiates to legs; surgery lower back, multiple injections cervical spine, medications, past PT	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Do52-year-old female presents for initial evaluation upon referral from Dr. Kevin Jackson. She reports neck and low back pain that began greater than 10 years ago and is related to a history of working as a cleaner.  Lumbar MRI without contrast ta; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; Patient did neck excercise she has decreased in her grip strength; hydrocodone morphine	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;;	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2007; There has been treatment or conservative therapy.; PAIN IN NECK AND SHOULDER; MEDS, PT, INJECTIONS.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2013; There has been treatment or conservative therapy.; PAIN IN NECK AND BACK; MEDS	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2016; There has been treatment or conservative therapy.; NECK AND BACK PAIN; MEDS	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Enter date of initial onset here - or Type In Unknown If No Info GiveUnknownn; There has been treatment or conservative therapy.;;	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	BILAT shoulder pain, hip pain and knee pain.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/2016; There has been treatment or conservative therapy.; Pain in right shoulder. Spine pain.; Medications , injections, & PA.	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	ICD: Chronic pain syndrome (G89.4); ICD: Generalized osteoarthritis (M15.9); ICD: Lumbago (M54.5); ICD: Cervical disc disorder with radiculopathy of cervical region (M50.10); ICD: Intervertebral disc disorder with radiculopathy of lumbosacral region (M51.); This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; It is not known if there has been any treatment or conservative therapy.;	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	MRI cervical spine is being requested to further evaluate the patient's persistent pain and symptoms. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process in formulating a treatment plan for this; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; amlodipine 10 mg-benazepril 40 mg capsule 1 Every Morning, Prescribe 1 Unspecified; clonidine 0.1 mg/24 hr weekly transdermal patch 1 Twice A Day PRN, Prescribe 2 Unspecified; Vitamin D3 5,000 unit tablet 1 Every Morning, Prescribe 1 Unspecified; metho	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Order MRI C and L spine. Schedule for bilateral LMBB . She might also benefit from CMBB in the future.; This study is being ordered for trauma or injury.; Unknown; There has not been any treatment or conservative therapy.; Worsening factor(s) include: bending, house chores, lifting, sitting, standing and walking Alleviating factors include medications and rest. Other associated symptoms/problems include but not limited to: difficulty staying asleep due to pain and weakness	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Pain has failed to respond to rest, activity modification, NSAIDs therapy, physical therapy, and current prescription medications, which include both opioid and non-opioids. Severe neck and shoulder pain and muscle spasm unresponsive to conservative manag; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has not directed conservative treatment for the past 6 weeks.	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Patient has been unable to sleep.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Weakness radiating to upper and lower extremities.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Patient is being considered for steroid injection; This study is being ordered for trauma or injury.; 4-2015; There has been treatment or conservative therapy.; Low back and neck pain; PT Meds	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Pt has chronic pain that is located in the neck and radiates down both arms and low back. She is being referred to spine surgery and needs an updated MRI for evaluation.; This is a request for cervical spine MRI; Pre-Operative Evaluation; Surgery is not scheduled within the next 4 weeks.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	r/o fracture; This study is being ordered for a neurological disorder.; 02/01/2017; There has been treatment or conservative therapy.; decrease sensation; physical therapy, medication	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiculopathy; This study is being ordered for a neurological disorder.; 1/2/2017; There has been treatment or conservative therapy.; Low back pain w/ radiculopathy; Home exercise, Nsaids, PT and chiropractic	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Recommend MRI Cervical Spine- MRI cervical spine is being requested to further evaluate the patient's persistent pain and symptoms. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process in form; This study is being ordered for trauma or injury.; Date of injury: 2010; There has been treatment or conservative therapy.; He reports onset of pain gradual. Reports frequency of his pain as constant with intermittent flare ups., constant and Intermittent. He describes the quality of pain as aching, burning, cramping, deep, dull, numbness, penetrating, pins and needle, pulling; Cervical Medical Branch Block	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Recommend MRI Lumbar Spine - MRI lumbar spine is being requested to further evaluate the patient's persistent pain and symptoms. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process in formulatin; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has not been any treatment or conservative therapy.; The patient has an ongoing non-radicular lower back pain. Pain has failed to respond to rest, activity modification, NSAIDs therapy, physical therapy, and current prescription medications, which include both opioid and non-opioids.	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Right paramidline lower cervical, Right periscapular pain and posterior arm pain and Right anterior brachium, Right posterior thigh and leg, Right paramidline lumbosacral The patient has been experiencing this pain for more that a year.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Reports loss of strength, numbness and tremors.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	She has tried NSAIDs- ibuprofen, Aleve, Tylenol, sports creams, Paxil and Hydrocodone in the past. The treatment tried in the past includes Heat, home exercises, Massage and tens. She says that the prior treatments tried have not helped much. The treatmen; This study is being ordered for trauma or injury.; Unknown; There has not been any treatment or conservative therapy.; Reports frequency of his pain as constant with intermittent flare ups. He describes the quality of pain as aching, burning, deep, penetrating, pins and needle, sharp, shooting, tender, throbbing and tingling. Pain radiates to left upper extremity, left fo	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.	4
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed conservative treatment (include activity modifications, physical/home exercise therapy, NSAIDs and opioid medication therapy) and wishes to proceed with a cervical epidural steroid injection.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; No, the patient did not have six weeks of Chiropractic care related to this episode.;	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	5
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	12
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.	10
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; None of the above; <Enter Additional Clinical Information>; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	9
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	18
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; He describes the quality of pain as aching, burning, cramping, deep and numbness. Pain radiates to bilateral upper extremities. He reports severity of pain on numerical reporting scale, at its worse is 10/10, least is 7/10, on an average 7/10, and right n; No, the patient does not have new or changing neurological signs or symptoms.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	unknown; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; 01/16/2017 - still attending	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	UNKNOWN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/15/2016; There has been treatment or conservative therapy.; NECK PAIN WITH ARM NUMBNESS AND WEAKNESS, LOW BACK PAIN RADIATING DOWN BOTH LEGS; PHYSICAL THERAPY AND MEDICATIONS	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/1/2000; There has been treatment or conservative therapy.; Pt has increased pain in the neck that radiates to the upper left extremities and lower left extremities, reports onset after Motor Vehicle accident; PT, injections, medications, ice/heat, massage therapy, chiro, and home exercise program	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2013; There has been treatment or conservative therapy.; Pt has low back pain that radiates down to her left leg to the left foot, neck pain that worsens with movement that occasionally goes down to her arm, occasional loss of grip.; Pt has had medication, surgery lumbar spine, and PT.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2015; There has been treatment or conservative therapy.;	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	left sided pain radiating down left side, numbness and tingling; physical therapy and medications	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2014; There has been treatment or conservative therapy.; CHRNIC PAIN IN BACK; MEDS	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2014; There has been treatment or conservative therapy.; PAIN IN BACK; SURGERY, INJECTIONS, MEDS	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2016; There has been treatment or conservative therapy.; NECK AND BACK PAIN; MEDS	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.	2
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; <Enter Additional Clinical Information>; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.	1

Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient complains of pain at lower back , hips and legs, neck and shoulder and upper extremities. The patient has been experiencing this pain for for long time and can not remember when it started. She reports onset of pain gradual. Reports frequency ; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of abnormal gait.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	6
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	4
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST		12
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	- RECOMMEND MRI CERVICAL SPINE - MRI cervical spine is being requested to further evaluate the patients persistent pain as well as the more worrisome neurologic symptoms. MRI is not typically needed prior to initiating treatment, unless there is a rapid; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; The patient complains of pain in neck, in lower back and in mid back. The patient has been experiencing this pain for Greater than 1 year.; There has been treatment or conservative therapy.; Mrs. Austin presents to clinic today on a referral from Dr. Joseph Long. She is having pain in her mid to lower back which radiates into her left hip and down her leg, anterior thigh, knee and sometimes is associated with burning/numbness and tingling. ; She is currently prescribed no pain medications. Chiropractic care, structure exercise at the gym and OTC meds have provided some relief, but she feels her pain is worsening over last 1-2 years.	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	UNKNOWN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/15/2016; There has been treatment or conservative therapy.; NECK PAIN WITH ARM NUMBNESS AND WEAKNESS, LOW BACK PAIN RADIATING DOWN BOTH LEGS; PHYSICAL THERAPY AND MEDICATIONS	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/1/2000; There has been treatment or conservative therapy.; Pt has increased pain in the neck that radiates to the upper left extremities and lower left extremities, reports onset after Motor Vehicle accident; PT, injections, medications, ice/heat, massage therapy, chiro, and home exercise program	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2013; There has been treatment or conservative therapy.; Pt has low back pain that radiates down to her left leg to the left foot, neck pain that worsens with movement that occasionally goes down to her arm, occasional loss of grip.; Pt has had medication, surgery lumbar spine, and PT.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2015; There has been treatment or conservative therapy.; left sided pain radiating down left side, numbness and tingling; physical therapy and medications	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >	1

Approval	73221 MRI JOINT OF UPPER EXTREMITY	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/09/2017; There has been treatment or conservative therapy.; Member is having hip and shoulder pain; physical therapy. celiboex medication	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2007; There has been treatment or conservative therapy.; PAIN IN NECK AND SHOULDER; MEDS, PT, INJECTIONS.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	Recommend MRI Right Shoulder and Lumbar spine- MRI RIGHT Shoulder and Lumbar spine is being requested to further evaluate the patient's persistent pain and symptoms. Findings from this study will be incorporated, in conjunction with objective findings, in; This study is being ordered for trauma or injury.; Date of injury: 2014; There has been treatment or conservative therapy.; Reports frequency of her pain as constant with intermittent flare ups. She describes the quality of pain as aching, burning, deep, sharp and pressure. Pain radiates to No radiation. She reports severity of pain on numerical reporting scale, at its worse i; Left SI Joint Injection Hip Bursa Injection #1 Hip Burse Injection #2	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	The pain is described as chronic; The member has failed a 4 week course of conservative management in the past 3 months.; This is a request for an elbow MRI; The study is requested for evaluation of elbow pain.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.	4
Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; There are no documented findings of crepitus.; There are no documented findings of swelling.; The ordering physician is not an orthopedist.; The patient is experiencing joint locking or instability.; The patient does not have a documented limited range of motion on physical examination.; There is no documented findings of severe pain on motion.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.	1

Approval	73700 CT LEG OR LOWER EXTREMITY	This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is a history of lower extremity joint or long bone trauma or injury.; This is a request for a Knee CT; Yes this is a request for a Diagnostic CT < Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Abscess; This is a request for a Knee MRI.; The study is not requested for knee pain.; The study is not requested for any of the standard indications for Knee MRI R/O DISC RELATED PATHOLOGY.; This study is being ordered for a neurological disorder.; July 2016; There has been treatment or conservative therapy.; chronic radiating pain; nsaid, pain medication and home exercise	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is for pre-operative planning.; The patient has a documented limitation of their range of motion.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	3
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/09/2017; There has been treatment or conservative therapy.; Member is having hip and shoulder pain; physical therapy. celiboex medication	1

Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT		< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2005; There has been treatment or conservative therapy.; Radiculopathy, pain,; surgery, PT, inseds,	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT		This is a requests for a hip MRI.; The member has failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an initial evaluation of suspected valve disease.	1
Disapproval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a sudden and severe headache.; The patient has NOT had a recent onset (within the last 3 months) of neurologic symptoms.	1
Disapproval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2011; There has been treatment or conservative therapy.; NECK AND BACK PAIN; MEDS	1
Disapproval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; JANUARY 2001; There has been treatment or conservative therapy.; PAIN IN NECK AND BACK; PHYSICAL THERAPY, BACK SURGERY, MEDICATIONS	1
Disapproval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.	1
Disapproval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	Radiology Services Denied Not Medically Necessary	Diagnostic Tests: ORDERING CT SCAN OF L-SPINE AND C-SPINE FOR CHRONIC PAIN AND R/O DISC RELATED PAIN. ALSO GETTING CT SCAN OF LEFT HIP.; This study is being ordered for a neurological disorder.; 09/13/2016; There has been treatment or conservative therapy.; Location of Pain: Neck pain & lower back pain, both in the center and on sides and chronic left hip pain s/p fractured and surgery; nsaid, pain medications and home exercise program	1
Disapproval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 15 years ago; There has been treatment or conservative therapy.; radiating pain up mid back and down into bilateral hips, knees, and ankles,; lumbar fusion, discogram, injections, nerve blocks,	1

Disapproval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	Radiology Services Denied Not Medically Necessary	The patient does not have any neurological deficits.; This is a request for a thoracic spine CT.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; There is a reason why the patient cannot undergo a thoracic spine MRI.; Yes this is a request for a Diagnostic CT	1
Disapproval	72131 CT LUMBAR SPINE, LOW BACK	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 15 years ago; There has been treatment or conservative therapy.; radiating pain up mid back and down into bilateral hips, knees, and ankles.; lumbar fusion, discogram, injections, nerve blocks,	1
Disapproval	72131 CT LUMBAR SPINE, LOW BACK	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2011; There has been treatment or conservative therapy.; NECK AND BACK PAIN; MEDS	1
Disapproval	72131 CT LUMBAR SPINE, LOW BACK	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; JANUARY 2001; There has been treatment or conservative therapy.; PAIN IN NECK AND BACK; PHYSICAL THERAPY, BACK SURGERY, MEDICATIONS	1
Disapproval	72131 CT LUMBAR SPINE, LOW BACK	Radiology Services Denied Not Medically Necessary	Diagnostic Tests: ORDERING CT SCAN OF L-SPINE AND C-SPINE FOR CHRONIC PAIN AND R/O DISC RELATED PAIN. ALSO GETTING CT SCAN OF LEFT HIP.; This study is being ordered for a neurological disorder.; 09/13/2016; There has been treatment or conservative therapy.; Location of Pain: Neck pain & lower back pain, both in the center and on sides and chronic left hip pain s/p fractured and surgery; nsaid, pain medications and home exercise program	1
Disapproval	72131 CT LUMBAR SPINE, LOW BACK	Radiology Services Denied Not Medically Necessary	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.; Yes this is a request for a Diagnostic CT	1
Disapproval	72131 CT LUMBAR SPINE, LOW BACK	Radiology Services Denied Not Medically Necessary	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is not experiencing symptoms of radiculopathy for six weeks or more.; There is no neurologic symptoms of bowel or urinary bladder dysfunction.; There is no suspicion of lumbar spine infection.; There is no suspicion of lumbar spine neoplasm or tumor or metastasis.; Yes this is a request for a Diagnostic CT	1

Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for cervical spine MRI; None of the above; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.	2

The patient complains of pain in neck and in lower back. The patient has been experiencing this pain for more than 10 years. She reports onset of pain gradually over time without significant; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; She is experienced these complaints for many years relating them to episodes of domestic abuse experienced in the 1980s.; There has been treatment or conservative therapy.; The patient complains of pain in neck and in lower back. The patient has been experiencing this pain for more than 10 years. She reports onset of pain gradually over time without significant initiating factor and sudden onset . The patient describes her; Exact Dates are unknown. ; Professional caregivers seen in the past include family physician, physical therapist, pain medicine physician and chiropractor. The following tests have been done in the past: X-rays . She has tried NSAIDs-ibuprofen, aleva</p> <p>She reports severity of pain on numerical reporting scale, at its worse is 10/10, least is 8/10, on an average 10/10, and right now it is 8/10. Worsening factor(s) include: any increased physical activity, bending, cold and rainy weather, lifting, pressure; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has not directed conservative treatment for the past 6 weeks.</p>	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	<p>The pain radiates to the back and left hip. Reports limitation of joint movement.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; muscle weakness, muscle pain and tenderness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; It is not known if there is x-ray evidence of a lumbar recent fracture.</p>	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	<p>The pain radiates to the back and left hip. Reports limitation of joint movement.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; muscle weakness, muscle pain and tenderness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; It is not known if there is x-ray evidence of a lumbar recent fracture.</p>	1

Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	The patient has failed conservative treatment which includes activity modifications, physical/home exercise therapy, NSAIDs and opioid medication therapy. MRI lumbosacral spine is being requested to further evaluate the patient's persistent pain and sym; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.; NSAIDS-ibuprofen,aleve,tylenol,sports creams,soma,robaxin,flexeril, valium,baclofen,neurontin,lyrica,topamax,amitriptyline,wellbutrin,zoloft,paxil,cymbalta,ultram,hydrocodone,oxycodone,oxyconton, and morphine. Also,heat, massage,surgery, and tens.	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	5
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/20/1996; There has been treatment or conservative therapy.; Pt has radiculopathy down the legs and arms, parasthesia, weakness, difficulty walking; PT, chiropractic, massage, injections	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Greater than 6 months; There has been treatment or conservative therapy.; Neck pain, lower back pain, bilateral leg pain.; Patient has had pain management procedures: lumbar radiofrequency and bilateral SI joint injections. Also has been treated with medications.	1

Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	unknown; This study is being ordered for trauma or injury.; 8 years ago; There has been treatment or conservative therapy.; patient is having numbness in the legs and lost of motion and swelling; patient has had injections shot the the spine and physical therapy	1
Disapproval	72192 CT PELVIS WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2014; There has been treatment or conservative therapy.; PAIN IN BACK THAT GOES INTO HIPS; MEDICATIONS, INJECTIONS, PT, IMAGING, SURGERY.	1
Disapproval	72196 MRI PELVIS	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2005; There has been treatment or conservative therapy.; Radiculopathy, pain,; surgery, PT, inseds,	1
Disapproval	72196 MRI PELVIS	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >	1
Disapproval	72196 MRI PELVIS	Radiology Services Denied Not Medically Necessary	unknown; This study is being ordered for trauma or injury.; 8 years ago; There has been treatment or conservative therapy.; patient is having numbness in the legs and lost of motion and swelling; patient has had injections shot the the spine and physical therapy	1
Disapproval	73221 MRI JOINT OF UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2010; There has been treatment or conservative therapy.; PAIN IN NECK, SHOULDER AND BACK; MEDS	1
Disapproval	73221 MRI JOINT OF UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2014; There has been treatment or conservative therapy.; PAIN IN NECK, SHOULDER AND BACK; MEDS	1
Disapproval	73221 MRI JOINT OF UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	; This study is being ordered for trauma or injury.; 2007; There has been treatment or conservative therapy.; PAIN IN SHOULDER AND BACK; SHOULDER-PT AND MEDS BACK-MEDS, SURGERY AND PT	1
Disapproval	73700 CT LEG OR LOWER EXTREMITY	Radiology Services Denied Not Medically Necessary	Diagnostic Tests: ORDERING CT SCAN OF L-SPINE AND C-SPINE FOR CHRONIC PAIN AND R/O DISC RELATED PAIN. ALSO GETTING CT SCAN OF LEFT HIP.; This study is being ordered for a neurological disorder.; 09/13/2016; There has been treatment or conservative therapy.; Location of Pain: Neck pain & lower back pain, both in the center and on sides and chronic left hip pain s/p fractured and surgery; nsaid, pain medications and home exercise program	1

Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is not from a recent injury, old injury, chronic pain or a mass. ; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2013; There has been treatment or conservative therapy.; PAIN IN BACK AND KNEE; MEDS	1
Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2013; There has been treatment or conservative therapy.; PAIN IN KNEES; MEDICATION	2
Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
Disapproval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	Radiology Services Denied Not Medically Necessary	bilateral hip pain, pain has become progressive over the past 3-4 months.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 02/10/2010; There has been treatment or conservative therapy.; bilateral hip pain; inflammatory meds, pain meds, warm compress none; This study is being ordered for a neurological disorder.; 8/21/16; It is not known if there has been any treatment or conservative therapy.; dizziness, has had a stroke, left sided residual from stroke	2
Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST		none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; one; There has not been any treatment or conservative therapy.; abnormal ultrasound and TIA with SOB	1
Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST		Yes, this is a request for CT Angiography of the Neck.	2
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST		none; This study is being ordered for a neurological disorder.; 8/21/16; It is not known if there has been any treatment or conservative therapy.; dizziness, has had a stroke, left sided residual from stroke	1
Approval	71250 CT CHEST, THORAX		"The ordering physician is a surgeon, pulmonologist, or cardiologist.;" A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.	1
Approval	71250 CT CHEST, THORAX		"The ordering physician is a surgeon, pulmonologist, or cardiologist.;" A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.; Yes this is a request for a Diagnostic CT	1

Approval	71250 CT CHEST, THORAX	"The ordering physician IS an oncologist, surgeon, pulmonologist, cardiologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for a pre-operative evaluation.; Yes this is a request for a Diagnostic CT	2
Approval	71250 CT CHEST, THORAX	"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	2
Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for known tumor.	2
Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus. EXAM: CT ANGIOGRAM ABDOMEN PELVIS W WO CONTRAST  COMPARISON: None  FINDINGS: There is calcified and noncalcified plaque throughout the arterial system. The celiac, SMA, and single bilateral renal arteries are widely patent. There is mild ectasia of ; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 7/20/2015; There has not been any treatment or conservative therapy.; AAA	2
Approval	71250 CT CHEST, THORAX	The ordering physician a Surgeon, Pulmonologist, or Cardiologist.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	The request is for a chest, thoracic or sterno-clavicular joint CT.; "There is not a nodule,coin lesion or other lung mass.cxct"; This examination is not being ordered for persistent lung infiltrate or pneumonia.; This study is not being requested prior to surgery or as part of lung biopsy.; "There is suspicion of tumor, neoplasm, or metastatic disease.cxct"; Yes this is a request for a Diagnostic CT	2
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a Follow-up to a previous angiogram or MR angiogram.; There are new signs or symptoms indicative of a dissecting aortic aneurysm.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2/16/2015; There has not been any treatment or conservative therapy.; unruptured thoracic ascending aortic aneurysm sob	1

Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	6 month follow-up thoracic aortic surveillance. Last CTA   Impression: 1. Ascending thoracic aortic aneurysm, measuring 4.1 cm in diameter. It measures 2.4 cm at the origin of the brachiocephalic artery and 2.6 cm in the descending aorta. 2. Nodular; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; It is not known if this is a pre-operative evaluation, post operative evaluation or follow up to a previous angiogram or MR angiogram.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	aortic aneurysm; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	chest pain, shortness of breath; This study is being ordered for Vascular Disease.; July 2016; There has not been any treatment or conservative therapy.; Chest pain First seen by mdo in 11/2016; This study is being ordered for Vascular Disease.; Aortic valve replacement 12/1/2016; There has been treatment or conservative therapy.;	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Severe cp radiating to both arms and Lt left; some epigastric discomfort; Aortic valve replacement	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	follow up for endovascular repair. Thoracic aortic aneurysm. DOS 1/13/2016.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Has ascending aortic aneurysm; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a Follow-up to a previous angiogram or MR angiogram.; There are new signs or symptoms indicative of a dissecting aortic aneurysm.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Swelling and chest pain.; This study is being ordered for Vascular Disease.; 04/04/2016; There has been treatment or conservative therapy.; size of the aneurysm to be 4.4 cm. Echo in May showed the aortic valve to be tri leaflet with mild regurgitation.; mointoring of AAA size and diamaiter	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.	4
Approval	71555 MRA, MRI ANGIOGRAPHY CHEST[NOT MYOCARDIUM] WITH/WITHOUT CONTRAST	descending thoracic aortic anuerysm; This is a request for an MR Angiogram of the chest or thorax	1

Approval	72191 CT ANGIOGRAPHY PELVIS W/CONTRAST/NONCONTRAST	First seen by mdo in 11/2016; This study is being ordered for Vascular Disease.; Aortic valve replacement 12/1/2016; There has been treatment or conservative therapy.; Severe cp radiating to both arms and Lt left; some epigastric discomfort; Aortic valve replacement	1
Approval	73206 CT ANGIOGRAPHY UPPER EXTREMITY	Yes, this is a request for CT Angiography of the upper extremity.	1
Approval	74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2/16/2015; There has not been any treatment or conservative therapy.; unruptured thoracic ascending aortic aneurysm sob	1
Approval	74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCONTRAST	chest pain, shortness of breath; This study is being ordered for Vascular Disease.; July 2016; There has not been any treatment or conservative therapy.; Chest pain EXAM: CT ANGIOGRAM ABDOMEN PELVIS W WO CONTRAST  COMPARISON: None  FINDINGS: There is calcified and noncalcified plaque throughout the arterial system. The celiac, SMA, and single bilateral renal arteries are widely patent. There is mild ectasia of ; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 7/20/2015; There has not been any treatment or conservative therapy.; AAA	1
Approval	74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCONTRAST	Swelling and chest pain.; This study is being ordered for Vascular Disease.; 04/04/2016; There has been treatment or conservative therapy.; size of the aneurysm to be 4.4 cm. Echo in May showed the aortic valve to be tri leaflet with mild regurgitation.; mointoring of AAA size and diamaiter	1
Approval	74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCONTRAST	This is a request for CT Angiography of the Abdomen and Pelvis.	7
Approval	74175 CT ANGIOGRAPHY ABDOMEN	Yes, this is a request for CT Angiography of the abdomen.	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Right upper quadrant pain; Yes this is a request for a Diagnostic CT	1
Approval	74185 MRA, MRI ANGIOGRAPHY ABDOMEN WITH/WITHOUT CONTRAST	This is a request for a MR Angiogram of the abdomen.	1
Approval	75572 CT Heart	This is a request for a Heart CT.	1
Approval	75635 CTA AA&BI ILIOFEM LXTR RS&I C-/C+ POST-PXESSING	First seen by mdo in 11/2016; This study is being ordered for Vascular Disease.; Aortic valve replacement 12/1/2016; There has been treatment or conservative therapy.; Severe cp radiating to both arms and Lt left; some epigastric discomfort; Aortic valve replacement	1

Approval	75635 CTA AA&BI ILIOFEM LXTR RS&I C-/C+ POST-PXESSING	none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; one; There has not been any treatment or conservative therapy.; abnormal ultrasound and TIA with SOB	1
Approval	75635 CTA AA&BI ILIOFEM LXTR RS&I C-/C+ POST-PXESSING	Yes, this is a request for CT Angiography of the abdominal arteries.	4
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; one; There has not been any treatment or conservative therapy.; abnormal ultrasound and TIA with SOB	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pre Operative clearance; This study is being ordered as a pre-operative evaluation.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt had cp with shortness of breath relieved by nitro. pt had t wave inversions on todays ekg in clinic. strong family history, uncle died of MI, maternal& paternal grandfathers had MI's in the their 30s.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	SCHEDULED FOR A PORTACATH. NEED TO ENSURE NO HEART ISSUES PRIOR TO THIS.; This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY		This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of Pericardial Disease.; There has been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of a pericardial disease.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an evaluation of new or changing symptoms of valve disease.	1
Approval	G0297 Low dose CT scan (LDCT) for lung cancer screening		This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient quit smoking less than 15 years ago.	1
Disapproval	71250 CT CHEST, THORAX	Radiology Services Denied Not Medically Necessary	3 mo f/u for 11/2016 ct; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Disapproval	71250 CT CHEST, THORAX	Radiology Services Denied Not Medically Necessary	PT had a CT on 8/16 that showed nodule; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Disapproval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	Yearly follow-up; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a post-operative evaluation.; There is no physical evidence of re-bleed or re-stenosis.; There is no physical evidence of an infection or other complication.; Yes, this is a request for a Chest CT Angiography.	1
Disapproval	71550 MRI CHEST	Radiology Services Denied Not Medically Necessary	This study is being ordered for vascular disease.; "The ordering physician is a surgeon, pulmonologist, or cardiologist."; This is a request for a chest MRI.	1
Disapproval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	Radiology Services Denied Not Medically Necessary	This is a request for a Tumor Imaging PET Scan; It is unknown why the study is being ordered.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.	1

Disapproval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	Radiology Services Denied Not Medically Necessary	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.	1
Approval	70450 CT BRAIN, HEAD			1
Approval	70450 CT BRAIN, HEAD		; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; Metallic implants such as Pacemakers, ICD (cardioverter/defibrillator), vascular clips, prosthesis or joint replacement is the reason why an MRI is not being considered	1
Approval	70450 CT BRAIN, HEAD		headache frequently; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
Approval	70450 CT BRAIN, HEAD		Mr. Castro comes in today to establish care with us. He denies any previous cardiac evaluation. Significant family history for MI. He does have occasional numbness in his left arm and leg. He states it happens about once a week. No precipitating factors o; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; it is unknown why an MRI is not being considered	1
Approval	70450 CT BRAIN, HEAD		No angina...no syncope....lost vision yesterday...90 minutes, and recovered.....and last week had headache; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; Imaging is needed and availability of MRI would delay treatment is the reason an MRI is not being considered	1
Approval	70450 CT BRAIN, HEAD		Patient having equilibrium problems since stent. Feels like he is "leaning to one side". Wants to know if Dr. Ribeiro thinks there is anything wrong. Discussed with Dr. Ribeiro. CT Head without contrast; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; There is another reason why an MRI is not being considered; Patient having equilibrium problems since stent. Feels like he is "leaning to one side". Wants to know if Dr. Ribeiro thinks there is anything wrong. Discussed with Dr. Ribeiro. CT Head without contrast	1
Approval	70450 CT BRAIN, HEAD		Reason for Appointment  1. Hypertension    History of Present Illness  HPI:  Mr. Moore is a new patient here for evaluation of hypertension. He says when his BP is elevated, he gets blurred vision. He has also had left arm and facial numb; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
Approval	70450 CT BRAIN, HEAD		This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	2

Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
Approval	70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for Vascular Disease.; 2/2016; There has been treatment or conservative therapy.; mbr has carotid stenosis and dizziness; medications	1
Approval	70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCONTRAST	Yes, this is a request for CT Angiography of the brain.	1
Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1
Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for Vascular Disease.; 2/2016; There has been treatment or conservative therapy.; mbr has carotid stenosis and dizziness; medications	1
Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST	Yes, this is a request for CT Angiography of the Neck.	13
Approval	70544 Mr angiography head w/o dye	UNKNOWN; This study is being ordered for trauma or injury.; UNKNOWN; There has not been any treatment or conservative therapy.; CHEST PAIN, SHORTNESS OF BREATH, TINGLING	1
Approval	70547 Mr angiography neck w/o dye	UNKNOWN; This study is being ordered for trauma or injury.; UNKNOWN; There has not been any treatment or conservative therapy.; CHEST PAIN, SHORTNESS OF BREATH, TINGLING	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	MOUTH DROP AND TINGLING OF LEFT FACE SIDE.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, one sided arm or leg weakness, the inability to speak, or vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.	4
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST		1

Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.	2
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	UNKNOWN; This study is being ordered for trauma or injury.; UNKNOWN; There has not been any treatment or conservative therapy.;	1
Approval	71250 CT CHEST, THORAX	CHEST PAIN, SHORTNESS OF BREATH, TINGLING	3
Approval	71250 CT CHEST, THORAX	"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	"The ordering physician is a surgeon, pulmonologist, or cardiologist."; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.; Yes this is a request for a Diagnostic CT	3
Approval	71250 CT CHEST, THORAX	"The ordering physician IS an oncologist, surgeon, pulmonologist, cardiologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for a pre-operative evaluation.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus.	4
Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus.; Yes this is a request for a Diagnostic CT	5

Approval	71250 CT CHEST, THORAX	ANNUAL CHECK ON THORACIC AORTIC ANEURYSM; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT DATE: 1/27/2017  PATIENT: Killackey, Holly  MRN: 1041569 DATE OF BIRTH: 2/9/82   STUDY: CORONARY ARTERY CALCIUM SCORE  INDICATION: 34 yr old wom; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Found pulmonary nodule on CT scan 12/15/15.....Continuing to monitor.....; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Lung nodule seen on a CTA AFRO.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass. Ms. Carr is an established patient of mine s/p AVR repair in September and then reop in October. She was scheduled with her oncologist Dr. Raja for a follow-up and on assessment Dr. Raja noted some purulent drainage from sternal wound. She denies fever, ch; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	patient has complaints of DOE, CP and palpitations. She also complains of decreased exercise intolerance, and fatigue.; "Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	pt is being evaluated for a heart transplant; This study is being ordered for Vascular Disease.; 1/30/17; It is not known if there has been any treatment or conservative therapy.;	1

Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; calcified mediastinal lymph nodes and a calcified granuloma in the left lower lobe by CT in December; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient.";	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	"There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection.";	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; It is not known whether this study is requested to evaluate suspected pulmonary embolus.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1

Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	; This study is being ordered for Vascular Disease.; ; There has been treatment or conservative therapy.; Abnormal stress echo results.;	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	; This study is not requested to evaluate suspected pulmonary embolus.; It is not known if this study will be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1

Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	2
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known or Suspected Congenital Abnormality.; The abnormality is of a cardiac nature.; There is no known or suspected coarctation of the aorta.; There is no other type of arch anomaly.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; It is not known if this is a pre-operative evaluation, post operative evaluation or follow up to a previous angiogram or MR angiogram.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a Follow-up to a previous angiogram or MR angiogram.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; There are signs or symptoms indicative of a progressive vascular stenosis.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; It is not known whether this is an evaluation for thoracic outlet syndrome.; There are no signs or symptoms indicative of vascular insufficiency to the neck or arms.; There are no signs or symptoms indicative of Superior Vena Cava syndrome.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	1. Chest Pain  44 year old male here for a 2 mo return visit. He has history of hyperlipidemia, family history significant for premature coronary artery disease. CTA measured ascending aorta to 4.4cm. He is established with CV surgery, who follows his ; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1

Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	abdominal aneurysm; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Ascending aorta measuring 4.3cm by echocardiogram, hypertension; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography. Danny returns for f/u of CAD and thoracic aortic aneurysm. He denies angina or exertional limitations. Tolerating meds; Follow up of known thoracic aortic aneurysm.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	F/U for this 45-year-old gentleman. His cardiac catheterization revealed normal coronary arteries and renal arteriogram revealed normal renal arteries. His blood pressure precipitously came down with minoxidil. His girlfriend states that he became lethargic; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a pre-operative evaluation.; This surgery is scheduled/planned.; A catheter angiogram has been performed within the last month.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	HISTORY OF PRESENT ILLNESS; Cathy is followed for coarctation of the aorta previously surgically repaired. She is on the medications listed. She has occasional chest discomfort, often in her back. She feels a little short of breath on exertion. Overall; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a post-operative evaluation.; It is not known whether there is physical evidence of re-bleed or re-stenosis.; There is no physical evidence of an infection or other complication.; Yes, this is a request for a Chest CT Angiography.	1

Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	<p>n/a; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1. Atrial Fibrillation &#x0D; 2. BSC DC PPM &#x0D; 3. Chest Pain &#x0D; 4. Syncope &#x0D; &#x0D; Mr. Byrd is a 59 year old white male here today for 6 month return appointment. Patient has a history of sick sinus syndrome status post Boston Scientific dual chamber pacemaker i; There has been treatment or conservative therapy.; The patient is extremely symptomatic with his a-fib. He has had near syncopal spells. complaints of chest pain that he states is in the middle of his chest that feels like a burn and mild pressure and makes him feel like he is going to pass out that last; status post Boston Scientific dual chamber pacemaker implanted 3/30/15 by Dr. Nair with RV lead revision on 3/31/15. History of atrial fibrillation on Amiodarone and Eliquis. He has a very high CHA2DS2VASC score and is on anticoagulation for stroke preven</p> <p>None; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.</p>	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	<p>Patent stent and nonobstructive CAD on recent cath at the hospital for possible unstable angina. Echo showed dilated ascending aorta. He denies angina or exertional limitations. Occasional episodes of brief muscular pain. Imdur has helped with his chest p; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a post-operative evaluation.; It is not known whether there is physical evidence of re-bleed or re-stenosis.; There is no physical evidence of an infection or other complication.; Yes, this is a request for a Chest CT Angiography.</p> <p>Patient has history of paroxysmal atrial fibrillation which has recently become persistent. Her echocardiogram showed normal left ventricular systolic function, moderately dilated left atrium with left atrial diameter 4.7 cm. She failed 120 mg of sotalol ; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.</p> <p>Pre-EPS/Ablation; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.</p>	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	<p>Pre-EPS/Ablation; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.</p>	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	<p>Pre-EPS/Ablation; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.</p>	1

Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Pt here for followup of afib and bradycardia on sotalol and xarelto therapy. He denies any chest pain. He denies any syncope. He has been feeling well. He comes in today for further evaluation.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; This is not an evaluation for thoracic outlet syndrome.; There are no signs or symptoms indicative of vascular insufficiency to the neck or arms.; There are no signs or symptoms indicative of Superior Vena Cava syndrome.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Pt is here for follow up on paroxysmal to persistent atrial fibrillation with device check. In AF today. He was scheduled for PVI but cancelled. Breakthrough despite Tikosyn.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are new signs or symptoms indicative of a dissecting aortic aneurysm.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Pt with worsening exertional SOB and chest pain lower mid sternal area. Hx of CAD. Hx of Ascending aortic aneurysm last evaluated 4/25/16 showing aneurysm to be 4.1 cm. Due to progressing symptoms physician recommends CTA chest to assess.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a Follow-up to a previous angiogram or MR angiogram.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; There are signs or symptoms indicative of a progressive vascular stenosis.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Pulmonary Vein Ablation with A-FIB.; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Pulmonary Vein Ablation.; Pulmonary Vein Mapping; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1

Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Recent CP eval in the AHH ER with normal stress test and echo. CXR at BMC conway showed density in the thoracic aorta and CT recommended. Feeling well since discharge.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; It is not known if this is a pre-operative evaluation, post operative evaluation or follow up to a previous angiogram or MR angiogram.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; This is not an evaluation for thoracic outlet syndrome.; There are signs or symptoms indicative of vascular insufficiency to the neck or arms.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.	34
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Thoracic aortic aneurysm.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a pre-operative evaluation.; This surgery is not scheduled/ planned.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Thoracic aortic aneurysm; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a pre-operative evaluation.; This surgery is not scheduled/ planned.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	wuill FAX; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known or Suspected Congenital Abnormality.; The abnormality is of a cardiac nature.; There is no known or suspected coarctation of the aorta.; There is no other type of arch anomaly.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71555 MRA, MRI ANGIOGRAPHY CHEST[NOT MYOCARDIUM] WITH/WITHOUT CONTRAST	In August of 2014, patient had a 5.1cm Aortic Aneurysm.; This is a request for an MR Angiogram of the chest or thorax	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	The patient does not have any neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; There is a reason why the patient cannot have a Cervical Spine MRI.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST		1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	bulging disk and spine pain; This study is being ordered for trauma or injury.; 03/13/2017; There has not been any treatment or conservative therapy.; leg numbness, back pain, shooting pain,	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	bulging disk and spine pain; This study is being ordered for trauma or injury.; 03/13/2017; There has not been any treatment or conservative therapy.; leg numbness, back pain, shooting pain,	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	bulging disk and spine pain; This study is being ordered for trauma or injury.; 03/13/2017; There has not been any treatment or conservative therapy.; leg numbness, back pain, shooting pain,	1
Approval	73200 CT ARM OR UPPER		1
Approval	73206 CT ANGIOGRAPHY UPPER EXTREMITY	Yes, this is a request for CT Angiography of the upper extremity.	1
Approval	73706 CT ANGIOGRAPHY LOWER EXTREMITY	Yes, this is a request for CT Angiography of the lower extremity.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; There is a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	He presents today with complaints of chest pain on a daily basis that he reports varies between sharp and dull. It will radiate down his left arm and up his neck. He reports associated symptoms of dizziness and SOB and states he will take nitro at times w; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a vascular disease.; The requested studies are being ordered for known or suspected aneurysms and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	1

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are clinical findings or indications of Hematuria.; The hematuria is newly diagnosed.; Yes this is a request for a Diagnostic CT	1
Approval	74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCONTRAST	Ms Smith is a 53y/o WF with a long history of tobacco abuse and emphysema, hep C, RA, and hypothyroid here today as a referral from Dr Seeme for complaints of chest pain. She states last monday she presented to Morrilton ER with complaints of chest pressu; This study is being ordered for Vascular Disease.; unknown; It is not known if there has been any treatment or conservative therapy.; Chest pain left arm pain intermittent SSCP Intermittent claudication in her legs	1
Approval	74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCONTRAST	This is a request for CT Angiography of the Abdomen and Pelvis.	8
Approval	74175 CT ANGIOGRAPHY ABDOMEN W/CONTRAST/NONCONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2/1/2017; There has not been any treatment or conservative therapy.; Grade 3 Aortic Insufficiency 4.73 cm enlarged Aortic Root Enlarged Ascending Aorta and Aneurysms 5.2 cm Enlarged significantly over past 6 months	1
Approval	74175 CT ANGIOGRAPHY ABDOMEN	Yes, this is a request for CT Angiography of the abdomen.	14
Approval	74176 CT ABD & PELVIS W/O CONTRAST	pt is being evaluated for a heart transplant; This study is being ordered for Vascular Disease.; 1/30/17; It is not known if there has been any treatment or conservative therapy.;	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone; Yes this is a request for a Diagnostic CT	2
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; unknown	1

Approval	74185 MRA, MRI ANGIOGRAPHY ABDOMEN WITH/WITHOUT CONTRAST	This is a request for a MR Angiogram of the abdomen. ; This study is being ordered for Inflammatory/ Infectious Disease.; Unknown; There has been treatment or conservative therapy.; Pericarditis inflammation around the heart sac; medications	2
Approval	75557 Cardiac MRI Morph & structure w/o contrast		1
Approval	75557 Cardiac MRI Morph & structure w/o contrast	This is a request for a heart or cardiac MRI	17
Approval	75571 Coronary Artery Calcium Score, EBCT	hypertension; This is a request for a CT scan for evaluation of coronary calcification.	1
Approval	75572 CT Heart	n/a; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1. Atrial Fibrillation  2. BSC DC PPM  3. Chest Pain  4. Syncope   Mr. Byrd is a 59 year old white male here today for 6 month return appointment. Patient has a history of sick sinus syndrome status post Boston Scientific dual chamber pacemaker i; There has been treatment or conservative therapy.; The patient is extremely symptomatic with his a-fib. He has had near syncopal spells. complaints of chest pain that he states is in the middle of his chest that feels like a burn and mild pressure and makes him feel like he is going to pass out that last; status post Boston Scientific dual chamber pacemaker implanted 3/30/15 by Dr. Nair with RV lead revision on 3/31/15. History of atrial fibrillation on Amiodarone and Eliquis. He has a very high CHA2DS2VASC score and is on anticoagulation for stroke preven	1
Approval	75572 CT Heart	This is a request for a Heart CT.	17
Approval	75573 CT Heart Congenital Study	This is a request for Heart CT Congenital Studies.	1
Approval	75574 CT Angiography Heart coronary arteries, CCTA	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for CTA Coronary Arteries.; The patient had a recent stress echocardiogram to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	3
Approval	75574 CT Angiography Heart coronary arteries, CCTA	; This is a request for CTA Coronary Arteries.; A study not listed has be completed.; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
Approval	75574 CT Angiography Heart coronary arteries, CCTA		1

Approval	75574 CT Angiography Heart coronary arteries, CCTA	; This study is being ordered for Vascular Disease.; ; There has been treatment or conservative therapy.; Abnormal stress echo results.;	1
Approval	75574 CT Angiography Heart coronary arteries, CCTA	Chest Pain that last 10 hours.; This is a request for CTA Coronary Arteries.; The patient had a recent stress echocardiogram to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
Approval	75574 CT Angiography Heart coronary arteries, CCTA	Chest Pain, Dyspnea; This is a request for CTA Coronary Arteries.; The patient has had a stress echocardiogram; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
Approval	75574 CT Angiography Heart coronary arteries, CCTA	Patient has been to the emergency room multiple times for chest pain. Patient was referred to cardiology for stress echocardiogram testing. Test was negative but chest pain was provoked during treadmill portion of test. Patient has a history of hypertensi; This is a request for CTA Coronary Arteries.; The patient had a recent stress echocardiogram to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
Approval	75574 CT Angiography Heart coronary arteries, CCTA	The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Pt is here to establish care. Pt states she was recently in the hospital for Afib & they made this appointment for her. Pt states she sometimes feels like she can't take a deep breath & also complains of fatigue. Pt complains of palpitations and a "hard p; Yes, there is Chronic Chest Pain.	1

Approval	75574 CT Angiography Heart coronary arteries, CCTA	The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; pt with continued chest pain, hypertension, obesity, and shortness of breath; Yes, there is Chronic Chest Pain.	1
Approval	75574 CT Angiography Heart coronary arteries, CCTA	The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Reason for Appointment  1. Palpitations  2. Atrial Fibrillation    History of Present Illness  HPI:  Pt is here to establish care. Pt was in the hospital 2 weeks ago with Afib at APMC and had to be converted back to sinus rhythm. Pt state; Yes, there is Chronic Chest Pain.	1
Approval	75574 CT Angiography Heart coronary arteries, CCTA	The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; ; Yes, there is Chronic Chest Pain.	6
Approval	75574 CT Angiography Heart coronary arteries, CCTA	The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; 1. Abnormal MPI  Mr. Gray is a 64 yo male with no prior history of cad. History of IDDM recently started on insulin, hypertension, 2 ppd smoker and strong family history of cad with multiple family members undergoing CABG or stenting in their 50-60's.; Yes, there is Chronic Chest Pain.	1

Approval	75574 CT Angiography Heart coronary arteries, CCTA	<p>The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Mr. Jones is a new patient here for cardiac evaluation. He was hospitalized at Saline Memorial on January 4th for chest pain and released the next day. He says he was told he had high cholesterol and blood pressure and he says he wanted a second opinion. ; Yes, there is Chronic Chest Pain.</p>	1
Approval	75574 CT Angiography Heart coronary arteries, CCTA	<p>The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Patient referred to cardiology by the emergency room for chest pain/chest discomfort. Patient has had two previous negative stress test. Patient has good history of exercise tolerance but continues to have chest pain despite negative stress testing with n; Yes, there is Chronic Chest Pain.</p>	1
Approval	75574 CT Angiography Heart coronary arteries, CCTA	<p>The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Patient with chest pain/pressure and shortness of breath. RSE performed. Exercise stress test negative for ischemia based on ECG criteria. Chest pain was provoked during stress test. Serial ECG's done during stress & during recovery showed no significant ; Yes, there is Chronic Chest Pain.</p>	1

Approval	75574 CT Angiography Heart coronary arteries, CCTA	The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; PLAN 1. Mr. Mabray has some symptoms that are, in many respects, very worrisome for angina. However, they seem to have improved as well. 2. We will perform an ischemic evaluation at this time with a coronary CT angiogram. This will allow us to hopef; Yes, there is Chronic Chest Pain.	1
Approval	75574 CT Angiography Heart coronary arteries, CCTA	The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Pt complains of cp and tightness with being easily fatigues and also has palpitations On Rest Stress Echo she complained of pressure like cp. No significant ST changes on ecg during stress or recovery. Exercise stress Echo is ambiguous for ischemia due; Yes, there is Chronic Chest Pain.	1
Approval	75574 CT Angiography Heart coronary arteries, CCTA	The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; pt having severe chest pain with no known CAD.; Yes, there is Chronic Chest Pain.	1
Approval	75574 CT Angiography Heart coronary arteries, CCTA	The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Unknown.; Yes, there is Chronic Chest Pain.	2
Approval	75574 CT Angiography Heart coronary arteries, CCTA	This is a request for CTA Coronary Arteries.; The study is requested for known or suspected valve disorders.	1

Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; It is not known if patient did not have a Nuclear Cardiology study within the past six months.; ABN. Stress TEst	1
Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; It is not known if patient did not have a Nuclear Cardiology study within the past six months.; Shortness of Breath with chest pain.	1
Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; None of the above.; Patient denies palpitations, dizziness, syncope, near syncope, chest pain, orthopnea, leg pain, edema.  Mrs Malchaski is a 30 yo wmn wth congenital aortic stenosis. The last time she was seen by a cardiologist was three years ago She stays	1
Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for being evaluated prior to a noncardiac surgical procedure.; none	1
Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for prior equivocal or uninterpretable cardiac imaging .; ; Yes, this patient has an equivocal or uninterpretable stress test (exercise, perfusion, or stress echo).	4
Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for prior equivocal or uninterpretable cardiac imaging .; Has hypertension and hyperlipidemia. Complains of intermittent chest pain with and without exertion. Underwent stress echo which did not show any acute EKG changes, but her LV function did not recover appropriately. Need to evaluate further for any si; Yes, this patient has an equivocal or uninterpretable stress test (exercise, perfusion, or stress echo).	1
Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for prior equivocal or uninterpretable cardiac imaging .; On outpatient echo stress test patient was positive for ischemia involving left anterior descending; Yes, this patient has an equivocal or uninterpretable stress test (exercise, perfusion, or stress echo).	1
Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; Yes, patient has new onset congestive heart failure.; <Additional Clinical Information>	1
Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.;	2

Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; None	1
Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; Patient experienced chest pain while performing the stress test.	1
Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; pt has DM, high risk of CAD, silent ischemia. Order CTA Coronaries for chest pain and h/o borderline MPI. 1. sob 	1
Approval	75574 CT Angiography Heart coronary arteries, CCTA	This is a 58-year-old male here for 15 mo return visit, previously seen by dr Martinez. PMH of tobacco abuse, COPD, and type 2 diabetes. Ec	1
Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; unknown	2
Approval	75574 CT Angiography Heart coronary arteries, CCTA	worsening shortness of breath and chest pain, abnormal stress echo, arteriosclerosis of extremity with rest pain, hypertension, congestive heart failure, lower extremity edema, hypercholesterolemia, abdominal/carotid bruit.; This is a request for CTA Coronary Arteries.; The patient had a recent stress echocardiogram to evaluate new or changing symptoms.; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.	1
Approval	75635 CTA AA&BI ILIOFEM LXTR RS&I C-/C+ POST-PXESSING		1
Approval	75635 CTA AA&BI ILIOFEM LXTR RS&I C-/C+ POST-PXESSING	Ms Smith is a 53y/o WF with a long history of tobacco abuse and emphysema, hep C, RA, and hypothyroid here today as a referral from Dr Seeme for complaints of chest pain. She states last monday she presented to Morrilton ER with complaints of chest pressu; This study is being ordered for Vascular Disease.; unknown; It is not known if there has been any treatment or conservative therapy.; Chest pain left arm pain intermittent SSCP Intermittent claudication in her legs	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Yes, this is a request for CT Angiography of the abdominal arteries.	72
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study		26

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; It is not known if the patient is diabetic.; The patient is less than 45 years old.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	5
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The patient is not diabetic.; The patient is less than 45 years old.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	14
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	8
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	2
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; It is not known if the patient is diabetic.; It is not known if the patient has had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	3

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	19
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	2
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is less than 20	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11-2016; There has not been any treatment or conservative therapy.; palpitations, dizziness, chest pain, SOB, abnormal ekg	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2/1/2017; There has not been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 7-8-2016; There has been treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >; MEDICATION	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Jan 18, 2017; There has not been any treatment or conservative therapy.; Chest pain, shortness of breath, diaphoresis . Morbidly obese. Had abnormal EKG, family history of CAD.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for Vascular Disease.; ; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; It is not known if the patient is diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.; The patient has had a cardiology study in the past 3 years.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	4
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The patient is not diabetic.; The patient is less than 45 years old.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	2

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	20
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.; The patient has not had a cardiology study in the past 3 years.; No other testing was completed more than 3 years ago.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	6
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	5
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	8
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient's diagnosis was established by a previous stress echocardiogram, nuclear cardiology study, or stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	2
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	2
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	46

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is not know	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; It is not known if the patient had a stress echocardiogram since surgery.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; It is not known if there has been any treatment or conservative therapy.;	3
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has not been any treatment or conservative therapy.;	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	01. Angina, class III (I20.9): Recurrent. Assoc with doe. Lexiscan MPI to be done first available. Pt unable to walk on treadmill due to leg, knee & back pain. ADD ASA 81mg q day. Reluctant to add BB at this time due to h/o low HR. 02. DOE (dyspnea o; This study is being ordered for Vascular Disease.; 08/04/2016; There has been treatment or conservative therapy.; CHIEF COMPLAINT: Chest Pain , Dyspnea , dizziness; 1. Chest Pain  The patient complains of chest discomfort. The discomfort is located in the substernal area. The patient describes the pain as dull and aching. Patient was scheduled for an echo and NSC last September, but she cancelled the appointments a	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	1. chest pain  2. palpitations  3. hyperetnsion  Mrs Hall is a 39 year old white female here for New patient evaluation with no known hx of CAD. She has a hx of Glaucoma and hypertension. She was seen with PCP for palptiations that occur at rest and; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	1. Chest Pain  61 yo male here for new pt visit. PMH of syncope back in 2011. Has c/o left sided chest pain in recent past. Pt presents today with c/o occasional leftsided sharp pains and tightness in chest that lasts about 10 min and ongoing for 6 mo. ; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	1. hypertension  2. cad  Mr. Kain is a 61 year old white male here for a return appointment. He has history of SSS status post Boston Single Chamber Pacemaker that was implanted on April 6 2016 for av synchrony by Dr. Nair. Device is followed by Lati; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	12/22/2015; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	34-year-old white female who over the last 3-4 months has been experiencing episodes of pressure-like, tightness type of chest discomfort located to mid precordium, nonradiating, associated with dyspnea, happening in a random fashion, no identifiable prec; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	41-year-old gentleman with:  Chronic systolic congestive heart failure, ejection fraction normalized from 25% to 55%, NYHA class II symptoms He has a history of coronary artery disease status post myocardial infarction and percutaneous coronary interve; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	44 yr old with chest pain on exertion and heavy smoker.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	50 y.o. male with h/o HLD and HTN here for  For the past several months he c/o SOB. moderate to severe. Worse with exertion (NYHA III). Sometimes associated with chest pain. Fluctuates but overall getting worse. Treated for PNA multiple times sin; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	58 y.o. male with HTN, HLD and CAD (RCA STEMI 6/2016; mLAD and OM2 Promus 9/2016) and AFib in the setting MI here for chest pain triggered by cold. For the past one week he c/o substernal burning pain with exposure to cold weather. Also worse with; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	58 year old patient presented to ER in December with left sided chest pain, states it lasted for about 2 hours, also has complaints of shortness of breath.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	63 yo male with HTN and DEM Type II, (RX Januvka and Meformin) complaining of chest pain. EKG shows anterioseptal infarction.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	A 46-year-old lady with a history of hypertension, hyperlipidemia, strong family history of coronary artery disease, multiple family members had very premature coronary artery disease presented to the Cardiology Clinic with complaint of dyspnea on exertio; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	A 54-year-old lady with a history of hypertension, untreated hyperlipidemia, family history of coronary artery disease, and history of smoking presented with typical angina like symptoms. Patient is unable to exercise because of lung disease and back inju; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	A 57-year-old lady with a known history of coronary artery disease and previous percutaneous transluminal coronary angioplasty stent unable to exercise because of the leg injury presented with typical angina like symptoms. At this time myocardial perfusio; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	A 63-year-old gentleman with a history of diabetes and hypertension presented with palpitations and chest discomfort which is poorly defined. Patient does not have a previous cardiac history. Symptoms seem to come and go.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	A 64-year-old gentleman with known history of coronary artery disease, previous percutaneous transluminal coronary angioplasty stent 11 years ago presented with recurrent index symptom. Also patient has a murmur; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Abnormal cardiac CT, Palpitations, sleep apnea, obesity;; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Abnormal EKG; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; x 2 weeks; It is not known if there has been any treatment or conservative therapy.; Chest Pain, shortness of Breadth.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Abnormal electrocardiogram stress test suggestive of myocardial ischemia .Hypertensive response to exercise.  Diabetes mellitus Palpitations Shortness of breath Hypertension Chest Pain; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Abnormal electrocardiogram with a borderline prolonged QT interval at 476 ms.   The patient is unable to exercise due to the shortness of breath. Would recommend avoiding any QT prolonging medication, and we will monitor his QT interval.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Abnormal Heart CT saver. HTN, Hyperlipidemia, Strong Family History CAD.; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>ADMITTING DIAGNOSES: 1. Near syncope; 2. Hypertension; 3. Bradycardia; HISTORY OF PRESENT ILLNESS: Mr. Otwell has had no chest pain, no chest discomfort. He had an episode of near syncope on Thursday. His blood pressure has been running in t; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Angina and Palpitation; It is not known if the patient is diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>angina pectoris, arteriosclerosis of extremity with rest pain, lower extremity edema, hypertension, shortness of breath, chest pain, left arm pain, current tobacco user, family history of coronary artery disease, abnormal ecgs, tachycardia; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>angina pectoris, palpitations, essential hypertension, shortness of breath, diaphoresis. Pt here today for follow up. She has a known history of htn and lvh. Pt stated that she has been having episodes of chest tightness/heaviness with exertion. Asso; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	angina pectoris, unspecified, chronic obstructive pulmonary disease, unspecified, family history of ischemic heart disease and other diseases of the circulatory system; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Angina, Hyperlipdemia, HTN; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study). angina, shortness of breath, dizziness, edema, hypertension, leg pain; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Anterior chest wall discomfort.; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Anxiety GERD w/o esophagitis Fatigue Palpitations Shortness of breath: SOB/DOE Varicose veins of leg w/ pain Varicose veins of leg w/ edema Arteriosclerosis of native coronary artery w/ other form of angina pectoris Pain in right knee Insomnia ; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Atypical Chest Pain and SOB; This study is being ordered for Congenital Anomaly.; Unkownn; It is not known if there has been any treatment or conservative therapy.; Chest pain, SOB	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Atypical chest pain with dyspnea on exertion, has history of CAD; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has had Myocardial Perfusion Imaging including SPECT (single photon Emission Computerized Tomography) or Thallium Scan.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease. CAD, HTN, Fatigue; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CAD, Hyperlipdemia, SOB; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CAD,HTN; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CAD/Angina, HTN, Fatigue, Hyperlipidemia; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Came in today due to weakness/ numbness in both arms that is intermittent, last about 3 minutes. Numbness is equal in both arms. She doesn't "wnat to even try to grasp anything. Its like her shoulder just droop and she looses all muscle strength. No CP. N; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	cardiac murmur, cp, hypertension, smoker, dyspnea; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Cardio gram is abnormal; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest pain and pressure, HTN, shortness of breath; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest pain and shortness of breath in this 45-year-old gentleman unable to complete the stress test which was suboptimal with adequate chronotropic response to exercise, heart rate went to 125. At this time we are going to request Cardiolute for further e; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CHEST PAIN AND SOB WITH NO PREVIOUS HX OF CAD, PT IS DIABETIC,SMOKER, HTN, HYPERTHYROID, HYPERLIPIDEMIA; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain down left arm at times shortness with breath with at rest and with exercise edema; The patient is not diabetic.; The patient is less than 45 years old.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest pain in adult (R07.9): Recurrent. Had recent normal GI work up. States cp is located in epigastric area mostly and radiates upward to substernal area. Described as sharp and worsening with walking, activity or movement. Assoc with lightheadedness; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest pain once a week.; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest pain with typical and atypical features  DOE Hx of CHF Preop clearance for ovarian surgery; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CHEST PAIN, ABNORMAL EKG, HISTORY OF CHF; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain, abnormal ekg; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain, exertion, shortness of breath, strong family history of CAD, patient is a smoker.; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain, htn, obesity; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CHEST PAIN, PERICARDITIS, LUPUS, FAMILY HX OF CAD; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain, pressure, SOB, hypertension; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain, unspecified type, patient in emergency room. 52-year-old female presents for evaluation of 2 months of intermittent chest pain. The patient's chest pains become more frequent and longer lasting during the last week. She notes her last episode; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CHEST PAIN; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	2

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pains, hx of stroke; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest tightness and pain uncontrolled hypertension family hx CAD dyspnea abnormal ekg; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest tightness, other chest pain, essential hypertension, heart palpitations Patient with history of hypertension, family history of early onset CAD, here for evaluation of chest discomfort. She was recently seen in emergency room about 3 weeks ago fol; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chronic combined systolic (congestive) and diastolic (congestive) heart failure Other cardiomyopathies Essential (primary) hypertension Other specified diabetes mellitus without complications Nonrheumatic mitral regurgitation: Valvular heart disease; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chronic cp; severe mitral stenosis; chest pressure; dyspnea; muscle cramps; edema; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Connie R Hill 57 y.o. female presents for follow up: Mrs. Hill is a pleasant 57-year-old woman with known coronary artery disease. She's had chest pain for at least a couple of years. Is been atypical and tends to occur at random although is a substernal; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	copd, hyperlipidemia, hypertension, cad, a fib, cp, smoker; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Coronary artery disease with recurrent chest pain. Patient also needs surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	coronary artery disease with significant co-morbidities to include hypertension, hyperlipidemia and diabetes mellitus. Of which he may not have typical ischemic pain; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	coronary atherosclerosis due to calcified coronary lesion, mixed hyperlipidemia, essential hypertension, encounter for Department of Transportation (DOT) examination for driving license renewal; Pt here today for follow up. She has a known history of ht; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Cp related to the Left Arm. Patient was seen in the ER and was given nitro to relieved the cp.; It is not known if the patient is diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Cp, DM2, smoker, Dizziness, HTN; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CP, HTN, went to ER with SOB and Cp; It is not known if the patient is diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	cp, hypertension, smoker, obesity; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	cp, hypertension, smoker,; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	cp, past smoker; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	cp, smoker, obesity, abn ekg; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	cp,dyspnea, abn ekg; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	cp,sob,hty,syncope,dyslipidemia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CP; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	diabetic, cp, hyperlipidemia, hypertension; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	diabetic, hypertension, cp; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	dyspnea on exertion and cp; smoker; multiple CAD factors; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Dyspnea on exertion, edema of lower extremities, preoperative cardiac clearancePreoperative cardiac clearanceDyspnea on exertionLymphangitic edema of both anklesAbnormal EKGEssential hypertensionObesity white female who is physically rather limited in ter; This study is being ordered as a pre-operative evaluation.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	dyspnea on exertion, type 2 diabetes; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	dyspnea; This study is being ordered for Vascular Disease.; 1/17/; There has been treatment or conservative therapy.; chest pain; three vessel bypass	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Early  repolarPrecordial chest pain, dyspnea, risk factors for coronary ar32-year-old white male who over the last 6-8 weeks has been experiencing episodes of heaviness/tightness in mid precordium, radiating into his back, moderate to severe in intensity; It is not known if the patient is diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	ECG showed very poor R wave progression which is worrisome. He also has an inferior Q wave of unknown significance.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	EKG changed noted, indicated ischemia. Pt followed for a-fib, hypertension, and palpitations.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Encounter for preprocedural cardiovascular exam: CV risk assessment - THA; Arteriosclerosis of native coronary artery w/o angina pectoris; Mixed hyperlipidemia; Essential (primary) hypertension; Other specified diabetes mellitus without complications; Sh; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Encounter for preprocedural cardiovascular exam: CV risk assessment; GERD w/o esophagitis; Other chest pain; Male ED; Anxiety; Muscle spasm of back; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Enter answer here - Unknown; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	5

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Enter answer here - Unknown; The patient is not diabetic.; The patient is less than 45 years old.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Enter answer here - Unknown; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Enter answer here - Unknown; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	2
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Enter answer here - or Type In Mr. Douglas is here today for follow up care. He has a past medical history of chronic hypertension, chronic hyperlipidemia and chronic obesity. He reports a 1 month history of substernal chest pain described as tightness ; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Enter answer here - or Type In Unknown.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Enter answer here - Unknown.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Enter answer here - Unknown; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Enter answer here - Unknown; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Episodes angina, precordial area, associated dyspnea, left sided numbness, relieved NTG....; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Essential (primary) hypertension; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	ETT incomplete, evaluate for CAD; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Family hx of heart disease smoker; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	First new patient clinic visit for Ms. Eskridge, referred for syncope. She came for a visit last week but had an episode of syncope with post-syncope confusion concerning for post-ictal activity and was sent to the ER for emergent evaluation. CT head has ; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	has chest pain, SOB and Hypertension.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	has hyperlipidemia, hypertension, diabetic; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	has hypertension, hyperlipidemia, Obese; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	has SVT, hyperlipidemia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29 He has a carotid bruit; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 weeks ago; There has not been any treatment or conservative therapy.; Shortness of breath, fatigue, chest pain	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	heart murmur;; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	High blood pressure Diabetic High Cholesterol; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	hospital admission on 12/28/2016. He was admitted with a diagnosis of unstable angina. He ended up with two stents being placed. He was back at the er and had another heart cath; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	hyperlipidemia and hypertension; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Hyperlipidemia, diabetes, essential hypertension; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	hyperlipidemia, hypertension, cad w bp, ventricular premature depolarization,abn ekg; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous myocardial infarction.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study). Hyperlipidemia, unspecified; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is less than 20	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Hyperlipidemia; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Hypertensive heart disease is present HypercholesterolemiaHypertriglyceridemia.Normal left ventricular systolic function; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Impression: 1. Chest pain R07.9 Plan : Atypical, plan ST  2. Edema R60.9 Plan : None on exam. Check labs, echo, needs weight loss   3. Hypercholesteremia E78.00 Plan : Check lipids  Planned Diagnostic Testing: Planned Diagnostic Tes; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Impression: 1. Shortness of breath R06.02 Plan : Nuclear stress test to evaluate for ischemia. Continue daily aspirin. add Spironolactone 25 mg/d  2. Cardiomyopathy I42.9 Plan : LVEF of 20-25%. Continue Lasix add Spironolactone 25mg once dail; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	in 2016 patient attempted tmst but could not reach 85% target; hx of chest discomfort; dyspnea on exertion; abnormal ekg; hypertension; morbid obesity with BMI of 66.08; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	In ULV Function: Ejection Fraction 60 % -.  Interpretation:  1. Technically poor 2-D, M-mode, color Doppler, and tissue Doppler echo were performed.   2. The aortic root is normal .   3. The left atrium is normal: Right atrium normal .   4. Le; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	increasing dyspnea on exertion; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	known CAD patient with new complaints of chest pressure and increasing shortness of breath. has history of STEMI in 2015 with stent placement in March and another in April of that year. He is a new patient to our clinic; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Known CAD, 10 years since last Angiogram, HTN; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	known CAD, new onset chest pain with radiculopathy. shortness of breath. worse with exertion, relieved with rest. previous MI, has Rx for nitro.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Known CHS, has pace maker; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	known heart failure with known CAD and shortness of breathe; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Mild bradycardia, no symptoms.  May-Thurner syndrome status post stent to the left iliac vein.; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	mitral valve disorder, htn, angina, hyperlipidemia; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>moderate pulmonary hypertension; dilated left pulmonary artery; holter that demonstrated just over 1000 PVC's; chest pain at rest and with activity; Nondiagnostic stress EKG; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.</p> <p>Mr Self is a 40 year old male referred for chest pain. He is in remission from methamphetamine use. He has not used it in 2 weeks. He also smokes. He was discharged today from HRMC where he presented with chest pain and markedly elevated BP. He had not us; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Mr. Chehroudi is an established patient here for a follow up appointment to review test results. His TMST in December 2016 showed equivocal findings with recommendations for MPI and to continue current medications. His echocardiogram showed EF 55 to 60% ; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.</p>	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Mr. Dokes is referred by Dr. McDonald for evaluation of chest pain. He was having chest discomfort a couple weeks ago. He was taking lisinopril/losartan together incorrectly and was coughing significantly with chest pain, left-sided, primarily with coughi; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Mr. Hales is 60 years old with history of CAD, HTN and HLP. He comes in today for surgical clearance for a lumbar decompression to L2-L3. This surgery is scheduled for 4/6/17. He had SCA on 12/21/17 that revealed 50% stenosis proximal to patent RCA stent.; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Mr. Lott is a new patient here to establish cardiac care. He has a history of coronary artery disease and is status post PCI in October 2016 at UAMS. He is easily fatigued but he tries to stay active. He says he is limited by knee pain. He denies any ches; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Mr. McIntyre is referred for cardiac evaluation of chest pain. He has a chronic past medical history of tobacco use, obesity, and OSA with CPAP. He reports non-radiating right-sided chest pain that first started approximately 2 years ago. He describes ; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Mr. Tumbleson has CAD. Heart cath in September 2016. Now has new onset chest pain and shortness of breath. need to evaluate for worsening disease process.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Mr. Vick is here with complaints of dizziness, edema and dyspnea. He has known ASD s/p closure, syncope, CKD, and HTN. His PCP started him on a diuretic that doesn't seem to be helping. He doesn't know what diuretic it is. His medication list indicates th; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Mr. Whitted is a 38 year old male here today for return appointment. No known history of CAD. He has a history of hypertension and hyperlipidemia. Patient presents today with complaints of dull and achy left-sided chest pain that is better with rest, dysp; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Mrs Dickerson is a 33 y/o female patient with no previous cardiac history who had ECHO with preserved EF with diastolic dysfunction. She has had multiple admits to the ER with chest pain and dizziness over the year. She presented to ER last night from She; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Ms Trice is here as a new patient after being referred by Dr William Riley. She is referred with complaints of dyspnea, diaphoresis, palpitations and fatigue. She has a chronic past medical history of PE with history of IVC filter placement and removal;; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Ms. Flick is referred by Dr. Joel Cobb for evaluation of chest pain. She presents with left-sided chest discomfort, moderate severity at times but worsening to very severe. She notes these episodes generally at rest and it resolved spontaneously. ; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Ms. Morris is a 46 y/o AAW with a h/o PAF, HTN, here today for a follow up. She says that her palpitations have been less since she started taking the propafenone. She says that she was having episodes of this 4-5 times daily and now these are down to 1; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39 n/a; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	N/A; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	New patient referred Dr Campbell, dyspnea with moderate exertion, no associated chest pain, not at rest, since AMI one year ago and had CABG times 3 and grafts closed, and had coronary stent in march 2016 and last stent in April 2016, and has ankle dema ; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	New patient referred Dr newbun cardiac clearance..No angina , no dyspnea, knee limits activity...non smoker.; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient had a recent non-nuclear stress test.; The results of the previous nuclear cardiology study were normal.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	New patient referred Dr Tarpley 2 years, got worse 2 weeks ago, precordial area, lasting 5 minutes, and no radiation, associated dyspnea, at rest, and 3 episodes in tandem, since the time daily episodes angina,,soker til 2016 1/2 a pack....non diabetic.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	none given; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	none; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	none; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	3
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	none; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient had a recent stress echocardiogram to evaluate new or changing symptoms.; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	None; This study is being ordered for Vascular Disease.; 2001; There has been treatment or conservative therapy.; SOB & Chest Pain; PCI 2001 & 2005	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Obesity, Syncope; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	other chest pain, essential hypertension; Chest Pain (Angina) ; This is a new problem. The current episode started more than 1 week ago. The problem occurs rarely. The problem has not changed since onset. Associated symptoms include chest pain. Pertinent ; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	other chest pain, mixed hyperlipidemia, essential hypertension, morbid obesity with BMI of 40.0-44.9, adult.; Wayne Epperly is a 36 y.o. male who presents as new. Pertinent history includes: Hypertension, hyperlipidemia. Other past medical history is n; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	other chest pain, shortness of breath on exertion, palpitations. Sherie L Grant is a 53 y.o. female who presents as re-establish. Pertinent history includes: None. Other past medical history is noted below. Patient complains of chest pain described feels; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	other chest pain, shortness of breath; Robin M Smoke is a 43 y.o. female who presents as new patient. Pertinent history includes: None. Other past medical history is noted below. ; Patient complains of right sided chest pain at rest radiating to the back; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Palpitation, DM II, HTN, Hyperlipidemia, Dyspnea on exertion.; It is not known if the patient is diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Palpitation, HTN, Ventricular Premature Complex, Atrial Premature Depolarization; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	palpitations, dizziness, shortness of breath, and chest pain; I have had a left arm that feels uncomfortable at the same times when my chest feelings strange; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	palpitations, dyspnea, family history, obesity; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	PATIENT HAD COMPLAINTS OF CHEST PAIN ON LEFT SIDE OF CHEST UNDER LEFT ARM. PT DOES HAVE SHORTNESS OF BREATH WITH EXERTION AS WELL AS A STRONG FAMILY HISTORY OF CARDIAC DISEASE; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient had surgery; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	PATIENT HAS A PACE MAKER, EXERCISE STRESS TEST PERFORMED 12/12/2014, CHEST PAIN RADIATING DOWN LEFT ARM AND UP TO THE NECK, SWEATING, SHORTNESS OF BREATH, DIZZINESS AND SYNCOPE; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study). Patient has Abn-EKG, PVC's and Bigeminy; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has diabetes.; The patient has not had a cardiology study in the past 3 years.; No other testing was completed more than 3 years ago.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient has asthma on inhalors cannot walk good on treadmill, chest pain, shortness of breath.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient has been having these recurrent typical chest pain episodes, unable to exercise due to her lightheadedness and dizziness and back problem, requesting pharmacological stress test. Abnormal tilt table test secondary to POTS syndrome.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are not new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Patient has CAD; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p> <p>patient has complaints of chest pain and attempted to complete a RSE but due to back pain could not reach target heart rate and so the test was non diagnostic. She also has had a syncopal episode and has 1st degree familial CAD; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Patient has CP, some radiating to the back and some radiating down his arm. He has a very strong FM HX of CAD with both brothers having heart attacks at his age. CP is relatively new onset over the past month or two. He as well is associated with SOB; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29</p>	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Patient has diabetes, hypertension and known CAD; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p> <p>patient has hyperlipidemia and chest pain; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Patient has diabetes, hypertension and known CAD; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient has hypertension; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient has shortness breath and chest pain. The patient has not had a stress echo. Patient has Hypertension, dizziness and giddiness.; It is not known if the patient is diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient have diabetes, hypertension; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient having Chest Pain, SOB, Fatigue; It is not known if the patient is diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient is a 55 year old male who presents today to establish care. PMH includes HTN, DM with neuropathy. He is a 1 PPD smoker x 35 years. Family history includes father with MI in his 40's, maternal uncle with MI in his 50's and mother with history of af; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient is a current smoker; patient cannot walk on treadmill due to back and knee pain. He complains of chest pain that radiates across his chest and history of tachycardia and SOB; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient is a smoker; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3/17/2017; There has been treatment or conservative therapy.; chest pain radiating to right arm; medication	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient is blind and can not walk on a treadmill. Patient has also had a stroke, a c-spine fracture, and a pelvic fracture. Patient is short of breath on exertion. Patient has a family history of diabetes and CAD. Patient has a long history of tobacco use; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient is diabetic, hyperlipidemia, and CAD by CT scan; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient is needing to have a cardiac clearance. Patient is scheduled to have a tumor removed from his neck. Patient has a history of CAD.; This study is being ordered as a pre-operative evaluation.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The patient has known CAD.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient is unable to walk on a treadmill due to back problems.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 02/09/17; There has been treatment or conservative therapy.; Patient presented to ER with stabbing chest pain; patient was given narcotic pain pills without relief of chest pain	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient presented today with chest pain, shortness of breath and palpitations that are worse with rest.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient presented with c/o chest pain--atypical in description. no hx CAD. ekg showed nsr with no ischemic change. cardiac enzymes negative x3. ct chest to r/o pe ordered but patient unable to fit in machine. suggested transferring to sbmc for test to be ; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient unable to complete bike stress echo; could only reach 64% max heart rate before needing to stop due to fatigue; recent episode of syncope and dizziness; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient had a recent stress echocardiogram to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient with a complaint of Chest Pain. Stress test was attempted. Patient had to stop before heart rate achieved due to back and knee pain.; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient with a-fib/flutter; cardiomyopathy w EF 25-30%; SOB on moderate exertion; recent hospital stay because of near cardiogenic shock; new onset a-fib; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient with hx of CAD and 2 coronary stents having chest pain and SOB; relieved by nitro; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient with recent stents Nov 2016; now with SOB on exertion; abnormal EKG; EF still in 20s; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient with the complaint of chest pain, palpitations, tachycardia. Stress Test was attempted and patient was not able to complete study due to morbid obesity (BMI 51.1) and sedentary lifestyle (truck driver). Patient is a former smoker.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pervious heart cath; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	PMH includes HTN. He underwent left heart cath with LV angio, aortic root angio and coronary angios done vial RFA without apparent complication on 2/2016. LVEF= approx 40%. Resolute stents in RPLB and in distal segment of RPDA and also placed a Resolute ; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pre op bi-lat knee and rt shoulder, diabetic, smoker, copd, cannot ambulate on tm;; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous myocardial infarction.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Precordial burning like chest pain/Abnormal EKG.Dyspnea on exertionLeft atrial dilatationEssential hypertensionHypertensive heart diseaseLeft ventricular diastolic dysfunctionPulmonary hypertensionType II diabetes mellitus HypercholesterolemiaCerebrovascu; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Precordial chest pain Dyspnea  Dyspena on exertion  Abnormal EKG Family history of coronary artery disease; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>precordial chest pain.&#x0D; Matthew Armstrong is a 44 y.o. Caucasian male who presents for evaluation of chest pain Onset was 10 years ago, with waxing and waning course since that time. The patient admits to chest discomfort that is intermittent, with radi; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Precordial chest pressure dyspne nausea dyspnea on exertion&#x0D; female who over the last month has been experiencing recurrent episodes of pressure in mid precordium radiating into his jaw and into her neck occasionally associated with dyspnea and shortness Pa; It is not known if the patient is diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>precordial pain, dyspna on exertion&#x0D; Robert Varnedore is a 51 y.o. male who presents for post hospital discharge follow up. PMH includes psychosis and multiple illicit drug use. Was in hospital 1/2/17 to 1/10/2017 with encephalopathy and coffee ground em; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.</p>	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Precordial Pain, Palpitations, SVT and PAT; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.</p>	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Precordial Pain, SOB, HTN, Dyslipidemia, Tabacco use, anxiety; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pressure like chest pain and dyspnea for 2-3 weeks; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Pressure like chest pain and dyspnea for 2-3 weeks; There has not been any treatment or conservative therapy.; chest pain abn ekg htn	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pressure like chest pain and dyspnea for 6-8 weeks Angina  Hypertension  Hypothyroidism Hyperlipidemia  Morbid obesity; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pressure, dyspnea on exertion, and fatigue but reports no lightheadedness, no chest pain, no leg edema, no syncope, no orthopnea, no palpitations, no PND, and no claudication. He reports exercise intolerance but reports no fever, no night sweats, no signi; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	previous stroke, and patient is smoker.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt called stating both of his legs are swelling, his right more than left. He also stated his blood pressure is running high.. He says that he does not feel right. Patient has CAD and a history of CABG.; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt did a ett in nov and exercised 4.41 mintes with reaching targe hr. she had some heart burn during exercise. see attached clinicals.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt has chest pain shortness of breath and syncope; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt has diabetes 2; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt has diabetes, hyperlipidemia and hypertensive heart disease; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt has history of diabetes with h/o stents so we want a follow up myoview. last cath in 2010; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt has hyperlipidemia Pt has essential hypertension; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt has hyperlipidemia, chest pain, central hypertension; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt has hyperlipidemia, hypertensive heart disease, chest pain; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	PT HAS UNCONTROLLED HYPERTENSION, DIABETES 2, RX METFORMIN, AND C/O CHEST PAIN AND DOE. RX'S FOR HTN: 162/100, MD INCREASED LOSARTAN TO 50MG, AND CONTINUED HCTZ.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt has Vertigo, Syncope, HTN, ASHD, and Dyslipidemia; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	PT HAVING CHEST PRESSURE WITH SHORTNESS OF BREATH CHEST PAIN INCREASING IN NATURE PT HAVING POOR ENERGY; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; PT HAVING CHEST PRESSURE WITH SHORTNESS OF BREATH CHEST PAIN INCREASING IN NATURE PT HAVING POOR ENERGY; There has not been any treatment or conservative therapy.; PT HAVING CHEST PRESSURE WITH SHORTNESS OF BREATH CHEST PAIN INCREASING IN NATURE PT HAVING POOR ENERGY	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt having CP and SOB .; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt here for followup of ischemic cardiomyopathy and cad. He denies any chest pain. He denies any syncope. He had some abdominal pain which was relieved with a loosening of his lap band by Dr. Baker, however he has since had trouble keeping weight off and ; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	PT IS HAVING CHEST PRESSURE WITH RADIATION, ALSO HAVING SHORTNESS OF BREATH AND HIGH BLOOD PRESSURE, PT ALSO DOES HAVE ARTHRITIS; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt present palpitations, family hx CAD; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt states that he has been having seizures a couple of times a night approx every other night that wakes him from his sleep. States that his whole left side goes numb with these episodes. Pt has not been to neurologist since getting out of jail. States th; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt suffers with prolonged Q T on EKG.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; It is not known if the patient is diabetic.; It is not known if the patient has had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt unable to exercise due to ddd; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt unable to walk on treadmill due to recent foot surgery... nsvt on halter monitor; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt was born w/ aortic valvotomy. Undergone aortic valve replacement for severe aortic regurgitation in 2014; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	R/O CAD; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; It is not known if the patient is diabetic.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Reason for Appointment  1. Afib    History of Present Illness  HPI:  He is feeling better on medication. he has cut back on his drinking. no concerning cardiac symptoms.; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Reason for Appointment  1. CHF    History of Present Illness  HPI:  He is here to re-engage with a cardiologist. He has not had one in several years. He had an MI and stents in 2006 at UAMS. He was also seen at the VA after that. he was to; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Reason for Appointment  1. PAF    History of Present Illness  Symptoms:  New patient referred DR Jon Tarpley episode PAF 3 years ago, and transfer cardiologist, no angina, no palpitations, no dyspnea....history hypertension.....negative nu; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Recent hospitalization with chest pain with SOB & abnormal EKG. Chronic right leg problems with multiple surgeries and a brace make walking difficult; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Referred for chest pain. Substernal chest discomfort, lasted 5 minutes and resolved spontaneously. She has dyspnea on exertion during her daily activities.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Right precordial chest pain/left arm tightnessDyspnea on exertionType II diabetes mellitus without complications Essential hypertension. Family history of coronary artery diseaseHypercholesterolemia.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Risk factors family hx of heart disease diabetes htn; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Ronald E. Riddle is a 59 y.o. Native American male who presents for evaluation of atherosclerotic coronary artery disease with myocardial infarction due to occluded diagonal branch treated with angioplasty and stenting on November 30, 2013. He was seen in; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	s/p PCI to circumflex 4/2015  S/P PCI to CXA/OM 9/2016 DIABETES  Recent admission to hospital due to decompensated CHF and angina; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	see clinicals pt has known cad and needs f/u myoview.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	SEVERAL CALCIFICATION DUE TO A CTA HEAVY SMOKER CARDIAC MURMUR; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is less than 20	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Shortness of breath on exertion. Jaw pain. Tobacco user.; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Shortness of breath; Weakness; Essential (primary) hypertension; Goiter; Nonrheumatic mitral regurgitation; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Shortness of breath, chest of breath; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Shortness of breath, Chest Pressure, PVD, ASHD; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	SHORTNESS OF BREATH, PALPATATIONS; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Shortness of breath: DOE; Fatigue; Arteriosclerosis of native coronary artery w/ other form of angina pectoris: Exertional angina CC II; Varicose veins of bilateral legs w/ pain: L greater than R; Varicose veins of bi low extrem with other complication; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Sob, Htn, Chronic heart failure, chf, cardiomyopathy; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if the patient has had a previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	sob; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; angina	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	States at times he does have an "uncomfortable feeling" in his middle chest area but no pains in his jaw or arm. Sob comes and goes. SOB has worsened since he had his stent in 11/2/16. He states that last night he had laid down in the bed and sudden; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	stress echo attempted, could not achieve max heart rate due to deconditioning and testing had to be stopped for shortness of breath and fatigue.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	strong family hx, diabetic, htn, hyperlipidemia; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	substernal chest pain; dyspnea; fatigue; abnormal ekg; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	suspected CAD and Proxysmal A Fib.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Syncope and collapse; Dizziness; Other chest pain; Shortness of breath; Weakness: Weakness/fatigue, hypersomnia; Stasis dermatitis; COPD; Other specified diabetes mellitus without complications; Mixed hyperlipidemia; Essential (primary) hypertension; Dis; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.</p>	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>syncope, unspecified syncope type, other chest pain.; Oma C Vaughn is a 59 y.o. female who presents w c/o syncope. Has had multiple episodes in the past week. Each time she feels lightheaded and as if the workd is spinning around her. She can usually get; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.</p>	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Tachycardia, shortness of breath on exertion, heart palpitations, essential hypertension, chest pain.; Patient with a past history of hypertension and tachycardia, and other medical problems, tells me she sees several specialist, here for followup evalua; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has diabetes.</p>	12
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>The patient is diabetic.; The patient is less than 45 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	34
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>The patient is not diabetic.; The patient is less than 45 years old.; The patient has had a recent exercise treadmill test that was positive.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	3

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	9
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has diabetes.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.	23
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient presents for 6 week f/u ov electrophysiology evaluation. Has h/o PSVT and has had multiple EP studies and ablations. In 1997 in Chicago had RFCA of L sided AP and in 2003 at ACH had RFCA of slow pathway (no AVNRT at EPS but + echoes). Had recu; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The Ptr has known CAD, continued shortness of breath.; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for a post myocardial infarction evaluation.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had a nuclear cardiology study since having an MI.	3

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	2
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	189
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient had a previous myocardial infarction.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	17
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient has congestive heart failure.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	10
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient's diagnosis was established by a previous stress echocardiogram, nuclear cardiology study, or stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	29
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	5

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; It is not known if the patient is diabetic.; It is not known if the patient has had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; It is not known if the patient is diabetic.; The patient had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	6
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	24

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); It is not known if the patient has a physical limitation to exercise.	5
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has a physical limitation to exercise.	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient had previous cardiac surgery or angioplasty.; There are new symptoms or changing EKG findings.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	3
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; It is not known if the patient has had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	2
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	8
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	20

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	175
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; The patient is diabetic.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	4

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	5
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	56
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	35
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	7
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a 42 year old male patient that presents today for follow up. Past medical history includes CAD sp PCI to RCA with DES in 7/2015, hypertension. patient is complaining of chest pain that last awhile and mainly at night time.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a 55-year-old gentleman with a history of paroxysmal atrial fibrillation who returned to clinic for one year followup. The patient complained of chest pain radiating to the throat that comes and goes. The patient is unable to tell if it is associated with exertion. The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a 62 year old male patient that presents today for new patient evaluation. Past medical history includes Rectal Cancer currently undergoing chemotherapy, long time smoker.; He was referred today by Dr.Desikan for cardiac evaluation. He presented with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for preoperative evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater	15
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater	2

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater	3
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater	5
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; It is not known if the member has known or suspected coronary artery disease.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The member does not have known or suspected coronary artery disease	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for congestive heart failure.; The member does not have known or suspected coronary artery disease	3
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for evaluation of the heart prior to non cardiac surgery.	7
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for known or suspected cardiac septal defect.	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for known or suspected valve disorders.	12
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested to evaluate a suspected cardiac mass. This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The results of the previous nuclear cardiology study were not normal.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; Yes, patient had a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	2
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This study is being ordered as a pre-operative evaluation.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent stress echocardiogram.; The patient has known CAD.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	2
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study		1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	4
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	unable to ambulate on tm, cp, cardiac murmur, hypertension; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	unable to walk on treadmill, dyspnea on exertion, ekg results normal but sinus 58 QIII by phasic TW S and V2-D3; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Unknown; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Unknown; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient's diagnosis was established by a previous stress echocardiogram, nuclear cardiology study, or stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	unknown; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	unknown; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	3
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	unknown; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	unknown; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	unknown; This study is being ordered as a pre-operative evaluation.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has not been any treatment or conservative therapy.; Chest pain, shortness of breath, dizziness, and palpitations	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	UNSTABLE ANGINA, CHEST PAIN, KNOWN CAD S/P STENT & CABG, HTN, HYPERLIPIDEMIA, DIABETES, OBESITY, FAMILY HX OF CAD; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	very obese, smoker, aortic valve problem; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78472 CARDIAC OR HEART BLOOD POOL IMAGING	This is a request for a MUGA scan.; This study is being ordered for Congestive Heart Failure.; The patient has recently been diagnosed with and/or treated for congestive heart failure.; The patient has not had a previous MUGA scan.; The patient is not presenting any new cardiac signs or symptoms.; Eval need for ICD	1
Approval	78472 CARDIAC OR HEART BLOOD POOL IMAGING	This is a request for a MUGA scan.; This study is being ordered for Congestive Heart Failure.; The patient has recently been diagnosed with and/or treated for congestive heart failure.; The patient has not had a previous MUGA scan.; The patient is presenting new cardiac signs or symptoms.; The patient had a recent MI.; ejection fraction has lowered	1

Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2/1/2017; There has not been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 7-8-2016; There has been treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	MEDICATION	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for Vascular Disease.; about a year ago; There has not been any treatment or conservative therapy.; chest pain, palpitations, short of breath	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; It is not known if there has been any treatment or conservative therapy.;	2
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has not been any treatment or conservative therapy.;	2
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; This is a recurrent problem. The current episode started more than 1 month ago. The problem occurs every several days. The problem has been unchanged.; There has not been any treatment or conservative therapy.; atypical chest pain, shortness of breath on exertion, fatigue, no previous workup	1

Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	01. Angina, class III (I20.9): Recurrent. Assoc with doe. Lexiscan MPI to be done first available. Pt unable to walk on treadmill due to leg, knee & back pain. ADD ASA 81mg q day. Reluctant to add BB at this time due to h/o low HR. 02. DOE (dyspnea o; This study is being ordered for Vascular Disease.; 08/04/2016; There has been treatment or conservative therapy.; CHIEF COMPLAINT: Chest Pain , Dyspnea , dizziness; 1. Chest Pain  The patient complains of chest discomfort. The discomfort is located in the substernal area. The patient describes the pain as dull and aching. Patient was scheduled for an echo and NSC last September, but she cancelled the appointments a	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	Abnormal EKG; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; x 2 weeks; It is not known if there has been any treatment or conservative therapy.; Chest Pain, shortness of Breadth.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	dyspnea; This study is being ordered for Vascular Disease.; 1/17/; There has been treatment or conservative therapy.; chest pain; three vessel bypass	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	He has a carotid bruit; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 weeks ago; There has not been any treatment or conservative therapy.; Shortness of breath, fatigue, chest pain	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	None; This study is being ordered for Vascular Disease.; 2001; There has been treatment or conservative therapy.; SOB & Chest Pain; PCI 2001 & 2005	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	PATIENT HAD NUMEROUS EPISODES OF CHEST PAIN, SHORTNESS OF BREATH. PAIN WENT INTO JAW AND HAD COMPLAINTS OF DIAPHORESIS DURING BOTH EPISODES. PATIENT DID HAVE EPISODES OF HYPERTENSION DURING THESE EPISODES ALONG WITH NEAR SYNCOPE.; This study is being ordered for Vascular Disease.; APPROX MID JANUARY 2017; There has not been any treatment or conservative therapy.; PATIENT HAD NUMEROUS EPISODES OF CHEST PAIN, SHORTNESS OF BREATH. PAIN WENT INTO JAW AND HAD COMPLAINTS OF DIAPHORESIS DURING BOTH EPISODES. PATIENT DID HAVE EPISODES OF HYPERTENSION DURING THESE EPISODES ALONG WITH NEAR SYNCOPE.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	patient is a smoker; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3/17/2017; There has been treatment or conservative therapy.; chest pain radiating to right arm; medication	1

Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	Patient is unable to walk on a treadmill due to back problems.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 02/09/17; There has been treatment or conservative therapy.; Patient presented to ER with stabbing chest pain; patient was given narcotic pain pills without relief of chest pain	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	PATIENT PRESENTED WITH CHEST PRESSURE THAT COMES AND GOES WITH EXERTION AND AT REST. PAIN IS RELIEVED WITH RESET. PT DOES HAVE PALPITATIONS AS WELL AS SOB WITH AND WITH EXERTION; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; PATIENT PRESENTED WITH CHEST PRESSURE THAT COMES AND GOES WITH EXERTION AND AT REST. PAIN IS RELIEVED WITH RESET. PT DOES HAVE PALPITATIONS AS WELL AS SOB WITH AND WITH EXERTION; There has not been any treatment or conservative therapy.; PATIENT PRESENTED WITH CHEST PRESSURE THAT COMES AND GOES WITH EXERTION AND AT REST. Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.	22

Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; It is unknown if there been a change in clinical status since the last echocardiogram.; It is unknown if this is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.	3
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient does not have a history of a recent heart attack or hypertensive heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has high blood pressure	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has a history of hypertensive heart disease.; There is a change in the patient's cardiac symptoms.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has high blood pressure	2
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has a history of hypertensive heart disease.; There is a change in the patient's cardiac symptoms.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Known or suspected left ventricular disease.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; There has been a change in clinical status since the last echocardiogram.; This is not for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.	3

Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; There has NOT been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Known or suspected Congestive Heart Failure.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; It is unknown if this study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG	4
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Known or suspected pulmonary hypertension	4
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Shortness of breath is not related to any of the listed indications.	5

Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; This study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG	6
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; This study is NOT being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG	5
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of heart failure.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Known or suspected Congestive Heart Failure.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This request is NOT for initial evaluation of a murmur.; This is NOT a request for follow up of a known murmur.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has abnormal heart sounds	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of cardiac arrhythmias; This study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.	6

Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of Pericardial Disease.; It is unknown if there been a change in clinical status since the last echocardiogram.; It is unknown if this for the initial evaluation of a pericardial disease.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of Pericardial Disease.; There has NOT been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of a pericardial disease.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Embolism.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Mass.; It is unknown if there been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of a cardiac mass.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Mass.; This is for the initial evaluation of a cardiac mass.	2
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; It is unknown if there been a change in clinical status since the last echocardiogram.; This request is NOT for initial evaluation of a murmur.; This is a request for follow up of a known murmur.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; There has been a change in clinical status since the last echocardiogram.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; It is unknown if there is clinical symptoms supporting a suspicion of structural heart disease.; This is a request for follow up of a known murmur.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; There has been a change in clinical status since the last echocardiogram.; This request is NOT for initial evaluation of a murmur.; This is a request for follow up of a known murmur.	2
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; It is unknown if there is clinical symptoms supporting a suspicion of structural heart disease.; This is NOT a request for follow up of a known murmur.	1

Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease.	2
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is grade III (3) or greater.	10
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is NOT grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is NOT for initial evaluation of a murmur.; It is unknown if this is a request for follow up of a known murmur.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; The patient has suspected prolapsed mitral valve.	2
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an annual review of known valve disease.; It has been 12 - 23 months or more since the last echocardiogram.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an annual review of known valve disease.; It has been 24 months or more since the last echocardiogram.	4
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an annual review of known valve disease.; It has been 7-9 months since the last echocardiogram.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an annual review of known valve disease.; It is unknown when the last echocardiogram was performed.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an evaluation of new or changing symptoms of valve disease.	18
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an initial evaluation of artificial heart valves.	1

Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an initial evaluation of suspected valve disease.	85
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for evaluation of change of clinical status.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for initial diagnosis of congenital heart disease.	3
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for a routine follow up of congenital heart disease.; It has been at least 24 months since the last echocardiogram was performed.	2
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for a routine follow up of congenital heart disease.; There has NOT been a change in clinical status since the last echocardiogram.; It has NOT been at least 24 months since the last echocardiogram was performed.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; It is unknown if there been a change in clinical status since the last echocardiogram.; It is unknown if this is for the initial evaluation of heart failure.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; It is unknown if there been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.	2
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; There has been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.	15
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; There has NOT been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.	5
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; This is for the initial evaluation of heart failure.	21
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; It is unknown if the patient has a history of a recent heart attack or hypertensive heart disease.	15

Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient does not have a history of a recent heart attack or hypertensive heart disease.	39
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of a recent myocardial infarction (heart attack).	5
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; It is unknown if there is a change in the patient's cardiac symptoms.	4
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; There is a change in the patient's cardiac symptoms.	63
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; There is NOT a change in the patient's cardiac symptoms.; It has been at least 24 months since the last echocardiogram was performed.	2
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; There is NOT a change in the patient's cardiac symptoms.; It has NOT been at least 24 months since the last echocardiogram was performed.	3
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; There is NOT a change in the patient's cardiac symptoms.; It is unknown if it has been at least 24 months since the last echocardiogram was performed.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Pulmonary Hypertension.	29
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has not been any treatment or conservative therapy.; Chest pain, shortness of breath, dizziness, and palpitations	1

Approval	93312 TEE R-T IMG 2D W/PRB IMG ACQUISJ I&R	Mr. Worsham is here for followup, monitor results. No sx of palpitations, no dizziness or lightheadedness. Continues to have right arm numbness, tingling. This starts in fingers, goes all the way up to his neck and face on right side. Reports a "haze" to ; This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is NOT for suspected acute aortic pathology, pre-op of mitral valve regurgitation, infective endocarditis, left atrial thrombus, radiofrequency ablation procedure, fever with intracardiac devise or completed NON diagnostic TTE.	1
Approval	93312 TEE R-T IMG 2D W/PRB IMG ACQUISJ I&R	Probable SVT - She has episodes of HR's as high as 165 that is associated with SOB and CP. This comes on abruptly and stops abruptly which does sound like SVT. Her mother has this condition. I would get a holter and an echocardiogram to rule out any struc; This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is NOT for suspected acute aortic pathology, pre-op of mitral valve regurgitation, infective endocarditis, left atrial thrombus, radiofrequency ablation procedure, fever with intracardiac devise or completed NON diagnostic TTE.	1
Approval	93312 TEE R-T IMG 2D W/PRB IMG ACQUISJ I&R	This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is being requested for evalutaion of atrial fibrillation or flutter to determine the presence or absence of left atrial thrombus or evaluate for radiofrequency ablation procedure.	9
Approval	93312 TEE R-T IMG 2D W/PRB IMG ACQUISJ I&R	This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is being requested after a completed NON diagnostic transthoracic echocardiogram.	5
Approval	93312 TEE R-T IMG 2D W/PRB IMG ACQUISJ I&R	This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is being requested for evaluation of suspected acute aortic pathology such as aneurysm or dissection.	2
Approval	93312 TEE R-T IMG 2D W/PRB IMG ACQUISJ I&R	This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is being requested for pre-operative evaluation of mitral valve regurgitation ; This is a request for a Stress Echocardiogram.; The patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; It is not known if the patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.	1
Approval	93350 ECHO TTHRC R-T 2D --M- MODE COMPLETE REST&STRS	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; It is not known if there has been any treatment or conservative therapy.;	1
Approval	93350 ECHO TTHRC R-T 2D --M- MODE COMPLETE REST&STRS		1

Approval	93350 ECHO TTHRC R-T 2D -+M-MODE COMPLETE REST&STRS		<p>; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ;</p> <p>Patient with known CAD s/p PTCA/stent for follow up stress after PTCA; This is a request for a Stress Echocardiogram.; The patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; It is not known if the patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.</p>	1
Approval	93350 ECHO TTHRC R-T 2D -+M-MODE COMPLETE REST&STRS		<p>This is a request for a Stress Echocardiogram.; It is unknown if the patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.</p>	1
Approval	93350 ECHO TTHRC R-T 2D -+M-MODE COMPLETE REST&STRS		<p>This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; It is not known if the member has known or suspected coronary artery disease.</p>	6
Approval	93350 ECHO TTHRC R-T 2D -+M-MODE COMPLETE REST&STRS		<p>This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; The member does not have known or suspected coronary artery disease</p>	9
Approval	93350 ECHO TTHRC R-T 2D -+M-MODE COMPLETE REST&STRS		<p>This is a request for a Stress Echocardiogram.; The patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.</p>	5
Approval	93350 ECHO TTHRC R-T 2D -+M-MODE COMPLETE REST&STRS		<p>This is a request for a Stress Echocardiogram.; The patient has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The member has known or suspected coronary artery disease.</p>	15
Approval	93350 ECHO TTHRC R-T 2D -+M-MODE COMPLETE REST&STRS		<p>Unknown; This is a request for a Stress Echocardiogram.; It is unknown if the patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; It is not known if the patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.</p>	103
Approval	93350 ECHO TTHRC R-T 2D -+M-MODE COMPLETE REST&STRS		<p>; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; Severe Claustrophobia is the reason an MRI is not being considered</p>	1
Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary		1

Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	pt has a panic disorder and MRI would be very hard to obtain.; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; Severe Claustrophobia is the reason an MRI is not being considered	1
Disapproval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	Further evaluation of carotid and/or subclavian artery stenosis. CT/CTA of neck, chest, and aortogram ordered see if this can be revascularized surgically or percutaneously.; This study is being ordered for Vascular Disease.; 05/14/2014 patient was seen in office as new patient. Last office visit was 02/03/2017. Patient presents with significant chest and left arm pain. Extremities are numb and tingling, and pt often experiences loss of sensation. Pulse is faint and coldness; There has been treatment or conservative therapy.; angina pectoris, shortness of breath, dizziness, left arm pain, numbness, tingling, and faint pulses with coldness to all extremities. Occasional loss of sensation to extremities becoming more frequent. Overall significant pain.; Medication management. Medical therapy. Previous diagnosis of CAD s/p stent to RCA.	1
Disapproval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically	Yes, this is a request for CT Angiography of the Neck.	4
Disapproval	70540 MRI ORBIT/FACE/NECK W/O DYE	Radiology Services Denied Not Medically Necessary	She saw me 10 years ago due to palpitation. She has been on physical work, lifting. She c/o moderate left arm aching at rest, not during lifting or exertion, associated "shocking" sensation in the past 6-8 weeks while resting, relieved on its own. No chest pain; This study is being ordered for Inflammatory/ Infectious Disease.; 01/05/2007; There has not been any treatment or conservative therapy.; She c/o moderate left arm aching at rest, not during lifting or exertion, associated "shocking" sensation in the past 6-8 weeks while resting, relieved on its own. No chest pain, SOB, DOE, orthopnea, PND, dizziness, syncope, palpitation. She had anxiety a	1

No chest pain, SOB, DOE, orthopnea, PND, dizziness, syncope, palpitation. She had anxiety a	1
Disapproval	71250 CT CHEST, THORAX	Radiology Services Denied Not Medically	; This study is being ordered for Vascular Disease.; ; There has not been any treatment or conservative therapy.;	1

Disapproval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Disapproval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	; It is not known whether this study is requested to evaluate suspected pulmonary embolus.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Disapproval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	Further evaluation of carotid and/or subclavian artery stenosis. CT/CTA of neck, chest, and aortogram ordered see if this can be revascularized surgically or percutaneously.; This study is being ordered for Vascular Disease.; 05/14/2014 patient was seen in office as new patient. Last office visit was 02/03/2017. Patient presents with significant chest and left arm pain. Extremities are numb and tingling, and pt often experiences loss of sensation. Pulse is faint and coldness; There has been treatment or conservative therapy.; angina pectoris, shortness of breath, dizziness, left arm pain, numbness, tingling, and faint pulses with coldness to all extremities. Occasional loss of sensation to extremities becoming more frequent. Overall significant pain.; Medication management. Medical therapy. Previous diagnosis of CAD s/p stent to RCA.	1
Disapproval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	Reason for Appointment  1. Palpitations  2. Atrial Fibrillation    History of Present Illness  HPI:  Pt is here to establish care. Pt was in the hospital 2 weeks ago with Afib at ACMC and had to be converted back to sinus rhythm. Pt state; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Disapproval	71555 MRA, MRI ANGIOGRAPHY CHEST[NOT MYOCARDIUM] WITH/WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for Inflammatory/ Infectious Disease.; Unknown; There has been treatment or conservative therapy.; Pericarditis inflammation around the heart sac; medications	1
Disapproval	74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for CT Angiography of the Abdomen and Pelvis.	1
Disapproval	74175 CT ANGIOGRAPHY ABDOMEN	Radiology Services Denied Not Medically Necessary	Yes, this is a request for CT Angiography of the abdomen.	2

Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; The requested studies are not being ordered for known or suspected aneurysms, hematoma, or blood clot, thrombosis, or stenosis and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.; There is no evidence of vascular abnormality seen on plain film and/or Ultrasound/ Doppler.; There are no symptoms or findings to indicate the member has internal abdominal and or pelvic bleeding such as hematoma or hemorrhage.; Vascular disease; <Enter Additional Clinical Information>; Yes this is a request for a Diagnostic CT	1
Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Reason for Appointment  1. CVI    History of Present Illness  Follow up interval visit:  Mr. McKinney comes to the PVI for an early interval visit secondary to new wounds. Underwent sclerotherapy on 10/14/2016 of the left proximal calf and; Yes this is a request for a Diagnostic CT	1
Disapproval	75557 Cardiac MRI Morph & structure w/o contrast	Radiology Services Denied Not Medically Necessary	This is a request for a heart or cardiac MRI	2
Disapproval	75571 Coronary Artery Calcium Score, EBCT	Radiology Services Denied Not Medically Necessary	; This is a request for a CT scan for evaluation of coronary calcification.	1
Disapproval	75571 Coronary Artery Calcium Score, EBCT	Radiology Services Denied Not Medically Necessary	Pt comes in to establish care. She is needing to have surgery to remove fibroid tumors. Her doctor referred her to us due to a low heart rate. Pt complains of stabbing, tight chest pain for the "past year or two". Pt says the pain can sometimes turn into ; This is a request for a CT scan for evaluation of coronary calcification. Reason for Appointment  1. Near syncope    History of Present Illness  HPI:  she was mopping recent and had brief episode of near syncope. She bent over and felt her vision go out for a few seconds. no other associated symptoms. She had a ; This is a request for a CT scan for evaluation of coronary calcification.	1
Disapproval	75571 Coronary Artery Calcium Score, EBCT	Radiology Services Denied Not Medically Necessary		1
Disapproval	75572 CT Heart	Radiology Services	This is a request for a Heart CT.	1
Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; It is not known if patient has new onset congestive heart failure.; left arm pain; Yes, there is Chronic Chest Pain.	1

Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	There is no "Acute Chest Pain" or Angina.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Patient is referred by her PCP for cardiac evaluation. On 02/01/2017 she blacked out while driving her car and ran into a building. She reports multiple episodes of seizure-like activity where she passes out, with no precipitating events. She states this ; No, there is no Chronic Chest Pain.; No, this patient does not have equivocal or uninterpretable stress test (exercise, perfusion, or stress echo).	1
Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	This is a request for CTA Coronary Arteries.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; It is not known if the member has known or suspected coronary artery disease.	1
Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	This is a request for CTA Coronary Arteries.; The study is requested for evaluation of the heart prior to non cardiac surgery.	1
Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	This is a request for CTA Coronary Arteries.; The study is requested for known or suspected valve disorders.	1
Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	This request is for a Coronary CT Angiography study.; It is not known if patient did not have a Nuclear Cardiology study within the past six months.; CHEST PAIN AND SHORTNESS OF BREATH.	1
Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for evaluation after cardiac angioplasty, stent or bypass graft.; POST ANGIOPLASTY TO EVALUATE ANOMALY OF CIRC. USA, HTN, FAMILY HX OF CAD, SMOKER, DIABETES	1
Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for known coronary disease.;	1
Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and asymptomatic (no significant symptoms)?; RT. sided Chest Pain	1
Disapproval	75635 CTA AA&BI ILIOFEM LXTR RS&I C-/C+ POST-PXESSING	Radiology Services Denied Not Medically Necessary	; This study is being ordered for Vascular Disease.; ; There has not been any treatment or conservative therapy.;	1

Disapproval	75635 CTA AA&BI ILIOFEM LXTR RS&I C-/C+ POST-PXESSING	Radiology Services Denied Not Medically Necessary	Further evaluation of carotid and/or subclavian artery stenosis. CT/CTA of neck, chest, and aortogram ordered see if this can be revascularized surgically or percutaneously.; This study is being ordered for Vascular Disease.; 05/14/2014 patient was seen in office as new patient. Last office visit was 02/03/2017. Patient presents with significant chest and left arm pain. Extremities are numb and tingling, and pt often experiences loss of sensation. Pulse is faint and coldness; There has been treatment or conservative therapy.; angina pectoris, shortness of breath, dizziness, left arm pain, numbness, tingling, and faint pulses with coldness to all extremities. Occasional loss of sensation to extremities becoming more frequent. Overall significant pain.; Medication management. Medial therapy. Previous diagnosis of CAD s/p stent to RCA.	1
Disapproval	75635 CTA AA&BI ILIOFEM LXTR RS&I C-/C+ POST-PXESSING	Radiology Services Denied Not Medically Necessary	Yes, this is a request for CT Angiography of the abdominal arteries.	6
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient had a recent stress echocardiogram to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is not know	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/23/2016; There has not been any treatment or conservative therapy.; hypertensive disorder, chest pain, dyspnea. EKG showed NSR, complained of severe cough with chest pain	1

Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; SUMMER 2016; There has not been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for Vascular Disease.; about a year ago; There has not been any treatment or conservative therapy.; chest pain, palpitations, short of breath ; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; A study not listed has be completed.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are not new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient had a recent stress echocardiogram to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	2

Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is not know	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	3
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has not been any treatment or conservative therapy.;	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; near syncopal episode 1 week ago assoc w/sweating.; Chest Pain (Angina) ; This is a new problem. The current episode started more than 1 week ago. The problem occurs rarely. The problem has been resolved. Associated symptoms include chest pain. Pertinent ; There has not been any treatment or conservative therapy.;	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; This is a recurrent problem. The current episode started more than 1 month ago. The problem occurs every several days. The problem has been unchanged.; There has not been any treatment or conservative therapy.; atypical chest pain, shortness of breath on exertion, fatigue, no previous workup	1

Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	1. COPD (chronic obstructive pulmonary disease) with acute exacerbation.; 2. Precordial chest pain, atypical.; 3. PSVT (paroxysmal supraventricular tachycardia).; 4. Hepatitis C.; 5. Tobacco abuse.; 6. Elevated bilirubin.; 7. Benign essential hypertension; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	56 y.o. female with h/o GERD, RA, Depression, fibromyalgia and HTN here for workup of chest pain.; For the past few years c/o chest pain. Left sided. Worse with emotional stress. Pressure-like. Lasts 5 minutes. Moderate. Progressive. Associated with; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	A 54-year-old gentleman with a history of hypertension presented with chest pain and dyspnea on exertion which does not happen frequently and lasts for a few minutes. The patient cannot tell if it is exertional or not. He has recently diagnosed hypertensi; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Active Problems.; 1. Cardiomyopathy (425.4) (I42.9).; 2. Cerebral infarction, unspecified (434.91) (I63.9).; 3. Chest pain (786.50) (R07.9).; 4. Conductive hearing loss, inner ear (389.04) (H90.2).; 5. Current every day smoker (305.1) (F17.200).; 6. Depression ; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	CAD w/new chest pain.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	chest pain and shortness of breath, especially with exertion. relieved with rest. abnormal EKG done which shows some ST depression and ischemic changes. evaluation for CAD needed.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	CHEST PAIN, SMOKER, FAMILY HX OF CAD, PVD; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	cp, palpitations; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	CP, SYNCOPE AND COLLAPSE, NICOTINE DEPENDENCE, HYPERTENSION, ABNORMAL EKG, UABLE TO DO REGULAR WALKING TM DUE TO ABN EKG AND SYNCOPE.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Had angina this am, precordial area, walking, no radiation, associated dyspnea, lasted 9 minutes, did not take NTG, had worse episode last week relieved NTG; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	having chest pain; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	INITIAL VISIT FOR NEW ONSET CHEST PAIN & ABNORMAL EKG. PT IS FORMER SMOKER & HAS A FAMILY HX OF CAD; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	INITIAL VISIT FOR NEW ONSET CHEST PAIN & HTN. PT IS UNABLE TO WALK ON TREADMILL DUE TO BROKEN FEMUR.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	L arm pain w/dyspnea; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Mr Ward is here today for cardiac evaluation. He states that he has been feeling fatigued lately even with plenty of rest. He states that his bp has been fluctuating recently. He also states that he has had some "skipped beats". He states that he has felt; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Mr. Carlson is here today for 6 month follow up with CTA to assess his abdominal aortic aneurysm. He underwent CEA and CABG back in June and July of this year. He is progressing well. States that "I can still feel my sternum move". Denies pain. Confirms t; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Mr. Danie is a 54 year old BM with a history of HTN and tobacco use, who was referred to us by Dr. McDaniel for complaints of chest pain. He states he has been having chest pain for the last month. He describes a sudden onset of a sharp pain in the cente; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Mrs Cross here for check up and cardiac clearance to have surgery per Dr Bryant on right shoulder.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Ms Jeanette is here today with c/o intermittent midsternal cp that occasionally radiates down left arm and causes sob. No nausea or diaphoresis. Last episode was last night and lasted approximately 10 minutes.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Muscular Sclerosis Knee Surgery; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	None; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 02/03/2017; There has been treatment or conservative therapy.; Chest Pain; O2 and ASA	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2012; There has been treatment or conservative therapy.; Prior Chest Pain--This is for follow-up of 2012 CABG; Medication	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	palpitations; possible recent small stroke; fatigue; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1

Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	PATIENT HAD NUMEROUS EPISODES OF CHEST PAIN, SHORTNESS OF BREATH. PAIN WENT INTO JAW AND HAD COMPLAINTS OF DIAPHORESIS DURING BOTH EPISODES. PATIENT DID HAVE EPISODES OF HYPERTENSION DURING THESE EPISODES ALONG WITH NEAR SYNCOPE.; This study is being ordered for Vascular Disease.; APPROX MID JANUARY 2017; There has not been any treatment or conservative therapy.; PATIENT HAD NUMEROUS EPISODES OF CHEST PAIN, SHORTNESS OF BREATH. PAIN WENT INTO JAW AND HAD COMPLAINTS OF DIAPHORESIS DURING BOTH EPISODES. PATIENT DID HAVE EPISODES OF HYPERTENSION DURING THESE EPISODES ALONG WITH NEAR SYNCOPE.	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Patient is having shortness of breath, chest pain, and tachycardia. Unable to walk on a treadmill.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Pt c/o SOB and angina; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	pt complaining of chest pain with heaviness, SOB when laying down at night, palpitations.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	ruling out CAD; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; chest pain, hyperlymphodemia, diabetes, hypertension	1

Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	This is a 38-year-old gentleman with a history of diabetes, hypertension and family history of coronary artery disease presented to the Cardiology Clinic with a few months history of progressive chest pain, retrosternal chest pain radiating to both arms a; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The member does not have known or suspected coronary artery disease	4
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for congestive heart failure.; It is not known if the member has known or suspected coronary artery disease.	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for congestive heart failure.; The member does not have known or suspected coronary artery disease	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for evaluation of the heart prior to non cardiac surgery.	5
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for known or suspected valve disorders.	15
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested to evaluate a suspected cardiac mass.	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Torn calf muscle precludes patient from walking on treadmill. Nuc study requested.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	unknown; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is not know	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	unknown; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/22/2016; There has not been any treatment or conservative therapy.; dyspnea, chest pain	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	unknown; This study is being ordered for Vascular Disease.; unknown; There has been treatment or conservative therapy.; patient is having dyspnea on exertion and lefted chest pain, on exertion; patient has had stents, medication therapy.	1

PATIENT ALSO HAS COMPLAINTS OF SHORTNESS OF BREATH	3
Disapproval	93350 ECHO TTHRC R-T 2D -+M- MODE COMPLETE REST&STRS	Radiology Services Denied Not Medically Necessary	This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; The member does not have known or suspected coronary artery disease	3
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST		This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a "thunderclap" or the worst headache of the patient's life.	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST		The patient has failed a course of anti-inflammatory medication or steroids.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to neurological deficits.; There has not been a supervised trial of conservative management for at least 6 weeks.; "The caller indicated that the patient is not experiencing or presenting symptoms of Abnormal Gait, Lower Extremity Weakness, Asymmetric Reflexes, Cauda Equina Syndrome, Bowel or Bladder Dysfunction, New Foot Drop, or Radiculopathy."; The patient is experiencing sensory abnormalities such as numbness or tingling.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient has had 3 or fewer follow-up Cervical Spine CTs.	1

Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.; Yes this is a request for a Diagnostic CT	2
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; It is not known if this patient had a recent course of supervised physical Therapy.; Yes, the patient had six weeks of Chiropractic care related to this episode.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; Yes, the patient had six weeks of Chiropractic care related to this episode.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	NO; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; PATIENT HAS BEEN EXPERIENCING RADIATING RIGHT ARM PAIN, WEAKNESS, NUMBNESS AND LOSS OF GRIP STRENGTH FOR APPROXIMATELY 7 MONTHS. PATIENT ALSO IS SUFFERING FROM EXTREME SWELLING IN RIGHT HAND WHICH IS LIMITING HER ABILITY TO PERFORM DAILY TASKS; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.	3
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; It is not known if this patient had a recent course of supervised physical Therapy.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.	4

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; parathesia; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	6
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Trauma or recent injury; The patient does not have new or changing neurologic signs or symptoms.; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; The patient has completed 6 weeks or more of Chiropractic care.; IBUFPROFEN	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/17/2016; There has been treatment or conservative therapy.; pt is having spinal pain; pt is having ultrasound therapy	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/17/2016; There has been treatment or conservative therapy.; pt is having spinal pain; pt is having ultrasound therapy	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Chronic back pain; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	low back pain radiating into bilateral hips and thighs; aching, pulling, sharp, stabbing pain; constant discomfort; activities of daily living have been difficult; aggravated by almost any movement;; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.	2
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	2
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Pre-Operative Evaluation; No, the last Lumbar spine MRI was not performed within the past two weeks.; Surgery is scheduled within the next 4 weeks.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	18

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality	8
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	5
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	1
Approval	72192 CT PELVIS WITHOUT CONTRAST	unknown; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
Approval	72196 MRI PELVIS	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for suspicion of pelvic inflammatory disease or abscess.	1
Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is suspicion of upper extremity bone or soft tissue infection.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; < Enter answer here - or Type In Unknown If No Info Given. >	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is an orthopedist.	2
Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.	4

Approval	73221 MRI JOINT OF UPPER EXTREMITY	This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Abnormal X-ray from 2/28/2017.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; home treatment documentation: tx plan 2x's a week she goes for Physical Therapy and 3 days a week she does HEP (exercise from PT). No improvement in swelling or pain.; The patient received oral analgesics.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Limited range of motion	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Swelling greater than 3 days	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >	1

Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT		This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT		This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion.	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT		This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient has a documented limitation of their range of motion.	1
Disapproval	70336 MRI TEMPROMANDIBULAR JOINT,TMJ,JAW JOINT	Radiology Services Denied Not Medically Radiology Services	This is a request for a temporomandibular joint MRI. unknown; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.	1
Disapproval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	Denied Not Medically Necessary		1
Disapproval	72131 CT LUMBAR SPINE, LOW BACK	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1

Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; ; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2015; There has been treatment or conservative therapy.; stiffness, neck and back sharp pains,; medication	1
Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 10/1/2016; There has been treatment or conservative therapy.; sharp shooting pain with radiculopathy with legs begins in mid-thoracic region waking patient up at night; physical therapy, chiropractic care	1
Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2015; There has been treatment or conservative therapy.; stiffness, neck and back sharp pains,; medication	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; None of the above; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 10/1/2016; There has been treatment or conservative therapy.; sharp shooting pain with radiculopathy with legs begins in mid-thoracic region waking patient up at night; physical therapy, chiropractic care	1

Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pars defect at L5 Multiple Schmorals nodes related to remote epiphysitis; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically	; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has not been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	xray was abnormal; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; notes only state weakness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Disapproval	72192 CT PELVIS WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >; < Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; There has been treatment or conservative therapy.;	1
Disapproval	73221 MRI JOINT OF UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	Crepitus, pain , loose body shoulder; chiro therapy	2

Disapproval	73221 MRI JOINT OF UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has not been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.	1
Disapproval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	Radiology Services Denied Not Medically Necessary		1
Disapproval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >	1
Disapproval	74150 CT ABDOMEN WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is not known if there are new symptoms including hematuria.; It is not known if there are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; It is not known if there is a suspicion of an adrenal mass.; It is not known if this is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Yes this is a request for a Diagnostic CT Faxing Clinicals; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Approval	71250 CT CHEST, THORAX		This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.	1
Approval	71250 CT CHEST, THORAX			2

Approval	71250 CT CHEST, THORAX	This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.	5
Approval	71250 CT CHEST, THORAX	This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.	2
Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for evaluation of the pelvis prior to surgery or laparoscopy.	3
Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for suspicion of tumor, mass, neoplasm, or metastatic disease?	2
Approval	72196 MRI PELVIS	This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.	1
Approval	72196 MRI PELVIS	This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.	2
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	5
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; The requested study is for post-operative evaluation.; The requested study is a first follow up study for a post operative complication.; Pre-op or post op evaluation; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; The requested study is for post-operative evaluation.; The requested study is not a first follow up study for a post operative complication.; Pre-op or post op evaluation; unknown; Yes this is a request for a Diagnostic CT	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.	5
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.	2
Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	Faxing Clinicals; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Colo-rectal Cancer.; This would be the first PET Scan performed on this patient for this cancer.	1
Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Colo-rectal Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; This would be the first PET Scan performed on this patient for this cancer.	1
Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new signs or symptoms.	1
Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.	1

Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; It is unknown if the patient completed a course of treatment initiated in the last 8 weeks or are experiencing new signs or symptoms.	1
Approval	70544 Mr angiography head w/o dye	There is an immediate family history of aneurysm.; This is a request for a Brain MRA.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	MEMBER WITH TETRALOGY OF FALLOT WITH ANOXIC BRAIN INJURY RESULTING IN DEFICITS IN COGNITION, POSSIBLE DYSPHAGIA, MOBILITY AND ADLS.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	patient had a seizure was in hospital has had a severe headache since having seizure.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient does not have dizziness, one sided arm or leg weakness, the inability to speak, or vision changes.; The patient does not have HIV or cancer.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing fatigue or malaise.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The study is NOT being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; Requested for evaluation of seizures; There has been a previous Brain MRI completed.; The brain MRI was abnormal.	1

Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	There are no documented clinical findings of immune system suppression.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; None of the options listed is the reason for the study.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing cervical neck pain not improving despite treatment.	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; physical therapy, pain medication, NSAIDs, muscle relaxers	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	chiropractic did not help. decompression made the pain worse. pain meds did help. Spurlings test is positive to the right. ROM is limited to 20 degrees. Obrians test causes pain to the right.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	Patient comes to clinic today for follow up of her chronic pain. She denies any new numbness/ tingling/ weakness or loss of bowel or bladder control.She is s/p left SI Joint injection with 70% relief. She denies any medication side effects.; CT of the l; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	The patient does not have any neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; There is a reason why the patient cannot have a Cervical Spine MRI.	2
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	This study is to be part of a Myelogram.; This is a request for a Cervical Spine CT ; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;	1
Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	This is a request for a thoracic spine CT.; "The patient has been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."; The study is being ordered due to follow-up to surgery or fracture within the last 6 months.; There is a reason why the patient cannot undergo a thoracic spine MRI.	1
Approval	72131 CT LUMBAR SPINE, LOW BACK	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; back and right knee pain; physical therapy, pain medications, NSAIDs	1
Approval	72131 CT LUMBAR SPINE, LOW BACK	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; physical therapy, pain medication, NSAIDs, muscle relaxers	1

Approval	72131 CT LUMBAR SPINE, LOW BACK	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;	1
Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.; Yes this is a request for a Diagnostic CT	3
Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is not experiencing symptoms of radiculopathy for six weeks or more.; There is no neurologic symptoms of bowel or urinary bladder dysfunction.; There is no suspicion of lumbar spine infection.; There is no suspicion of lumbar spine neoplasm or tumor or metastasis.; Yes this is a request for a Diagnostic CT	1
Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.; Yes this is a request for a Diagnostic CT	5
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/7/2014; There has been treatment or conservative therapy.; Radiating Pain; injections, narcotic and inset treatment, past pt none recently	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 05/04/16; There has been treatment or conservative therapy.; Shoulder pain, limited mobility, neck pain, unable to move neck/shoulder, inability to lift or use shoulder, numbness/tingling in the extremity, not able to sleep; PT and medication	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; epidural injections, pain medications, NSAIDs	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, muscle relaxer, NSAIDs	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, muscle relaxers	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, NSAIDs	4

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid back pain; PT, pain medication, NSAIDs	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, muscle relaxers, NSAIDs	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, NSAIDs, muscle relaxers	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and right shoulder pain; pain medication, NSAIDs, muscle relaxers	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;;	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Patient was approved for Lumbar MRI in November 2016 and was unable to attend the scheduled appt.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient has had neck and back pain since November 2016. Patient has tried home exercises with no relief.; There has been treatment or conservative therapy.; Neck and back pain. Numbness; Home therapy exercises.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.	2
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.	2

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; No, the patient did not have six weeks of Chiropractic care related to this episode.; <Enter Additional Clinical Information>	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; "The patient has been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."; Follow-up to Surgery or Fracture within the last 6 months	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.	23
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	4
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	3
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	14
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Yes, this patient had a recent course of supervised physical Therapy.	3
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; pt new develop pain, pain to her neck radiating to her head and pain radiation to her arm to her hand.	1

Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/7/2014; There has been treatment or conservative therapy.; Radiating Pain; injections, narcotic and inset treatment, past pt none recently	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.;	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; mid to lower back pain; pain medication, NSAIDs	2
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid back pain; PT, pain medication, NSAIDs	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, muscle relaxers, NSAIDs	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, NSAIDs, muscle relaxers	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Caller does not know whether the patient is experiencing sensory abnormalities such as numbness or tingling.; Mrs. Owens presents for follow-up evaluation of many years progressive low back pain. To review lumbar MRI report from the VA on 05/16/16 she's had a laminectomy with posterior fusion from L2-L5. There is grade 1 retrolisthesis of L2 on L3. At L2-3 there	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is not experiencing sensory abnormalities such as numbness or tingling.; Sprain of T7-8 interspinous ligament and scoliosis with apex at T7.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.	3

Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; <Enter Additional Clinical Information>; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; ; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; On my review of her thoracic x-rays done on 03/17/17 she has significant thoracic scoliosis centered at T3-4 with disc height loss at this level and anterior spurring.I educated her that scoliosis can increase force through the facets and also cause myofa; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of abnormal gait.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.	3
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	4
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient is presenting new symptoms.; It is not known if the study is for follow up or staging.; It is not known if the patient is undergoing active treatment for cancer.; This is a request for a thoracic spine MRI.; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.;" The study is being ordered due to known tumor with or without metastasis.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of asymmetric reflexes.	1

Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	unknown; This study is being ordered for a neurological disorder.; has had symptoms since age of 13; There has been treatment or conservative therapy.; pain that goes down R side into arm, low back pain down left leg with numbness; PT, injections < Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/7/2014; There has been treatment or conservative therapy.; Radiating Pain; injections, narcotic and inset treatment, past pt none recently ; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.;	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; left thigh pain and back pain; pain medication	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; mid to lower back pain; pain medication, NSAIDs	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; epidural injections, pain medications, NSAIDs	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, muscle relaxer, NSAIDs	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, muscle relaxers	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	has been treatment or conservative therapy.; neck and back pain; pain medication, NSAIDs	4
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, muscle relaxers, NSAIDs	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, NSAIDs, muscle relaxers	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Pain Details: The patient presents today for follow up. They report pain as basically stable and controlled with current medications. Denies any side effects from their medications and maintains physical activity. Requests no changes today. The patient ; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Patient was approved for Lumbar MRI in November 2016 and was unable to attend the scheduled appt.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient has had neck and back pain since November 2016. Patient has tried home exercises with no relief.; There has been treatment or conservative therapy.; Neck and back pain. Numbness; Home therapy exercises.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Recent falls off her bed which caused more pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; First seen by MDO on 01/26/2016. Back pain 10+ yrs.; There has been treatment or conservative therapy.; Pain and worsening pain in mid to lower back region; Epidural injection; facet injection; pain meds; PT x 6wks 1yr ago	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	85
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality	3
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has completed Treatment with a facet joint or epidural injection in the past 6 weeks	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	22
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unknown; This study is being ordered for a neurological disorder.; has had symptoms since age of 13; There has been treatment or conservative therapy.; pain that goes down R side into arm, low back pain down left leg with numbness; PT, injections	1
Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for pelvic trauma or injury.	1

Approval	73200 CT ARM OR UPPER EXTREMITY	This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is not suspicion of upper extremity bone or joint infection.; The ordering physician is not an orthopedist or rheumatologist.; Yes this is a request for a Diagnostic CT	1
Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	The request is for an upper extremity non-joint MRI.; This is a preoperative or recent postoperative evaluation. < Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 05/04/16; There has been treatment or conservative therapy.; Shoulder pain, limited mobility, neck pain, unable to move neck/shoulder, inability to lift or use shoulder, numbness/tingling in the extremity, not able to sleep; PT and medication	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 10/2015; There has been treatment or conservative therapy.; Tenderness, positive painful arch test; Pain management, PT	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and right shoulder pain; pain medication, NSAIDs, muscle relaxers	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Her left shoulder pain is 50% reduced status post ultrasound-guided injection, therefore think the majority of her pain now is related to the rotator cuff, there were areas of tendinopathy and possible small tear at the distal portion of the Supraspinatus	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is an orthopedist.	2
Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.	6

Approval	73700 CT LEG OR LOWER EXTREMITY	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; back and right knee pain; physical therapy, pain medications, NSAIDs	1
Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is not a history of lower extremity joint or long bone trauma or injury.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 10/2015; There has been treatment or conservative therapy.; Tenderness, positive painful arch test; Pain management, PT	2
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Suspected meniscus, tendon, or ligament injury	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Instability; No, the member do not experience a painful popping, snapping, or giving away of the knee.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no supsected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; Instability	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	He has had taken a lot of fluoroquinolone antibiotics for chronic sinus infections in suspect this may have predisposed him to Achilles and iliopsoas tendon tear and tendinopathy, the best recommendation for this would be platelet rich plasma injection. ; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Hip pain initially started in May 2016. Right ankle pain started October 2016.; There has been treatment or conservative therapy.; Stabbing pain in right hip and right ankle.; Chiropractic care for 8 months and physical therapy for 6 months.	1

Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	severe arthrosis of the right femoral head, moderate arthrosis of left femoral head, degeneration of the acetabular cartilage R L with arthrosis. There appears to be a collapse of R L femoral head; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2/5/2007; There has been treatment or conservative therapy.; severe hip pain; severe arthrosis of the right femoral head, moderate arthrosis of left femoral head, degeneration of the acetabular cartilage R L with arthrosis. There appears to be a collapse of R L femoral head; inflammatory medication, pain meds, physical therapy	2
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.	4
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is receiving long-term steriod therapy (Prednisone or Cortisone).	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient has a documented limitation of their range of motion.	1

Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	Radiology Services	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has used a cane or crutches for greater than four weeks.; The patient has a documented limitation of their range of motion.	1
Disapproval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	Denied Not Medically Necessary Radiology Services	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, NSAIDs, muscle relaxer	1
Disapproval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	Denied Not Medically Necessary	; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	2
Disapproval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; mid to lower back pain; pain medication, muscle relaxers, NSAIDs, physical therapy, chiropractor	1
Disapproval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, NSAIDs, muscle relaxer	1
Disapproval	72131 CT LUMBAR SPINE, LOW BACK	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; mid to lower back pain; pain medication, muscle relaxers, NSAIDs, physical therapy, chiropractor	1
Disapproval	72131 CT LUMBAR SPINE, LOW BACK	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, NSAIDs, muscle relaxer	1
Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; 09/30/2014; There has been treatment or conservative therapy.; radiating pain and numbness from neck to back then legs; treatment and physical therapy	1
Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/18/2016; There has been treatment or conservative therapy.; Chronic pain,; Facet joint Injections, and epidural injections	1
Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; NSAIDs, muscle relaxers, pain medication	1

Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, muscle relaxers	1
Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, muscle relaxers, NSAIDs, back surgery 2007	1
Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, NSAIDs	2
Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, NSAIDs,	1
Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, NSAIDs, muscle relaxers	1
Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; physical therapy, pain medication, NSAIDs	1
Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid back pain; epidurals, physical therapy, muscle relaxer, NSAIDs	1
Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; OTC medication, physical therapy	1
Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, NSAIDs	1
Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and thoracic pain; physical therapy, pain medication, muscle relaxers, NSAIDs	1
Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; epidural injection, pain medication, NSAIDs	1

Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; No, the patient did not have six weeks of Chiropractic care related to this episode.; Tenderness on right side, after pain meds, neck is still hurting so they want to rule out what is causing the pain.	1
Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.	1
Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/18/2016; There has been treatment or conservative therapy.; Chronic pain,; Facet joint Injections, and epidural injections	1
Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid back pain; epidurals, physical therapy, muscle relaxer, NSAIDs	1
Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; OTC medication, physical therapy	1
Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, NSAIDs	1
Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and thoracic pain; physical therapy, pain medication, muscle relaxers, NSAIDs	1
Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Recent falls off her bed which caused more pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; First seen by MDO on 01/26/2016. Back pain 10+ yrs.; There has been treatment or conservative therapy.; Pain and worsening pain in mid to lower back region; Epidural injection; facet injection; pain meds; PT x 6wks 1yr ago	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1

Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; 09/30/2014; There has been treatment or conservative therapy.; radiating pain and numbness from neck to back then legs; treatment and physical therapy	1

Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; mid to lower back pain; pain medication, NSAIDs	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; NSAIDs, muscle relaxers, pain medication	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, muscle relaxers	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, muscle relaxers, NSAIDs, back surgery 2007	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, NSAIDs	2
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, NSAIDs,	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, NSAIDs, muscle relaxers	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; physical therapy, pain medication, NSAIDs	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; OTC medication, physical therapy	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, NSAIDs	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; right knee and back pain; physical therapy, back surgery, pain medication, NSAIDs	1

Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; epidural injection, pain medication, NSAIDs	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Pain going down to her legs and feet; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Disapproval	72196 MRI PELVIS	Radiology Services Denied Not Medically Necessary	; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
Disapproval	73200 CT ARM OR UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is not suspicion of upper extremity bone or joint infection.; The ordering physician is not an orthopedist or rheumatologist.; Yes this is a request for a Diagnostic CT	1
Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; bilateral hip and knee pain; pain medication, NSAIDs	2
Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; left thigh pain and back pain; pain medication	1
Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; right knee and back pain; physical therapy, back surgery, pain medication, NSAIDs	1
Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	He has had taken a lot of fluoroquinolone antibiotics for chronic sinus infections in suspect this may have predisposed him to Achilles and iliopsoas tendon tear and tendinopathy, the best recommendation for this would be platelet rich plasma injection. ; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Hip pain initially started in May 2016. Right ankle pain started October 2016.; There has been treatment or conservative therapy.; Stabbing pain in right hip and right ankle.; Chiropractic care for 8 months and physical therapy for 6 months.	1

Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	patient has pain 90% of the day with medication to calm pain. patient has lost time from work because of the pain.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/10/2013; There has been treatment or conservative therapy.; swelling, pain while walking, sitting, bending and sleeping; patient has taken inflammatory medications, pain medications, injection therapy	2
Disapproval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; bilateral hip and knee pain; pain medication, NSAIDs	2
Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; ; Yes this is a request for a Diagnostic CT	1
Approval	70450 CT BRAIN, HEAD		This is a request for a brain/head CT.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a recent head trauma or injury.	1
Approval	70450 CT BRAIN, HEAD		This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	4
Approval	70450 CT BRAIN, HEAD		This is a request for a brain/head CT.; This study is being requested for a history of stroke, (CVA) known or follow-up.	1
Approval	70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST		This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is immune-compromised.	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST		This is a request for neck soft tissue CT.; It is unknown if there has been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.	2
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST		This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	2
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.	3
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST		weakness, numbness; This study is being ordered for a neurological disorder.; 03/02/17; It is not known if there has been any treatment or conservative therapy.; weakness, numbness	1

Approval	71250 CT CHEST, THORAX	"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days.;" A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	2
Approval	71250 CT CHEST, THORAX	; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of mediastinal widening.; There is physical or radiologic evidence of a chest wall abnormality.; The ordering physician a is NOT a Surgeon, Pulmonologist, or Cardiologist.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.	1
Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; < Enter answer here - or Type In Unknown If No Info Given. >; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient.;" "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection.;" There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
Approval	71250 CT CHEST, THORAX	There is radiologic evidence of non-resolving pneumonia after at least 4 weeks of treatment.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient.;" A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	patient has sob, patient just recently quit smoking and is afraid she could possibly have black mold poisoning from her house; It is not known whether this study is requested to evaluate suspected pulmonary embolus.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.; Yes this is a request for a Diagnostic CT	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	2
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	weakness, numbness; This study is being ordered for a neurological disorder.;	
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	03/02/17; It is not known if there has been any treatment or conservative therapy.;	1
		weakness, numbness	2
		; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.;	
		There is weakness.;	
		Left-sided low back pain with left-sided sciatica I think it's appropriate to proceed with MRI of his L-spine given his CT scan that was done in 2015 that shows significant findings of foraminal stenosis and disc bulge at L3 and L4/L5. He continues to ex; The patient does not have new signs or symptoms of bladder or bowel dysfunction.;	
		The patient does not have a new foot drop.;	
		There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.;	
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The patient has acute or chronic back pain.;	
		The patient has Neurological deficit(s)	2
		NOne; This is a request for a Knee MRI.;	
		The study is requested for knee pain.;	
		The pain is from a known mass.;	
		The diagnosis of Mass, Tumor, or Cancer has not been established.;	
		The patient has not had recent plain films, bone scan or ultrasound of the knee.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT		
		This is a request for a foot MRI.;	
		"There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot.";	
		There is not a suspected tarsal coalition.;	
		There is a history of new onset of severe pain in the foot within the last two weeks.;	
		The patient has an abnormal plain film study of the foot other than arthritis.;	
		The patient does not have a documented limitation of their range of motion.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT		
		This is a request for a foot MRI.;	
		"There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot.";	
		There is not a suspected tarsal coalition.;	
		There is not a history of new onset of severe pain in the foot within the last two weeks.;	
		The patient has an abnormal plain film study of the foot other than arthritis.;	
		The patient has a documented limitation of their range of motion.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT		
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.;	
		The ordering physician is not an orthopedist.;	
		Non-acute Chronic Pain; Instability	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT		
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.;	
		The ordering physician is not an orthopedist.;	
		Non-acute Chronic Pain; Locking	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT		
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.;	
		The patient had recent plain films of the knee.;	
		The plain films were normal.;	
		The ordering physician is not an orthopedist.;	
		Non-acute Chronic Pain; Pain greater than 3 days	1

Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is a suspected tarsal coalition.	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion.	1
Approval	73725 MRA, MRI ANGIOGRAPHY LOWER EXTREMITY WITH/WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/02/2016; There has been treatment or conservative therapy; pain, swelling, large amount of drainage , redness, tenderness. arterial Doppler aortoiliac disease on left with pulsatile monophasic flow from the common femoral artery all the way to the foot small vessel disease on right calf; wound care for last three weeks and oral antibiotics	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	Intra-abdominal and pelvic swelling, mass and lump, unspecified site; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were unknown.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	Lower Abdominal Pain, Low Back Pain, Other fecal Abnormalities, Recent history of dysuria; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; The requested study is for pre-operative evaluation.; The study is requested by a surgeon, specialist or PCP on behalf of a specialist who has seen the patient.; Pre-op or post op evaluation; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	2
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Hematuria.; Other; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; patient has an umbilical hernia; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone; Yes this is a request for a Diagnostic CT	8
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; Palpable mass located in left lower abdomen near source of pain	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for hematuria.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A abnormality was found on the pancreas during a previous CT, MRI or Ultrasound.	1

Approval	74185 MRA, MRI ANGIOGRAPHY ABDOMEN WITH/WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/02/2016; There has been treatment or conservative therapy.; pain, swelling, large amount of drainage , redness, tenderness. arterial Doppler aortoiliac disease on left with pulsatile monophasic flow from the common femoral artery all the way to the foot small vessel disease on right calf; wound care for last three weeks and oral antibiotics	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study		1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt was brought to er with chest pain.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study		The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
Approval	93350 ECHO TTHRC R-T 2D --M-MODE COMPLETE REST&STRS		This is a request for a Stress Echocardiogram.; The patient has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The member has known or suspected coronary artery disease.	1
Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
Disapproval	70544 Mr angiography head w/o dye	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; August 2016; There has not been any treatment or conservative therapy.; Tingling to the left side of the body that started about a year ago and has progressed.He has trouble standing with an unsteady gait.	1
Disapproval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/28/2017; There has been treatment or conservative therapy.; dizziness, double vision, neck pain , numbness and tingling; physical therapy	1
Disapproval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; August 2016; There has not been any treatment or conservative therapy.; Tingling to the left side of the body that started about a year ago and has progressed.He has trouble standing with an unsteady gait.	1
Disapproval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	1
Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/28/2017; There has been treatment or conservative therapy.; dizziness, double vision, neck pain , numbness and tingling; physical therapy	1

Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	NEG XRAYs, FAILED MEDS; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/21/2016; There has been treatment or conservative therapy.; MODERATE PAIN WITH RANGE OF MOTION. RADIATING INTO SHOULDER; GIVEN FLEXERIL, GABUPENTIN, MEDROL DOSE PAK, CONSERVATIVE THERAPY.HOME EXERCISES	1
Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Caller does not know whether the patient is experiencing sensory abnormalities such as numbness or tingling.; caller will fax over clinicals	1
Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	NEG XRAYs, FAILED MEDS; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/21/2016; There has been treatment or conservative therapy.; MODERATE PAIN WITH RANGE OF MOTION. RADIATING INTO SHOULDER; GIVEN FLEXERIL, GABUPENTIN, MEDROL DOSE PAK, CONSERVATIVE THERAPY.HOME EXERCISES	1
Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	pt describes pain as severe; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; approximately 3 weeks ago; There has been treatment or conservative therapy.; Pain and tenderness in lower back; anti-inflammatories	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	pt describes pain as severe; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; approximately 3 weeks ago; There has been treatment or conservative therapy.; Pain and tenderness in lower back; anti-inflammatories	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	1
Disapproval	73221 MRI JOINT OF UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.;	1

Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Knee MRI.; It is not known if the study is requested for knee pain; The study is not requested for any of the standard indications for Knee MRI	1
Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	Sharp abdominal pain; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Disapproval	74181 MRI ABDOMEN	Radiology Services Denied Not Medically Necessary	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.;	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary		2
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; It is not known if the patient is diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	unknown; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is not know	1
Approval	70450 CT BRAIN, HEAD		This is a request for a brain/head CT.; There is a suspected or known brain tumor.; This study is being requested for known or suspected brain tumor, mass or cancer.	1
Approval	70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST		This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT	1
Approval	70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST		This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year)	1

Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for neck soft tissue CT.; The study is being ordered for something other than Trauma or other injury, Neck lump/mass, Known tumor or metastasis in the neck, suspicious infection/abcess or a pre-operative evaluation.; Yes this is a request for a Diagnostic CT	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. PRIOR PET SCAN SHOWED TUMOR MARKERS AND DID NOT REVEAL ANY ABNORMALITIES. SOME AREAS COULD NOT BE WELL VISUALIZED. THESE TESTS NOW RECOMMENDED.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	2
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; Yes this is a request for a Diagnostic CT	7
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.	2
Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	member has grave's disease; There is not a suspicion of an infection or abscess.; This examination is NOT being requested to evaluate lymphadenopathy or mass.; There is not a suspicion of a bone infection (osteomyelitis).; There is NOT a suspicion of an orbit or face neoplasm, tumor, or metastasis.; This is a request for an Orbit MRI.; There is not a history of orbit or face trauma or injury.	1
Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST		1

Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	; This study is being ordered for Congenital Anomaly.; ; There has been treatment or conservative therapy.; ; 2015 MRI revealed a tiny pituitary adenoma. This is a f/u MRI; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Adrenal insufficiency; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	No imaging, elevated prolactin level, discharge in left nipple and lump under the areola. She is having some headaches off and on. They are looking closely at the pituitary.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; It is not known if the tumor is a pituitary tumor or pituitary adenoma.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	NOne; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.	1

Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This is a request for an Internal Auditory Canal MRI.; There is not a suspected Acoustic Neuroma or tumor of the inner or middle ear.; There is not a suspected cholesteatoma of the ear.; The patient has not had a recent brain CT or MRI within the last 90 days.; There are no neurologic symptoms or deficits such as one-sided weakness, speech impairments, vision defects or sudden onset of severe dizziness.; This is not a pre-operative evaluation for a known tumor of the middle or inner ear.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	2
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	5
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing fatigue or malaise.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	4
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.	1

Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are physical findings or laboratory values indicating abnormal pituitary hormone levels.	4
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; It is not known if a biopsy has been completed to determine tumor tissue type.; It is not known if there are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are physical findings or laboratory values indicating abnormal pituitary hormone levels.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for a tumor.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.	2
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	thyroid issues and cycles have stopped, pre diabetic; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1

Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	unknown; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; It is not known if the tumor is a pituitary tumor or pituitary adenoma.	1
Approval	71250 CT CHEST, THORAX	; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Approval	71250 CT CHEST, THORAX	; This study is being ordered for Congenital Anomaly.; ; There has been treatment or conservative therapy.; ;	1
Approval	71250 CT CHEST, THORAX	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; follow up cts needed see notes.; It is not known if there has been any treatment or conservative therapy.;	1
Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus.	1
Approval	71250 CT CHEST, THORAX	PRIOR PET SCAN SHOWED TUMOR MARKERS AND DID NOT REVEAL ANY ABNORMALITIES. SOME AREAS COULD NOT BE WELL VISUALIZED. THESE TESTS NOW RECOMMENDED.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Approval	71250 CT CHEST, THORAX	She had a history of a posterior mediastinal paraspinal mass at the level of the carina many years ago so he was just doing follow-up on that. Here's what his note from 2010 said: Of interest, she had an MRI of the thoracic spine on August 10, which inci; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Approval	71250 CT CHEST, THORAX	This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.	1

Approval	71250 CT CHEST, THORAX	This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.	2
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; "The patient is not being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.;" Known Tumor with or without metastasis; ; No, the patient does not have new or changing neurological signs or symptoms.	1
Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for suspicion of pelvic inflammatory disease or abscess.	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	; This study is being ordered for Congenital Anomaly.; ; There has been treatment or conservative therapy.; ;	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	left adrenal and bi lateral mass, pancreatic mass, checking for stability, 6 month post to see if surgery is needed; This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; No,there is not an abdominal and pelvic or retroperitoneal mass that has been confirmed.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered as a pre-op or post op evaluation.; The requested study is for post-operative evaluation.; The requested study is a first follow up study for a post operative complication.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is a request for initial staging of a known tumor other than prostate.; No, this is not a request for follow up to a known tumor or abdominal cancer.	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is a request for initial staging of a known tumor other than prostate.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes this is a request for a Diagnostic CT	1

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; Yes, there has been a recent abdominal CT scan.; No, this is not a repeat of a CT of the abdomen within 6 weeks.	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; Yes, this is a request for follow up to a known tumor or abdominal cancer.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are clinical findings or indications of Diabetic patient with gastroparesis.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are clinical findings or indications of unexplained weight loss of greater than 10% body weight in 1 month; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; follow up cts needed see notes.; It is not known if there has been any treatment or conservative therapy.;	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; The reason for the study is known tumor.; This study is being ordered for follow-up.; It is not known if the patient is presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient is female.; The last Abdomen/Pelvis CT was performed more than 10 months ago.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; <Enter Additional Clinical Information>; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; thyroid ULTRA indicating dysphasia. Fatigue,; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is not presenting new symptoms.; The patient has had 4 or more follow-up abdomen MRIs.; The last abdomen MRI was performed more than 6 months ago.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; It is not known if the ordering physician is an oncologist, urologist, gastroenterologist, or surgeon.; < Enter answer here - or Type In Unknown If No Info Given. >	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is diabetic.; The patient is less than 45 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY		Radiology Services	This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Head/Neck Cancer.; The patient had a thyroidectomy and radioiodine ablation.; The patient has a serum thyroglobulin level greater than 10ng/mL.; The patient had a negative whole body I-131 scan.; The patient has Thyroid cancer.; This would be the first PET Scan performed on this patient for this cancer.	1
Disapproval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Denied Not Medically Necessary	Radiology Services	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for a tumor.	1
Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Denied Not Medically Necessary	Radiology Services	10/2016 Injured back lifting a tv Gabapentin Tramadol Flexeril Lyrica; The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; The patient has none of the above.; This procedure is being requested for Trauma or recent injury	1
Disapproval	74150 CT ABDOMEN WITHOUT CONTRAST	Denied Not Medically Necessary	Radiology Services	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; Yes, there has been a recent abdominal CT scan.; No, this is not a repeat of a CT of the abdomen within 6 weeks.	1
Approval	70450 CT BRAIN, HEAD			This is a request for a brain/head CT.; There is a suspected or known brain tumor.; This study is being requested for known or suspected brain tumor, mass or cancer.	1
Approval	70450 CT BRAIN, HEAD			This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
Approval	70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST			"This request is for face, jaw, mandible CT.239.8"; "There is not a history of serious facial bone or skull, trauma or injury.fct"; "There is suspicion of neoplasm, tumor or metastasis.fct"	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST			This is a request for neck soft tissue CT.; It is unknown if there has been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is not a suspicion of an infection or abscess.; This is not being ordered by an ENT specialist.; Yes this is a request for a Diagnostic CT	1

Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Enter answer here - or Type In Upknown If No Info Given.PATIENT IS HAVING NAUSEA, VOMITING, ALTERED MENTAL STATUS AND DIZZINESS. HE HAS HAD AN EGD THAT WAS NORMAL.US WAS ALSO NORMAL. HE IS HIV POSITIVE. WE ARE TRYING TO R/O ANY BRAIN ISSUES.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient is experiencing dizziness.	1
Approval	71250 CT CHEST, THORAX	"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Approval	71250 CT CHEST, THORAX	"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for Inflammatory/ Infectious Disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; There has been treatment or conservative therapy.; abnormal weight loss, abdominal pain,; medications,	1
Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/2016; There has been treatment or conservative therapy.; chest and abdominal pain; antibiotics	1
Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/26/2016; There has not been any treatment or conservative therapy.; Left lower quadrant abdominal pain	1

Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/28/2016; There has not been any treatment or conservative therapy.; Epigastric pain, nausea	1
Approval	71250 CT CHEST, THORAX	; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for known tumor.;	3
Approval	71250 CT CHEST, THORAX	Yes this is a request for a Diagnostic CT A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus.	1
Approval	71250 CT CHEST, THORAX	Abnormal X-Ray, dysphasia; "Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	barium swallow; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Dec 6, 2016; There has been treatment or conservative therapy.; heartburn, constipation, vomiting, abdominal pain, increasing gas, reflux; medications	1
Approval	71250 CT CHEST, THORAX	Chest pain and dysphasia. Having throat spasms. Scheduled for esophageal mobility testing.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Had a liver transplant 2/4/2015 due to liver cancer. Last CT of chest showed changes in lungs. This is to check those changes.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Approval	71250 CT CHEST, THORAX	none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; on going for years; There has been treatment or conservative therapy.; see faxed info; cts for stones	1

Approval	71250 CT CHEST, THORAX	Patient currently being evaluated for a liver transplant. Imaging is following treatment to surveillance for mets.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is NOT a smoker nor do they have a history of smoking.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Patient currently listed for a liver transplant with abnormal finding on previous CT Chest. Imaging is to evaluate any changes in a patient with hepatocellular carcinoma.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Pt had liver transplant in 2008, developing ascites, on long term immunotherapy; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/2017; There has been treatment or conservative therapy.; accumulation of fluid in the abdominal area; Post liver transplant This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.	1
Approval	71250 CT CHEST, THORAX	Tumor; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Approval	71250 CT CHEST, THORAX	will fax clinical; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of bowel or bladder dysfunction.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	1
Approval	72192 CT PELVIS WITHOUT CONTRAST	; This study is being ordered due to known or suspected infection.; "The ordering physician is a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
Approval	72192 CT PELVIS WITHOUT CONTRAST	Had a liver transplant 2/4/2015 due to liver cancer. Last CT of chest showed changes in lungs. This is to check those changes.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Approval	72196 MRI PELVIS	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/1/16; There has not been any treatment or conservative therapy.; ABDOMINAL PAIN , DIVERTICULITIES	1
Approval	72196 MRI PELVIS	atypical hemangioma in left aspect of sacrum 6 month follow up; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
Approval	72196 MRI PELVIS	Dr is ordering MRI Pelvis (Defecography) due to Constipation due to outlet dysfunction.; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
Approval	72196 MRI PELVIS	None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/17/2017; There has been treatment or conservative therapy.; Severe abd pain RLQ pain; Ultrasound small bowel follow through hida scan	1
Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for suspicion of pelvic inflammatory disease or abscess.	4
Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The study is being ordered for joint pain or suspicion of joint or bone infection.; The study is being ordered for bilateral hip avascular necrosis.	1
Approval	72196 MRI PELVIS	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.; k92.2 GI bleed iron deficiency, Abdominal pain; flagyl and Doxycycline, colonoscopy	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST		6

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; It is not known if this is a request for initial staging of a known tumor other than prostate.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; No,there is not an abdominal and pelvic or retroperitoneal mass that has been confirmed.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is not known if there are new symptoms including hematuria.; It is not known if there are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; It is not known if this is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	2
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/2016; There has been treatment or conservative therapy.; chest and abdominal pain; antibiotics	1

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/26/2016; There has not been any treatment or conservative therapy.; Left lower quadrant abdominal pain	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/28/2016; There has not been any treatment or conservative therapy.; Epigastric pain, nausea	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	1.4 cm hyperechogenic lesion right lobe of the liver may reflect hemangioma but cannot be definitively characterized. Other foci presumably reflect cysts. Consider biphasic postcontrast CT to further evaluate these findings.; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Abdominal pain, constipation, abnormal imaging, gallstones; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Abdominal pain: Will obtain CT abdomen to evaluate for possible umbilical hernia; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Abnormality of AFP, Hx Of Hep C; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	CIRRHOSIS OF THE LIVER, ELEVATED LIVER FUNCTION TEST AND AFP, HISTORY OF HEPATIC ENCEPHALOPATHY; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Complicated PMHx. The GI symptoms may be a manifestation of EDS: recommend colonoscopy and CT to assess further.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Continued pain.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	ELEVATED AFP; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	elevated LFTs and is likely to have NASH.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Having epigastric and abdominal pain; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	None; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Pain; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Patient had ultrasound in August that showed cirrhosis. She had a liver biopsy in January that showed Stage 0 fibrosis. Need to get closer imaging of the liver. Ordering Triple Phase CT scan.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Pt had liver transplant in 2008, developing ascites, on long term immunotherapy; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/2017; There has been treatment or conservative therapy.; accumulation of fluid in the abdominal area; Post liver transplant	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is a request for initial staging of a known tumor other than prostate.; No, this is not a request for follow up to a known tumor or abdominal cancer.	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is a request for initial staging of a known tumor other than prostate.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes this is a request for a Diagnostic CT	1

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; No, there has not been a recent abdominal CT scan.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; Yes, there has been a recent abdominal CT scan.; No, this is not a repeat of a CT of the abdomen within 6 weeks.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; Yes, this is a request for follow up to a known tumor or abdominal cancer.; Yes this is a request for a Diagnostic CT	3
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; There is neither a known nor a strong suspicion of kidney or ureteral stones.; This patient is experiencing hematuria.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.	4
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT	6
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a vascular disease.; The requested studies are being ordered for known or suspected blood clot, thrombosis, or stenosis and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.	1

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; Yes this is a request for a Diagnostic CT	3
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are known or endoscopic findings of Acute Non-ulcerative Colitis.	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	8
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	18
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are clinical findings or indications of unexplained abdominal pain in patient over 75 years of age.	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are clinical findings or indications of unexplained weight loss of greater than 10% body weight in 1 month	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.	2
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Tumor; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1

Approval	74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCONTRAST	This is a request for CT Angiography of the Abdomen and Pelvis.	2
Approval	74175 CT ANGIOGRAPHY ABDOMEN	Yes, this is a request for CT Angiography of the abdomen.	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were unknown.; Yes this is a request for a Diagnostic CT	2
Approval	74176 CT ABD & PELVIS W/O CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; It is not known if this is the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2/14/17; It is not known if there has been any treatment or conservative therapy.; ABD pain, CEA 407	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an lipase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	1. Abdominal pain, blood in stool  57 yo originally self referred for diverticulitis  He was seen in the ED 5/31 with abdominal pain and started on Abx Reports that he was admitted in Branson with diverticulitis LOS 3 days CT in Branson only showed ; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	1. Gastrointestinal hemorrhage  2. Chronic gastritis  Ashley is here with complaint it's been going on since around Thanksgiving. She is waking up every morning around 3:30 or 4:00 with epigastric abdominal discomfort nauseous and vomiting. She is p; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	80lb loss in the past 3 years; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an lipase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	Abdominal pain, hematochezia, constipation, heartburn, change in bowel habits; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	barium swallow; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Dec 6, 2016; There has been treatment or conservative therapy.; heartburn, constipation, vomiting, abdominal pain, increasing gas, reflux; medications	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	Chronic Hexi patient; Rectal bleeding - 8 out of 10 pain level. Rebound gastric tenderness.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	did a abdominal exam has rigidity, tender to potion no mass was present; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT have had a previous studies, US of abdomen-showed fatty infiltration of liver; This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	Left lower quadrant pain with concern for diverticulitis. Patient has had diverticulitis in past with same symptoms present.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	None; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; on going for years; There has been treatment or conservative therapy.; see faxed info; cts for stones	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	PATIENT HAD ABDOMEN ULTRASOUND IN 12/09/2016; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	patients Crohns disease markers were elevated.. patient has continuous diarrhea, nausea and vomiting; This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; The patient does not have a fever and elevated white blood cell count or abnormal amylase/lipase.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient has Crohn's Disease.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	Pt has had a small bowel follow through and upper gi series, labs, stool study and ultrasound; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	pt. have diarrhea 10 times a day; pain 10/10; constant vomiting; dry heaves and; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were normal.	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	26

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	120
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT	2
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; The requested study is for pre-operative evaluation.; The study is requested by a surgeon, specialist or PCP on behalf of a specialist who has seen the patient.; Pre-op or post op evaluation; Yes this is a request for a Diagnostic CT	2
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Hematuria.; Other	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Hematuria.; Other; Yes this is a request for a Diagnostic CT	2
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of unexplained abdominal pain in patient over 75 years of age.; Other; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of unexplained weight loss of greater than 10% body weight in 1 month; Other	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of unexplained weight loss of greater than 10% body weight in 1 month; Other; Yes this is a request for a Diagnostic CT	7

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Diverticulitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other;	2
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; <Enter Additional Clinical Information>; Yes this is a request for a Diagnostic CT	9
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; ; Yes this is a request for a Diagnostic CT	4
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; 52-year-old with recent bleeding that was likely diverticular in origin. Looking for the possibility of small bowel pathology, Meckel's diverticulum, et cetera. Requesting CT imaging of the small bowel.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Abd pain urgency; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; abdominal pain and changing bowel pattern; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Abdominal pain, ongoing, referred to this doctor 2/23 for gastritis; Yes this is a request for a Diagnostic CT	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; CROHNS DISEASE OF THE LARGE INTESTINE WITH COMPLICATIONS,ACUTE ONSET ABD PAIN,ABNORMAL LABS,R/O OBSTRUCTION OR ACUTE PROCESS,PT WITH COMPLICATED HX OF CROHNS DISEASE; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; diarrhea, persistent right quadrant pain, a risk for fibrosing colonopathy; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Epigastric abdominal pain, Diarrhea, Change in bowel habits, Disease of stomach, and diverticulosis	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; k58.2; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; left lower quad and back pain	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; ongoing severe pain for 10 months, bloating;; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Patient had CT Abdomen/Pelvis performed on January 30th, 2017 that revealed intussusception of jejunum. CT enterography of small bowel being ordered to evaluate further!; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; previous CT shows possible IBS, Pt still having pain, nausea an vomiting, recently had colonoscopy showed mild inflammation in the small intestines; Yes this is a request for a Diagnostic CT	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Pt has diarrhea, trying to r/u pancreatic or any other pathology, c/o of chronic cough, shortness of breath, vomiting, abdominal swelling, cramps and change in bowel movements; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; replaces T# 055611310 which was ab ct only; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Right upper quadrant pain, Irritable bowel syndrome, Loss of appetite, Chronic Diarrhea with now weight loss: flushing, palpitations, etc: Is undergoing 24 hour urine collection per endocrinology: concern would be mastocytosis (need 5 HIA collection), neu	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; The patient reports periumbilical for the past 13 yrs. Pain described as sharp, cramping, dull, squeezing, and discomfort. The pain worsens when her chronic pain medication usually wears off. She also reports nausea and vomiting for the past 3 weeks on a	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; UNKNOWN	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; UNKNOWN; Yes this is a request for a Diagnostic CT	5
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor	3
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT	13

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement; Yes this is a request for a Diagnostic CT	4
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is no evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement; <Enter Additional clinical information >; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is not known if there are new symptoms including hematuria.; It is not known if there are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; It is not known if there is a suspicion of an adrenal mass.; It is not known if this is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; <Enter Additional Clinical Information>; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.; Suspicious Mass or Tumor	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; unknown; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis and the patient is undergoing active treatment.; Known Tumor, Cancer, Mass, or Rule out metastases; Yes this is a request for a Diagnostic CT	5
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is a request for initial staging of a known tumor other than prostate.; Known Tumor, Cancer, Mass, or Rule out metastases	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is a request for initial staging of a known tumor other than prostate.; Known Tumor, Cancer, Mass, or Rule out metastases; Yes this is a request for a Diagnostic CT	3
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There has NOT been a recent (within the last 3 months) Abdomen and/or Pelvis CT.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; Known Tumor, Cancer, Mass, or Rule out metastases; yes, there is a palpable or observed abdominal mass.; Yes this is a request for a Diagnostic CT	2
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is an abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; Known Tumor, Cancer, Mass, or Rule out metastases; No, there is not a palpable or observed abdominal mass.	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is an abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; Known Tumor, Cancer, Mass, or Rule out metastases; No, there is not a palpable or observed abdominal mass.; Yes this is a request for a Diagnostic CT	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; Known Tumor, Cancer, Mass, or Rule out metastases; No, there is not a palpable or observed abdominal mass.; Patient has recent colonoscopy and egd that showed patient to have malignant carcinoid tumor of duodenum, high grade dysplasia in colonic adenoma, and a hiatal hernia. Order CT scan to make sure there are no other tumors throughout the GI tract.	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has been completed.; The results of the contrast/barium x-ray were normal.; The patient had an endoscopy.; The endoscopy was normal.; Yes this is a request for a Diagnostic CT	4
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has been completed.; The results of the contrast/barium x-ray were normal.; The patient had an endoscopy.; The endoscopy was normal.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	unknown; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for acute pain.; There has not been a physical exam.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	We need to check the patient for infection, abscesses, inflammatory disease; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
Approval	74181 MRI ABDOMEN		1
Approval	74181 MRI ABDOMEN	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Approval	74181 MRI ABDOMEN	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/1/16; There has not been any treatment or conservative therapy.; ABDOMINAL PAIN , DIVERTICULITIES	1
Approval	74181 MRI ABDOMEN	5. Screening for HCC: The patient had an ABUS (4.18.2016) concerning for thrombus therefore, will schedule MRI w EOVI protocol to further characterize ABUS findings.; This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.	1
Approval	74181 MRI ABDOMEN	Autoimmune hepatitis. Her disease has been difficult to control in the past. Currently, her liver chemistries are not completely normal but they have only rarely been normal. She is not a candidate for budesonide given her cirrhosis on biopsy; This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.	1

Approval	74181 MRI ABDOMEN	Enter answer here She has had epigastric pain that started September 2016,pain was significant when it stated her pain is episodic most of the time she has abd pain , the pain worse after meals. she has associated shortness of breath with the pain. she ha; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; Describe primary symptoms here epigastric Pain,episodic pain high level of lipase, Disease of stomach and duodenum - or Type In Unknown If No Info Given; Describe treatment / conservative therapy here; H.pylori (neg) 9/14/16; Abd U/s 9/16/16; Hida Scan 1/24/17; EGD 1/27/17; labs 2/2/17 - or Type In Unknown If No Info Given	1
Approval	74181 MRI ABDOMEN	MRI MRCP order as a follow-up and further evaluation of pancreatic cyst, necrosis; This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.	1
Approval	74181 MRI ABDOMEN	None; This request is for an Abdomen MRI.; This study is being ordered for pre-operative evaluation.; Surgery is not planned for within 30 days.	1
Approval	74181 MRI ABDOMEN	None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/17/2017; There has been treatment or conservative therapy.; Severe abd pain RLQ pain; Ultrasound small bowel follow through hida scan	1
Approval	74181 MRI ABDOMEN	Pt. has a abnormal CT scan, elevated lab work, CEA & CA19-9. Pt. has obstructive jaundice & we are looking for a tumor or obstruction in the biliary tract.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Approval	74181 MRI ABDOMEN	The P t has liver cancer, hep C and scirosis.; This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; There are NO physical findings or abnormal blood work consistent with peritonitis, pancreatitis or appendicitis.; There is active or clinical findings of ulcerative colitis, bowel inflammation or diverticulitis.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist.";	15
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist."; < Enter answer here - or Type In Unknown If No Info Given. >	3

Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist.;" Dx at 16 Crohn's disease with fistula of small intestines; loose stools; small bowel obstruction; has a significant high risk of complication	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist.;" Elevated liver functions and enlarged pancreas on recent ultrasound and ct scan.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist.;" Epigastric pain and pancreatic cyst.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist.;" Epigastric is mildly tender on physical exam and her LFT's are elevated.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist.;" He describes sudden onset diarrhea 1 year ago, now occurring 10-15 mins after eating. It is watery and occurs 6-10 times/day. Prior to this, he had 1-2 BMs/week only. He lost 30 lbs initially, his weight is now stable at 120 lbs. He has nocturnal incontin	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist.;" Sepsis, due to unspecified organism	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist.;" Wendy Fry is a 37 y.o. female with a history of Crohn's disease (small bowel) diagnosed in 1997. She presented with V+D, anorexia and fevers at diagnosis. She cannot recall where the disease is located but thinks it is the small bowel. She has not had GI	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for known or suspected vascular disease.; The ordering physician is not a surgeon.; There are plain film or ultrasound evidence of vascular abnormality.; history of primary biliary cholangitis, auto immune hepatitis,presistent elevated liver function test	1

Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is not presenting new symptoms.; The patient has had 3 or fewer follow-up abdomen MRIs.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; < Enter answer here - or Type In Unknown If No Info Given. >	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is not presenting new symptoms.; The patient has had 3 or fewer follow-up abdomen MRIs.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; 02/29/2016; multilobulated 14 x 17 mm cyst in the pancreatic tail. Again, this could represent a simple cyst, or even a cystic neoplasm of the pancreas.; This is a one year follow up	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is not presenting new symptoms.; The patient has had 3 or fewer follow-up abdomen MRIs.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; 09/01/2016; Impression: Avidly arterial enhancing liver lesion within segment six measuring 1 cm which shows persistent and progressive contrast enhancement with central enhancing nodule, may represent focal nodular hyperplasia. Suggest followup in 6	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is not presenting new symptoms.; The patient has had 3 or fewer follow-up abdomen MRIs.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; Possible IPMN in the head of the pancreas, will follow with MRI. Patient is not candidate for surgical intervention due to his liver disease.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is not presenting new symptoms.; The patient has had 3 or fewer follow-up abdomen MRIs.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; unknown	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is presenting new symptoms.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; N/A	1

Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is presenting new symptoms.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; Rectal bleeding, constant nausea and a 'full feeling'.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for follow-up.; The patient is presenting new signs or symptoms.; The patient did NOT have chemotherapy, radiation therapy or surgery in the last 3 months.; They had an Abdomen MRI in the last 10 months.	2
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for follow-up.; The patient is undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon.";	4
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for follow-up.; The patient is undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; Patient is currently listed for a liver transplant, imaging is for surveillance of treated hepatocellular carcinoma.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for staging.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon.";	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for staging.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; Patient is being evaluated for a liver transplant. Imaging is to determine tumor size.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for staging.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; staging of liver cancer	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for organ enlargement.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A abnormality was found on the pancreas during a previous CT, MRI or Ultrasound.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for organ enlargement.; There is an ultrasound or plain film evidence of an abdominal organ enlargement.;	2

Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for organ enlargement.; There is an ultrasound or plain film evidence of an abdominal organ enlargement.; CT SCAN WAS PERFORMED AND THE LIVER MEASURED 21 CM. THERE IS ALSO A LOW DENSITY LESION ON THE LIVER MEASURING 10MM.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for organ enlargement.; There is an ultrasound or plain film evidence of an abdominal organ enlargement.; multiple lesions need to be looked at annually	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for organ enlargement.; There is an ultrasound or plain film evidence of an abdominal organ enlargement.; Other specified diseases of biliary tract	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for organ enlargement.; There is an ultrasound or plain film evidence of an abdominal organ enlargement.; Will order repeat MRE to evaluate previously noted mid small bowel lesions and thickening. If resolved will continue to peel back therapy.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for pre-operative evaluation.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; EVALUATION FOR A LIVER TRANSPLANT	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for pre-operative evaluation.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; Patient is currently being evaluated for a liver transplant.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for pre-operative evaluation.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; Patient is currently being evaluated for listing for a liver transplant. Imaging is to abnormalities and lesions.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for pre-operative evaluation.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; unknown	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study.";	7
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; < Enter answer here - or Type In Unknown If No Info Given. >	7

Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; abd ct showed possible lesion on 12/15/2016	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; CT imaging of her abdomen showed a 4.9x3.5cm pseudocyst in the tail of the pancreas along with para-aortic and retroperitoneal lymphadenopathy. The pseudocyst was slightly larger than it was on a previous CT abd from 1/2016 which showed it to be 4.5x3.4cm	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Ct showed masslike appearance in the second portion of the duodeum and wall thickening in common bile duct. She has weight loss, nausea and vomiting, abdom pain.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; follow up MRI	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; None	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; pt has known cirrhosis,	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has not had an abdominal ultrasound, CT, or MR study."; Elevated liver enzymes	1

Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; It is not known if the patient had and abdominal ultrasound, CT or MR study.; < Enter answer here - or Type In Unknown If No Info Given. >	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Liver lesions This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study."; < Enter answer here - or Type In Unknown If No Info Given. >	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study."; Abdominal Ultrasound should can not rule out liver mass vs fatty liver sparing.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study."; Patient has a history of cirrhosis and has complaints of LUQ abdominal pain. Had recent ultrasound of abdomen and there were multiple hepatic masses noted. Recommended MRI	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study."; Patient has MRI last year that showed a pancreatic lesion. Recommended one year follow up MRI.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study."; Pt had a abdom Ultrasound that showed a 2.1 cm liver lesion and bilateral renal cyst. He has left upper quad pain.	1

Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; It is not known if the patient had an abdominal ultrasound, CT or MR study.; abnormal US showing a mass that has occurred within the last 6 months	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A abnormality was found on the pancreas during a previous CT, MRI or Ultrasound.	2
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.;	2
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; < Enter answer here - or Type In Unknown If No Info Given. >	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; 42-year-old with multiple GI complaints and a significant history of small bowel resection. He has also had a past history of abnormal liver tests. Recent CBC, CMP, TTG Ab, and thyroid testing were relatively unremarkable. Odd finding in cecum.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; elevated AFP	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; has cirrhosis of the liver	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; male with a history of Crohn's disease (terminal ileum) diagnosed in 2007 in Conway	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; pt had US showed dilated biliary tree	1

Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; R/O abnormality in the tail of the pancreas, such as a pancreatic cyst.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; She describes the pain as dull and radiating to her back and flanks. She denies any diarrhea or steatorrhea. A 90 minute GES was completed and report reviewed which showed 48% residual at 90 minutes. She has not had another GES but she states that when Dr.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; She reports a flare of symptoms for the past 2 weeks. Pain in the RIF going through to the back -beginning to ease now. She has been assessed at outside facilities and has had appendicitis excluded. Weight has decreased 11 lbs in the past 2 weeks accordin	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; unknown	2
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; Vomiting, bloody stool, abdominal pain, previous pancreatitis	1
Approval	74181 MRI ABDOMEN	This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.	1
Approval	74181 MRI ABDOMEN	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.; k92.2 GI bleed iron defeciency, Abdominal pain; flagyl and Doxycycline, colonoscopy	1
Approval	74185 MRI ABDOMEN WITH/WITHOUT CONTRAST	This is a request for a MR Angiogram of the abdomen.	1

Approval	74261 CT Colonography, diagnostic without contrast	; This patient has a medical problem that makes him/her unsuitable for conventional colonoscopy.; The member had colon screening studies completed prior to this request.	1
Approval	74261 CT Colonography, diagnostic without contrast	patient has exertional chest pain; This patient has a medical problem that makes him/her unsuitable for conventional colonoscopy.; The member had colon screening studies completed prior to this request.	1
Approval	74261 CT Colonography, diagnostic without contrast	Patient needs CT colon due to not able to tolerate anesthesia due to abnormal EKG, pt has iron def anemia; This patient has a medical problem that makes him/her unsuitable for conventional colonoscopy.; The member had colon screening studies completed prior to this request.	1
Approval	74261 CT Colonography, diagnostic without contrast	PT was unable to complete it bc they were only able to go so far in the colon due to angulation; This patient does not have a medical problem that makes him/ her unsuitable for conventional colonoscopy.; This patient has undergone an attempted but incomplete conventional colonoscopy.; The member had colon screening studies completed prior to this request.	1
Approval	74263 CT Colonography, screening	This is a request for CT Colonoscopy for screening purposes only.	1
Approval	75571 Coronary Artery Calcium Score, EBCT	Mrs. Cook is a 63-year-old with cryptogenic cirrhosis referred for a liver transplant evaluation. Her MELD is only at 14. She is having a follow up EGD later today. Although she is frail, will start her LT evaluation. Diagnoses are as follows: 1. Cryptog; This is a request for a CT scan for evaluation of coronary calcification.	1
Approval	75571 Coronary Artery Calcium Score, EBCT	Patient currently being evaluated for a liver transplant, patient has a history of hypertension and short of breath. Imaging is to determine abnormal cardiac activities.; This is a request for a CT scan for evaluation of coronary calcification.	1
Approval	75571 Coronary Artery Calcium Score, EBCT	Patient currently being evaluated for a liver transplant.; This is a request for a CT scan for evaluation of coronary calcification.	2
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient currently being evaluated for a liver transplant.; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient with HCC currently being evaluated for a liver transplant with abnormal EKG.; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78813 PET IMAGING WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Head/Neck Cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; The patient does NOT have Thyroid or Brain cancer.; 1 PET Scans has already been performed on this patient for this cancer.	1

Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; It is unknown why the study is being ordered.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.	1
Approval	S8037 mrcp	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; The patient does not require evaluation for a congenital defect of the pancreatic or biliary tract.; It is not known if MRCP will be used to identify a pancreatic or biliary system obstruction that cannot be opened by ERCP.; It is not known if patient is an infant or young child, and not an adult who is debilitated or uncooperative in such a manner that ERCP is unsafe or cannot be performed.; "The patient has neither a documented allergy to iodine-based contrast materials, or a general history of allergic responses."; It is not known if patient has acute pancreatitis.	1
Approval	S8037 mrcp	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; The patient does not require evaluation for a congenital defect of the pancreatic or biliary tract.; The MRCP will not be used to identify a pancreatic or biliary system obstruction that cannot be opened by ERCP.; "The patient is not an infant or young child, and not an adult who is debilitated or uncooperative in such a manner that ERCP is unsafe or cannot be performed."; "The patient has neither a documented allergy to iodine-based contrast materials, or a general history of allergic responses."; The patient does not have acute pancreatitis.	1
Approval	S8037 mrcp	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	2
Approval	S8037 mrcp	; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP. 6mos follow-up for pancreatic cyst; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Approval	S8037 mrcp	abdominal pain elevated liver function; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Approval	S8037 mrcp	elevated liver function , normal ab/ pel ct; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Approval	S8037 mrcp	elevated liver function , normal ab/ pel ct; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1

Approval	S8037 mrcp	<p>Enter answer here She has had epigastric pain that started September 2016,pain was significant when it stated her pain is episodic most of the time she has abd pain , the pain worse after meals. she has associated shortness of breath with the pain. she ha; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; Describe primary symptoms here epigastric Pain,episodic pain high level of lipase, Disease of stomach and duodenum - or Type In Unknown If No Info Given; Describe treatment / conservative therapy here; H.pylori (neg) 9/14/16; Abd U/s 9/16/16; Hida Scan 1/24/17; EGD 1/27/17; labs 2/2/17 - or Type In Unknown If No Info Given</p>	1
Approval	S8037 mrcp	<p>history of nausea and abdominal pain elevated liver and lipase this is to rule out biliary obstruction biliary rubin is 9.1; This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; The patient does not require evaluation for a congenital defect of the pancreatic or biliary tract.; It is not known if MRCP will be used to identify a pancreatic or biliary system obstruction that cannot be opened by ERCP.; "The patient is not an infant or young child, and not an adult who is debilitated or uncooperative in such a manner that ERCP is unsafe or cannot be performed."; "The patient has neither a documented allergy to iodine-based contrast materials, or a general history of allergic responses."; The patient does not have acute pancreatitis.</p>	1
Approval	S8037 mrcp	<p>hx of pancreatitis; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.</p>	1
Approval	S8037 mrcp	<p>Patient has a history of fatigue and nausea. Also complains of abdominal pain in her lower abdomen along with bloating and cramping. She had recent liver biopsy for elevated liver functions. Pathology showed occasional microgranulomas within the lobules. ; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.</p>	1
Approval	S8037 mrcp	<p>PREVIOUS CT HAS BEEN PERFORMED AT THE ER SHOWING INFLAMMATION AND PANCREATITIS; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.</p>	1
Approval	S8037 mrcp	<p>pt is now having nausea and vomiting, cyst on liver and pancreas. Pt has completed chemo tx radiation tx for colon cancer. Pt's mother & father & brother all died of either liver or pancreatic cancer.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.</p>	1
Approval	S8037 mrcp	<p>R/O ductal disease; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.</p>	1

Approval	S8037 mrcp		She had similar pain when she had an ERCP with stone removed 11/2015 and 9/2016 with gravel removed. She states she has a fever of up to 102 2-3 days a week. If the MRCP is positive we will continue with the ERCP.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
			This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; The patient does not require evaluation for a congenital defect of the pancreatic or biliary tract.; The MRCP will be used to identify a pancreatic or biliary system obstruction that cannot be opened by ERCP.	
Approval	S8037 mrcp		This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient has an altered biliary tract anatomy that precludes ERCP.	1
Approval	S8037 mrcp		This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has undergone unsuccessful ERCP and requires further evaluation.	1
Approval	S8037 mrcp		Unexplained pancreatitis, normal liver testing, normal ultrasound, nausea, vomiting, epigastric pain, normal EGD, normal CT in January; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Approval	S8037 mrcp		UNKNOWN; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Approval	S8037 mrcp		US report suggested MRI / MRCP be done to evaluate the dilated common duct.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Approx June / July 2016; There has been treatment or conservative therapy.; Pt. is having nausea, anorexia & weight loss.; Pt. was placed on Nexium for finding of Gastritis from EGD, no relief of symptoms. Pt. has had a US that showed a dilated common duct. CT was also ordered.	1
Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically	; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications	1
Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	He also has curious episodes of severe right-sided jaw pain, brought on following an episode of straining, centred at the right TM joint, which spreads to the neck. This pain then heralds the onset of a high fever (103 degrees) that lasts for 4 days. He h; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications	1
Disapproval	70490 CT NECK SOFT TISSUES, LARYNX, THYROID ETC. NO CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is not a suspicion of an infection or abscess.; This is not being ordered by an ENT specialist.; Yes this is a request for a Diagnostic CT	1

Disapproval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	The pt has had a complete GI work up. All testing normal and we can not find any reason for the nausea and vomiting with weight loss. Trying to rule out anything in the brain that might be causing her issues.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; NOT requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
Disapproval	71250 CT CHEST, THORAX	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for Inflammatory/ Infectious Disease.; 2016; There has been treatment or conservative therapy.; abdomen and pelvic pain, weight loss; antibiotics	1
Disapproval	71250 CT CHEST, THORAX	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/2012; There has not been any treatment or conservative therapy.; Weight loss and left side abdominal pain	1
Disapproval	71250 CT CHEST, THORAX	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/2016; There has been treatment or conservative therapy.; abdominal pain, chest pain, difficulty swallowing, reflux, constipation.; meds, diet changed, edg	1
Disapproval	71250 CT CHEST, THORAX	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/2014; There has been treatment or conservative therapy.; unknown; medication	1
Disapproval	71250 CT CHEST, THORAX	Radiology Services Denied Not Medically Necessary	suspected malignancy or tumor; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has not been any treatment or conservative therapy.;	1
Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	1

Disapproval	74150 CT ABDOMEN WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	1
Disapproval	74150 CT ABDOMEN WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Disapproval	74150 CT ABDOMEN WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	abnormal labs; This is a request for an Abdomen CT.; This study is being ordered for a vascular disease.; The requested studies are not being ordered for known or suspected aneurysms, hematoma, or blood clot, thrombosis, or stenosis and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.; There is no evidence of vascular abnormality seen on plain film and/or Ultrasound/ Doppler.; There are no symptoms or findings to indicate the member has internal abdominal and or pelvic bleeding such as hematoma or hemorrhage.; Yes this is a request for a Diagnostic CT	1
Disapproval	74150 CT ABDOMEN WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Lab work abnormal; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Disapproval	74150 CT ABDOMEN WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	nausea, heartburn, abdominal pain, and frequent diarrhea; nausea, heartburn, abdominal pain, and frequent diarrhea;weight gain (10lbs) and exercise intolerance;; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1

Disapproval	74150 CT ABDOMEN WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	patient had EGD, left upper quadrant pain, chronic gastritis; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Disapproval	74150 CT ABDOMEN WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Possible mass and weight loss; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; The patient has new lab results or other imaging studies including doppler or x-ray (plain film) findings.; Yes this is a request for a Diagnostic CT	1
Disapproval	74150 CT ABDOMEN WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	right upper quadrant pain, nausea, Hepatitis: Y - Chronic Hepatitis C, Gallstones: Y, Cirrhosis: Y, Liver Disease: Y, Notes: Hep-C, cirrhosis, hernia; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Disapproval	74150 CT ABDOMEN WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	suspected malignancy or tumor; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has not been any treatment or conservative therapy;	1
Disapproval	74150 CT ABDOMEN WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are known or endoscopic findings of Diverticulitis.; Yes this is a request for a Diagnostic CT	1
Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.	1

Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT	1
Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT	1

RECENTLY LOST JOB DUE TO THE MEMORY LOSS.; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for Dementia/ Cognitive Impairment; It is unknown why an MRI is not being considered	1
Approval	70450 CT BRAIN, HEAD	frequent falls, ear and nose bleeds, weakness, knees buckle when stands, palpitations, headaches, diabetes, history of heart disease.; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications	1
Approval	70450 CT BRAIN, HEAD	H/A is interfering with her daily activity, with pain going into her both eyes, rest is helps but she has to be there for hours, room has to be dark, noise sensitive; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
Approval	70450 CT BRAIN, HEAD	He has a history of prostate cancer. Patient is diabetic, long time smoker; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has not been any treatment or conservative therapy.; Dysphagia, sore throat, feels like lump in his throat	1
Approval	70450 CT BRAIN, HEAD	head trauma and headaches; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
Approval	70450 CT BRAIN, HEAD	HEAD TRAUMA. WAS HIT IN THE BACK OF HEAD AND SHOULDER BLADES WITH HAMMER. COMPLAINS OF DIZZINESS, SEVERE PAIN, HEADACHE.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.	1

Approval	70450 CT BRAIN, HEAD	headache due to head trauma; This is a request for a brain/head CT.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a recent head trauma or injury.	1
Approval	70450 CT BRAIN, HEAD	Headache is getting more severe, a month ago he was having balance issues, now he is having headaches and blacking out.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
Approval	70450 CT BRAIN, HEAD	Headache, wakes up and her head hurts a lot. It felt swollen in the morning and she takes Ibuprofen, in the last month it has not worked but shes still taking it. In the last week if she turns she feels dizzy, states its a lightheaded dizziness, has never; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
Approval	70450 CT BRAIN, HEAD	headaches start on one side and intensifies;; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
Approval	70450 CT BRAIN, HEAD	Headaches that have not improved with medication. medications ketorolac 15 mg/mL injection solution; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
Approval	70450 CT BRAIN, HEAD	history of brain bleed, dizziness; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.	1
Approval	70450 CT BRAIN, HEAD	left sided weakness, moving eyes makes headache worse. feels weak on left side of body; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
Approval	70450 CT BRAIN, HEAD	left sided weakness; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; Imaging is needed and availability of MRI would delay treatment is the reason an MRI is not being considered	1

Approval	70450 CT BRAIN, HEAD	lymphadenopathy of the cervical and headaches; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; There has been treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >; steroids anti inflammatories	1
Approval	70450 CT BRAIN, HEAD	memory loss; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.	1
Approval	70450 CT BRAIN, HEAD	N/A; This is a request for a brain/head CT.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a recent head trauma or injury.	1
Approval	70450 CT BRAIN, HEAD	n/a; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.	1
Approval	70450 CT BRAIN, HEAD	needing ct head to eval vertigo symptoms and chronic sinusitis. Ct head can show all of the above whereas ct sinus will only limit views to the sinus area rather than the entire head. looking to r/u chronic sinusitis that is causing vertigo vs. something; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for Vertigo; There is another reason why an MRI is not being considered; needing ct head to eval vertigo symptoms and chronic sinusitis. Ct head can show all of the above whereas ct sinus will only limit views to the sinus area rather than the entire head	1
Approval	70450 CT BRAIN, HEAD	no; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
Approval	70450 CT BRAIN, HEAD	none; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for Dementia/ Cognitive Impairment; It is unknown why an MRI is not being considered	1
Approval	70450 CT BRAIN, HEAD	pain behind eye, nausea and vomiting, ringing in ears; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1

Approval	70450 CT BRAIN, HEAD	<p>patient failed in office mini mental exam, needs ct to evaluate short term memory loss; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has a sudden change in mental status.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.</p> <p>Patient had a recent fall with head trauma, patient and family members reports confusion and difficulty staying awake since the fall . Also patient has had multiple syncope episodes; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.</p>	1
Approval	70450 CT BRAIN, HEAD	<p>Patient has a 4 cm indurated nodule to forehead, superior to bridge of nose. Nodule is increasing in size.; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.</p> <p>PATIENT HAS BEEN HAVING EPISODES OF SYNCOPE; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.</p>	1
Approval	70450 CT BRAIN, HEAD	<p>Patient presented in office today due to left sided numbness to face and arm and headache to right side of head.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; The patient is able to have a Brain MRI for evaluation of these symptoms.</p> <p>PATIENT PRESENTS TO CLINIC WITH LEFT SIDED PARESSESIA.; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; Imaging is needed and availability of MRI would delay treatment is the reason an MRI is not being considered</p> <p>Patient states chronic headache that wakes her up at times.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.</p> <p>Patient was knocked unconscious and have been having seizures since.; This is a request for a brain/head CT.; This study is requested for a new onset of seizures or newly identified change in seizure activity or pattern.</p>	1
Approval	70450 CT BRAIN, HEAD		1
Approval	70450 CT BRAIN, HEAD		1
Approval	70450 CT BRAIN, HEAD		1
Approval	70450 CT BRAIN, HEAD		1

Approval	70450 CT BRAIN, HEAD	Patient with head injury while on Eliquis. Patient has a quarter sized abrasion just above the left lateral portion of the left eyebrow. Has swelling noted without bruising or erythema.; This is a request for a brain/head CT.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a recent head trauma or injury.	1
Approval	70450 CT BRAIN, HEAD	Persistent Headache  neck and head lymphadenopathy  concern for some form of abnormal lymphoma; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient with continued headaches and lymphadenopathy. This has not resolved and has developed vague chest pains. Concerned for some form of abnormal lymphoma.; There has been treatment or conservative therapy.; New Daily Persistent Headache  Head & Neck Lymphadenopathy; Patient was given clindamycin @ FastCare to take for 10 days and still has not helped any.	1
Approval	70450 CT BRAIN, HEAD	PREVIOUS HISTORY OF STROKE; This study is being ordered for a neurological disorder.; 02/23/2017; There has not been any treatment or conservative therapy.; RIGHT SIDED WEAKNESS	1
Approval	70450 CT BRAIN, HEAD	Problems remembering things, altered mental status, someone reported he had a seizure but he doesn't remember either of them.; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; This study is being ordered for new onset of seizures or newly identified change in seizure activity or pattern.	1
Approval	70450 CT BRAIN, HEAD	Pt has a h/x of thunderclap headaches and thrombocytopenia; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
Approval	70450 CT BRAIN, HEAD	pt has been experiencing intense headaches with seizures; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.	1
Approval	70450 CT BRAIN, HEAD	rule out CVA; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 02/03/2017; There has not been any treatment or conservative therapy.; visual disturbances	1

Approval	70450 CT BRAIN, HEAD	RULE OUT MASS; This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
Approval	70450 CT BRAIN, HEAD	RULE OUT TEMPORAL ARITIS; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
Approval	70450 CT BRAIN, HEAD	SEE MRI REPORT.; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications Sensitive to light Knot on her head for several months Gets woken up in the middle of the night with the headache Hurts her head all over; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
Approval	70450 CT BRAIN, HEAD	Severe headache with neck pain and nausea.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
Approval	70450 CT BRAIN, HEAD	severe headaches, started after head trauma. wake him at night. meds are not working; This is a request for a brain/head CT.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a recent head trauma or injury.	1
Approval	70450 CT BRAIN, HEAD	She is stating that she lost days a few weeks ago. She doesn't remember them and come to and realized her house was trashed.  She is experiencing dizziness and falling.; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications	1
Approval	70450 CT BRAIN, HEAD	STRONG FAMILY HISTORY. THE SMELL OF CIGARETTES COMES AND GOES AND LAST UP TO 15 AND 20 MINUTES; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has a loss of smell.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.	1
Approval	70450 CT BRAIN, HEAD	Suspected TIA; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has vertigo.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.	1

Approval	70450 CT BRAIN, HEAD	Suspected TIA; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; Imaging is needed and availability of MRI would delay treatment is the reason an MRI is not being considered	2
Approval	70450 CT BRAIN, HEAD	Syncopal episode (almost passed out); This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a recent head trauma or injury.	30
Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The headache is described as a "thunderclap" or the worst headache of the patient's life.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.	5
Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; The patient is NOT able to have a Brain MRI for evaluation of these symptoms.	1
Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or aneurysm.; This study is being ordered for a previous stroke or aneurysm.	1
Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.	1
Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has the inability to speak.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or aneurysm.; This study is being ordered for neurological deficits.	1
Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; This study is being ordered for infection or inflammation.	2
Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; There is a suspected or known brain tumor.; This study is being requested for known or suspected brain tumor, mass or cancer.	14

Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	145
Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; There is not a suspected or known brain tumor.; The patient currently does not have cancer.; This is an evaluation for a bone tumor or abnormality of the skull.; This study is being requested for known or suspected brain tumor, mass or cancer.	1
Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	16
Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.; This study is being requested for a headache.	1
Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; This study is being requested for a history of stroke, (CVA) known or follow-up.	10
Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; This study is being requested for Hydrocephalus or congenital abnormality.	1
Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; This study is requested for known or suspected bleed such as subdural hematoma or subarachnoid bleed.	16
Approval	70450 CT BRAIN, HEAD	Traumatic brain injury  Hemorrhagic CVA  Short term memory loss. Cervicalgia after MVA. Chronic headaches & migraines. Paresthesias in different parts of the body.; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or aneurysm.; This study is being ordered for a previous stroke or aneurysm.	1
Approval	70450 CT BRAIN, HEAD	Unknown.; This is a request for a brain/head CT.; It is unknown if the study is being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.	1

Approval	70450 CT BRAIN, HEAD	unknown; This is a request for a brain/head CT.; It is unknown if the study is being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.	1
Approval	70450 CT BRAIN, HEAD	unknown; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
Approval	70450 CT BRAIN, HEAD	unknown; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.	1
Approval	70450 CT BRAIN, HEAD	Unknown; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
Approval	70450 CT BRAIN, HEAD	unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Approval	70450 CT BRAIN, HEAD	Vertigo, fatigue, confusion; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has a sudden change in mental status.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.	1
Approval	70450 CT BRAIN, HEAD	weakness and numbness in all 4 ext that lasts for greater than 30 min. lightheaded and dizzy lasting 40 min. no vertigo; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; There is another reason why an MRI is not being considered; MRI would be okay with Provider, is usually not approved	1
Approval	70480 CT ORBIT,EYE SOCKET, SELLA TURCICA, POSTERIOR FOSSA,EAR ETC.	"This request is for orbit,sella, int. auditory canal,temporal bone, mastoid, CT.239.8"; "There is not suspicion of bone infection, cholesteatoma, or inflammatory disease.ostct"; "There is a history of serious head or skull, trauma or injury.ostct"; Yes this is a request for a Diagnostic CT	1
Approval	70480 CT ORBIT,EYE SOCKET, SELLA TURCICA, POSTERIOR FOSSA,EAR ETC.	"This request is for orbit,sella, int. auditory canal,temporal bone, mastoid, CT.239.8"; "There is suspicion of bone infection, cholesteatoma, or inflammatory disease.ostct"; Yes this is a request for a Diagnostic CT	2

NO CONTRAST	; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The size of the neck mass is unknown.; The neck mass has been examined twice at least 30 days apart.; The lump did not get smaller.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	fullness palpated anteriorly; cervical mass; hypothyroidism; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	He has a history of prostate cancer. Patient is diabetic, long time smoker; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has not been any treatment or conservative therapy.; Dysphagia, sore throat, feels like lump in his throat	1

Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	known smoker, lymphadenopathy, worsening SOB; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	Lack of energy noted. patient describes of fatigue moderate tiredness for the last 5 months. This has been a constant problem. She denies associated symptoms. She is not taking any medications. Patient states that she use to take medication for her t; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The size of the neck mass is unknown.; The neck mass has NOT been examined twice at least 30 days apart.	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	lymphadenopathy of the cervical and headaches; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; There has been treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >; steroids anti inflammatories mass interior neck just below the jaw line. pt is having hair loss and fatigue; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The size of the neck mass is unknown.; It is not known if the neck mass has been examined twice at least 30 days apart.; Yes this is a request for a Diagnostic CT	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	member had more then 1 mass and ultra sound was abnormal; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is 1 cm or smaller.; The neck mass has been examined twice at least 30 days apart.; The lump did not get smaller.; A fine needle aspirate was NOT done.	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	none; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	NONE; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/2016; There has been treatment or conservative therapy.; The Pt has an enlarged nodule on left side of neck. Pt has nausea and abdominal Pain.; Medication therapy	1

Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	Opinion: Solid echoheterogenous 4.3 cm mass demonstrating abundant internal arterial and venous flow is present adjacent to the right submandibular gland. I cannot determine its etiology with certainty. I favor neoplasm arising from the right parotid gland; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	Patient has supraclavicular mass. Patient has a history of breast cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	Persistent Headache  neck and head lymphadenopathy  concern for some form of abnormal lymphoma; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient with continued headaches and lymphadenopathy. This has not resolved and has developed vague chest pains. Concerned for some form of abnormal lymphoma.; There has been treatment or conservative therapy.; New Daily Persistent Headache  Head & Neck Lymphadenopathy; Patient was given clindamycin @ FastCare to take for 10 days and still has not helped any.	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	PT HAVING ISSUSE WITH THERE JOINTS AND SLEEPING; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/2/2015; There has not been any treatment or conservative therapy.; NECK PAIN pt is unable to swallow and has multiple knots in her throat; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is 1 cm or smaller.; The neck mass has NOT been examined twice at least 30 days apart.	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	The lump started 1-2 years ago, The lump is located under the chin,The affected area is draining purulent material not warm is tender at times - is intermittently swollen, The size of the lump is less than 1 cm but patient states can get as big as 2 cm, ; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is 1 cm or smaller.; The neck mass has been examined twice at least 30 days apart.; The lump got smaller.	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; It is unknown if there has been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; Yes this is a request for a Diagnostic CT	1

Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; The study is being ordered for Follow Up.; The patient has a known tumor or metastasis in the neck.; They have not had a previous Neck CT in the last 10 months.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; There are NO new or changing symptoms in the neck.; Yes this is a request for a Diagnostic CT	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; The study is being ordered for recent trauma or other injury.; Yes this is a request for a Diagnostic CT	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has been recent trauma or other injury to the neck.	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has been recent trauma or other injury to the neck.; Yes this is a request for a Diagnostic CT	3
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; It is unknown if there is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is a suspicion of an infection or abscess.; Yes this is a request for a Diagnostic CT	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is a suspicion of an infection or abscess.; Yes this is a request for a Diagnostic CT	3
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is not a suspicion of an infection or abscess.; This is not being ordered by an ENT specialist.	3
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.	12
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; Yes this is a request for a Diagnostic CT	48
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	THIS PATIENT HAS HAD A RECENT EGD DONE AND IT HAS SHOWED SHE HAS A LARGE MASS ON THE OUTSIDE OF HER ESOPHAGUS. THIS NEEDS TO BE FURTHER EVALUATED, SO THESE TEST ARE NECESSARY; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1

Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	Unknown; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is 1 cm or smaller.; The neck mass has been examined twice at least 30 days apart.; The lump did not get smaller.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	unknown; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT	1
Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Approval	70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCONTRAST	Yes, this is a request for CT Angiography of the brain.	6
Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST	Yes, this is a request for CT Angiography of the Neck.	10
Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The study is ordered for suspicion of infection or abscess	1
Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The study is ordered for the evaluation of lymphadenopathy or mass	5
Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	CT scan1-2 months ago at BHMC-NLR reportedly showed a sinus polyp; This study is being ordered for a neurological disorder.; Neck pain for the last 2 years.; There has been treatment or conservative therapy.; The location is primarily back of head from neck area. The pain radiates to the neck. Associated symptoms include nausea, vision disturbance and vomiting; He has tried Naproxen, Tylenol, BC, hydrocodone (which helped)	1

Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	Date of initial onset: MUSCULOSKELETAL: normal gait; range of motion: decreased ROM in right shoulder; pain with ROM of right shoulder; Crepitus, Tenderness, Effusion: tenderness noted in the exquisite over the right anterior chest wall and shoulder/espec; This study is being ordered for trauma or injury.; MUSCULOSKELETAL: normal gait; range of motion: decreased ROM in right shoulder; pain with ROM of right shoulder; Crepitus, Tenderness, Effusion: tenderness noted in the exquisite over the right anterior chest wall and shoulder/especially of the clavicle; There has not been any treatment or conservative therapy.; Date of initial onset: MUSCULOSKELETAL: normal gait; range of motion: decreased ROM in right shoulder; pain with ROM of right shoulder; Crepitus, Tenderness, Effusion: tenderness noted in the exquisite over the right anterior chest wall and shoulder/espec	1
Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	It is unknown if there is a suspicion of an infection or abscess.; This examination is being requested to evaluate lymphadenopathy or mass.; This is a request for an Orbit MRI.; There is not a history of orbit or face trauma or injury.	1
Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	Patient has pain in his neck that radiates to his head. Patient states the pain is sharp. C/o decreased mobility, spasms, weakness, and nausea x6weeks.; "This is a request for orbit,face, or neck soft tissue MRI.239.8"; The reason for the study is not for trauma, infection,cancer, mass, tumor, pre or post-operative evaluation	1
Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	Patient is a pleasant 41 year-old white female who presents to clinic complaining that 2 days ago she woke up with left ocular pain. She states when she moved her eyes she would feel discomfort. She then 1 day ago woke up and had loss of lower visual fiel; This study is being ordered for a neurological disorder.; 03/06/2017; There has not been any treatment or conservative therapy.; Left ocular pain. She states when she moved her eyes she would feel discomfort. loss of lower visual field and left peripheral vision.	1
Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	There is a suspicion of an infection or abscess.; This is a request for a Face MRI.; There is not a history of orbit or face trauma or injury.	1
Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	There is a suspicion of an infection or abscess.; This is a request for an Orbit MRI.; There is not a history of orbit or face trauma or injury.	1
Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	There is not a suspicion of an infection or abscess.; This examination is being requested to evaluate lymphadenopathy or mass.; This is a request for a Face MRI.; There is not a history of orbit or face trauma or injury.	1
Approval	70544 Mr angiography head w/o dye	; There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.	1

Approval	70544 Mr angiography head w/o dye	current headaches and since this has not been done in over 10 years then I recommend that she get this; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; document in notes that pt has had headaches since 7/10/16. taking soma and aleve with no relief.; There has been treatment or conservative therapy.; headaches worsening over the last 3-4 days. no change in vision. no numbness or tingling. her last MRI of brain was 15 years ago. last angiogram of brain was 30 years ago and it was normal. mother and brother both died of aneurysms.frequent or severe head; taking soma and aleve without relief. headaches worsening over the last 3-4 days. no change in vision. no numbness or tingling. her last MRI of brain was 15 years ago. last angiogram of brain was 30 years ago and it was normal. mother and brother both die	1
Approval	70544 Mr angiography head w/o dye	high blood pressure; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 03/19/2017; There has not been any treatment or conservative therapy.; vision loss, dizziness Pt had a CT in the ER that was abnormal and now requesting these studies for possible aneurysm; This study is being ordered for Vascular Disease.; 2/8/17; There has not been any treatment or conservative therapy.; Pt has headaches, dizziness, heart palpitations, vertigo, weakness	1
Approval	70544 Mr angiography head w/o dye	SISTER HAD SUBARACHNOID BLEED; This study is being ordered for a neurological disorder.; PATIENT IS HAVING INCREASED HEADACHES WITH SISTER HAVING SUBARACHNOID BLEED; It is not known if there has been any treatment or conservative therapy.; INCREASED HEADACHES	1
Approval	70544 Mr angiography head w/o dye	There is an immediate family history of aneurysm.; This is a request for a Brain MRA.	9
Approval	70544 Mr angiography head w/o dye	There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has had a recent MRI or CT for these symptoms.; There has been a stroke or TIA within the past 2 weeks.; This is a request for a Brain MRA.	1
Approval	70544 Mr angiography head w/o dye	There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.	1
Approval	70544 Mr angiography head w/o dye	There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has been a stroke or TIA within the past 2 weeks.; This is a request for a Brain MRA.	3

Approval	70544 Mr angiography head w/o dye	There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.	4
Approval	70544 Mr angiography head w/o dye	This is a request for a head and neck MR Angiogram.; There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; "There is a sudden onset of one-sided weakness, speech impairment, vision defects or severe dizziness."	1
Approval	70547 Mr angiography neck w/o dye	high blood pressure; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 03/19/2017; There has not been any treatment or conservative therapy.; vision loss, dizziness	1
Approval	70547 Mr angiography neck w/o dye	The patient has had a recent MRI or CT for these symptoms.; This is a request for a Neck MR Angiography.	1
Approval	70547 Mr angiography neck w/o dye	The patient has not had a recent MRI or CT for these symptoms.; There has been a stroke or TIA within the past 2 weeks.; This is a request for a Neck MR Angiography.	1
Approval	70547 Mr angiography neck w/o dye	This is a request for a head and neck MR Angiogram.; There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; "There is a sudden onset of one-sided weakness, speech impairment, vision defects or severe dizziness."	1
Approval	70547 Mr angiography neck w/o dye	This is a request for a Neck MR Angiography.; The patient had an ultrasound (doppler) of the neck or carotid arteries.; The ultrasound showed stenosis (narrowing) of the artery.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	6

MRI Head is to evaluate and rule out other causes.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Patient was referred to an ENT doctor and is still having problems. This study is being requested to find an underlying cause of the tinnitus.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The results of the lab tests are unknown.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	patient with Neurofibromatosis with headaches increasing in frequency and intensity needs MRI to be sent to neurology; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1

Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Possible tumor; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; It is not known if the headache is described as a "thunderclap" or the worst headache of the patient's life.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is a new and sudden onset of headache (less than 1 week) not improved by pain medications.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	pseudotumor cerebri double vision photophobia; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has fatigue or malaise; It is unknown why this study is being ordered. Pt had a CT in the ER that was abnormal and now requesting these studies for possible aneurysm; This study is being ordered for Vascular Disease.; 2/8/17; There has not been any treatment or conservative therapy.; Pt has headaches, dizziness, heart palpitations, vertigo, weakness	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	pt has a history of bells palsy, she went to ER last week due to her entire left side of her body went numb; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; It is not known if there is a new and sudden onset of a headache less than 1 week not improved by medications.; It is not known if there is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation); Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient has Bell's Palsy. PT HAS HAD HEADACHES SINCE 2015, HAS JUST TAKEN OTC MEDICATIONS AND NOTHING HAS HELPED. MRI ORDER 2015 BUT NEVER WAS DONE.ALSO HAS DIZZINESS AND VISUAL DISTURBANCE. Progressive headaches; Most likely migraine headaches but some features of tension headach; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Pt has had persistant headache for one month that began suddenly. Worst headache of her life for the past week. Meds have not helped. Pt has pending appointment with neurologist.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1

Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Pt has intermittent dizziness for last 2 months. Pt says she has daily ha's. Pt also has fatigue. Pt says otc meds help her ha's. Pt says dizziness last about 30 min.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Pt has pituitary adenoma. Multiple endocrine neoplasia. Memory loss.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; A metabolic work up was done including urinalysis, electrolytes and complete blood count with results completed.; The lab results were normal.; The patient is experiencing loss of smell. Pt is having headaches along with low pituitary hormones. Dr. Bell fears that patient has something abnormal with his pituitary and needs this MRI to evaluate the headaches and pituitary insufficiency.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	pt is having intermittent weakness and then is also having numbness in left leg and left arm; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has fatigue or malaise; It is unknown why this study is being ordered.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	pt still c/o tremors that sometimes seem to affect his whole body x 3 months, getting worse, carbidopa-levodopa didn't seem to help and diazepam caused AMS; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient is experiencing dizziness.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	pthas had ongoing c/o headache, dizziness, nausea, and paresthesia; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	R/O MS; This study is being ordered for a neurological disorder.; 01/23/2017; There has been treatment or conservative therapy.; Ongoing, progressively worse pain in leg, essential tremors, myoclonic jerks; Physical therapy	1

Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	R26.9; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing vertigo	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Radiologist recommended MRI after CT was done; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; It is unknown if the patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	recent memory loss w/ hx CVA w/ R hemiparesis; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; It is not known if there are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.; It is not known if there a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Reports pulsatile headache with photophobia and phonophobia and emesis. Has never been worked up for migraine. Has a moist cough but lungs are clear, no ant. cerv. lymphadenopathy; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	requested to bypass clinicals; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; n/a; It is not known if there has been any treatment or conservative therapy.; n/a	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	seen and evaluated by neuropsych and that specialist recommended MRI with and without contrast of the brain for further evaluation of cognitive decline to rule out underlying mass or diagnose CVA; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the patient had a normal audiogram.; The patient is experiencing hearing loss.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Seizure like activity. Headache with aura. Had another one last night Increasing in frequency; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	sensitive to light, h/a; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1

Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	she indicates that she has had headache daily over the past week. during episodes describes feeling lightheaded. describes feeling that she could pass out during the episodes.  denies any changes in her vision.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has dizziness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	significant memory loss; sob; dizziness; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has a sudden change in mental status.; It is unknown why this study is being ordered.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	SISTER HAD SUBARACHNOID BLEED; This study is being ordered for a neurological disorder.; PATIENT IS HAVING INCREASED HEADACHES WITH SISTER HAVING SUBARACHNOID BLEED; It is not known if there has been any treatment or conservative therapy.; INCREASED HEADACHES	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	T1 weighted showed abnormalities pseudo umor cerebri; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	The patient has noted that both of her hands have been locking up on her, tingling and then going numb. This usually lasts about 30 minutes, however, them most recent occurrence lasted for over 4 hours. She is experiencing bilateral paresthesia in bands ; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This is a request for a brain MRI WITH CONTRAST. She presented to the office with weakness and numbness.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This is a request for an Internal Auditory Canal MRI.; There is a suspected Acoustic Neuroma or tumor of the inner or middle ear.	3

Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This is a request for an Internal Auditory Canal MRI.; There is not a suspected Acoustic Neuroma or tumor of the inner or middle ear.; There is not a suspected cholesteatoma of the ear.; The patient has not had a recent brain CT or MRI within the last 90 days.; There are neurologic symptoms or deficits such as one-sided weakness, speech impairments, vision defects or sudden onset of severe dizziness.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing dizziness.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Requested due to trauma or injury.; There are new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	9

Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	38
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	170
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; It is unknown if there recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a “thunderclap” or the worst headache of the patient’s life.	2
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a “thunderclap” or the worst headache of the patient’s life.	15
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)	2
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.	110

Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient had a thunderclap headache or worst headache of the patient's life (within the last 3 months).	11
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.	3
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	8
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a "thunderclap" or the worst headache of the patient's life.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient has Bell's Palsy.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	14
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing dizziness.	29
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing fatigue or malaise.	4

Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing vertigo	4
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	4
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing dizziness.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing fatigue or malaise.	3
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing vertigo	1

Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient did not have a normal audiogram.; The patient is experiencing hearing loss.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	9
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of infection or inflammation; The patient has a fever, stiff neck AND positive laboratory findings (like elevated WBC or abnormal Lumbar puncture fluid examination that indicate inflammatory disease or an infection.	2
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; It is not known if the patient has undergone treatment for multiple sclerosis.; There are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has not undergone treatment for multiple sclerosis.; There are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.	8
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has undergone treatment for multiple sclerosis.	3
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has been a previous Brain MRI completed.; The brain MRI was abnormal.	5
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.	19
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.	43
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.	4

Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.	11
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; It is not known if a biopsy has been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are not physical findings or laboratory values indicating abnormal pituitary hormone levels.; There has been a previous Brain MRI completed.; The brain MRI was abnormal.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; It is not known if a biopsy has been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are physical findings or laboratory values indicating abnormal pituitary hormone levels.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; It is not known if a biopsy has been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack).	6
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has the inability to speak.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack).	1

Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; There has been a recent assessment of the patient's visual acuity.; This study is being ordered for an aneurysm.; This study is being ordered for neurological deficits.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; There has been a recent assessment of the patient's visual acuity.; This study is being ordered for stroke or TIA (transient ischemic attack).	4
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for a tumor.	10
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for and infection or inflammation.	3
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for seizures.; There has been a change in seizure pattern or a new seizure.	10
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The study is NOT being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.; There has not been a previous Brain MRI completed.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	trying to rule out a brain tumor.patient is having increased headache with nausea with vomiting.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a sudden and severe headache.; The patient has NOT had a recent onset (within the last 3 months) of neurologic symptoms.	1

Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Unknown; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Unknown; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	unknown; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	unknown; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	2
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Unknown; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a sudden and severe headache.; It is unknown if the patient had a recent onset (within the last 3 months) of neurologic symptoms.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	UNKNOWN; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation); Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient has Bell's Palsy.	1

Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Unknown; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; It is not known if a biopsy has been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is not a pituitary tumor or pituitary adenoma.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	unknown; This study is being ordered for trauma or injury.; 12/2016; There has not been any treatment or conservative therapy.; headaches, left shoulder pain, blurred vision in the left eye, nose bleeds, decreased hearing, loss of appetite	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Unknown; This study is being ordered for trauma or injury.; 2/2017; There has not been any treatment or conservative therapy.; headaches, dizziness, joint pain, back and arm, tremors, swelling in abdomen, weakness, on 3/4 episode of stop breathing, vomiting, weight loss	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	upper bi lateral tremors; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Vertigo of central origin, unspecified ear; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing dizziness.	1
Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	weakness (generalized weakness to each upper ext especially when twists in certain way, and generalized weakness to both lower ext when on feet excessively) and headache (generalized), low back pain, neck pain with certain movment, tenderness paraspinal l; This study is being ordered for a neurological disorder.; January 13, 2017; There has been treatment or conservative therapy.; low back pain, Headache, weakness (generalized weakness to each upper ext especially when twists in certain way, and generalized weakness to both lower ext when on feet excessively) and headache (generalized); Suggested OTC meds and continued PT/chiropractic care and recommendations from them	1

Approval	70554 Functional MRI Brain	unknown; This study is being ordered for a neurological disorder.; 1 year ago; There has been treatment or conservative therapy.; headaches, difficulty finding words,; insets over a year, chiropractic , pt , home exercise	1
Approval	71250 CT CHEST, THORAX		3
Approval	71250 CT CHEST, THORAX	"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	7
Approval	71250 CT CHEST, THORAX	"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	29
Approval	71250 CT CHEST, THORAX	"The ordering physician is a surgeon, pulmonologist, or cardiologist."; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.; Yes this is a request for a Diagnostic CT	2
Approval	71250 CT CHEST, THORAX	"The ordering physician is not a surgeon, pulmonologist, or cardiologist."; It is not known if there is radiologic evidence of mediastinal widening.; PFT shows abnormality consistent with pulmonary vascular abnormalities/fibrosis; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	"The ordering physician is not a surgeon, pulmonologist, or cardiologist."; There is no radiologic evidence of mediastinal widening.; ; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	"The ordering physician is not a surgeon, pulmonologist, or cardiologist."; There is no radiologic evidence of mediastinal widening.; Pt has had a Chronic cough for up to 3 years and never reported to doctor he now presents with a Chronic cough up to 3 to 4 times daily that causes him to become light headed and SOB we have treated him for respiratory illness and with antibiotic therapy ; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	36
Approval	71250 CT CHEST, THORAX	"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	158

Approval	71250 CT CHEST, THORAX	"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They did not have a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Approval	71250 CT CHEST, THORAX	"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They did not have a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	3
Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; "Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	2
Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	15
Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	11
Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1

Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; There is no radiologic evidence of asbestosis.; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist. < Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for Inflammatory/ Infectious Disease.; ; There has been treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >; medications	2
Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for Inflammatory/ Infectious Disease.; 2/10/2017; It is not known if there has been any treatment or conservative therapy.; shortness of breath/gasp for air/dyspnea/difficulty swallowing/choking	1
Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1
Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/13/2017; There has been treatment or conservative therapy.; abdominal pain for 4 days, fatigue, shortness of breath with exertion , excruciating epigastric pain; GI cocktail , morphine and Proventil	1
Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 years ago; There has not been any treatment or conservative therapy.; abdominal pain, right flank pain, short of breath	1

Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3/22/17; There has been treatment or conservative therapy.; SHORTNESS OF BREATH , ELIVATION ON CHEST XRAY , CAUSE UNDETERMINED/ CT WAS RECOMMENDED BY RADIOLOGIST; INHALERS, SHORTNESS OF BREATH ,	1
Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; May 29,2015; There has been treatment or conservative therapy.; The patient has pain in his shoulder. Sharp and throbbing.; Patient is in Physical Therapy, Pain medication.	1
Approval	71250 CT CHEST, THORAX; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	; "Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Approval	71250 CT CHEST, THORAX	; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	4
Approval	71250 CT CHEST, THORAX	; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	7
Approval	71250 CT CHEST, THORAX	; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
Approval	71250 CT CHEST, THORAX	; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1

Approval	71250 CT CHEST, THORAX	; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient does NOT have a 30 pack per year history of smoking.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
Approval	71250 CT CHEST, THORAX	; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	2
Approval	71250 CT CHEST, THORAX	; There is no radiologic evidence of asbestosis.; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	; There is no radiologic evidence of mediastinal widening.; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.	1
Approval	71250 CT CHEST, THORAX	; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Approval	71250 CT CHEST, THORAX	; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1

Approval	71250 CT CHEST, THORAX	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has not been any treatment or conservative therapy.;	1
Approval	71250 CT CHEST, THORAX	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 years ago; There has been treatment or conservative therapy.;	1
Approval	71250 CT CHEST, THORAX	; This study is being ordered for trauma or injury.; For CT of Brain, onset from a fall December of 2016; ; For CT of Chest, onset summer of 2016; There has been treatment or conservative therapy.; For CT of Brain:; Last Summer she was admitted to the hospital, in Georgia, for double pneumonia. They said when she gets back home she needs to follow up with PCP and never did. Did not go to the Pulmonologist referral either.; Since discharge, she has c;	1
Approval	71250 CT CHEST, THORAX	1 year F/U to a pulmonary nodule, 10mm; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	4.9mm nodule in the right lower lobe that does not appear to be calcified, meaning it is likely benign but I would like to order a a CT scan of the chest to eval newly found lung nodule in a smoker with a cough a 26# unexplained weight loss over the past ; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 4.9mm nodule in the right lower lobe that does not appear to be calcified (found in chest xray on 12/29/16), meaning it is likely benign but I would like to order a a CT scan of the chest to eval newly found lung nodule in a smoker with a cough a 26# unex; There has been treatment or conservative therapy.; 4.9mm nodule in the right lower lobe that does not appear to be calcified, meaning it is likely benign but I would like to order a a CT scan of the chest to eval newly found lung nodule in a smoker with a cough a 26# unexplained weight loss over the past ;	1
Approval	71250 CT CHEST, THORAX	4mm indeterminate noncalcified nodule in right upper lobe found on CT Chest performed on 09/08/2015. Needs follow up evaluation.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1

Approval	71250 CT CHEST, THORAX	4mm pulmonary nodule along major fissure in the lingula and 2 mm nodule in right lower lobe; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12-20-2016; There has not been any treatment or conservative therapy.; unknown	1
Approval	71250 CT CHEST, THORAX	53 yo female noted to have a history of a 7 mm LUL nodule. Please re-eval. Thanks!  IMPRESSION: Stable 7 mm left upper lobe nodule encouraging for benignity and likely reflects a noncalcified granuloma. Follow-up CT in 6 months to evaluate for furt; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	55yr old male who smokes w/chronic nasal obstruction, SOB, DOE and fatigue.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01.16.17; There has not been any treatment or conservative therapy.; 55yr old male who smokes w/chronic nasal obstruction, SOB, DOE and fatigue	1
Approval	71250 CT CHEST, THORAX	6 month follow-up from last CT which showed lung nodules.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	6/29/2016 last xray l spine suspicious mediastinum mass Further imaging chest ct required; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for known tumor.	8
Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for known tumor.; Yes this is a request for a Diagnostic CT	28
Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient does NOT have signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	4

Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient quit smoking in the past 15 years.; The patient does NOT have signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus.	9
Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus.; Yes this is a request for a Diagnostic CT	37
Approval	71250 CT CHEST, THORAX	A5-6mm nodule is noted in the right lung base on the x-ray report from 2/6/2017; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	ABD PAIN,SHORTNESS OF BREATH WT LOSS, ABNORMAL CT,NAUSEA,POOR APPETITE,BILATERAL LEG AND FEET TINGLING,NUMBNESS,R/O METASTATIC PROCESS FOR MRI R/O HNP,LOW CIT B12 AND D; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	abdominal pain; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Abnormal chest imaging is described as the following: Radiographic findings include a solitary nodule (8mm lul). Recommendation to repeat study in 3 months. Last CT of Chest was September 2016.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Abnormal chest x-ray in the lung area; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Abnormal chest x-ray requires further imaging; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1

Approval	71250 CT CHEST, THORAX	Abnormal chest xray showing mass vs infiltrate of the right lower lobe. Per radiologist, a CT- Chest is recommended.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Abnormal chest xray, Pt came to office to cough and lung pain, SOB; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; It is unknown if the patient quit smoking in the past 15 years.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Abnormal finding of the lung field.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Abnormal X-ray; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	An indeterminant pulmonary nodule was incidentally found on a kidney x-ray and needs work up.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
Approval	71250 CT CHEST, THORAX	Assess pulmonary nodule; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	BEEN TO ER 4X WITHIN 6 MONTHS, SHARP PAIN AND SHORTNESS OF BREATH; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	chest ct done 03/22/2017 showed multiple small lung nodules that needs to be evaluated; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Chest mass.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Chest pain compression fracture abnormal xray history of smoking; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1

Approval	71250 CT CHEST, THORAX	Chest pain and shortness of breath; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	CHEST XRAY DONE 08/16/2016 WAS SHOWING A 9MM NODULE ON THE RIGHT SIDE OF CHEST NOW CHEST DONE 02/03/2017 IS SHOWING 1 CMM SIXE NODULE WHICHI INDICATES HAS GROWN WE ARE TRYING TO RULE OUT CANCER.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Chest x-ray showed calcifications. Radiologist recommended CT of chest be performed to evaluate the calcifications further.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Chest x-ray was done left lung Nodule was found.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Approval	71250 CT CHEST, THORAX	chronic cough with chest heaviness. trying to rule out a hiatal hernia or mediastinal mass; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Approval	71250 CT CHEST, THORAX	Chronic cough with hemoptysis; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Chronic Cough; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	congested shortness of breth chest compression xrays came back abnormal crackle fluid meds not working ;; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	cough greater than 4 weeks. Treated with medicine, inhaler; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1

Approval	71250 CT CHEST, THORAX	CT cervical spine showed incidental findings of cavitation with emphysema and bullous emphysema; The patient has NOT had a chest x-ray recently.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for hemoptysis.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	CTA found pulmonary nodule in September and it recommended follow up CT in 6 months to check status.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	enlarged Hila, To r/o Hilar Adenopathy; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Enter answer here - Pt had a pulmonary nodule on previous ct and is to have f/up Ct.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Evaluate weight loss, abdominal pain, nausea and vomiting.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Approval	71250 CT CHEST, THORAX	f/o for nodule, previous CT found lung nodule 6/20/2016; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	f/u for solitary nodule of lung, 4 mm noncalcified pulmonary nodule right lower lobe; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
Approval	71250 CT CHEST, THORAX	Family hx of lung, throat, prostate & breast cancer Specialist suggests cancer Eval for thymoma Abnormal labs; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	FOLLOW UP FROM PREVIOUS TEST; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Follow up to known nodule; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1

Approval	71250 CT CHEST, THORAX	Has SOB; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; It is unknown if the patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	He has a history of prostate cancer. Patient is diabetic, long time smoker; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has not been any treatment or conservative therapy.; Dysphagia, sore throat, feels like lump in his throat	1
Approval	71250 CT CHEST, THORAX	Hypertension and sleep Apnea, lower extremity swelling, Palpatations; "Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	IMPRESSION from CT 1/10/17; 1. Bilateral calcified and partially calcified pulmonary nodules have; benign pattern of central calcification which is most consistent with; partially calcified granulomas. A few of these were visible on the; 3/25/2014 CT abdo; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	It is not known if there is radiologic evidence of non-resolving pneumonia.; It is not known if there is radiologic evidence of asbestosis.; FIRST VISIT COMPLAINING WAS 2/6/17; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; It is not known if there is radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1

Approval	71250 CT CHEST, THORAX	<p>It is not known if there is radiologic evidence of non-resolving pneumonia.; It is not known if there is radiologic evidence of asbestosis.; This patient has a personal history of small cell lung cancer in remission since 2011. Now with complaints of chest pain, cough and an abnormal plain film xray.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "The caller doesn't know if there is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; It is not known if there is radiologic evidence of a lung abscess or empyema.; It is not known if there is radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT</p>	1
Approval	71250 CT CHEST, THORAX	<p>It is not known if there is radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Doctors impression: mild pneumomediastinum; scarring right lower lung? diaphragm; haziness left lower heart border and posterior inferior on lateral; ekg- rbb no acute st elevation; troponin neg; has had this pressure for a week. plan was to send for sta; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.</p>	1
Approval	71250 CT CHEST, THORAX	<p>It is not known if there is radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Patient had CT in august of 2016. It should abnormal findings consistent with pneumonia that recommended follow up to see if it is cleared.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT</p>	1
Approval	71250 CT CHEST, THORAX	<p>known smoker, lymphadenopathy, worsening SOB; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.</p>	1

Approval	71250 CT CHEST, THORAX	LARGE PLEURAL EFFUSION; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Left lingular lung nodule was noted incidentally on an Abd CT/Abd last year. Is due for a repeat surveillace CT chest; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	LOW BACK PAIN, MASS, AND HAS ASTHMA.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	mass in chest -; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	mass located in left axillary region; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	MOD PERSISTENT ASTHMA,SOB,COUGH,WHEEZING,ABNORMAL CHEST X-RAY,R/O PULMONARY FIBROSIS,BILATERAL INFILTRARE,GROUND GLASS; There is no radiologic evidence of asbestosis.; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
Approval	71250 CT CHEST, THORAX	MULTIPLE PULMONARY NODULES IN THE LUNGS THAT HAVE BEEN SEEN.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Need to follow up on patients lung nodules. Subpleural nodules scattered throughout the left and right lungs. Sizes from 3mm to 5mm.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Needing further evaluation of pectus excavatum. The right side of his chest wall is more protuberant than the lower; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1

Approval	71250 CT CHEST, THORAX	No info Given; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Approval	71250 CT CHEST, THORAX	None; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	None; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	none; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Approval	71250 CT CHEST, THORAX	Onset started 01/05/2017; hacking cough; coughing up blood; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
Approval	71250 CT CHEST, THORAX	pain in upper back and chest, chest x ray with pulmonary changes and persistant Atelectasis; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; It is unknown if the patient has a 30 pack per year history of smoking.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	pain; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Patient 01/10/2017 had a chest xray and white blood count cell is elevated; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Approval	71250 CT CHEST, THORAX	Patient had previous abnormal X-ray and presented to office with shortness of breath.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Approval	71250 CT CHEST, THORAX	Patient has a chronic cough that is worsening. .; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1

Approval	71250 CT CHEST, THORAX	<p>Patient has a history of colon cancer and currently has 3 month+ adenopathy which has not resolved with antibiotic treatment; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.</p>	1
Approval	71250 CT CHEST, THORAX	<p>Patient has been treated in the past for irregular blood cells.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; approx 7-1-16; There has been treatment or conservative therapy.; abnormal weight loss greater than 30 pounds, prostate cancer and abdominal pain; medication</p>	1
Approval	71250 CT CHEST, THORAX	<p>Patient has COPD and is having shortness of breath.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT</p>	1
Approval	71250 CT CHEST, THORAX	<p>Patient has COPD. Patient has had sinus issues including bronchitis since 12/12/16 with no resolve.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.</p>	1
Approval	71250 CT CHEST, THORAX	<p>patient has had a previous ct of the chest in January 2016, and dr goss is wanting a repeat ct of chest w/contrast for follow up; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT</p>	1
Approval	71250 CT CHEST, THORAX	<p>Patient has history of abnormal mammogram demonstrating lymphadenopathy right axilla and patient has history of carcinoma of the kidney. Patient presents for diagnostic mammogram and the impression is right axillary adenopathy which is nonspecific but wi; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.</p>	1
Approval	71250 CT CHEST, THORAX	<p>Patient has supraclavicular mass. Patient has a history of breast cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.</p>	1

Approval	71250 CT CHEST, THORAX	patient is a smoker; chest xr showed well circumscribed density to L 5th incostal space. decreased bs in l and decreased bs on r; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Patient is has had UTI's in the past and Microscopic Hematuria and multiple occasions. Continues to have pain and Blood in urine.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/6/16 for the Flank and Abdominal pain. On 3/9/17 an X-ray was done and a pulmonary nodule was seen.; There has been treatment or conservative therapy.; Pain in flank, lower abdominal pain.; Patient was given Antibiotics for an infection, and referred to a Urologist. No treatment has been given for the Pulmonary nodule.	1
Approval	71250 CT CHEST, THORAX	PATIENT IS NICOTINE DEPENDENT. PRESENTED WITH A COUGH AND CHEST XRAY WAS ABNORMAL. XRAY SHOWED SUSPICIOUS CIRCULAR SHADOWING TO LLL. PREVIOUS XRAY SHOWED SHADOW BUT NOT AS LARGE.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Patient presents with bronchitis and states coughing up small amounts of blood for 2 days. Patient had chest X-Ray which shows bronchitis and mild hyperinflation of the lungs. Radiologist recommends a follow up chest CT to exclude a subtle endobronchial; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Patient presents with complaint of cough, congestion, fatigue, weight loss x one week. States another physician she sees, did CT scan that showed opacity in lung. Patient short of breath on exam today and no better from last office visit on 01/03/17 whe; "Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Approval	71250 CT CHEST, THORAX	Patient was seen in ER and chest xray shows patient has several bilateral lung nodules. Patient also has COPD.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1

Approval	71250 CT CHEST, THORAX	PLEURITIC CHEST PAIN,MILD TENDERNESS UPPER ANTERIOR CHEST, ABNORMAL X-RAY,MALAISE,DYSYPNEA,PULMONARY NODULE; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Positive for chest pain (episodes of burning in the chest). . He does have a history of an abnormal chest CT over a year ago but did not pursue the follow-up CT that we had recommended and scheduled.  A 1.4 cm patch of density which could be a nodule or ; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	precordial pain that does not go away; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	pt came in for cough, cxr showed hyperdense nodule in retrocardiac area.  pt needs CT Chest to further evaluate this nodule; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Pt had an abnormal mammogram w/ no involvement and now having rib pain.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Pt had an xray on November 17 that should a pulmonary nodule. cough, shortness of breath.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	pt had positive TB test ...with chest x- ray; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Pt has elevated white blood cell count, persistent cough, x ray non diagnostic, levaquin started with no improvement, fever; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1

Approval	71250 CT CHEST, THORAX	Pt has family Hx of myocardial infarction; Pt has shortness of breath, fluid around the heart (seen on Xray); A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Pt has lung nodules, has been coughing up blood; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Pt has non-Hodgkins lymphoma, stage 1; now having abnormal weight loss; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Approval	71250 CT CHEST, THORAX	Pt has pneumonia and acute bronchitis; There is no radiologic evidence of asbestosis.; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Pt is experiencing breast and chest wall pain, swelling on the L upper chest and axilla area for approximately 3 days w/abnormal CXR. R/O thoracic root disorder; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	PT IS HAVING PERSISTANT SOB, AND ABNORMAL CXR TODAY IN CLINIC; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Pt with c/o left sided chest wall pain, knots on left side of chest, reports is growing and causing some pain.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Approval	71250 CT CHEST, THORAX	pt. had a neck CT, mass is extending down into the chest...; "Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

Approval	71250 CT CHEST, THORAX	PULMONARY NODULE, CHRONIC COUGH, COPD; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Pulmonary nodule; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Questionable superior mediastinal widening seen by in-house radiologist Dr. Riner.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Radiologist recommended a 6 month follow-up after suspicious mass found on prior CT of chest.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	repeat 1 year for pulmonary nodules; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	repeat every 6 months to determine if solitrary pulmonary nodule is stable; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/23/2016; There has not been any treatment or conservative therapy.; no info given	1
Approval	71250 CT CHEST, THORAX	RIGHT CLAVICAL PAIN, SWOLLEN LYMPH NODES ON THE LEFT ANTECUBITAL SPACE, FEVER AND NIGHT SWEATS, HEMATURIA; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Right upper lobe nodule on X-ray; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	SEPT/ CHEST CT SHOWED PULMONARY NODULE, 3MONTH FOLLOW UP MONITERING SIZE; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

Approval	71250 CT CHEST, THORAX	She had a x-ray in the office and it was sent for over read with the radiologists and they did observe enlargement in the left hilum. May be due to pulmonary artery enlargement vs. adenopathy.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	SHE IS HAVING PAIN AND PROBLEMS IN THE STERNAL AREA.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	short of breath, cough; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	SIX MONTH FOLLOW-UP FOR A NODULE; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	SOB , Cough, abnormal chest x ray; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	soft tissue mass left lateral to posterior chest wall present for several years, increased in size in the last year. Pt has a history of Tobacco Abuse.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	spots showed mri from the thoracic spine; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Suspicious right pulmonary nodule.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	swollen lymph node on right side of neck for about a year and has gotten bigger and chest nodule grown bigger over last 6 months; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1

Approval	71250 CT CHEST, THORAX	Swollen lymph nodes right axilla and pain in LUQ with know liver mass; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Swollen lymph nodes right axilla and pain in LUQ with know liver mass. Alkaline phosphatase elevation, swelling of lymph node.; It is not known if there has been any treatment or conservative therapy.; Swollen lymph nodes right axilla and pain in LUQ with know liver mass	1
Approval	71250 CT CHEST, THORAX	Tenderness (right anterolateral chest wall)  Continuous pain times 2 months or greater. Normal chest film. Medication treatment not working. Treated with pain meds, anti inflammatories, home stretches and exercises.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	The patient has had a chest x-ray recently.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for hemoptysis.	3
Approval	71250 CT CHEST, THORAX	The patient has had a chest x-ray recently.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for hemoptysis.; Yes this is a request for a Diagnostic CT	6
Approval	71250 CT CHEST, THORAX	The patient is presenting new signs or symptoms.; "There is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; It is unknown if there is radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	The patient is presenting new signs or symptoms.; "There is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	There is a solid somewhat lobulated nodule in the lateral right lower lobe with calculated volume 168 cubic mm, meeting criteria for NODCAT 3 classification. Recommend follow-up exam in 3 months to evaluate for stability. 2. Mild diffuse emphysema wit; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1

Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of mediastinal widening.; There is no physical or radiologic evidence of a chest wall abnormality.; Patient had fall still having acute bilateral thoracic back pain.; The ordering physician a is NOT a Surgeon, Pulmonologist, or Cardiologist.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of mediastinal widening.; There is physical or radiologic evidence of a chest wall abnormality.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.	1
Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of mediastinal widening.; There is physical or radiologic evidence of a chest wall abnormality.; The ordering physician a is NOT a Surgeon, Pulmonologist, or Cardiologist.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.	1
Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of mediastinal widening.; There is physical or radiologic evidence of a chest wall abnormality.; The ordering physician a is NOT a Surgeon, Pulmonologist, or Cardiologist.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.; Yes this is a request for a Diagnostic CT	2
Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "The caller doesn't know if there is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is radiologic evidence of a lung abscess or empyema.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; It is not known if there is radiologic evidence of asbestosis.; ; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "The caller doesn't know if there is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; It is not known if there is radiologic evidence of a lung abscess or empyema.; It is not known if there is radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1

Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; The patient is presenting new signs or symptoms.; "The caller doesn't know if the ordering physician is a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; It is not known if there is radiologic evidence of a lung abscess or empyema.; There is radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; < Enter answer here - or Type In Unknown If No Info Given. >; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; It is not known if there is radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; < Enter answer here - or Type In Unknown If No Info Given. >; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; ; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "The caller doesn't know if there is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1

Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; ; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; hard time breaking chest heaviness cough; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Jimmy R Hunt is a 49 y.o. male presents for a follow up. He states that he noticed in early November, that he would have flushing, runny nose, chills, sweating with mild activity. He was noted to have these sx by his fellow firefighters. He notices exc; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; left chest pains; was admitted to hospital on 03/02/17 and dc'd 03/03/17 with these; cough, chest tightness; lightheadedness and dizziness; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1

Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Patient has chronic pain; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Patient has COPD and Right Lower Lobe Pneumonia.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Patient has presented to the clinic several times with chest wall pain that have negative findings on x-ray. Medications have not alleviated the symptoms.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Patient has shortness of breath and chest pain.; "The caller doesn't know if the ordering physician is a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1

Approval	71250 CT CHEST, THORAX	<p>There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Pt has an abnormal chest x-ray on 3/3/17 that showed a calcified granuloma in left upper lung and mild bibasilar atelectasis. pt is experiencing shortness of breath and cough; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "The caller doesn't know if there is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT</p>	1
Approval	71250 CT CHEST, THORAX	<p>There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Pt seen in the clinic on 12/29/16, a chest x-ray was preformed with negative x-ray findings. Pt. stated tat he hae TB when he was 3 yr's old and was on oral medication for a year. Dr. &#x0D; Brashears is requesting that a CT of the chest without contrast be or; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcooidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.</p>	1
Approval	71250 CT CHEST, THORAX	<p>There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; pt was hospitalized for pneumonia and the doctor ordered a follow up Ct for the pt; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcooidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT</p>	1

Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Radiologist recommends follow up CT because of slight prominence of the perihilar shadows paratracheal shadows that could indicate underlying adenopathy.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; recent history of left thoracotomy for spontaneous pneumothorax. Severe worsening pain with shortness of breath.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; See attached; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; unresolved dry cough greater than 3 months. treated with inhaler; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1

Approval	71250 CT CHEST, THORAX	There is not a known inflammatory disease.; There is not a known tumor.; history of breast cancer, heavy smoker; "The ordering physician is NOT an oncologist, surgeon, pulmonologist, cardiologist or PCP ordering on behalf of a specialist who has seen the patient."; There is no known vascular disease.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for a pre-operative evaluation.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	There is radiologic evidence of non-resolving pneumonia after at least 4 weeks of treatment.; "The caller doesn't know if the ordering physician is a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	There is radiologic evidence of non-resolving pneumonia after at least 4 weeks of treatment.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	5
Approval	71250 CT CHEST, THORAX	There is radiologic evidence of non-resolving pneumonia after at least 4 weeks of treatment.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	21
Approval	71250 CT CHEST, THORAX	There is radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	5
Approval	71250 CT CHEST, THORAX	This condition occurred without any known injury. Symptoms are located in the midline upper back. The patient describes the pain as aching. The symptoms occur intermittently. Symptoms are exacerbated by standing, prolonged standing, prolonged sitting, lif; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	this is a 3 month follow up for chest wall mass; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	This is a 6 month follow up to a CT; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1

Approval	71250 CT CHEST, THORAX	THIS PATIENT HAS HAD A RECENT EGD DONE AND IT HAS SHOWED SHE HAS A LARGE MASS ON THE OUTSIDE OF HER ESOPHAGUS. THIS NEEDS TO BE FURTHER EVALUATED, SO THESE TEST ARE NECESSARY; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Approval	71250 CT CHEST, THORAX	unknown; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Unknown; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	3
Approval	71250 CT CHEST, THORAX	UNKNOWN; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	unknown; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	unknown; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; It is unknown if the patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	UNKNOWN; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
Approval	71250 CT CHEST, THORAX	unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1

Approval	71250 CT CHEST, THORAX	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/31/2016; There has not been any treatment or conservative therapy.; significant weight loss, abnormal chest x-ray, chronic cough	1
Approval	71250 CT CHEST, THORAX	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; He has been having problems at least a year.; There has been treatment or conservative therapy.; abnormal weight loss, chronic cough, nicotine dependence, type 2 diabetic, COPD.; inhalers and being referred to GI physician	1
Approval	71250 CT CHEST, THORAX	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; It is not known if there has been any treatment or conservative therapy.; Chest pain in a longtime smoker, large chest mass, chronic neck pain	1
Approval	71250 CT CHEST, THORAX	unknown; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Approval	71250 CT CHEST, THORAX	want to rule out suspected mass; Radiologist suggest we do CT exam; "Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Approval	71250 CT CHEST, THORAX	Will fax clinical information; This study is being ordered for trauma or injury.; ; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >; xray was done in 8/2016; heart enlarged. cough; "Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; It is not known whether this study is requested to evaluate suspected pulmonary embolus.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	3

Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3/8/2017; It is not known if there has been any treatment or conservative therapy.; pain,	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; It is not known if this is a pre-operative evaluation, post operative evaluation or follow up to a previous angiogram or MR angiogram.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	*Clinical info. will be provided*; It is not known whether this study is requested to evaluate suspected pulmonary embolus.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	; It is not known whether this study is requested to evaluate suspected pulmonary embolus.; This study is being ordered for Known or Suspected Congenital Abnormality.; The abnormality is of a cardiac nature.; It is not known whether there is a known or suspected coarctation of the aorta.; It is not known if there is another type of arch anomaly.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	looking for thoracic aneurysm; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Patient scheduled to see surgeon who is requesting testing to be done prior to appointment.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a pre-operative evaluation.; This surgery is not scheduled/ planned.; Yes, this is a request for a Chest CT Angiography.	1

Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	rule out any Aneurism or cardiac pathology or lung pathology; negative GI workup; It is not known whether this study is requested to evaluate suspected pulmonary embolus.; This study is being ordered for Suspected Vascular Disease.; There are new signs or symptoms indicative of a dissecting aortic aneurysm.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.	46
Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	wanted to do cardiovascular evaluation for unspecified carotid artery; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.	1
Approval	71550 MRI CHEST	Date of initial onset: MUSCULOSKELETAL: normal gait; range of motion: decreased ROM in right shoulder; pain with ROM of right shoulder; Crepitus, Tenderness, Effusion: tenderness noted in the exquisite over the right anterior chest wall and shoulder/espec; This study is being ordered for trauma or injury.; MUSCULOSKELETAL: normal gait; range of motion: decreased ROM in right shoulder; pain with ROM of right shoulder; Crepitus, Tenderness, Effusion: tenderness noted in the exquisite over the right anterior chest wall and shoulder/especially of the clavicle; There has not been any treatment or conservative therapy.; Date of initial onset: MUSCULOSKELETAL: normal gait; range of motion: decreased ROM in right shoulder; pain with ROM of right shoulder; Crepitus, Tenderness, Effusion: tenderness noted in the exquisite over the right anterior chest wall and shoulder/espec	1
Approval	71550 MRI CHEST	rates pain at 8/10.; This study is being ordered for trauma or injury.; 12/25/2016; It is not known if there has been any treatment or conservative therapy.; left arm pain radiating to elbow and hand; parasthesias, weakness	1
Approval	71550 MRI CHEST	This study is being ordered for a work-up of a suspicious mass.; There is radiographic or physical evidence of a lung or chest mass.; This is a request for a chest MRI.	1
Approval	71550 MRI CHEST	This study is being ordered for follow-up to trauma.; "The ordering physician is not a surgeon, pulmonologist, or cardiologist."; There is no radiologic evidence of mediastinal widening.; There is physical or radiologic evidence of a chest wall abnormality.; This is a request for a chest MRI.	1
Approval	71550 MRI CHEST	This study is being ordered for follow-up to trauma.; "The ordering physician is not a surgeon, pulmonologist, or cardiologist."; There is radiologic evidence of mediastinal widening.; This is a request for a chest MRI.	1

Approval	71550 MRI CHEST	Upper back pain noted. She does not recall any precipitating event or injury. Ms. BACA presents with a diagnosis of upper back pain. This was diagnosed 1 week ago. The course has been progressively worsening. It is of moderate intensity. Aggravating; This study is NOT being ordered for a Work-up for Suspicious Mass, Known Tumor, Known or Suspected Inflammatory Disease, etc...; This is a request for a chest MRI.	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST		2
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	There are no documented clinical findings of immune system suppression.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; None of the options listed is the reason for the study.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing cervical neck pain not improving despite treatment.	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; 02/21/17; There has been treatment or conservative therapy.; numbness and tingling; pain medications	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 2/16/17; There has not been any treatment or conservative therapy.; headache, neck ache and pain. back pain. Fell.	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI. Abnormal findings on diagnostic imaging of other specified body structures,MRI scan abnormal, Findings: Motion artifact limits the examination particularly on axial imaging, Impression: 1. Nonspecific bone marrow edema along the left C4-C5 vertebral bod; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	3
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST		1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	having neck shoulder and upper back pain. patient has hardware in C spine area; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	pt has already had MRI cervical spine and is needing CT to check for screw placement; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	1

Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	pt has neck pain and pain in both arms; pt appears in acute distress, pain is chronic, unrelenting; pt has been given medication therapy home range of motion exercises to no avail; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	rule out CVA; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 02/03/2017; There has not been any treatment or conservative therapy.; visual disturbances	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	She needs a myelogram. MRI was inconclusive in 2015; This study is being ordered for a neurological disorder.; Pt has experienced severe neck and upper back pain with radiculopathy. She has failed conservative treatment and is in need of a myelogram of her c and t spines.; There has been treatment or conservative therapy.; Pain in neck and back, tingling, numbness. She failed conservative treatment; pt has had PT and medications. muscle relaxers and pain reliever.	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	soft tissue anterior cervical mass; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; The patient is experiencing sensory abnormalities such as numbness or tingling.; There is a reason why the patient cannot have a Cervical Spine MRI.; This study is being ordered for another reason besides Abnormal gait, Lower extremity weakness, Asymmetric reflexes, Documented evidence of Multiple Sclerosis, Bowel or bladder dysfunction, Evidence of new foot drop, etc...	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Abnormal gait.	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Lower extremity weakness.	1

Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to trauma or acute injury within 72 hours.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Evidence of a recent fracture on previous imaging studies.	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	The patient does not have any neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; There is a reason why the patient cannot have a Cervical Spine MRI.	3
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to neurological deficits.; The patient is experiencing or presenting symptoms of radiculopathy.; There is a reason why the patient cannot have a Cervical Spine MRI.	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to pre-operative evaluation.; The patient is experiencing or presenting symptoms of radiculopathy.; There is a known condition of neurological deficits.; There is a reason why the patient cannot have a Cervical Spine MRI.	1
Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	This study is to be part of a Myelogram.; This is a request for a Cervical Spine CT	3
Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/15/2016; There has been treatment or conservative therapy.; severe pain; brace, medication	1
Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2/1/2017; There has been treatment or conservative therapy.; Back pain, decreased rom; Physical Therapy	1
Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 4/4/16; There has been treatment or conservative therapy.; chronic pain / pain in lower back / pain progressively gotten worst; PT/ pain managements previous MRI/ CT /bone scans/ NSAIDS /topical sports creams/ muscle relaxers	1

Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	PATIENT HAS HAD PT FOR 6 WEEKS & ORAL MEDICATIONS WITH NO RELIEF FROM CHRONIC BACK PAIN. PATIENT HAS HAD XRAYS 1/24/17.; This is a request for a thoracic spine CT.; Caller does not know whether there is a reason why the patient cannot undergo a thoracic spine MRI.; Yes this is a request for a Diagnostic CT	1
Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	Recommended by radiologist for follow up from x ray reports on 01/03/2017; This study is being ordered for trauma or injury.; Unknown; There has been treatment or conservative therapy.; Having constant pain during therapy and focal pain to touch. Xray adnormal at T-12 and S-1; Continue with Therapy and stretching	1
Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	She needs a myelogram. MRI was inconclusive in 2015; This study is being ordered for a neurological disorder.; Pt has experienced severe neck and upper back pain with radiculopathy. She has failed conservative treatment and is in need of a myelogram of her c and t spines.; There has been treatment or conservative therapy.; Pain in neck and back, tingling, numbness. She failed conservative treatment; pt has had PT and medications. muscle relaxers and pain reliever. The patient does have neurological deficits.; This is a request for a thoracic spine CT.; The study is being ordered due to chronic back pain or suspected degenerative disease.; There is a reason why the patient cannot undergo a thoracic spine MRI.; The patient has a recent fracture or abnormality seen on a previous imaging study; Yes this is a request for a Diagnostic CT	1
Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine CT.; The study is being ordered due to chronic back pain or suspected degenerative disease.; There is a reason why the patient cannot undergo a thoracic spine MRI.; The patient is experiencing or presenting radiculopathy documented on EMG or nerve conduction study.	1
Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine CT.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; There is a reason why the patient cannot undergo a thoracic spine MRI.; Yes this is a request for a Diagnostic CT	2
Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	THE PT HAS TO HAVE THIS EXAM IN ORDER TO SEE A NEUROSURGEON.; This study is being ordered for trauma or injury.; 4 YEARS AGO; There has been treatment or conservative therapy.; low back pain, discomfort in the thoracic and lumbar spine, constant,tightening sensation. This is a chronic problem, with essentially constant pain.; PHYSICAL THERAPY AND PAIN MEDICATION	1

Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	This is a request for a thoracic spine CT.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits."; There is a reason why the patient cannot undergo a thoracic spine MRI.; Caller does not know if there are documented clinical findings of immune system suppression or AIDS.; Caller does not know if the patient is experiencing thoracic back pain associated with chest pain.; Yes this is a request for a Diagnostic CT	1
Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	This is a request for a thoracic spine CT.; The study is being ordered due to known or suspected infection or abscess.; There is a reason why the patient cannot undergo a thoracic spine MRI.; There is laboratory or x-ray evidence of paraspinal abscess.; Yes this is a request for a Diagnostic CT	1
Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	This is a request for a thoracic spine CT.; The study is being ordered due to Neurological deficits.; There is a reason why the patient cannot undergo a thoracic spine MRI.; The patient is experiencing or presenting abnormal gait.; Yes this is a request for a Diagnostic CT	1
Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	This is a request for a thoracic spine CT.; The study is being ordered due to Neurological deficits.; There is a reason why the patient cannot undergo a thoracic spine MRI.; The patient is experiencing or presenting lower extremity weakness.; Yes this is a request for a Diagnostic CT	1
Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	UNKNOWN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 04/05/2016; There has been treatment or conservative therapy.; DELAYED HEALING; SURGERY	1
Approval	72131 CT LUMBAR SPINE, LOW BACK	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/15/2016; There has been treatment or conservative therapy.; severe pain; brace, medication	1
Approval	72131 CT LUMBAR SPINE, LOW BACK	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2/1/2017; There has been treatment or conservative therapy.; Back pain, decreased rom; Physical Therapy	1

Approval	72131 CT LUMBAR SPINE, LOW BACK	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 4/4/16; There has been treatment or conservative therapy.; chronic pain / pain in lower back / pain progressively gotten worst; PT/ pain managements previous MRI/ CT /bone scans/ NSAIDS /topical sports creams/ muscle relaxers	1
Approval	72131 CT LUMBAR SPINE, LOW BACK	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/8/2016; There has been treatment or conservative therapy.; Severe low back pain with radiculopathy. she has numbness in left foot with cramping. pain radiates down bilateral legs and buttocks; medication including anti-inflammatory. Physical therapy stretches	1
Approval	72131 CT LUMBAR SPINE, LOW BACK	THE PT HAS TO HAVE THIS EXAM IN ORDER TO SEE A NEUROSURGEON.; This study is being ordered for trauma or injury.; 4 YEARS AGO; There has been treatment or conservative therapy.; low back pain, discomfort in the thoracic and lumbar spine, constant,tightening sensation. This is a chronic problem, with essentially constant pain.; PHYSICAL THERAPY AND PAIN MEDICATION	1
Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is a preoperative or recent post-operative evaluation.	2
Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is a preoperative or recent post-operative evaluation.; Yes this is a request for a Diagnostic CT	6
Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.	4
Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.; Yes this is a request for a Diagnostic CT	20
Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is not experiencing symptoms of radiculopathy for six weeks or more.; There is no neurologic symptoms of bowel or urinary bladder dysfunction.; There is a suspicion of lumbar spine infection.; Yes this is a request for a Diagnostic CT	3

Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is not experiencing symptoms of radiculopathy for six weeks or more.; There is no neurologic symptoms of bowel or urinary bladder dysfunction.; There is no suspicion of lumbar spine infection.; There is no suspicion of lumbar spine neoplasm or tumor or metastasis.	2
Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is not experiencing symptoms of radiculopathy for six weeks or more.; There is no neurologic symptoms of bowel or urinary bladder dysfunction.; There is no suspicion of lumbar spine infection.; There is no suspicion of lumbar spine neoplasm or tumor or metastasis.; Yes this is a request for a Diagnostic CT This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is not experiencing symptoms of radiculopathy for six weeks or more.; There is no neurologic symptoms of bowel or urinary bladder dysfunction.; Yes this is a request for a Diagnostic CT	2
Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is to be part of a myelogram or discogram.	1
Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is to be part of a myelogram or discogram.; Yes this is a request for a Diagnostic CT	2
Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.	5
Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.; Yes this is a request for a Diagnostic CT	31
Approval	72131 CT LUMBAR SPINE, LOW BACK	UNKNOWN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 04/05/2016; There has been treatment or conservative therapy.; DELAYED HEALING; SURGERY	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST		12

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.; muscle spasms, tingling in right & upper extremities, worse in the right hand has been going on for x5 days. No recent injuries	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; diminished grip strength and lack of coordination.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Document exam findings; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; numbness and tingling on both sides, range of motion has decreased, stiffness.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; numbness to the right arm, tenderness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.; Left neck/shoulder pain Numbness from left shoulder down to left hand tenderness C 4,5 paravertebral plain film shows some protrusion and spacing	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	2
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; C-spine pain; Pt reports pain and stiffness in neck,Pt would like to review x-rays from 01/12-2017; Pain + tingling radiates down the right arm and into the 1st, 2nd and 3rd fingers. ; The 2nd and 3rd fingers are numb.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; patient has neck pain that radiates down her right upper extremity and scapula area. she has failed physical therapy out patient and conservative tx and now needs mri c spine; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; PT HAS BILATERAL UPPER EXTREMITY WEAKNESS. PT HAS HAS 6 WEEKS OF PHYSICAL THERAPY WITHOUT SUCCESS.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; RIGHT UPPER EXTREMITY WEAKNESS; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.;	2
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; 01/04/2017; There has not been any treatment or conservative therapy.; Patient is having back and neck pain with radiating numbness	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; 03-02-2017; There has not been any treatment or conservative therapy.; Sudden onset left side numbness, hyperreflexia, blurred vision in left eye	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; see attached clinicals; It is not known if there has been any treatment or conservative therapy.; see clinicals attached	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/17/16; There has been treatment or conservative therapy.; pain in neck, weakness in both arms and hands; pain in lower back radiating down right lower extremity; Patient has been taking meloxicam and OTC NSAIDS with no improvement of symptoms	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.; lower back and neck pain with numbness into both hands pt. has finished PT and NSAIDS for months and she is not improved; physical therapy, NSAIDS	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.;	3
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	abnormal central signal in cord consistent with a tiny syrinx; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.; mri of thoracic spine and pre and postcontrast imaging of the cervical spine and brain and to include the distal cord at the thoracolumbar level is recommended as underlying central nervous system lesions cannot be excluded	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	abnormal nerve conduction study; This is a request for cervical spine MRI; None of the above; The patient does not have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	back and neck ddd; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/02/17; There has been treatment or conservative therapy.; back and neck ddd; naproxen	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Bilateral lower extremity numbness and itching without cause; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness in hands with numbness and tingling; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	c/o neck pain x about 5 years. No previous trauma. She has never had an MRI. The neck pain keeps her up at night. It is worse when she has to move a lot. c/o her neck "crunches and pops." The right hand numbness has been present x 20 years but has been w; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	chronic neck pain, spondylosis on X-rays.However, since last visit he reports several episodes of numbness and tingling radiating down both shoulders to bilateral hands and superiorly from the neck into the scalp. Symptoms seem to be worse while laying in; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Patient presents for follow-up of chronic neck pain. He has known cervical spondylosis and chronic pain resistant to conservative treatment. Pain is been well controlled on current medications and without any adverse side effects. However, since last visi; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	DEGENERATIVE OSTEOARTHRITIC changes which include loss of the normal lordotic curvature of the neck, bilateral muscle spasms and tenderness to palpation, and limited range of motion in extension, flexion and rotation though most pronounced in extension., ; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Patient holding left arm at side, states unable to move due to pain and numbness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	difficulty moving on her own; This study is being ordered for a neurological disorder.; 9/22/2016; There has been treatment or conservative therapy.; pins and needles and spasms in feet for the past month, hard for Pt to move legs and hands, unable to function properly, stiffness in LE. Work up was negative; medication	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	evaluate for surgery; This study is being ordered for a neurological disorder.; 01/01/2016; There has been treatment or conservative therapy.; Pain and radiculopathy in neck and back, history of fibromyalgia; Medication, exercises, injections	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	EVALUATE UNDERLYING CAUSE OF PAIN IN CERVICAL AND THORACIC BACK PAIN.MODERATLY DECREASED ROM IN NECK AND THORACIC SPINE TENDERNESS WITH EXACERBATION OF PAIN CAUSED BY EXTENDING ARMS; This study is being ordered for a neurological disorder.; 09/07/2016; There has been treatment or conservative therapy.; Mid thoracic spine tenderness. Pain in the area exacerbated by extending arms against resistance; THORACIC BACK PAIN,RADICULOPATHY TO ANTERIOR TORSO,SPINAL TENDERNESS; PUSHING AGAINST HARD SURFACE INCREASES PAIN IN MID TO UPPER BACK AREA.HX C-SPINE ISSUES; MEDS:BACLOFEN,CELEBREX,HYDROCODONE-ACETAMINOPHEN,LYRICA; HOME EXERCISES	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	F/u after failed for the 2nd round of therapy; This study is being ordered for a neurological disorder.; 1/9/17; There has been treatment or conservative therapy.; Chronic pain w/ limited range of motion Muscle stiffness Radiculopathy; PT 8 wks Flexeril Diclofenac Hydrocodone	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	f/u neck pain with radicular sx r shoulder. some better last week but over weekend pain exacerbated. not sleeping. getting back like was. now tingling down into arm as well.pt not responding to physical therapy. will proceed with mri neck. f/u after mri t; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness; tender cervical paraspinal . pain exacerbated with sidebending to right. shoulder tender laterally. good rom shoulder.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	failed meloxicam, currently in PT, xrays negative. pain has been for longer than six weeks; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; The patient has not completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.; meloxicam	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Filed PT x8 weeks, Failed MEDS. Failed Chio ttreatmetn.; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Poor grip in right hand as compare to the grip.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Finished 6 weeks of conservative treatment. Did not help symptoms; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Weakness in right arm/hand w/tingling; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.; Will attach clinical once MD has signed off on them	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.;	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Limited range of motion on extension and elevation; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/01/2017; There has been treatment or conservative therapy.; Pain with radiculopathy, Numbness and tingling in hands.; Anti Inflammatory medications and Physical therapy with no improvements	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	migraines; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Midline, bilateral, L and R; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	mri recommended after bilat upper ext ncv was abnormal. weakness/numbness/pain bilat upper arms/hands; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness numbness pain  bilateral arms/hands that radiate from neck ncv has been preformed & they recommended an mri; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	muscle rigidity; pain in his neck, Neurologic: tingling AND NUMBNESS DOWN HIS ARMS and frequent or severe headaches. NO RELIEF FROM PT, FLEXERIL OR HYDROCODONE; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Neck Pain, myalgia (spams in neck, spasms in low back especially if twists with arms elevated, pt demonstrated here in office; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; It is not known if the physician has directed conservative treatment for the past 6 weeks.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	No Info Given; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Several Years; There has been treatment or conservative therapy.; Pt. has weakness, Achilles tendon pain. Pt. range of motion is off, visual disturbance, and numbness.; Pt. did Physical therapy and had an injection. NONE; This study is being ordered for a neurological disorder.; 01/25/2017; There has been treatment or conservative therapy.; The Pt has pain, radiating into right shoulder.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	P has numbness in right arm. Pt had EMG recommends this study; Pt has had medication therapy	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	NONE; This study is being ordered for a neurological disorder.; 2014; There has been treatment or conservative therapy.; The Pt has back pain, bulging discs in lumbar spine , bilateral canal stenosis. Pt has bileateral leg pain, numbness and tingling. Pt had nereve conduction study cervical spine disease.; The Pt has had Ct scans, medication therapy.	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/04/2016; There has not been any treatment or conservative therapy.; Numbness and parathesia in arms and legs	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	numbness, tingling in neck and back; headaches;; This study is being ordered for trauma or injury.; 3/3/17; There has been treatment or conservative therapy.; stiffness, throbbing and tingling pain at neck and back; complaines of dizziness, headaches, numbness and tingling and tightness; having trouble in school and at home with activities of daily living; aggravated by any movement; relived by nothing; chiropractice treatments	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	numbness, tingling in upper extremity.. post motor vehicle accident; This is a request for cervical spine MRI; None of the above; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	pain present at least 3 months, chronic pain, neck pain or cervicalgia, degenerative disc disease, thoracic; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; pain present at least 3 months, chronic pain, neck pain or cervicalgia, degenerative disc disease, thoracic; It is not known if there has been any treatment or conservative therapy.; chronic pain	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	patient has cervical radulaphy, history trauma, right should tenderness with range of motion decrease grip strength right hand; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Decreased grip strength in the right hand; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Patient has chronic cervical spine pain. Patient finished 4 weeks of physical therapy with no relief. Patient also has no relief from medication therapy.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.;	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	patient has continued neck pain and low back pain; has numbness of left arm and left leg; This study is being ordered for a neurological disorder.; 09/27/16; There has been treatment or conservative therapy.; neck pain with paresthesia of left arm & low back pain with paresthesia of left leg; patient has done physical therapy without success, pain is worse now; patient has been on pain medications, steroids without controlling the pain	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	<p>Patient has had recent bouts with numbness in fingers and with faintness if she extends her neck upwards. CT performed at ER did not show enough details, requesting MRI study.; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Patient becomes faint if extends her head up.; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.</p> <p>Patient has had six weeks of conservative treatment with no improvement.; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Upper extremity right V/V Left III/V Strength and grip.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.</p>	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	<p>Patient has had worsening neck pain that causes headaches. He has taken Neurontin with somewhat good response, but has had to continue taking pain medicine.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Neck: Diffuse posterior tenderness mostly around C3-5 area. Neurologic: Upper extremities reveal strength is 4/5 in the right triceps, others are 5/5. Sensation & DTRs are equal.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.</p>	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	<p>Patient is a candidate for cervical and lumbar epidural injections. Possible surgical candidate pending MRI results.; This study is being ordered for trauma or injury.; 1998, but worsened on 01/23/2017 after falling.; There has been treatment or conservative therapy.; Neck pain radiating down both arms. Midline midback pain that worsens with movement, lying down, when going from sitting to standing, and lower back pain chronic duration. Tingling of both legs. Posterior cervical and lumbar spine exhibited moderate tenderness; Previously treated with Physical Therapy-which didn't help. Patient is unable to participate in therapy again due to recent injury on 01/23/2017.</p>	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Patient is a candidate for Epidural Steroid Injections.; This study is being ordered for a neurological disorder.; 10/11/2014; There has been treatment or conservative therapy.; Tingling of the posterior right thigh. Neck pain in trapezius extends into shoulder. Lower back pain radiating to the legs posteriorly on the right and chronic duration. Cervical and lumbar spine midline tenderness exhibited on palpation. Range of motion ; Chiropractic Therapy with Dr. Chris Tate-which didn't help. Home therapy exercises-which hasn't helped.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Patient is a pleasant 41 year-old white female who presents to clinic complaining that 2 days ago she woke up with left ocular pain. She states when she moved her eyes she would feel discomfort. She then 1 day ago woke up and had loss of lower visual field; This study is being ordered for a neurological disorder.; 03/06/2017; There has not been any treatment or conservative therapy.; Left ocular pain. She states when she moved her eyes she would feel discomfort. loss of lower visual field and left peripheral vision.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	patient with spindle cell lipoma had MRI c-spine and t-spine done in August.; artifax noted on films recommendation of repeat done after braces taken off; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; august 2016; There has not been any treatment or conservative therapy.; patient with spindle cell lipoma had MRI c-spine and t-spine done in august. artifax noted due to patient's braces.; recommendation for repeat MRI after braces taken off.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Pending MRI results patient is a candidate for cervical and lumbar epidural steroid injections and possibly surgery.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/24/2010; There has been treatment or conservative therapy.; Numbness and tingling of the lateral left arm. Midline upper back pain, radiating along the midline, and lower back pain chronic duration. Cervical and lumbar spine midline tenderness on palpation. Pain demonstrated with flexion and rotation. Previously t; Physical Therapy for several months with no improvement.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	plain film abnormal widening of the C-5 and C-6 radiologist suggests further imaging; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; decreased sensation left inner forearm DTR's abnormal Tenderness in C-3 C-4 right infrascapular; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if there is x-ray evidence of a recent cervical spine fracture.	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Previous CT showing posterior disc bulge. Needing MRI to be evaluated by Neurosurgeon; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; ; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Pt had EMG/NCV on 3/6/17 which was abnormal. Radiologist recommended patient have MRI of Cervical and Thoracic Spine.; This study is being ordered for trauma or injury.; January 30, 2017; There has been treatment or conservative therapy.; neck pain that goes from neck to shoulder, down to elbow and fingers/forearm numb.; pt started Tramadol, Prednisone and Decadron on 2/22/17. Was seen again on 2/27/17 and started Meloxicam and continued Tramadol. Pt was seen on 3/1/17 by Dr. Joseph/Orthopedic doctor and was given injections. Still continued pain.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Pt has complaints of neck and shoulder pain with paresthesias x 3 months. She has failed treatment with NSAIDS, muscle relaxers, and physical therapy. This study is for further eval; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	pt is having back and should pain, is having some numbness and tingling in bilateral lower extremities; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2014; There has been treatment or conservative therapy.; shoulder and back pain; pt has under went injections, chiropractor	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	pt is having worse pain and now having numbness in bilateral hands. She has had steroid dose pack and on medication daily. she has tried heat therapy and has done 2 weeks of pt and now doing home exercises; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Pt with neck pain radiculopathy to left arm, numbness tingling and weakness noted to left arm and grip.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness of grip to left hand. fourth and fifth digit of left hand with parasthesia; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Pt. c/o of low back pain started on right side and now goes all the way across, also numbness in bilateral arms, no longer drives as she cannot feel her arms; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	R/O herniated disc; This study is being ordered for a neurological disorder.; 01/31/2017; There has been treatment or conservative therapy.; pain in back radiating to legs and feet; physical therapy, injections	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	R/O MS; This study is being ordered for a neurological disorder.; 01/23/2017; There has been treatment or conservative therapy.; Ongoing, progressively worse pain in leg, essential tremors, myoclonic jerks; Physical therapy	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	rates pain at 8/10.; This study is being ordered for trauma or injury.; 12/25/2016; It is not known if there has been any treatment or conservative therapy.; left arm pain radiating to elbow and hand; parasthesias, weakness	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	rule out spinal stenosis as cause of upper and lower extremity pain and radiculopathy; This study is being ordered for a neurological disorder.; 1/2015; There has been treatment or conservative therapy.; neck pain, hand numbness, low back pain, bil foot numbness.; pt was evaluated by neurology and EMG studies were unremarkable except bil carpal tunnel syndrome; PT, Cymbalta, Mobic	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Severe C Spine lesion found with nerve conduction study and severe cervicalgia; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; C spine lesion found on nerve conduction study, severe cervicalgia; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	symptoms not improving and worsening with time; This study is being ordered for Inflammatory/ Infectious Disease.; 01/26/2017; There has been treatment or conservative therapy.; neck pain, right shoulder pain and weakness in right hand; x-ray right shoulder showing arthropathy, mobic	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if the patient demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; No, this patient did not have a recent course of supervised physical Therapy.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; It is not known if this patient had a recent course of supervised physical Therapy.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.	4
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.	3
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.	6

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.	34
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; It is not known if this patient had a recent course of supervised physical Therapy.	2
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.	18
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; "The patient has been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."; Follow-up to Surgery or Fracture within the last 6 months	4
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.	6
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is x-ray evidence of a recent cervical spine fracture.	2

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	7
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; The patient has completed 6 weeks or more of Chiropractic care.; norco	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; Yes, there is evidence of recent development of unilateral muscle wasting.	2
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.	259
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Known or Suspected Multiple Sclerosis, Infection or abscess; Yes, the patient have new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.; yes, there are documented clinical findings of Multiple sclerosis.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; &Enter Additional Clinical Information>; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; Yes, the patient is demonstrating unilateral muscle wasting.	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; numbness in left arm, neck pain, cervical disc degeneration; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; Patient c/o constant neck pain radiating to the shoulder and arm. The pain is aching, sharp, throbbing and shooting. The pain is aggravated by bending, sitting, laying down, and daily activities. Associated symptoms include decreased mobility, difficulty ; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; Patient is having numbness and tingling of hands and arms. Nerve conduction study has been done and MRI Cervical Spine needs to be done to rule out cervical disk disease; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	77
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; None of the above; <Enter Additional Clinical Information>; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	2

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; None of the above; STERIODS AND MUSCLE RELAXERS FAILED.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; None of the above; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	4
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Pre-Operative Evaluation; No, the last Cervical spine MRI was not performed within the past two weeks.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Pre-Operative Evaluation; Surgery is scheduled within the next 4 weeks.; The last Cervical Spine MRI was not performed within the past two weeks.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	5
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	54
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Yes, this patient had a recent course of supervised physical Therapy.	10
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.;	2
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; <Enter Additional Clinical Information>	3

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; <Enter Additional Clinical Information> pt cannot lift do to pain, and arm weakness, pt has weakness numbness in right are, and pain in suprascapular.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; GENERAL: well developed, well nourished, in no apparent distress  EYES: lids and conjunctiva are normal;  RESPIRATORY: normal respiratory rate and pattern with no distress; normal breath sounds with no rales, rhonchi, wheezes or rubs;  CARDIOVASCULAR:	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.; yes, there is a documented evidence of extremity weakness on physical examination.	3
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; <Enter Additional Clinical Information>; No, the patient does not have new or changing neurological signs or symptoms.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; ; No, the patient does not have new or changing neurological signs or symptoms.	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; CERVICALGIA,WT LOSS,NAUSEA,RADICULOPATHY BIL LEGS AND FEET PAIN,TINGLING,NUMBNESS POPPING,DECREASE MOBILITY PAIN IN NECK AND LEGS,R/O METASTATIC PROCESS FOR MRI R/O HNP; Yes, the patient have new or changing neurological signs or symptoms.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; experiencing muscle pain on the right and neck pain; Yes, the patient have new or changing neurological signs or symptoms.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; MVA 8 months ago. She has has more numbness in her upper left back.; Yes, the patient have new or changing neurological signs or symptoms.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; Pain with motion, tenderness, Minimal improvement with PT, tingling in the arms and fingers.; No, the patient does not have new or changing neurological signs or symptoms.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; whiplash injury; No, the patient does not have new or changing neurological signs or symptoms.	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; Yes, the patient have new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	11
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	tingling and numbness, asked to put heat on the area and given him Medrol dose package, no known injury or accidents to the area.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Cant lift anything without pain.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/15/2016; There has been treatment or conservative therapy.; neck and back pain which radiates into lower extremity, numbness in arm, tingling, pain in right leg, hip down to toes, pain in left leg down to knee, Radiculopathy; medications , PT	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	unknonw; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; patient arms were weakness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	unknown; This is a request for cervical spine MRI; None of the above; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; patient had arm weakness and muscle weakness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	unknown; This study is being ordered for a neurological disorder.; 01/02/2017; There has been treatment or conservative therapy.; back pain, leg pain, unsteady gait, dizziness, numbness, tingling and pain in arm , fatigue; medication	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	unknown; This study is being ordered for a neurological disorder.; 05/04/2015; There has been treatment or conservative therapy.; Neck pain, bilateral back pain radiating down both legs. Tenderness in arms to elbow. Numbness in hands to figures. Numbness and pain. Constant discomfort.; Lumbar and CT, medications. Back brace. Muscle relaxers.	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	unknown; This study is being ordered for a neurological disorder.; 1 year ago; There has been treatment or conservative therapy.; headaches, difficulty finding words,; insets over a year, chiropractic , pt , home exercise	1

Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/14/2016; There has been treatment or conservative therapy.; weakness, numbness, tingling.; pt, medication	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; First appointment with ordering 01/31/2017. Patient Reports onset of symptoms began 1.5 years ago after a MVA.; There has been treatment or conservative therapy.; ; unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; It is not known if there has been any treatment or conservative therapy.; Chest pain in a longtime smoker, large chest mass, chronic neck pain	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.; decreased range of motion and movement, muscle spasms; steroids, pain meds, chiropractor	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	unknown; This study is being ordered for trauma or injury.; 6 weeks ago, 1/2/17; There has been treatment or conservative therapy.; 27 broken bones in back and foot, swelling, bruising, decrease ROM and redness; medication therapy, xrays	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	unkown; This study is being ordered for trauma or injury.; 2/21/2013; secondary injury 2/20/2017; There has been treatment or conservative therapy.; pt. has pain in back, decrease ROM, weakness in legs, numbness in legs and lower back, unable to exercise, kneel, unable to put on own socks/shoes, walking limited distance. History of C-Spine fracture . Tenderness in CS and LS, hand swelling moderate pai; pt. has medication, therapy, seen a neurologist	1
Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	YES; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST		1

Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	There are no documented clinical findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is not experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits.";	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	There are no documented clinical findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is not experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits."; radiculopathy, pain between shoulder blades, radiates from side up to front, limited range of motion, tingling, numbness	1

Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; ; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.	2
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of abnormal gait.	4
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of asymmetric reflexes.	2
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.	3

Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of recent fracture on previous imaging studies.	3
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Weakness, decreased range of motion; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.	3
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; The patient has had 3 or fewer thoracic spine MRIs.; It is not known if there has been a supervised trial of conservative management for at least six weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; The patient has had 3 or fewer thoracic spine MRIs.; There has not been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	3
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; "The patient has not been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist.;" This is a continuation or recurrence of symptoms related to a previous surgery or fracture.; The study is being ordered due to follow-up to surgery or fracture within the last 6 months.; XR Thoracic Spine impressions: Inferior endplate compression at T11. MRI considered clinically indicated	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; "The patient is not being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.;" The study is being ordered due to known tumor with or without metastasis.;	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to trauma or acute injury within 72 hours.; T-12 vertebrate made be fracture	1

Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	33
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient is presenting new symptoms.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; This is a request for a thoracic spine MRI.; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; The study is being ordered due to known tumor with or without metastasis.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; "The caller indicated that there is not a known condition of: Tumor, Infection or Neurological deficits."; The study is being ordered due to pre-operative evaluation.; 62 year old male complaining of mid-back pain after a fall, plain films show an abnormality at T6.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; The patient has completed 6 weeks or more of Chiropractic care.; Diclofenac, Robaxin, Ibuprofen	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is recent evidence of a thoracic spine fracture.	2
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	3
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; Follow-up to Surgery or Fracture within the last 6 months; The patient does have new or changing neurologic signs or symptoms.; There has not been a recurrence of symptoms following surgery.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; The patient been not been seen by or is not the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.; There is recent evidence of a thoracic spine fracture.	1

Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; DTRs abnormal (3+ b/l knees, sustained clonus b/l ankles). Coordination and Cerebellum: intention tremor.; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; Pt experiencing radiating pain bilateral upper extremities and bilateral lower extremities. Pt is experiencing weakness, numbness, tingling and burning. Standing, walking, any type of physical activities longer than 10 -15 minutes. Pt has sleep difficul; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of abnormal gait.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of recent fracture on previous imaging studies.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to Neurological deficits.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; There is evidence of tumor or metastasis on a bone scan or x-ray.; The study is being ordered due to suspected tumor with or without metastasis.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; There is x-ray or laboratory evidence of paraspinal abscess.; The study is being ordered due to known or suspected infection or abscess.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This study is being ordered for staging.; This is a request for a thoracic spine MRI.; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; The study is being ordered due to known tumor with or without metastasis.	1

Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/15/2016; There has been treatment or conservative therapy.; neck and back pain which radiates into lower extremity, numbness in arm, tingling, pain in right leg, hip down to toes, pain in left leg down to knee, Radiculopathy; medications , PT	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Unknown.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/01/2016; There has been treatment or conservative therapy.; numbness and tingling. pain. weakness in right leg.; PT and medications	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Unknown; This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Hypothesia, and bilateral CA 21 R L2-4, decreased ROM; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is recent evidence of a thoracic spine fracture.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	unknown; This study is being ordered for a neurological disorder.; 01/02/2017; There has been treatment or conservative therapy.; back pain, leg pain, unsteady gait, dizziness, numbness, tingling and pain in arm , fatigue; medication	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/01/2012; There has not been any treatment or conservative therapy.; Pain, Low and upper back pain, Numbness and tingling down his right thigh and leg.	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 02/20/2017; There has been treatment or conservative therapy.; back pain, abdominal pain; mediation	1
Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/14/2016; There has been treatment or conservative therapy.; weakness, numbness, tingling,; pt, medication	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST		28

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; It is not known if there is x-ray evidence of a lumbar recent fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	3
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; found in lumbar spine; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; lower extremity weakness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	2
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; ON RIGHT LEG FROM KNEE DOWN; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness in L Leg; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	2
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; ; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	4

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; CHRONIC LOW BACK PAIN, LIMITED ROM, NUMBNESS OF FOOT, WEAKNESS, has limited his mobility to a point he cannot get out of bed.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Increased weakness and numbness to bilateral lower extremities. With increased pain and limited ROM; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; numbness going down legs cannot stand or sit long periods of time; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Unable to perform straight leg test due to pain; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness in legs has been let go at job because she could not do the lifting with legs going weak and severe back pain; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; It is not known if the physician has directed conservative treatment for the past 6 weeks.	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; formal home exercise program with gabapentin and hydrocodone with no relief	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	2
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.;	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; DocumentPt pain is not improving and getting worse. Left sided low back pain continues. Pt with shooting pains down his left leg. Denies urinary or bowel complaints. Denies saddle anesthesia. He admits to stenosis dx with MRI done in the fall of 2014. Pt s; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	3
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Trauma or recent injury; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.;;	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; 01/04/2017; There has not been any treatment or conservative therapy.; Patient is having back and neck pain with radiating numbness	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; see attached clinicals; It is not known if there has been any treatment or conservative therapy.; see clinicals attached	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/8/2016; There has been treatment or conservative therapy.; Severe low back pain with radiculopathy. she has numbness in left foot with cramping. pain radiates down bilateral legs and buttocks; medication including anti-inflammatory. Physical therapy stretches	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.; lower back and neck pain with numbness into both hands pt. has finished PT and NSAIDS for months and she is not improved; physical therapy, NSAIDS	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.;	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for trauma or injury.; 12/30/16; There has been treatment or conservative therapy.; Back pain radiating down legs; Physical therapy, naprosyn, flexeril, tylenol #3 , medrol dose pack	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for trauma or injury.; Patient involved in an MVA on 01/02/17. Hit by semi truck. still having severe thoracic and lumbar pain.; There has been treatment or conservative therapy.; Patient can't walk very far due to exacerbation of the pain. Pain limits his ambulation and movement.; Patient treated at ER with Fentanyl injection and morphine as well as Hydrocodon and Valium. No Physical therapy as patient can't tolerate moving.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	a/o, pat. in pain w l and t spine pain.. focal pain to palp of spinous processes of L 3 and T 10 or so. xrays w both above vert. bodies w mild abnormalities. Additionally reports: osteoporotic thoracic spine compression fx w cruciform brace, miacalcin, pr; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/13/2016; There has been treatment or conservative therapy.; 2 days of mid back pain starting abruptly w/o trauma, w/o radiation/radicular s/s. known osteoporosis on meds. pain worse w activity, movement. paraspinal muscles tender.; she has been using a back brace and had was off of work for the first 2 weeks	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	ACUTE LEFT SIDED LOW BACK PAIN WITH LEFT SIDED SCIATICA,LEFT FLANK PAIN THRU BUTTOCK AREA DOWN LEFT LEG,LEFT ANKLE,CONSTANT PAIN,FEELS LIKE CHARLIE HORSE,PT.CHRONIC KIDNEY DISEASE STAGE 2,CHRONIC HEPATITIS C; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	atient complains of low back pain. The discomfort is most prominent in the thoracic spine and in the lumbar spine. This is a chronic, but intermittent problem with an acute exacerbation. He states that the current episode of pain started one year ago. ; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; atient complains of low back pain. The discomfort is most prominent in the thoracic spine and in the lumbar spine. This is a chronic, but intermittent problem with an acute exacerbation. He states that the current episode of pain started one year ago.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	back spasms; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Back stiffness and pain radiates to bilateral LE, standing, walking and climbing stairs are difficult. Paraspinous muscle spasms, tenderness over and lumbar and sacral vertebrae. MVA in 2008-pain since accident.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Back surgery in 80's, back pain since then; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has not directed conservative treatment for the past 6 weeks.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	back and neck ddd; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/02/17; There has been treatment or conservative therapy.; back and neck ddd; naproxen	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Bilateral Lumbar sacral spasms Limited flexion Lumbar sacral spine Abnormal deep tendon reflections X-ray - Intervertebral disk space narrowing at L4-05 and L5-S1 Degenerative; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; Decreased bi-lateral quadriceps reflex	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Chief Complaint of Numbness (bilat legs. all symptoms have been going on for the past two months); Fall (falling due to numbness in legs); Back Pain; and Cyanosis (in bilateral legs); The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Numbness (bilat legs. all symptoms have been going on for the past two months); Fall (falling due to numbness in legs); Back Pain; and Cyanosis (in bilateral legs); The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	chronic back pain with history of recent fall and compression fracture; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; cyclobenzaprine, flexeril, hydrocodone, ibuprofen, medrol, percocet	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Chronic back pain, previous imaging shows some abnormalities; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Chronic pain.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; L2 is less than 10% of normal size, DJD. Weakness in rt. LE, radiculopathy.; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	completed pt; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	decrease range of motion low back pain compression fracture to tee spine; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	DETERMINING IF PAIN COMING FROM LUMBAR SPINE OR RIGHT HIP; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/16/2016; There has been treatment or conservative therapy.; JOINT PAIN, RIGHT HIP AND RIGHT LEG PAIN; MEDICATIONS	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	difficulty moving on her own; This study is being ordered for a neurological disorder.; 9/22/2016; There has been treatment or conservative therapy.; pins and needles and spasms in feet for the past month, hard for Pt to move legs and hands, unable to function properly, stiffness in LE. Work up was negative; medication failed conservative therapy. getting worse with PT. Mobic not helping. low back xray showed severe dextrorotary, scoliotic curve of the lumbar spine, and severe degenerative disc disease; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	gait: slowed and marked difficulty--must hold on to people or furniture to walk; , tone and strength: 5/5 bilat quadriceps; , range of motion: decreased ROM with back flexion, extension, and (marked limitation of ant flex'n & ext'n); pain with back flexio; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; reflexes: knee jerks: 3+; sensation: (N) to light touch L/E's;	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	gait: slowed; range of motion: decreased ROM with back flexion; pain with back flexion; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	had history of fall pain going down right leg numbness and weakness; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	has lumbar spondylosis with radiation of pain bilaterally and needs MRI lumbar; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	He had lumbar surgery numerous years ago (lumbar fusion in 2002) and feels that his pain is progressively getting worse. He is unable to recall when his last MRI was.; S/P Lumbar Neurotomy. The patient complains of pain in lower back, in left knee, in ; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	in car accident a few years ago and fractured back, believes he has aggravated it again, taking ibuprofen without much relief; This study is being ordered for trauma or injury.; about a week ago, estimated Feb 22; It is not known if there has been any treatment or conservative therapy.; low back pain	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	LBP, decreased DTR of BL knees, diminished light touch to lateral thighs; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; decreased DTR of BL knees, diminished light touch to lateral thighs Left leg weakness; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pt with several months of low back pain. Recent weakness in left leg; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	LEFT SIDED SCIATICA, DECREASED RANGE OF MOTION, WORSENING BACK PAIN,TENDERNESS; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; DECREASED RANGE OF MOTION, TENDERNESS, MYALGIAS; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	LEFT SIDED SCIATICA, DECREASED RANGE OF MOTION, WORSENING BACK PAIN,TENDERNESS; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; DECREASED RANGE OF MOTION, TENDERNESS, MYALGIAS; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	<p>Low back pain details; the discomfort is most prominent in the lumbar spine. This radiates to the left and right buttock. He characterizes it as sharp and burning. He has tried PT in the past. This is a Chronic condition with and accute episode thatsta; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Low back pain details; the discomfort is most prominent in the lumbar spine. This radiates to the left and right buttock. He characterizes it as sharp and burning. He has tried PT in the past. This is a Chronic conditdion with and accute episode thatsta; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; It is not known if there is x-ray evidence of a lumbar recent fracture.</p>	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	<p>lumbar pain, weakness, numbness. Pt has failed all conservative treatment including several months of physical therapy, NSAIDS, lumbar steroid injections. Must have updated MRI to check for worsening disc bulge and to see if she is eligible for surgery.; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness and giving away of left leg, slowed gait; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.</p>	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	<p>Lumbar radiculopathy, weak limbs (left quadriceps); numbness of the legs/feet (left anterior leg); tingling, Gait and Station: Appearance: antalgic gait (to right) and ambulating with walker, Neurological System: Ankle Reflex Right: absent (0). Knee Refle; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weak limbs (left quadriceps), Special Tests on the Left: left straight leg raising positive; Patrick's test positive on left. Reflexes on the Left: left knee reflex diminished and ankle reflex diminished,decrease sensation of left foot and leg (mild decre; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.</p>	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	LUMBAR SPINE TENDERNESS; History of Present Illness: 1. musculoskeletal pain; Onset: 1 month ago. The problem is stable. Location: lower back. The pain is aggravated by movement. Associated symptoms include decreased mobility, nocturnal awakening, ; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; Duration of Symptoms: Start: 12/30/2016 ; ; Physical Exam Findings: low back pain with radiculopathy to the right leg, associated right leg numbness right foot pain, decreased mobility nocturnal awakening and nocturnal numbness, lumbar tenderness, decreased muscle strength in both legs and it was 4 out of 5 pt had slrp on left at 30 degrees; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness; legs; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Ms. Manning presents with low back pain. Reason for visit: Pain. The discomfort is most prominent in the mid lumbar spine. This radiates to the hips. She is unable to describe the discomfort. The pain level between 1 and 10 is a 4. This is a chronic; This study is being ordered for a neurological disorder.; 10 years ago; There has been treatment or conservative therapy.; pain; joint injection, pain medication and muscle relaxer	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Ms. SANDERS presents with low back pain. The location is primarily in the lower lumbar spine. It does not radiate. She characterizes it as intermittent, moderate in intensity, dull, and aching. This is an acute episode with no prior history of back pain; The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has not directed conservative treatment for the past 6 weeks.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	MUSCULOSKELETAL: gait: affected by a right leg limp; range of motion: decreased ROM with back lateral flexion; pain with back extension and lateral flexion; ; NEUROLOGIC: sensation: hypoesthesia in right L5 distribution; Patient complains of low back pain; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	N/A; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Needs MRI to be referred for surgery or injection; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; HEP did not help, PT attempted but back pain increased. HEP for several months.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	NEW ONSET OF RADICULOPATHY WITH BACK PAIN; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Msk: joint tenderness, decreased ROM and kyphosis. ; Lumbosacral Exam: ; Inspection-deformity: Normal; Palpation-spinal tenderness: Abnormal; Location: L4-L5; Range of Motion: Forward Flexion: 60 degrees; Squatti; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	No Info Given; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Several Years; There has been treatment or conservative therapy.; Pt. has weakness, Achilles tendon pain. Pt. range of motion is off, visual disturbance, and numbness.; Pt. did Physical therapy and had an injection.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	none; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	NONE; This study is being ordered for a neurological disorder.; 2014; There has been treatment or conservative therapy.; The Pt has back pain, bulging discs in lumbar spine , bilateral canal stenosis. Pt has bileateral leg pain, numbness and tingling. Pt had nereve conduction study cervical spine disease.; The Pt has had Ct scans, medication therapy.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	none; This study is being ordered for trauma or injury.; 10/6/2016; There has been treatment or conservative therapy.; Right hip locking up, Pain, compression fracture of L1 and2.; Back Brace, MEDS	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Numbness and tingling and weakness in left leg; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Numbness and tingling, weakness in right leg, pain radiates to right leg; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	numbness, tingling in neck and back; headaches;; This study is being ordered for trauma or injury.; 3/3/17; There has been treatment or conservative therapy.; stiffness, throbbing and tingling pain at neck and back; complains of dizziness, headaches, numbness and tingling and tightness; having trouble in school and at home with activities of daily living; aggravated by any movement; relived by nothing; chiropractice treatments	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Pain in T-spine at level of T6 area with palpation. - No bony deformity noted.  TTP to musculature of low back. Positive right leg raise today. Bilat patellar reflex 2 +. Sensation intact. schedule MRI of T and L spine due to persistent pain unresponsi; This study is being ordered for trauma or injury.; 12/22/16; There has been treatment or conservative therapy.; Here for f/u on back pain after completing PT. She was originally evaluated by me in December 2016.  She was re-evaluated by me on 1/23/17 for continued pain. She continues to have pain in T-spine and low back pain now radiating down anterior upper leg d; 6 weeks of physical therapy and medication	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Pain in unspecified joint; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Pain is progressing T11 & T12 disc degeneration changes; This study is being ordered for a neurological disorder.; 1/2017; There has been treatment or conservative therapy.; Chronic back pain; PT Robaxin Meloxicam	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	pain radiating down right leg. difficulty walking and no knee problems; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; when walking legs are giving out.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Pain radiating down the L leg, muscle spasms throughout his lumbar spine.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; L leg weakness, gives out when walks, falls like its twisted; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	pain radiating to bilateral thighs, aggravated when sitting, patient has been on muscle relaxer and pain meds for a week with no improvement, patient had steroid injections;; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Pain specialist Dr. Luo no longer is on insurance. Has been seeing her for 1-2 years. Last saw her in Oct. Stopped morphine recently as it really was not helping much. Still on tramadol 1-2 pills a day, cyclobenzaprine 10 mg prn. Has been trying shots in ; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; LEGS WILL TINGLE AND GO NUMB AT TIMES; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	pain that radiates down right leg, has did pt ;,; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Patient fell and landed on knee and buttocks. Low back pain that is radiating down into the left leg with difficulty walking.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Patient states that the pain is radiating down into her left leg with trouble walking.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; It is not known if there is x-ray evidence of a lumbar recent fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Patient has a new onset elevated CRP level.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient with complaints of back pain, neck pain more than 2 years.; There has been treatment or conservative therapy.; Persistent back pain, cervical radiculopathy and neuropathy; Patient has had medication therapy and physical therapy. previous treatment with Pain Management.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	patient has continued neck pain and low back pain; has numbness of left arm and left leg; This study is being ordered for a neurological disorder.; 09/27/16; There has been treatment or conservative therapy.; neck pain with paresthesia of left arm ; low back pain with paresthesia of left leg; patient has done physical therapy without success, pain is worse now; patient has been on pain medications, steroids without controlling the pain	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	patient has had failed attempts by medication and physical therapy; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; patient has weakness in upper extremities; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Patient has tried PT, heat, ice, chiropractic, acupuncture, and positive leg raise; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Patient has tried warm compresses,rest, back exercises, NSAIDs and Had 2 ER visits while on PT and after 4 sessions her pain has worsenrd and even hydrocodone or oxycodone are not helping&#xOD; pja md; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has not directed conservative treatment for the past 6 weeks.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Patient is a candidate for cervical and lumbar epidural injections. Possible surgical candidate pending MRI results.; This study is being ordered for trauma or injury.; 1998, but worsened on 01/23/2017 after falling.; There has been treatment or conservative therapy.; Neck pain radiating down both arms. Midline midback pain that worsens with movement, lying down, when going from sitting to standing, and lower back pain chronic duration. Tingling of both legs. Posterior cervical and lumbar spine exhibited moderate tende; Previously treated with Physical Therapy-which didn't help. Patient is unable to participate in therapy again due to recent injury on 01/23/2017.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Patient is a candidate for Epidural Steroid Injections.; This study is being ordered for a neurological disorder.; 10/11/2014; There has been treatment or conservative therapy.; Tingling of the posterior right thigh. Neck pain in trapezius extends into shoulder. Lower back pain radiating to the legs posteriorly on the right and chronic duration. Cervical and lumbar spine midline tenderness exhibited on palpation. Range of motion ; Chiropractic Therapy with Dr. Chris Tate-which didn't help. Home therapy exercises-which hasn't helped.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Patient is having severe pain.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Having thigh weakness, with limping gait.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	<p>Patient presents for follow-up regarding chronic back pain over the past 10 years, from lumbar spine through thoracic and cervical spines; patient has been seen x2 over the past couple of months for symptoms. Was tried on meloxicam daily; increased to twi; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; tried on meloxicam daily; increased to twice daily with minimal relief. Patient reports he is seeing a chiropracter with minimal relief as well. Patient has been doing physical exercises at home (per handouts provided at previous visits) with stretching f; Meloxicam 7.5 mgs, 1 tab twice a day</p>	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	<p>Patient presents today with c/o right-sided lumbar back pain with right sided sciatica. This is an acute on chronic problem that first began approximately 9 months ago. No known injury. The pain is positional with bending or lifting, with radiation down t; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.</p>	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	<p>Patient with acute onset of low back pain,sciatica. Pain is severe and stabbing. Patient was seen in the Emergency room on 01/01/17. Xray notes L5-S1 facet arthropathy. At the time of ER visit patient was treated with steroid injection and pain meds. Seen; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.</p>	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	<p>Patients pain in the lower pain is going down into her left leg. she is not responding to pain meds and the pain is just getting worse.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above</p>	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Pending MRI results patient is a candidate for cervical and lumbar epidural steroid injections and possibly surgery.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/24/2010; There has been treatment or conservative therapy.; Numbness and tingling of the lateral left arm. Midline upper back pain, radiating along the midline, and lower back pain chronic duration. Cervical and lumbar spine midline tenderness on palpation. Pain demonstrated with flexion and rotation. Previously t; Physical Therapy for several months with no improvement.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	possible lumbar stenosis, narrowing or disk abnormality; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; pain radiating to the legs Quality: sharp Severity: moderate (5-7) Duration: cannot identify  Onset/Timing: recurrent episode  Context: prior back problems; used medications for back pain  Alleviating Factors: rest  Aggravating Factors: movement/po; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Previous back strain and radiculopathy; The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; The patient has none of the above.; This procedure is being requested for Trauma or recent injury	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	previous spine fusion; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	pt does have degenerative disc disease of the lumbar.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; patient also has degenerative disc disease of the lumbar.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	PT FELL WAS HIT AND KICKED; This study is being ordered for trauma or injury.; 2013; There has been treatment or conservative therapy.; SEVERE BACK PAIN RADIATING TO HIP AND LEG; EPIDURAL INJECTION	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Pt had left lower extremity weakness with leg swelling.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Decreased range of motion. Unable to flex, rotate and extend without pain. Tender to palpitations at sacral region with mild fullness to the muscle.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Pt has a h/x of degenerative disc disease; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	PT HAS DONE SOME SESSIONS OF PHYSICAL THERAPY WITH ONLY IMMEDIATE TEMPORARY PAIN RELIEF LASTING ONLY 30MIN TO 1HOUR AFTER TREATMENT. DOING AT HOME EXERCISES WITHOUT RELIEF. PAIN IS WORSENING. HE IS TAKING GABAPENTIN, HAS TRIED AND FAILED OXYCODONE, TAKEN ; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; DECREASED ROM WITH BACK FLEXION, CREPITUS, TENDERNESS, EFFUSION. TENDERNESS NOTED IN THE LEFT S-I JOINT. POS STRAIGHT LEG LIFT ON LEFT. RELEXES KNEE JERKS 2+, ANKLE JERKS, ZERO SENSATION TO LEFT FOOT pt having back pain since fall January 2017...pain scale 10/10.; pain radiates into left thigh..all activities of daily living increases pain...had trigger point injection on 1/12/17 with no relief...over the counter meds do not help.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	pt is having back and shoulder pain, is having some numbness and tingling in bilateral lower extremities; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2014; There has been treatment or conservative therapy.; shoulder and back pain; pt has under went injections, chiropractor	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Pt. recently had CT of Lumbar Spine performed. Impression per Radiologist indicated "No acute fracture of the lumbar spine" and "Probable small central disk protrusion at L5-S1. Follow up with MRI of the lumbar Spine"; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Pt. went to ER on Friday w/severe back pain. MRI recommended.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radicular pain of both legs, suspected degenerative disc disease; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	radicular symptoms when he bends down; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pain in his legs; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	RADIOLOGY: I have ordered (There is documentation of the patient completing and failing a 4-6 week trial of P.T. and/or NSAIDS.), MRI lumbar spine w/o contrast to be done.  RECOMMENDATIONS given include: Continue current medications, Continue current t; The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; worsening low back pain and radiculopathy; Gabapentin 300mg 2 tabs tid - started 2013 Meloxicam 15mg 1 tab daily - started 12/01/2016 Hydrocodone 10/325mg	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	RIGH LUMBAR RADICULOPATHY WITH PERINEAL NUMBNESS AND POSSIBLE CAUDA EQUINA SYNDROM FROM FALL OFF LATER; The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; PATIENT HAS LUMBAR RADICULOPATHY THAT IS CAUSING LEG PAIN AND WEAKNESS; POSSIBLE SYMPTOMS OF CAUDA EQUINA SYNDROME; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	right side hip low back pain that is now radiating down leg started about year ago but continues to get worse has been to ER previously--- was told nerve Nov Sherwood urgent care--- xray and CT---- they said needed MRI because thinks nerve; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does not have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Rt sided sciatica and back pain; Has tried medication, back brace, PT and injections; wants to refer to a neurosurgeon r/o HNP; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	rule out spinal stenosis as cause of upper and lower extremity pain and radiculopathy; This study is being ordered for a neurological disorder.; 1/2015; There has been treatment or conservative therapy.; neck pain, hand numbness, low back pain, bil foot numbness. pt was evaluated by neurology and EMG studies were unremarkable except bil carpal tunnel syndrome; PT, Cymbalta, Mobic	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	see scanned reports; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; 1) motor deficit of lower extremity 2) myelopathic sx's (lost reflexes  or weakness lower ext.) 3) Sciatica (pain radiates below knee) 4) LBP worse with activity 5) LBP worse w/ lumbar extension (downhill walking-standing-reaching overhead); The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Spasms on the right side, numbness in the feet, pain in mid back, right LB posture, bilateral LE tingling, decreased sensation in S1 nerve root right.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Bilateral LE weakness, more on the right side.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Surgery performed 5/2016, pain is getting worse.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	tenderness and limited ROM, back pain (Shooting pain ever once in awhile), lower back and middle back has hurt intermittently for years, she has known degenerative disc disease, x-rays at er confirm this, has never had an MRI, pain radiates around trunk ; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; lower back and middle back has hurt intermittently for years; It is not known if there has been any treatment or conservative therapy.; has known degenerative disc disease, x-rays at er confirm this, has never had an MRI, pain radiates around trunk to the anterior, radiates down both legs, some numbness and tingling down the legs, back pain (Shooting pain ever once in awhile), tendernes	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; the patient was treated with a facet joint injection.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	10
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; It is not known was medications were used in treatment.; The patient has completed 6 weeks or more of Chiropractic care.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.	14

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.	8
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is x-ray evidence of a recent lumbar fracture.	2
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is x-ray evidence of a recent lumbar fracture.	3
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	25
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; the patient was treated with a facet joint injection.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has completed 6 weeks or more of Chiropractic care.	3

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Follow-up to Surgery or Fracture within the last 6 months; The patient does have new or changing neurologic signs or symptoms.; There has not been a recurrence of symptoms following surgery.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is x-ray evidence of a recent lumbar fracture.; The patient been not been seen by or is not the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Follow-up to Surgery or Fracture within the last 6 months; The patient has been seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.	2
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for Neurologic deficits	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.	3
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.	5
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; The patient has Neurological abnormalities; This procedure is being requested for Trauma or recent injury	2
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; The patient has Symptoms or x-ray evidence of a recent fracture; This procedure is being requested for Trauma or recent injury	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for Neurologic deficits	5
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	578
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal nerve study involving the lumbar spine	6

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality	154
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has completed Treatment with a facet joint or epidural injection in the past 6 weeks	5
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	440
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	2
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; This study is being ordered for staging.; Known Tumor with or without metastasis; The patient has been seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Tingling and needle prick sensation.; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Lower extremity; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/15/2016; There has been treatment or conservative therapy.; neck and back pain which radiates into lower extremity, numbness in arm, tingling, pain in right leg, hip down to toes, pain in left leg down to knee, Radiculopathy; medications , PT	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Unknown.; The study requested is a Lumbar Spine MRI.; Trauma or recent injury; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Unknown.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/01/2016; There has been treatment or conservative therapy.; numbness and tingling. pain. weakness in right leg.; PT and medications	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.; Norco 10/325	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; ; Toradol Methylprednisolone Acetate - 80 mg one	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	UNKNOWN; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; reflexes: knee jerks: 2+; shuffling, stooped, and unsteady; Crepitus, Tenderness, Effusion: tenderness noted in the upper lumbar spine and lumbar paraspinous muscles;Decreased L1-2 intervertebral joint space	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Numbness and weakness in both legs.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Same notes on the Thoracic Spine request; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Tenderness and spasm; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; Norco.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unknown; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness in right leg .; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unknown; The study requested is a Lumbar Spine MRI.; None of the above; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Unknown; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unknown; This study is being ordered for a neurological disorder.; 01/02/2017; There has been treatment or conservative therapy.; back pain, leg pain, unsteady gait, dizziness, numbness, tingling and pain in arm , fatigue; medication	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unknown; This study is being ordered for a neurological disorder.; 05/04/2015; There has been treatment or conservative therapy.; Neck pain, bilateral back pain radiating down both legs. Tenderness in arms to elbow. Numbness in hands to figures. Numbness and pain. Constant discomfort.; Lumbar and CT, medications. Back brace. Muscle relaxers.	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/01/2012; There has not been any treatment or conservative therapy.; Pain, Low and upper back pain, Numbness and tingling down his right thigh and leg.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	UNKNOWN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 02/10/2016; There has been treatment or conservative therapy.; BACK PAIN, LEG WEAKNESS, MUSCLE SPASMS IN THE BACK; NSAIDS, PAIN MEDICATION, MUSCLE RELAXERS, HOME EXERCISES	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 02/20/2017; There has been treatment or conservative therapy.; back pain, abdominal pain; mediation	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.; decreased range of motion and movement, muscle spasms; steroids, pain meds, chiropractor	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Unknwon; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/30/2016; There has been treatment or conservative therapy.; lower back pain; Pain medications	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unkown; This study is being ordered for trauma or injury.; 2/21/2013; secondary injury 2/20/2017; There has been treatment or conservative therapy.; pt. has pain in back, decrease ROM, weakness in legs, numbness in legs and lower back, unable to exercise, kneel, unable to put on own socks/shoes, walking limited distance. History of C-Spine fracture . Tenderness in CS and LS, hand swelling moderate pai; pt. has medication, therapy, seen a neurologist	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	will fax; This study is being ordered for Inflammatory/ Infectious Disease.; ar least since June 2016 but worsening; There has been treatment or conservative therapy.; low back pain radiating down legs; L shoulder pain; tenderness; joint pain; weakness; gait difficulties; meds muscle relaxer; Mobic anti-inflammatory; pain meds;	1

Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Will provide; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Muscle weakness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	X-ray shows anterior bony spurring of the upper interspaces.; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Sudden loss of strength, has sharp pain in low then complete loss of strength in rt lower extremity. Pain is worse when lying or sitting.; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	X-RAYS LUMBAR SPINE 02/12/2017 DISC LOSS AT L4/L5 AND L5/S1 LEVELS. CONTINUES TO HAVE LOWER BACK PAIN RADIATING DOWN LEFT LEG, NUMBNESS AND TINGLING EVERY DAY PAIN AND UNABLE TO STAND FOR LONG PERIODS OF TIME; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Approval	72192 CT PELVIS WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered because of a suspicious mass/ tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; Yes this is a request for a Diagnostic CT	1
Approval	72192 CT PELVIS WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered because of a suspicious mass/ tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are NO documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.	1
Approval	72192 CT PELVIS WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered because of a suspicious mass/ tumor.; "The patient has NOT had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; Yes this is a request for a Diagnostic CT	1

Approval	72192 CT PELVIS WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	3
Approval	72192 CT PELVIS WITHOUT CONTRAST	.pelvic pain with ambulation after fall in bath tube; This study is being ordered as a follow-up to trauma.; There is NO laboratory or physical evidence of a pelvic bleed.; There are no physical or abnormal blood work consistent with peritonitis or pelvic abscess.; There is physical or radiological evidence of a pelvic fracture.; "The ordering physician is not a gastroenterologist, urologist, gynecologist, or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
Approval	72192 CT PELVIS WITHOUT CONTRAST	; This study is being ordered because of a suspicious mass/ tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; Yes this is a request for a Diagnostic CT	2
Approval	72192 CT PELVIS WITHOUT CONTRAST	; This study is being ordered due to known or suspected infection.; "The ordering physician is NOT a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; "There are active, clinical findings or endoscopic findings of Crohn's disease, ulcerative colitis, or diverticulitis."; "There are no physical findings or abnormal blood work consistent with peritonitis, pelvic inflammatory disease, or appendicitis."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
Approval	72192 CT PELVIS WITHOUT CONTRAST	; This study is being ordered due to known or suspected infection.; "The ordering physician is NOT a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; "There are NO active, clinical findings or endoscopic findings of Crohn's disease, ulcerative colitis, or diverticulitis."; "There are no radiographical or ultrasound findings consistent with abnormal fluid collection, pelvic abscess, pelvic inflammation or ascites."; "There are no physical findings or abnormal blood work consistent with peritonitis, pelvic inflammatory disease, or appendicitis."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
Approval	72192 CT PELVIS WITHOUT CONTRAST	; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1

Approval	72192 CT PELVIS WITHOUT CONTRAST	Enter answer here - or Type In Unknown If No follow up on US results from 2/6 JHicks CNA . HPI: Followup Patient had US (Abd/Pelvis) of abdominal mass on 2/6. Here for results. Current Medication: Info Given.; This study is being ordered because of a suspicious mass/ tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; Yes this is a request for a Diagnostic CT	1
Approval	72192 CT PELVIS WITHOUT CONTRAST	Has had Doppler and found enlarged lymphnodes; This study is being ordered because of a suspicious mass/ tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are NO documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; Yes this is a request for a Diagnostic CT	1
Approval	72192 CT PELVIS WITHOUT CONTRAST	Having abdominal tenderness; pain with palpation RLQ and LLQ; worsened since previous visit. Hx of ovarian cyst.; This study is being ordered due to known or suspected infection.; "The ordering physician is NOT a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; "There are physical findings or abnormal blood work consistent with peritonitis, pelvic inflammatory disease, or appendicitis."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
Approval	72192 CT PELVIS WITHOUT CONTRAST	left hip pain; radiating to buttocks; legs, foot; weak limbs; numbness of the legs/feet; instability; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
Approval	72192 CT PELVIS WITHOUT CONTRAST	pain 2.5 years after childbirth. abnormal xray; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.	1
Approval	72192 CT PELVIS WITHOUT CONTRAST	PAIN,JOINT,PELVIC REGION AND THIGH,HOT TO TOUCH,NUMBNESS,TINGLING,PAIN,TINGLING RADIATES INTO PELVIS,HIP,LIMPS,R/O ABSCESS,FX,ACHING,BURNING; This study is being ordered due to known or suspected infection.; "The ordering physician is NOT a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; "There are physical findings or abnormal blood work consistent with peritonitis, pelvic inflammatory disease, or appendicitis."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
Approval	72192 CT PELVIS WITHOUT CONTRAST	patient had a 4.7 cm stone on CT abdomen, shows mild diverticulosis of colon and right renal cysts.; The hematuria is not painful.; This study is being ordered due to hematuria.; "The patient has had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1

Approval	72192 CT PELVIS WITHOUT CONTRAST	PATIENT HAD AN ABNORMAL ABDOMEN CT. PAINFUL GAS, NAUSEA, ECT.; This study is being ordered due to known or suspected infection.; "The ordering physician is a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
Approval	72192 CT PELVIS WITHOUT CONTRAST	Patient has a pelvic US and it showed a mass in her uterus.; This study is being ordered because of a suspicious mass/ tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; Yes this is a request for a Diagnostic CT	1
Approval	72192 CT PELVIS WITHOUT CONTRAST	Patient is passing large blood clots, having severe abdominal pain, and ongoing menstrual period.; This study is being ordered due to known or suspected infection.; "The ordering physician is NOT a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; "There are physical findings or abnormal blood work consistent with peritonitis, pelvic inflammatory disease, or appendicitis."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
Approval	72192 CT PELVIS WITHOUT CONTRAST	Patient with persistent groin and thigh pain following treatment for pelvic infection. Physical exam showed pain and tenderness in pelvic bone area.; This study is being ordered due to known or suspected infection.; "The ordering physician is NOT a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; "There are NO active, clinical findings or endoscopic findings of Crohn's disease, ulcerative colitis, or diverticulitis."; "There are no radiographical or ultrasound findings consistent with abnormal fluid collection, pelvic abscess, pelvic inflammation or ascites."; "Caller does not know if there are physical findings or abnormal blood work consistent with peritonitis, pelvic inflammatory disease, or appendicitis."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
Approval	72192 CT PELVIS WITHOUT CONTRAST	pt came in with a knot in her gorin. we have only seen her this one time she said it is very painful and will not go away and seems to grow.; This study is being ordered because of a suspicious mass/ tumor.; "The patient has NOT had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; Yes this is a request for a Diagnostic CT	1

Approval	72192 CT PELVIS WITHOUT CONTRAST	Pt had an MRI L Spine, with a finding of boney lesion, and recommended by radiologist was a CT Sacrum focusing on the S3.; This study is being ordered for known tumor, cancer, mass, or rule-out metastasis.; "The ordering physician is NOT an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This study is being ordered for initial staging.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
Approval	72192 CT PELVIS WITHOUT CONTRAST	PT WAS IMPALED BY HAY SPEAR.MARCH THE 4TH 2015. HE WAS LIFTED AND THROWN. WAS SEEN BY A SURGEON DR TREPTOW ON 1/5/2017. DR TREPTOW WANTED ANOTHER CT TO FOLLOW UP AND DR TUCKER IS PTs PCP. PT HAD A LEFT INGUINAL LACERATION.; This study is being ordered as a follow-up to trauma.; "The ordering physician is a gastroenterologist, urologist, gynecologist, or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
Approval	72192 CT PELVIS WITHOUT CONTRAST	SHARP PELVIC PAIN IN MALE,PAIN WHEN LIFTING LEGS,LEUKOCTTOSIS,ABNORMAL LAS,HEMATURIA,DECREASED URINE OUTPUT,DIFFUSE PELVIC PAIN,RASH,PAIN RADIATING TO HIPS AND THIGHS; This study is being ordered due to known or suspected infection.; "The ordering physician is NOT a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; "There are physical findings or abnormal blood work consistent with peritonitis, pelvic inflammatory disease, or appendicitis."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
Approval	72192 CT PELVIS WITHOUT CONTRAST	swelling and pain in scrotal area, clinical finding of a mass.; This study is being ordered because of a suspicious mass/ tumor.; "The patient has NOT had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.	1
Approval	72192 CT PELVIS WITHOUT CONTRAST	U/S soft tissues of Groin done for Right Groin pain. U/S Showes 4.8x6.5x2.7 CM massin the suprapubic region to the right of the midline. need to r/o an Organizing endometrioma vs. other masses.; The patient is not undergoing active treatment for cancer.; This study is being ordered for known tumor, cancer, mass, or rule-out metastasis.; "The ordering physician is NOT an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This study is not being ordered for initial staging.; The patient is presenting new signs (e.g. lab findings or imaging) or symptoms.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
Approval	72192 CT PELVIS WITHOUT CONTRAST	Will Attach Clinicals.; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1

Approval	72196 MRI PELVIS		1
Approval	72196 MRI PELVIS	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Pelvis MRI.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; An abnormality was found in the uterus.; The study is being ordered for suspicion of tumor, mass, neoplasm, or metastatic disease.	1
Approval	72196 MRI PELVIS	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
Approval	72196 MRI PELVIS	; This is a request for a Pelvis MRI.; The request is not for any of the listed indications. ; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/01/2017; There has been treatment or conservative therapy.; N/V; abn ct	1
Approval	72196 MRI PELVIS	; This study is being ordered for Vascular Disease.; ; There has been treatment or conservative therapy.;	1
Approval	72196 MRI PELVIS	Abdominal pain; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
Approval	72196 MRI PELVIS	chronic right groin pain evaluating for avn; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
Approval	72196 MRI PELVIS	Diffusely heterogeneous appearance to the uterus. Further evaluation with a contrast-enhanced MR examination of the uterus may be of benefit given the patient's symptoms  The patient presents with hematuria (painful and with clots). The problem began; This is a request for a Pelvis MRI.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; An abnormality was found in the uterus.; The study is being ordered for suspicion of tumor, mass, neoplasm, or metastatic disease.	1
Approval	72196 MRI PELVIS	Evaluate reason for severe pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/30/2016; There has been treatment or conservative therapy.; Hip and groin pain and low back pain; Physical therapy	1
Approval	72196 MRI PELVIS	Pain in lumbar/sacral region not improved after 3 lumbar epidural injections.; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
Approval	72196 MRI PELVIS	Patient presents to clinic today to discuss her right pubic pain. It's about a 5 on a 1 to 10 scale of pain. 10 being the worst in one being the best. Says it hurts worse when she sits, standing actually makes it better. She says it feels like a constant ; This is a request for a Pelvis MRI.; The study is being ordered for pelvic trauma or injury.; This is NOT an evaluation of the pelvic girdle, sacrum or the tail bone (coccyx).	1

Approval	72196 MRI PELVIS	PELVIS PAIN UNSPECIFIC; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
Approval	72196 MRI PELVIS	Persistent diffuse low back pain which worsens throughout the day. Pain is unimproved with IM steroid injection. Lower back pain bilaterally, lumbar spine painful on movement, lumbar pain on palpation, chronic duration, and pain is significantly effecting; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Approval	72196 MRI PELVIS	Please see attached clinicals; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
Approval	72196 MRI PELVIS	Pt had abdominal ultrasound; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/25/2016; There has been treatment or conservative therapy.; Pt has had CT and vaginal ultrasound; medication: Bactrim DS/Metroall, Pt has been to office several time and also referred a GYN doctor.	1
Approval	72196 MRI PELVIS	Pt has completed 6 weeks of physical therapy with failed treatment.; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
Approval	72196 MRI PELVIS	R sided pelvis/hip pain w/o known injury. Pt has failed rest, activity mod, therapy, stretching exercises, massage therapy and NSAIDs. MRI to further evaluate pelvic structure and for stress fx R hip. positive for pain, decreased mobility, joint pain, ten; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
Approval	72196 MRI PELVIS	R/O cancer; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/14/2016; There has not been any treatment or conservative therapy.; Abnormal CT scan of abdomen and pelvis with hematuria	1
Approval	72196 MRI PELVIS	SWELLING X 2 WEEKS,MILD,NO INJURY,BULDGE ON RIGHT LOWER SIDE OF ABDOMEN WITH PRESSURE.SMALL RECTUS MUSCLE HERNIA; This is a request for a Pelvis MRI.;	1
Approval	72196 MRI PELVIS	The request is not for any of the listed indications.	1
Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for pelvic trauma or injury.	8
Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for suspicion of joint or bone infection.	2
Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for suspicion of pelvic inflammatory disease or abscess.	5
Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for suspicion of tumor, mass, neoplasm, or metastatic disease?	13

Approval	72196 MRI PELVIS	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; ORGAN ANOMOLIES NOTED WITH INCREASING ABD/PELVIS PAIN. HEMATURIA AND MASS PRESENT.	1
Approval	72196 MRI PELVIS	Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; It is not known if there has been any treatment or conservative therapy.; Unknown	1
Approval	72196 MRI PELVIS	UNKOWN; This study is being ordered for Inflammatory/ Infectious Disease.; 2 YEARS AGO?; There has been treatment or conservative therapy.; LUMBAR PAIN RUQ PAIN R HIP PAIN PELVIC PAIN; HOME EXERCISES ANTI-INFLAMMATORY MEDICATIONS PAIN MEDICINE with ambetter, this will go to review, will just fax notes; This is a request for a Pelvis MRI.; The study is being ordered for something other than suspicion of tumor, mass, neoplasm, metastatic disease, PID, abscess, Evaluation of the pelvis prior to surgery or laparoscopy, Suspicion of joint or bone infect	1
Approval	72196 MRI PELVIS	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 3/2016; There has not been any treatment or conservative therapy.; NUMBNESS PAIN	1
Approval	73200 CT ARM OR UPPER EXTREMITY	This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is a history of upper extremity joint or long bone trauma or injury.	1
Approval	73200 CT ARM OR UPPER EXTREMITY	This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is a history of upper extremity joint or long bone trauma or injury.; Yes this is a request for a Diagnostic CT	15
Approval	73200 CT ARM OR UPPER EXTREMITY	This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is suspicion of upper extremity bone or joint infection.; Yes this is a request for a Diagnostic CT	2
Approval	73200 CT ARM OR UPPER EXTREMITY	This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity neoplasm or tumor or metastasis.	1

Approval	73200 CT ARM OR UPPER EXTREMITY	This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity neoplasm or tumor or metastasis.; Yes this is a request for a Diagnostic CT	1
Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	n/a; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	NONE; This study is being ordered for a neurological disorder.; 01/25/2017; There has been treatment or conservative therapy.; The Pt has pain, radiating into right shoulder. P has numbness in right arm. Pt had EMG recommends this study; Pt has had medication therapy	1
Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	The request is for an upper extremity non-joint MRI.; This is a preoperative or recent postoperative evaluation.	2
Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is not an orthopedist.; There is a history of upper extremity trauma or injury.	10
Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is not an orthopedist.; There is not a history of upper extremity trauma or injury.	3
Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is suspicion of upper extremity bone or soft tissue infection.	1
Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity neoplasm or tumor or metastasis.	10
Approval	73221 MRI JOINT OF UPPER EXTREMITY		2

Approval	73221 MRI JOINT OF UPPER EXTREMITY	< Enter answer here - or Type In Unknown If No Info Given. >; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; PATIENT HAS 6 WEEKS WITH NO IMPROVEMENT & SYMPTOMS ARE WORSENING.; The patient received oral analgesics.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	< Enter answer here - or Type In Unknown If No Info Given. >; The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has not directed conservative treatment for the past 6 weeks.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/19/2017; There has been treatment or conservative therapy.; Pain, popping, soreness, and sharp pain, limited ROM; Medications	1

Sharp and throbbing.; Patient is in Physical Therapy, Pain medication.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 3/2016; There has not been any treatment or conservative therapy.; NUMBNESS PAIN	1

Approval	73221 MRI JOINT OF UPPER EXTREMITY	; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; It is not known if there is a suspicion of fracture not adequately determined by x-ray.; The request is for shoulder pain.; It is not known if there is a suspicion of tendon, ligament, rotator cuff injury, or labral tear.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.	2
Approval	73221 MRI JOINT OF UPPER EXTREMITY	; The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; Continued pain and dysfunction.; The patient received oral analgesics.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	; The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; patient still have pain getting worse doing the home treatment, nothing seems to help at all; The patient received oral analgesics.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	; The requested study is a Shoulder MRI.; The pain is not from a recent injury, old injury, chronic pain or a mass.; The request is for shoulder pain.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	; The requested study is a Shoulder MRI.; The study is not requested for any of the standard indications for Knee MRI; It is not known if the study is requested for shoulder pain.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	; This study is being ordered for a neurological disorder.; ; It is not known if there has been any treatment or conservative therapy.;	2
Approval	73221 MRI JOINT OF UPPER EXTREMITY	; This study is being ordered for a neurological disorder.; Enter date of initial onset here - or Type In Unknown If No Info Given ; January of 2016; There has been treatment or conservative therapy.;	1

Approval	73221 MRI JOINT OF UPPER EXTREMITY	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; bilateral shoulder pain, Doctor assessment from 01/17/2017 Severe arthritis in shoulders bilaterally.; Patient has been seen on 10/19/2016,11/16/2016, 12/15/2016, and 01/17/2017 all for shoulder pain. Patient was using Voltaren gel on 10/19/2016, nothing was changed. On 11/16/2016 Kenalog and Toradol injections were given along with a prescription for Za	2
Approval	73221 MRI JOINT OF UPPER EXTREMITY	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/23/2016; It is not known if there has been any treatment or conservative therapy.; constant pain in both wrists, pt denies injury, pain increasing. radiates in hand up to forearm. No decreased ROM or overuse. Hx of mild wrist pain in the past. Denies other joint pain. Pain improved with Ibuprofen. Xray did not show fracture, dislocation	2
Approval	73221 MRI JOINT OF UPPER EXTREMITY	40 yr old female w/ shoulder pain; numbness and tingling in right arm; weakness in that arm.; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; The patient received oral analgesics.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	Constant worsening bilateral wrist pain and swelling. MRI needed to evaluate increased swelling about the carpal tunnel space.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 7 months ago; There has been treatment or conservative therapy.; Pain, swelling, decreased mobility, joint tenderness, numbness, popping, swelling, tingling, weakness; Rest, splint, corticosteroid injection, NSAIDs	2
Approval	73221 MRI JOINT OF UPPER EXTREMITY	CONTINUED PAIN SINCE FALL INJURY 1/4/2017,WENT TO ER TREATED BUT STILL ALOT OF PAIN WITH SHOULDER.XRAYS:NORMAL R/O:ROTATOR TEAR; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.	1

Approval	73221 MRI JOINT OF UPPER EXTREMITY	Date of initial onset: MUSCULOSKELETAL: normal gait; range of motion: decreased ROM in right shoulder; pain with ROM of right shoulder; Crepitus, Tenderness, Effusion: tenderness noted in the exquisite over the right anterior chest wall and shoulder/espec; This study is being ordered for trauma or injury.; MUSCULOSKELETAL: normal gait; range of motion: decreased ROM in right shoulder; pain with ROM of right shoulder; Crepitus, Tenderness, Effusion: tenderness noted in the exquisite over the right anterior chest wall and shoulder/especially of the clavicle; There has not been any treatment or conservative therapy.; Date of initial onset: MUSCULOSKELETAL: normal gait; range of motion: decreased ROM in right shoulder; pain with ROM of right shoulder; Crepitus, Tenderness, Effusion: tenderness noted in the exquisite over the right anterior chest wall and shoulder/espec	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	INJURY IN 1986 WITH WORSENING PAIN THAT HAS BEEN CHRONIC IN NECK AND LEFT SHOULDER; This study is being ordered for trauma or injury.; ; It is not known if there has been any treatment or conservative therapy.;	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	LEFT ANTERIOR SHOULDER PAIN,DECREASED ACTIVE AND PASSIVE ROM.NORMAL X-RAY.R/O ROTATOR CUFF INJURY; The requested study is a Shoulder MRI.; The pain is not from a recent injury, old injury, chronic pain or a mass.; The request is for shoulder pain. left SHOULDER EFFUSION moderate to large, with crepitus and cracking over extremes of flexion and extension. Rotation is painful and range of motion is limited partially due to capsular tendon secondary to the SHOULDER effusion. Pain in left shoulder with; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	MVA about 6 weeks ago, having pain to right elbow, any movement with her right arm causes pain to the right elbow, has used anti inflammatories and has had a cotisone injection, xray to right elbow showed no acute fracture; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; There is a suspicion of tendon or ligament injury.; This is a request for an elbow MRI; The study is requested for evaluation of elbow pain.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	N/A; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/2014; There has been treatment or conservative therapy.; Right shoulder- previous mri in 2014 showed full thickness tear (suprastinatus), tear is posterior superior labrum. Left shoulder- pain that is worse when reaching above head or behind back, suspected tear.; Pain medication.	2

Approval	73221 MRI JOINT OF UPPER EXTREMITY	Neg EKG and member has had meds and PT with no relive; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	Patient had abnormal X-rays on shoulder and neck.; This study is being ordered for a neurological disorder.; Enter date of initial onset here - 11/5/16; There has been treatment or conservative therapy.; Describe primary symptoms here - Right arm numbness, pain, tingling, weakness and swelling. Pain with movement, lifting and laying down at night.; Describe treatment / conservative therapy here - Patient has had home physical therapy since 11/5/17 and medications.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	patient had xray which stated that a mri could be consider for further evaluation.; The pain is from an old injury.; It is not known if the member has failed a 4 week course of conservative management in the past 3 months.; This is a request for an elbow MRI; The study is requested for evaluation of elbow pain.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	Patient has pain in left shoulder increasing pain with motion.; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	possible separation/subluxation of left side of clavicle/sternum; This study is being ordered for trauma or injury.; 10/18/2016; There has been treatment or conservative therapy.; Left Shoulder pain , possible separation/subluxation of left side clavicle/sternum.; Physical therapy for 6 weeks, he is also a construction worker works with both arms daily, has tried treatment medications not improved	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	Pt has cat bite. She received it on the 9th. It is painful, red, swollen, has drainage, fever, weakness, stiffness, and decreased motion. Today its worsening. Concerned for osteomyelitis.; The study is for infection or inflammation.; There are physical exam findings, laboratory results, other imaging including bone scan or ultrasound confirming infection, inflammation and or aseptic necrosis.; Surgery or other intervention is not planned for in the next 4 weeks.; This request is for a wrist MRI.; The reason for the study is not for evaluation of wrist pain.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	Pt hurt herself on the job about a month ago and has had severe pain since.; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; There is not a suspicion of fracture not adequately determined by x-ray.; The request is for shoulder pain.; There is not a suspicion of tendon, ligament, rotator cuff injury or labral tear.	1

Approval	73221 MRI JOINT OF UPPER EXTREMITY	r/o tear; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	rates pain at 8/10.; This study is being ordered for trauma or injury.; 12/25/2016; It is not known if there has been any treatment or conservative therapy.; left arm pain radiating to elbow and hand; parasthesias, weakness	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	Recent shoulder injury by lifting a gun safe. Decreased range of motion; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	severe shoulder pain 10/10; aggravated by movement, overhead activity and lifting. painful ROM, tried Ibuprofen with no relief, decreased ROM, abduction restricted, external rotation restricted, extension painful, tender, have a normal X-ray; The requested study is a Shoulder MRI.; The pain is not from a recent injury, old injury, chronic pain or a mass.; The request is for shoulder pain.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	symptoms not improving and worsening with time; This study is being ordered for Inflammatory/ Infectious Disease.; 01/26/2017; There has been treatment or conservative therapy.; neck pain, right shoulder pain and weakness in right hand; x-ray right shoulder showing arthropathy, mobic	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	tendon rupture in the right shoulder; The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; It is not known what type of medication the patient received.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	The pain is described as chronic; The member has failed a 4 week course of conservative management in the past 3 months.; This is a request for an elbow MRI; The study is requested for evaluation of elbow pain.	4
Approval	73221 MRI JOINT OF UPPER EXTREMITY	The pain is described as chronic; The member has failed a 4 week course of conservative management in the past 3 months.; This request is for a wrist MRI.; This study is requested for evaluation of wrist pain.	1
Approval	73221 MRI JOINT OF UPPER EXTREMITY	The pain is from a known mass.; The diagnosis of Mass, Tumor, or Cancer has not been established.; The patient has had recent plain films, bone scan or ultrasound of the knee.; The imaging studies were abnormal.; This request is for a wrist MRI.; This study is requested for evaluation of wrist pain.	1

Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation.";	2

Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a foot CT.; The patient has not used a cane or crutches for greater than four weeks.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.; Yes this is a request for a Diagnostic CT	1
Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a foot CT.; The patient has not used a cane or crutches for greater than four weeks.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient has an abnormal plain film study of the foot other than arthritis.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is for pre-operative planning.; The patient does not have a documented limitation of their range of motion.; Yes this is a request for a Diagnostic CT	1
Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a hip CT.; This study is not being ordered in conjunction with a pelvic CT.; There is a suspected infection of the hip.; The patient has not been treated with and failed a course of supervised physical therapy.; There is a mass adjacent to or near the hip.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient does not have a documented limitation of their range of motion.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.	1
Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a hip CT.; This study is not being ordered in conjunction with a pelvic CT.; There is not a suspected infection of the hip.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient has a documented limitation of their range of motion.; Yes this is a request for a Diagnostic CT	2

Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a hip CT.; This study is not being ordered in conjunction with a pelvic CT.; There is not a suspected infection of the hip.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass adjacent to or near the hip.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient does not have a documented limitation of their range of motion.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.; Yes this is a request for a Diagnostic CT	1
Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a Lower Extremity CT.; This is a preoperative or recent postoperative evaluation.; Yes this is a request for a Diagnostic CT	1
Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is a history of lower extremity joint or long bone trauma or injury.	1
Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is not a history of lower extremity joint or long bone trauma or injury.	1
Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is suspicion of lower extremity bone or joint infection.; Yes this is a request for a Diagnostic CT	4
Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of a lower extremity neoplasm, tumor or metastasis.	1
Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of a lower extremity neoplasm, tumor or metastasis.; Yes this is a request for a Diagnostic CT	2
Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for an ankle CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.; Yes this is a request for a Diagnostic CT	1

Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for an ankle CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.	1
Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for an ankle CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; Yes this is a request for a Diagnostic CT	1
Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for an ankle CT.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.; Yes this is a request for a Diagnostic CT	1
Approval	73700 CT LEG OR LOWER EXTREMITY	This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is a history of lower extremity joint or long bone trauma or injury.; This is a request for a Knee CT; Yes this is a request for a Diagnostic CT	3
Approval	73700 CT LEG OR LOWER EXTREMITY	This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is a history of lower extremity joint or long bone trauma or injury.; This is a request for a Leg CT.; Yes this is a request for a Diagnostic CT	1
Approval	73700 CT LEG OR LOWER EXTREMITY	This is not a preoperative or recent postoperative evaluation.; There is suspicion of lower extremity bone or joint infection.; This is a request for a Leg CT.; Yes this is a request for a Diagnostic CT	1
Approval	73700 CT LEG OR LOWER EXTREMITY	This is not a preoperative or recent postoperative evaluation.; There is suspicion of a lower extremity neoplasm, tumor or metastasis.; This is a request for a Knee CT; Yes this is a request for a Diagnostic CT	1
Approval	73706 CT ANGIOGRAPHY LOWER EXTREMITY	Yes, this is a request for CT Angiography of the lower extremity.	10
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT		2
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a foot MRI.; The study is being ordered for foot pain.; The study is being ordered for chronic pain.; The patient has had foot pain for over 4 weeks.; The patient has been treated with anti-inflammatory medication for at least 6 weeks.	1

Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; It is not known if the ordering physician is an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; There is no symptom of locking,Instability, Swelling,Redness,Limited range of motion or pain.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; There is no symptom of locking,Instability, Swelling,Redness,Limited range of motion or pain.; No, patient has not completed and failed a course of conservative treatment.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; It is not known if patient has completed and failed a course of conservative treatment.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; It is not known if the physician has directed conservative treatment for the past 6 weeks.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.	7
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is not from a recent injury, old injury, chronic pain or a mass.	3
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for Inflammatory/ Infectious Disease.; 3/20/17; There has been treatment or conservative therapy.; swelling cant walk tender pain; medication 03/29/17	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/19/2017; There has been treatment or conservative therapy.; Pain, popping, soreness, and sharp pain, limited ROM; Medications	1

Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 1/18/2017; There has not been any treatment or conservative therapy.; Pain in the neck, back, and ankle, leg swelling	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 11/03/2016; There has been treatment or conservative therapy.; Pain, swelling and bruising.; Pt received SHE program, and NSAIDs	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; ; The patient received oral analgesics.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; It is not known if there is a suspected meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; It is not known if there is a suspicion of fracture not adequately determined by x-ray.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.	3
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is not from a recent injury, old injury, chronic pain or a mass.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; It is not known if there has been any treatment or conservative therapy.;	2
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	; This study is being ordered for trauma or injury.; HPI: 58 y.o. female presents with ankle and foot pain that started 3 days ago. The day prior she was playing tennis but doesn't recall an injury. Pain has worsened until she is unable to walk on it. She has been trying ice and elevation with some benefit.; There has not been any treatment or conservative therapy.; pain, bruising, swelling	2

Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	3 views of the left knee. Joint spacing is very slightly narrowed with soft tissue shadowing suggesting medial compartment hemarthrosis, patella is well seated in the distal femoral patellar groove very slight medial deviation, tibiofibular articulation ; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; After at home exercises to try and re-strengthen the left knee, the pain still progressively got worse.; The patient received oral analgesics.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Abnormal phy exam, abnormal x-ray, mem did 6 weeks on C.C. insaids, rest, ice, heat.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Concern for ligament tear. Not much swelling, but painful. Been using a brace. Hurts worse when moving on it. Does ok with rest. Feels like knee is going to give out.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	conservative therapy not helping; This is a request for a foot MRI.; The study is being ordered for foot pain.; The study is being ordered for chronic pain.; The patient has had foot pain for over 4 weeks.; The patient has been treated with anti-inflammatory medication for at least 6 weeks.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Continued knee pain after fall; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Enter answer here - or Type In UnknowER Follow Up knee/ankle injury; patient reports that the injury occurred about 36 hours ago. Reports she was seen in the ER early this morning. States that they did do Xrays and states that they were negative..  HP; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.	1

Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Enter answer here - or Type INew symptom(s):  HE WAS STANDING WELDING 3 DAYS AGO AND STEPPED BACKWARD AND FELT HIS POSTERIOR LEFT KNEE POP LOUDLY AND WAS UNABLE TO SUPPORT WEIGHT ON IT OR EXTEND IT STRAIGHT AFTERWARD. ER VISIT FOR NORMAL XRAYS WA; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	FAX; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	knee and hip pain,for several years aggravated by exercise and better with rest  has seen orthopedic, has had injections,  nsaid, steroids,; This study is being ordered for Inflammatory/ Infectious Disease.; 06/10/2014, initial visit for left knee pain, pt fell going down stairs and tore ligaments, has had medication therapy and seen orthopedic specialist  now has arthritis in joins of left side; There has been treatment or conservative therapy.; knee and hip pain, grating pain, worse on arising; Injections 2014 medications 2014-2017 exercise, range of motion	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	knee swelling, e66.9; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is not from a recent injury, old injury, chronic pain or a mass.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	LEG PAIN AND ADEMA ON THE RIGHT SIDE; This is a request for a Knee MRI.; No, the patient did not have a recent ultrasound of the knee.; The patient has not had recent plain films of the knee.; There are no physical findings (palpabel mass) of a suspicious mass or known primary site of cancer.; The patient has not had a recent bone scan.; Suspicious Mass or Suspected Tumor/ Metastasis	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	PAIN AND SWELLING IN RIGHT KNEE SINCE NOV 2016; This is a request for a Knee MRI.; No, the patient did not have a recent ultrasound of the knee.; The patient has not had a recent bone scan.; The results of the plain films is not known.; There are no documented physical or laboratory findings of a joint infection.; Known or Suspected Joint Infection	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Pain is more at rest in right knee than left knee.; This study is being ordered for Inflammatory/ Infectious Disease.; knee pain 1/2017; There has not been any treatment or conservative therapy.; both knee pain	2

Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Patient fell and injured knee on 1/31/17. He has pain and swelling.; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	patient has left knee internal derangement; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	patient has tried tramadol for pain and injection, steroids and has not help.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Patient is in a lot of pain and can barely walk. Patient had an x-ray done it showed normal, but the patient still can't walk due to knee pain.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	patient presents on 3/21/17 as a new patient to our clinic complaining of constant left knee pain for 15 years with occasional swelling and occasional locking up. On physical exam there was tenderness and moderately reduced range of motion in the left knee; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has not directed conservative treatment for the past 6 weeks.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Patient with a 3 week history of pain and swelling following recent fall. Unable to bear weight and continues to be painful and swollen despite conservative therapy of rest, ice, compression and elevation as well as medications including moxib, diclofenac; This is a request for an Ankle MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The study is requested for ankle pain.; There is a suspicion of tendon or ligament injury.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Patient with left knee pain, recent fall and history of osteoarthritis. Patient has been using brace, NSAIDs, using ice and resting without relief for two weeks.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; It is not known if surgery or arthroscopy is scheduled in the next 4 weeks.	1

Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	pt. has a lot of swelling in the knee and is wheelchair bound, unable to straighten, decreased ROM; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; It is not known if there is a suspected meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; It is not known if there is a suspicion of fracture not adequately determined by x-ray.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Rt ankle pain for 3 months; This is a request for an Ankle MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The study is requested for ankle pain.; There is a suspicion of tendon or ligament injury.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	see attached; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; It is not known if the physician has directed conservative treatment for the past 6 weeks.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.	5
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.	13
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.	2

Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.	2
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.	16
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is for pre-operative planning.; The patient does not have a documented limitation of their range of motion.	1

Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	<p>This is a request for a Knee MRI.; It is not known if the study is ordered prior to arthroscopic surgery.; "This study is not being ordered prior to a planned or scheduled open surgery (joint replacement, etc.)."; The ordering physician is not an orthopedist.; Pre-operative Evaluation; Instability</p>	1

Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; No, the patient did not have a recent ultrasound of the knee.; The patient had recent plain films of the knee.; There are physical findings (palpable mass) of a suspicious mass or known primary site of cancer.; The patient has not had a recent bone scan.; The plain films were normal.; palpable mass, patient fell 1/2017 and mass on back of patient knee; Suspicious Mass or Suspected Tumor/ Metastasis	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Non-acute Chronic Pain; Locking	2
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Suspected meniscus, tendon, or ligament injury	30
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; Instability	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Instability	15
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Limited range of motion	12
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Locking	12
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Swelling greater than 3 days	24
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Instability; It is not known if the member experience a painful popping, snapping, or giving away of the knee.	2
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Instability; Yes, the member experience a painful popping, snapping, or giving away of the knee.	5
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Limited range of motion; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Locking; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1

Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Swelling greater than 3 days; It is not known if the member experience a painful popping, snapping, or giving away of the knee.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Instability; No, the member do not experience a painful popping, snapping, or giving away of the knee.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Instability; Yes, the member experience a painful popping, snapping, or giving away of the knee.	30
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; It is not known if the member experience a painful popping, snapping, or giving away of the knee.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; No, the member do not experience a painful popping, snapping, or giving away of the knee.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; Yes, the member experience a painful popping, snapping, or giving away of the knee.	12
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Locking; No, the member do not experience a painful popping, snapping, or giving away of the knee.	2
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Locking; Yes, the member experience a painful popping, snapping, or giving away of the knee.	13
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Swelling greater than 3 days; No, the member do not experience a painful popping, snapping, or giving away of the knee.	6

Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Swelling greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	17
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Instability	47
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Limited range of motion	28
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Locking	14
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Swelling greater than 3 days	28
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There are documented physical or laboratory findings of a joint infection.; Post-operative Evaluation	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; Instability	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; Limited range of motion	3
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; Swelling greater than 3 days	4
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days	14
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Pain greater than 3 days; No, the member do not experience a painful popping, snapping, or giving away of the knee.	1

Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; No, the member do not experience a painful popping, snapping, or giving away of the knee.	2
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	8
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days	7
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; <Additional Clinical Information>; Suspicious Mass or Suspected Tumor/ Metastasis	2
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; She has a suspected mass; Suspicious Mass or Suspected Tumor/ Metastasis	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days	9
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; No, the member do not experience a painful popping, snapping, or giving away of the knee.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	3

Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; There is no symptom of locking,Instability, Swelling,Redness,Limited range of motion or pain.; No, the member do not experience a painful popping, snapping, or giving away of the knee.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days	5
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; Pain greater than 3 days	3
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; This study is being ordered prior to arthroscopic surgery.; The ordering physician is not an orthopedist.; Pre-operative Evaluation; Pain greater than 3 days	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed exercise program	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications	8
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physical Therapy; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1

Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications; Yes, the member experience a painful popping, snapping, or giving away of the knee.	2
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications	3
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The plain films were not normal.; &Additional Clinical Information>; Known or Suspected Joint Infection	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The plain films were not normal.; joint effusion; Known or Suspected Joint Infection	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	17
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient received joint injection(s).	2

Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; It is not known if there is a suspected meniscus, tendon, or ligament injury.; There is a suspicion of fracture not adequately determined by x-ray.	2
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	4
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient received joint injection(s).	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; This study is being ordered prior to arthroscopic surgery.; The ordering physician is an orthopedist.; Pre-operative Evaluation; Instability	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; There is a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; There is a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is taking antibiotics.; This is a study for a fracture which does not show healing (non-union fracture).	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; There is a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is taking antibiotics.	4
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is taking antibiotics.	3
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.	1

Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.	13
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.	17
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a suspected tarsal coalition.	8
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a history of new onset of severe pain in the ankle within the last two weeks.; The patient does not have an abnormal plain film study of the ankle other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; There is not a suspected tarsal coalition.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; The patient does not have an abnormal plain film study of the ankle other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; There is not a suspected tarsal coalition.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.	4

Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a history of new onset of severe pain in the ankle within the last two weeks.; The patient does not have an abnormal plain film study of the ankle other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; There is not a suspected tarsal coalition.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a history of new onset of severe pain in the ankle within the last two weeks.; The patient does not have an abnormal plain film study of the ankle other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; There is not a suspected tarsal coalition.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient has a documented limitation of their range of motion.; This study is not being ordered by an operating surgeon for pre-operative planning.	2
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a history of new onset of severe pain in the ankle within the last two weeks.; The patient had an abnormal plain film study of the ankle other than arthritis.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.	2
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for an Ankle MRI.; There is a suspicion of fracture not adequately determined by x-ray.; The study is requested for ankle pain.; Tendon or ligament injury is not suspected.	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	unknown; This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; It is not known if the ordering physician is an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; There is no symptom of locking,Instability, Swelling,Redness,Limited range of motion or pain.	2
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	UNKNOWN; This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Unknown; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.	1

Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	unknown; This study is being ordered for a neurological disorder.; 09/19/2016; There has been treatment or conservative therapy.; pain; swelling;; meds-napercin	2
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	unknown; This study is being ordered for trauma or injury.; 6 weeks ago, 1/2/17; There has been treatment or conservative therapy.; 27 broken bones in back and foot, swelling, bruising, decrease ROM and redness; medication therapy, xrays	2
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Will fax clinical information; This study is being ordered for trauma or injury.; ; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1
Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	XR Bilateral knees 6/17/17   Bilateral tricompartmental osteoarthritis, severe involving the patellofemoral compartments. Bilateral osteochondral body(s) present  Impression per Dr John S Dennis, Radiologist.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Per clinical note in chart, chronic bilateral knee pain for several years.; There has been treatment or conservative therapy.; Bilateral knee pain, left knee is worse. Reports chronic bending makes it worse, reports that injections do not last long.; She is getting injections over the past few years. PT ongoing.	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; 10/13/2016; There has been treatment or conservative therapy.; hip pain, lumbar pain, numbness, tingling in legs, walks with a limp; medication, physical therapy, injection s	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 9/2016; There has been treatment or conservative therapy.; low back pains. new onset hip pains.; rest, heat, medication	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	3 mm lesion seen on in-house xray of the left hip.; This is a requests for a hip MRI.; The member has not failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	DETERMINING IF PAIN COMING FROM LUMBAR SPINE OR RIGHT HIP; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/16/2016; There has been treatment or conservative therapy.; JOINT PAIN, RIGHT HIP AND RIGHT LEG PAIN; MEDICATIONS	1

Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	Ms. Manning presents with low back pain. Reason for visit: Pain. The discomfort is most prominent in the mid lumbar spine. This radiates to the hips. She is unable to describe the discomfort. The pain level between 1 and 10 is a 4. This is a chronic; This study is being ordered for a neurological disorder.; 10 years ago; There has been treatment or conservative therapy.; pain; joint injection, pain medication and muscle relaxer	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	N/A; This study is being ordered for a neurological disorder.; 2014; There has been treatment or conservative therapy.; PAIN, NUMBNESS, AND TINGLING.; HOME EXERCISES, MEDICATIONS, AND X-RAYS	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; Surgery or arthroscopy is scheduled in the next 4 weeks.; There is a suspicion of tendon or ligament injury.; The hip pain is due to a recent injury.; The request is for hip pain.	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; The diagnosis of Mass, Tumor, or Cancer has been established.; The study is requested for staging.; The hip pain is due to a mass.; The request is for hip pain.	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; The member has failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.	3
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; The member has failed a 4 week course of conservative management in the past 3 months.; The hip pain is due to an old injury.; The request is for hip pain.	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is for pre-operative planning.; The patient has a documented limitation of their range of motion.	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient has a documented limitation of their range of motion.	1

Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient had an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient has a documented limitation of their range of motion.	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.	8
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.	5
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steriod therapy (Prednisone or Cortisone).	2

Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.	3
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is receiving long-term steriod therapy (Prednisone or Cortisone).	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion.	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.	1

Approval 73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion. 1

Approval 73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion. 1

Approval 73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient has a documented limitation of their range of motion. 2

Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.	2
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient has a documented limitation of their range of motion.	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has used a cane or crutches for greater than four weeks.; The patient has a documented limitation of their range of motion.	3

Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient had an abnormal plain film study of the hip other than arthritis.; The patient has a documented limitation of their range of motion.	8
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient had an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is a mass near the hip.; The patient does not have a documented limitation of their range of motion.	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.	1

Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is for pre-operative planning.; The patient does not have a documented limitation of their range of motion.	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steriod therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.	8
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	UNKOWN; This study is being ordered for Inflammatory/ Infectious Disease.; 2 YEARS AGO?; There has been treatment or conservative therapy.; LUMBAR PAIN RUQ PAIN R HIP PAIN PELVIC PAIN; HOME EXERCISES ANTI-INFLAMMATORY MEDICATIONS PAIN MEDICINE	1
Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	x ray of shoulder and hip in office on 1/18/17; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10 years; There has been treatment or conservative therapy.; Pain in joints; pain meds	1
Approval	73725 MRA, MRI ANGIOGRAPHY LOWER EXTREMITY WITH/WITHOUT CONTRAST	; Is this a request for one of the following? MR Angiogram lower extremity	1
Approval	73725 MRA, MRI ANGIOGRAPHY LOWER EXTREMITY WITH/WITHOUT CONTRAST	R/O claudication.; Is this a request for one of the following? MR Angiogram lower extremity	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST		1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; There is neither a known nor a strong suspicion of kidney or ureteral stones.; This patient is not experiencing hematuria.; Yes this is a request for a Diagnostic CT	1

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; It is not known if there is a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; It is not known if there are findings that confirm hepatitis C.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	2
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	7
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; Which organ is enlarged? Don't know; Yes this is a request for a Diagnostic CT	1

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	; This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; It is not known if the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	5
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.;	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	; This study is being ordered for trauma or injury.; 01/22/2017; There has not been any treatment or conservative therapy.; Patient was in MVA on 01/22/2017 pt experiencing low back pain,inner thigh soreness,neck pain,abdominal pain and head ache since mva. Pt has not eaten and has c/o nausea/vomiting	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	ABD Pain,; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Abdominal pain and distention; This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is no evidence of organ enlargement on ultrasound, plain film, or IVP.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	abdominal pain. Symptoms include abdominal pain, nausea, vomiting and diarrhea. The pain is located in the right upper quadrant and right lower quadrant. The patient describes the pain as sharp. Onset was sudden 3 week(s) ago. The symptoms occur frequent; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Abnormal findings on diagnostic imaging of liver and biliary tract, US IMPRESSION: Abnormal liver echotexture either from steatosis or cirrhosis. Recommend CT for further assessment, there are 2 hypochoic lesions, one is most likely an area of focal; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Abnormal Liver Function Test and Abnormal Abdominal Ultrasound; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	ABNORMAL PIPIDA SCAN THAT SHOWED POSSIBLE LIVER ISSUES.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	appendix; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Chronic Nausea pt is not able to hold anything down; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	cirrrosis of the liver for follow up nodular liver and with atropy on left lobe; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Enter answer here - or Type In Unknown unknownIf No Info Given.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	EPIGASTRIC PAIN, TENDER IN THE AREA, NO MASSES, NAUSEA; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	For possible epigastric hernia, inguinal hernia, or scar tissue; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Gastric surgery as newborn. Developed knot at incision site, possible hernia; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	INNUMBERABLE LESIONS IN LIVER ON MRI SPINE.; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is unknown if the patient has new symptoms including hematuria, new lab results or other imaging studies including ultrasound, doppler or x-ray (plain film) findings, suspicion of an adrenal mass or suspicion of a renal mass.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Limited Abdominal Ultrasound; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	mbr had auto accident and HX hernia repair seatbelt gave major pain. R/O abdomen wall defect; This is a request for an Abdomen CT.; This study is being ordered for trauma.; This request is not for follow up to abdominal and/or pelvic trauma ordered by a specialist or PCP on behalf of a specialist who has seen the patient.; There is no recent trauma with physical findings or abnormal blood work indicating either peritonitis or abscess.; There are no physical findings or lab results indicating an intra-abdominal bleed.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	moderate pain in entire abdomen to light palpation. 1.5 in mass in left upper quadrant that is severely tender; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; The patient has new lab results or other imaging studies including doppler or x-ray (plain film) findings.	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	NAUSEA AND VOMITING. BACK AND ABDOMINAL PAIN. PAIN IN LEFT UPPER QUADRANT. PT HAS ENLARGED LIVER. VERY FATIGUED. PAIN ATLEAST TWO WEEKS; This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; Which organ is enlarged? Liver; The patient did not have an Ultrasound.	1

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	nausea, right upper quadrant pain,; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Patient had blood work done on 2/9/17 and her liver functions were elevated, patient returned a week later to get levels rechecked and her levels went up some more.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Patient had CT T-spine and it showed multiple cystic liver abnormalities. Needing Ct to further evaluate this.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Patient has been recently hospitalized. Discharge diagnosis of left sided abdominal mass vs tail of pancreas vs paracolic abscess vs pancreatic pseudocyst. We are requesting this follow-up CT be performed so that we can get patient in with correct special; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; The patient has new lab results or other imaging studies including doppler or x-ray (plain film) findings.	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Patient has Mass Right upper abdomen tender to touch; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is unknown if the patient has new symptoms including hematuria, new lab results or other imaging studies including ultrasound, doppler or x-ray (plain film) findings, suspicion of an adrenal mass or suspicion of a renal mass.; Yes this is a request for a Diagnostic CT	1

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Patient in office today with severe stomach pain. Patient had an EGD showing Gastritis in August 2016. Had a Chest CT on 12/1/2016 with findings of a cyst.; This is a request for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Patient is having abdominal pain and diarrhea for three weeks.; This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Patient is having abdominal pain. Trying to rule out if patient has a hernia.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Patient is too large for abdominal ultrasound.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Patient presents with c/o constant abdominal pain over the past couple of weeks, worsening over the past week now rated a 9/10; reports it is to epigastric/mid abdominal area. Patient was seen by a provider a few days ago; reports he has had some nausea a; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Patient with persistent vomiting, nausea and diarrhea in patient with significantly elevated LFTs and HX of alcohol abuse.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Per the US of the abdomen- echotexture of the liver is abnormal either from cirrhosis or stratosis. CT would be helpful.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Pt has been having abdominal pain for 1 month, had abnormal Abdominal Ultrasound that showed Single focal Hypoechoic area within the liver, needs CT fro further investigation, also pt's Liver Function on Labwork is Elevated.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	pt is having bilateral Flank pain which radiates to RUQ. Dr is looking at her Kidneys and other organs that could be causing pain.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	PT IS HAVING PAIN AND BLOATING WITH EVERYTHING SHE EATS AND DRINKS. IS USING OTC MEDS THAT ARE NOT HELPING. SHE HAS LOTS OF BLOATING EVEN DRINKING WATER CAUSES HEARTBURN; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	r/o hernia; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	R/O hernia; This is a request for an Abdomen CT.; This study is being ordered for trauma.; This request is not for follow up to abdominal and/or pelvic trauma ordered by a specialist or PCP on behalf of a specialist who has seen the patient.; There is no recent trauma with physical findings or abnormal blood work indicating either peritonitis or abscess.; There are no physical findings or lab results indicating an intra-abdominal bleed.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	right upper quadrant pain; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is a request for initial staging of a known tumor other than prostate.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes this is a request for a Diagnostic CT	3
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; Yes, there is a Is there an abdominal and pelvic or retroperitoneal or abdominal mass that has been confirmed.	2

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; Yes, there is a Is there an abdominal and pelvic or retroperitoneal or abdominal mass that has been confirmed.; Yes this is a request for a Diagnostic CT	2
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; No, there has not been a recent abdominal CT scan.; Yes this is a request for a Diagnostic CT	3
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; Yes, there has been a recent abdominal CT scan.; No, this is not a repeat of a CT of the abdomen within 6 weeks.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; Yes, this is a request for follow up to a known tumor or abdominal cancer.; Yes this is a request for a Diagnostic CT	4
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; There is a known or a strong suspicion of kidney or ureteral stones.	2
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; There is a known or a strong suspicion of kidney or ureteral stones.; Yes this is a request for a Diagnostic CT	2
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; This patient is experiencing hematuria.; The hematuria is newly diagnosed.	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.	1

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; It is not known if there is a suspicion of an adrenal mass.; This is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.	2
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT	16
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.	2

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Yes this is a request for a Diagnostic CT	4
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There is suspicion of renal mass.; The suspicion of a renal mass was suggested by an Ultrasound.	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a vascular disease.; The requested studies are being ordered for known or suspected blood clot, thrombosis, or stenosis and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.	2
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Ulcerative Colitis.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; It is not known if the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	4

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	14
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.	2
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; Yes this is a request for a Diagnostic CT	6
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are known or endoscopic findings of Diverticulitis.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Diverticulitis.; It is not known if the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Inflammatory bowel disease.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	1

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	5
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are clinical findings or indications of Hematuria.; Yes this is a request for a Diagnostic CT This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are clinical findings or indications	2
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	of unexplained abdominal pain in patient over 75 years of age.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are clinical findings or indications of unexplained weight loss of greater than 10% body weight in 1 month; Yes this is a request for a Diagnostic CT	2
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.	2
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for trauma.; This request is for follow up to abdominal and/or pelvic trauma ordered by a specialist or PCP on behalf of a specialist who has seen the patient.; Yes this is a request for a Diagnostic CT	3

Approval	74150 CT ABDOMEN WITHOUT CONTRAST	THIS PATIENT HAS HAD A RECENT EGD DONE AND IT HAS SHOWED SHE HAS A LARGE MASS ON THE OUTSIDE OF HER ESOPHAGUS. THIS NEEDS TO BE FURTHER EVALUATED, SO THESE TEST ARE NECESSARY; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Umbilical nodule.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	UNKNOWN; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Yes this is a request for a Diagnostic CT	1
Approval	74150 CT ABDOMEN WITHOUT CONTRAST	UNKNOWN; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	3
Approval	74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS	This is a request for CT Angiography of the Abdomen and Pelvis.	6
Approval	74175 CT ANGIOGRAPHY ABDOMEN	Yes, this is a request for CT Angiography of the abdomen.	8
Approval	74176 CT ABD & PELVIS W/O CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	7

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; fever since march 20 2017 abd pain gas pockets thinking partial bowel obstruction; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Having abdominal and pelvic pain for years; which has gotten worse in the last 6mos.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; He is having painless jaundice with some weightloss. He has had liver functions that have been 10 times sometimes 20 times higher than normal. We are trying to rule out pancreatic cancer.; Yes this is a request for a Diagnostic CT	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; He presents with a 3 to four-week history of diarrhea, abdominal discomfort and bloating. He is feverish today. He has an elevated white count today. Had no previous abdominal surgeries. He denies nausea vomiting with this. He has some tenderness to ; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Hernia	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Hernia; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Hx of diverticulitis; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; hx of left mechrectomy kidney and bladder surgery march 6 2014 right lower pain since surgery 2 months secondaty to nutcracker syndrome pain worse taken oxycodone and ibuprofen right lower quadrant tenderness positive heel tap reproducing pain in rig; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; left lower quadrant pain, nausea, vomiting, possible kidney stone; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Left lower quadrant pain; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; neg gall bladder; ruq pain;; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; pain,	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Patient c/o RLQ pain with bloating, nausea and vomiting. Described as "achy and sharp" off/on for 1 year. Patient does not respond to medications.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Patient had a surgery in 2015 and recently has felt a bulge in the incisional area when she coughs. It is painful in that area. Ultrasound was performed and was inconclusive.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Patient had abdominal pain.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; patient had previous CT that showed adrenal nodules that need further evaluation	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Patient has abdomen distention. Patient has had previous colonoscopy with no medical findings. Needing CT for further evaluation of area.	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; patient has abdominal pain; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Patient has been having unexplained abdomen pain for 1 month now. Patient has tried changing her eating habits with no relief. She is have several bowel movements a day which are very thin in texture. She is having cramping abdomen pain that that radiates; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Patient has dysuria and abdominal pain. Patient states she believes she has passed a kidney stone.	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; patient has had abdominal pain, swelling & bloating for about 3 years now. It's getting worse; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Patient has had recent ER visit with normal ultrasound and X-ray, but is still having severe right upper and lower quadrant pain with unknown etiology; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Patient has nausea, abdominal pain, diarrhea.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; patient has non alcoholic cirrhosis. access for HCC.	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; patient has sever abdominal pain with increased constipation and weight loss; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; PATIENT IS HAVING AB PAIN AND NAUSIA AND PELVIC PAIN, ULTRASOUND WAS DONE WITH NO FINDINGS.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; PATIENT IS HAVING ABD PIAN AND VENTRAL HERNIA; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; PATIENT PRESENTS TO CLINIC WITH EPIGASTRIC PAIN. ABDOMINAL ULTRA SOUND WAS NORMAL.; Yes this is a request for a Diagnostic CT	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Patient presents with nausea and constipation for 3 days. Patient wheelchair bound. Patient has low grade fever. Has abdominal x-ray done which showed and ileus and possible bowel obstruction.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Patient with persistent abdominal pain and diarrhea for 8 months. Patient has Celiac's disease. And, family history of father with pancreatic cancer.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Pelvic pain and tenderness on pelvic exam, unable to visualize ovaries on PELVIC us, RADIOLOGIST SUGGESTED ct OF abd/PELVIS WITH CONTRAST; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; pelvis and abdominal pain,; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Positive for abdominal pain (epigastric; RUQ; LUQ; had improved over weekend after several BM) and nausea (worse with eating).; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Pt has been having R upper quadrant pain for 3 weeks. Pt has ABD distension on exam. Elevated ESR and platlets on lab work. Symptoms suspicious of Gall bladder disease.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; pt has c/o abdominal pain and bloody stools intermittently for 3 years. Pain has gotten worse w change in bowel movements.; Yes this is a request for a Diagnostic CT	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; pt has come to clinic for worsening abdominal pain,w history of bilateral hernia repair, Dr looking for hernia tear or abdominal mass causing worsening pain; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Pt has pain, tender to the touch, white blood cells are elevated, decrease appetite, diarrhea, been on antibiotics for a week w/ no improvement.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Pt suffers with left lower quad pain; for 3 weeks.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; pt. is having abdominal pain that is unexplained. pt has tenderness to upper right and epigastric pain; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Right lower abd pain	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; right upper quad pain greater than a month; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; rule out diverticulitis; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; ruling out diverticulitis, blood in stool and upper left quadrant pain.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; RUQ since 1/14/17 that is severe and "stabbing" and no relief.; Yes this is a request for a Diagnostic CT	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; see attached; Long history of abdominal pain; known gallsludge; tenderness throughout; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Severe Right lower quadrant Abdominal pain, with blood in the stools; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; shes had vaginal u/s that was normal, but she has L pelvic pain prior to periods, and its still there-  pain on/off x 1 year, only on L side.  chiropractor told her its due to scoliosis, but doesnt think thats it.  chiro xrayed- in collierville.  abd ; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Suspected Umbilical Hernia.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; The pt ahs abdominal tenderness . fever, diahrhea	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; THIS EXAM IS BEING DONE FOR POSSIBLE HERNIA.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; ULTRASOUND SHOWED A FATTY LIVER	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Unknown	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; unknown; Yes this is a request for a Diagnostic CT	2

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; upper abdominal pain, unable to lay flat & sleep. HX: of umbilical hernias, removed with mesh repair.	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone	76
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone; Yes this is a request for a Diagnostic CT	287
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor	6
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT	21
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement	3
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement; Yes this is a request for a Diagnostic CT	7
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is neither a known nor a strong suspicion of kidney or ureteral stones.; This patient is experiencing hematuria.; Kidney/Ureteral stone	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is neither a known nor a strong suspicion of kidney or ureteral stones.; This patient is experiencing hematuria.; Kidney/Ureteral stone; Yes this is a request for a Diagnostic CT	3
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is no evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement; <Enter Additional clinical information >; Yes this is a request for a Diagnostic CT	2
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is no evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement; ; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is no evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement; r/o inguinal hernia; scrotal swelling and testicular pain; Yes this is a request for a Diagnostic CT	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is no evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement; spleen surgery on 1/20/17, patient having continued pain, palpable swelling noted on physical exam; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is not known if there are new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT	2
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is not known if there are new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; It is not known if there is a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; ; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is not known if there are new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; palpated on abd mass on exam; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.; Suspicious Mass or Tumor	2
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT	11
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; It is not known if there are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is a suspicion of an adrenal mass.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; palpable mass seen in ER for epigastric pain pain started several weeks ago elevated function study; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone; Kidney/Ureteral stone; Yes this is a request for a Diagnostic CT ; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis and the patient is undergoing active treatment.; Known Tumor, Cancer, Mass, or Rule out metastases	2
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis and the patient is undergoing active treatment.; Known Tumor, Cancer, Mass, or Rule out metastases; Yes this is a request for a Diagnostic CT	6
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; It is not known if this is a request for initial staging of a known tumor other than prostate.; There is an abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; Known Tumor, Cancer, Mass, or Rule out metastases; No, there is not a palpable or observed abdominal mass.; Yes this is a request for a Diagnostic CT	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is a request for initial staging of a known tumor other than prostate.; Known Tumor, Cancer, Mass, or Rule out metastases	3
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is a request for initial staging of a known tumor other than prostate.; Known Tumor, Cancer, Mass, or Rule out metastases; Yes this is a request for a Diagnostic CT	8
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There has been a recent (within the last 3 months) Abdomen and/or Pelvis CT.; This would not be a repeat of a CT of the abdomen and or pelvis within 6 weeks.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; Known Tumor, Cancer, Mass, or Rule out metastases; yes, there is a palpable or observed abdominal mass.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There has NOT been a recent (within the last 3 months) Abdomen and/or Pelvis CT.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; Known Tumor, Cancer, Mass, or Rule out metastases; yes, there is a palpable or observed abdominal mass.	2
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There has NOT been a recent (within the last 3 months) Abdomen and/or Pelvis CT.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; Known Tumor, Cancer, Mass, or Rule out metastases; yes, there is a palpable or observed abdominal mass.; Yes this is a request for a Diagnostic CT	7

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is an abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; Known Tumor, Cancer, Mass, or Rule out metastases; No, there is not a palpable or observed abdominal mass.	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is an abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; Known Tumor, Cancer, Mass, or Rule out metastases; No, there is not a palpable or observed abdominal mass.; Yes this is a request for a Diagnostic CT	2
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are new signs or symptoms including hematuria, presenting with known cancer or tumor.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; Known Tumor, Cancer, Mass, or Rule out metastases; No, there is not a palpable or observed abdominal mass.	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are new signs or symptoms including hematuria, presenting with known cancer or tumor.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; Known Tumor, Cancer, Mass, or Rule out metastases; No, there is not a palpable or observed abdominal mass.; Yes this is a request for a Diagnostic CT	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This request is for follow up to abdominal and/or pelvic trauma ordered by a specialist or PCP on behalf of a specialist who has seen the patient.; Trauma; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This request is not for follow up to abdominal and/or pelvic trauma ordered by a specialist or PCP on behalf of a specialist who has seen the patient.; There is no recent trauma with physical findings or abnormal blood work indicating either peritonitis or abscess.; There are physical findings or lab results indicating an intra-abdominal bleed.; Trauma; Yes this is a request for a Diagnostic CT	2
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This request is for follow up to abdominal and/or pelvic trauma ordered by a specialist or PCP on behalf of a specialist who has seen the patient.; There is recent trauma with physical findings or abnormal blood work indicating either peritonitis or abscess.; Trauma; Yes this is a request for a Diagnostic CT	2
Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an lipase lab test.; The results of the lab test were abnormal.	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	ULTRA showed renal mass with vascular flow; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	Ultra was abnormal; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	ULTRASOUND DONE ON 12/13/16 RT REANL CYST SEEN, HEMATURIA NOTED.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	Ultrasound shows enlarged spleen.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	unknown.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	unknown; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for protein.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	unknown; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	unknown; This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; It is not know if this study is being requested for abdominal and/or pelvic pain.; It is not known if the study is requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	unknown; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	unknown; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	unknown; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	2
Approval	74176 CT ABD & PELVIS W/O CONTRAST	unknown; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.	1

Approval	74176 CT ABD & PELVIS W/O CONTRAST	unknown; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/31/2016; There has not been any treatment or conservative therapy.; significant weight loss, abnormal chest x-ray, chronic cough	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; He has been having problems at least a year.; There has been treatment or conservative therapy.; abnormal weight loss, chronic cough, nicotine dependence, type 2 diabetic, COPD,; inhalers and being referred to GI physician	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	Unknown; This study is being ordered for trauma or injury.; 2/2017; There has not been any treatment or conservative therapy.; headaches, dizziness, joint pain, back and arm, tremors, swelling in abdomen, weakness, on 3/4 episode of stop breathing, vomiting, weight loss	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Approval	74176 CT ABD & PELVIS W/O CONTRAST	Weight loss, 20 over last 6 months, ER told her she needed bone marrow test, nausea, diarrhea, anemia and low white blood cells; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for bilirubin.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an lipase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT	1
Approval	74181 MRI ABDOMEN	; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; ;	1
Approval	74181 MRI ABDOMEN	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/01/2017; There has been treatment or conservative therapy.; N/V; abn ct	1
Approval	74181 MRI ABDOMEN	12/29 Abdomen & pelv ct showed 2.2 cm lesion; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/27/16; There has not been any treatment or conservative therapy.; none	1

Approval	74181 MRI ABDOMEN	Already had 2 lesions on the liver; u/s showed the size has changed; new liver on the kidney; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Abnormal ultrasound done on 1/23/2017; There has not been any treatment or conservative therapy.; Lesions seen on u/s HEPATIC LESION, NAUSEA, VOMITING, RT GROIN PAIN, WEIGHT LOSS, PELVIC PAIN, RLQ ABDOMINAL PAIN,; This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.	1
Approval	74181 MRI ABDOMEN	HPI Comments: Patient is here today with concerns that a recent CT of the abdomen/Pelvis did show that she had a 1 mm lesion on her pancreas and they recommend that she get an MRI.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Approval	74181 MRI ABDOMEN	Pt had abdominal ultrasound; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/25/2016; There has been treatment or conservative therapy.; Pt has had CT and vaginal ultrasound; medication: Bactrim DS/Metroall, Pt has been to office several time and also referred a GYN doctor.	1
Approval	74181 MRI ABDOMEN	R/O cancer; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/14/2016; There has not been any treatment or conservative therapy.; Abnormal CT scan of abdomen and pelvis with hematuria	1
Approval	74181 MRI ABDOMEN	Renal mass protocol. Left renal mass measuring 1.9 cm concerning for a solid mass. Recommend further evaluation with renal mass protocol. Differential considerations include renal cell carcinoma and possibly other complicated renal cystic lesions per C; This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A kidney abnormality was found on a previous CT, MRI or Ultrasound.; The patient has a renal cyst.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for follow-up trauma.; The ordering physician is a gastroenterologist or surgeon.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for hematuria.; "The patient has had an abdominal ultrasound, CT, or MR study."; The hematuria is not painful.;	1

Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for hematuria.; The patient has painful hematuria.; It is unknown if the patient has had an IVP (intravenous pyelogram).; abnormal CT, with complex Cysts	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is not a gastroenterologist, urologist, or infectious disease specialist.;" "There are physical findings or abnormal blood work consistent with peritonitis, pancreatitis, or appendicitis.;"	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is not a gastroenterologist, urologist, or infectious disease specialist.;" It is not known if there are physical findings or abnormal blood work consistent with peritonitis, pancreatitis, or appendicitis.; It is not known if there are active of clinical findings of Crohn 's disease, ulcerative colitis, bowel inflammation or diverticulitis.; "There is not radiographical or ultrasound findings consistent with abnormal fluid collection, abdominal abscess, or ascites.;"	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for known or suspected vascular disease.; The ordering physician is not a surgeon.; There are plain film or ultrasound evidence of vascular abnormality.; < Enter answer here - or Type In Unknown If No Info Given. >	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for known or suspected vascular disease.; The ordering physician is not a surgeon.; There are plain film or ultrasound evidence of vascular abnormality.; pt had CT that showed what could be vascular phenomenon. need MRI for further look.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is not presenting new symptoms.; The patient has had 3 or fewer follow-up abdomen MRIs.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon.;" < Enter answer here - or Type In Unknown If No Info Given. >	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is presenting new symptoms.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon.;" patient is presenting with a liver lesion found on mri l-spine	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for follow-up.; The patient did NOT have chemotherapy, radiation therapy or surgery in the last 3 months.; They did NOT have an Abdomen MRI in the last 10 months.	1

Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for staging.; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon."; Mass found on ct 01/18/2017	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for staging.; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon."; PT CAME IN WITH ADOMINAL PAIN. WE DID A CT ON THE PT. CT SHOWED A 2CM LESION ON THE RIGHT LOWER LOBE OF THE LIVER. THERE IS A POSSIBLE LESION ON THE LEFT BUT MRI FOCUSING ON THE LIVER WAS RECOMMENDED.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for staging.; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon."; unknown	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for organ enlargement.; There is an ultrasound or plain film evidence of an abdominal organ enlargement.; < Enter answer here - or Type In Unknown If No Info Given. >	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for organ enlargement.; There is an ultrasound or plain film evidence of an abdominal organ enlargement.; Jaundice	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for organ enlargement.; There is an ultrasound or plain film evidence of an abdominal organ enlargement.; Patient has had an abdominal ultrasound, CT of abdomen/pelvis with and without contrast, HIDA scan, and EGD for diagnostic testing that have so far been inconclusive. MRI is needed for further evaluation related to continued pain that has been going on fo	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study.";	4
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; < Enter answer here - or Type In Unknown If No Info Given. >	2
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; 1. Multiple hyperechoic hepatic masses, likely hemangiomas.  Contrastd abdominal MRI recommended for further evaluation.	1

Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; 2.6 centimeter lesion in the inferior right hepatic lobe	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Abd and Pelv ct recommended Abdomen MRI for further evaluation.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; ABNORMAL CT ABD/PEL SHOWS LESION IN PANCREAS AREA	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Abnormal CT scan requires further imaging	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Alpha Fetoprotein tumor marker is elevated at 6.4 ng/ml She had an abnormal CT and ultrasound showing a lesion and recommending an MRI of the abdomen for further investigation.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; CT showed a 1.5 cm enhancing lesion lower right hepatic lobe. Cavernous hemanigioma favored. Recommended MRI with hemangioma protocol.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Focal area of enhancement near the dome of the right hemidiaphragm in the right lobe of the liver. A lesion cannot be excluded and you may wish to consider MRI of the abdomen with and without contrast and dynamic technique.	1

Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Liver mass	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; ORGAN ANOMOLIES NOTED WITH INCREASING ABD/PELVIS PAIN. HEMATURIA AND MASS PRESENT.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Patient had a abnormal ct scan that showed left renal mass, and parapelvic renal cyst	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; patient has an adrenal gland nodule.	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; PT HAD A MRI 07/26/2016 @ BAPTIST LR RADIOLOGIST RECOMMENDED F/U MRI IN 6MTHS FOR THE 1.9CM RETROPERITONEAL MASS TO SEE IF THERE IS CHANGE THATS WHY WE ARE TRYING TO GET A MRI ABD DONE	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Pt had ultrasound , reflected multiple benign appearing hepatic cysts. rule out METS	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Pt has Ct of Abdomen/Pelvis w/o contrast and it showed a spot on the liver 3.6CM on left Radiologist suggest a Liver MRI .	1

Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Pt has enlarged, violation of the pancreatic duct	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; pt recently had abd CT and it did not show what we were looking for. Trying to r/u abd soft tissue mass. MRI would provide best picture	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; radiologist recommended MRI for further look more views of the lesions found measuring 2.5cm	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; ultrasound suggest hepatic mass protocol for liver mass. US showed liver mass; Interval development of hyperechoic regions within the right lobe; of the liver which are nonspecific and could represent focal fat; hemangiomas. Further evaluation with MR	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; unknown	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has not had an abdominal ultrasound, CT, or MR study."; lesion found on Chest CT, radiologist recommends Abdomen MRI	1
Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Lesion on liver	1

Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; pt had CT chest that showed liver masses. needs MRI to get closer look.	1
Approval	74181 MRI ABDOMEN	unknown; This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A liver abnormality was found on a previous CT, MRI or Ultrasound.; There is NO suspicion of metastasis.	1
Approval	74185 MRA, MRI ANGIOGRAPHY ABDOMEN WITH/WITHOUT CONTRAST	This is a request for a MR Angiogram of the abdomen.	5
Approval	75557 Cardiac MRI Morph & structure w/o contrast	This is a request for a heart or cardiac MRI	1
Approval	75572 CT Heart	This is a request for a Heart CT.	1
Approval	75574 CT Angiography Heart coronary arteries, CCTA	The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; 1. Chest Pain  2. hypertension  3. mvp  No known history of CAD. Stress echo 10/26/16 revealed EF 60-65%, grade I/IV diastolic dysfunction, and low risk for ischemia. History of fibromyalgia and vitamin d deficiency. Reports chest pressure onset 3 m; Yes, there is Chronic Chest Pain.	1
Approval	75635 CTA AA&BI ILIOFEM LXTR RS&I C-/C+ POST-PXESSING	Yes, this is a request for CT Angiography of the abdominal arteries.	11
Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for Breast MRI.; This study is being ordered for known breast lesions.; There are NOT benign lesions in the breast associated with an increased cancer risk.	1
Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	Breast mass; This is a request for Breast MRI.; This study is being ordered for known breast lesions.; There are NOT benign lesions in the breast associated with an increased cancer risk.	1

Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	Had a Mammogram and needs MRI to check on nodule; This is a request for Breast MRI.; This study is being ordered for known breast lesions.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this is not a confirmed breast cancer.; No, this patient does not have axillary node adenocarcinoma.; No, there are no anatomic factors (deformity or extreme density) that make a simple mammogram impossible.; It is unknown if there are benign lesions in the breast associated with an increased cancer risk.	1
Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	MAMMOGRAM AND ULTRASOUND PERFORMED ON 12.28.2016.; This is a request for Breast MRI.; This study is being ordered for known breast lesions.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this is not a confirmed breast cancer.; No, this patient does not have axillary node adenocarcinoma.; No, there are no anatomic factors (deformity or extreme density) that make a simple mammogram impossible.; It is unknown if there are benign lesions in the breast associated with an increased cancer risk.	1
Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	Pt had a mammogram and was normal but she has been having bloody discharge and MDO is requesting the MRI.; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.	1
Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	the patient has a recently enlarged, tender mass in the right breast.; This is a request for Breast MRI.; This study is being ordered for known breast lesions.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this is not a confirmed breast cancer.; No, this patient does not have axillary node adenocarcinoma.; It is not know if there are anatomic factors (deformity or extreme density) that make a simple mammogram impossible.; It is unknown if there are benign lesions in the breast associated with an increased cancer risk.	1
Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	This is a request for Breast MRI.; This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; This study is being ordered for a known history of breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; Yes, this is a confirmed breast cancer.; Yes, this is a confirmed breast cancer.; Yes, the results of this MRI (size and shape of tumor) affect the patient's further management.; Yes, the results of this MRI (size and shape of tumor) affect the patient's further management.	1
Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	This is a request for Breast MRI.; This study is being ordered as a screening examination following genetic testing for breast cancer.; The patient has a lifetime risk score of greater than 20.	1

Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There is a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).	5
Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; Yes, this is a confirmed breast cancer.; Yes, the results of this MRI (size and shape of tumor) affect the patient's further management.	3
Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; Yes, this is an individual who has known breast cancer in the contralateral (other) breast.	1
Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	This is a request for Breast MRI.; This study is being ordered for known breast lesions.; There are benign lesions in the breast associated with an increased cancer risk.	6
Approval	77078 CT bone mineral density study, 1 or more sites; axial skeleton	This is a request for a Bone Density Study.; This patient has not had a bone mineral density study within the past 23 months.; This is a bone density study in a patient with clinical risk of osteoporosis or osteopenia.	3
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2-16-2017; There has not been any treatment or conservative therapy.; chest pain on l side of chest goes to her neck last for a couple of mins moderate to severe and pt has numbness and tingling	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	2
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>ABNORMAL ECG WITH PREMATURE SUPRAVENTRICULAR COMPLEXES. ANTEROSEPTAL INFART; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p> <p>c/o episode of chest pain yesterday that has since resolved. pain described as substernal pressure at mid chest without radiation. a/w sweats and sob. no n/v or palpitations. episode occurred at rest and resolved after about 20 minutes. no known exacerbati; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39</p>	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>chest pain and has hypertension , palpitation; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p> <p>Chest pain, unspecified; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>H/O myocardial infarction; &#x0D; hypertension; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is unknown if the patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The study is requested for congestive heart failure.; There are not new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.</p>	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	htn; chest congestion that's improvement; precordial pain; helicobacteria; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	normal EKG; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if the patient has had a previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Palpitations and chest pressure for past several weeks. EKG, ECHO, HOLTER MONITOR were all normal. Needs further investigation; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient complains of Chest Pains; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient having chest pain on exertion; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	PATIENT PRESENTS TO CLINIC W C/O CHEST PAIN. PATIENT ALSO HAS COPD. PATIENT WAS SENT FOR STRESS ECHO @ MERCY HOSPITAL BUT WAS UNABLE TO COMPLETE DUE TO LUNG COMPLICATIONS. PCP STILL NEEDING NUC MED STRESS TEST COMPLETED FOR CONTINUATION OF CARE.; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient was in office 2/16/17 and has had left upper chest pain for the past two weeks. 1-10 pain scale member rates 8.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt was not able to exercise long enough to give accurate findings.; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Sudden onset Severe Chest Pressure, sob, and dyspnea on exertion.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has diabetes.	2
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is diabetic.; The patient is less than 45 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	6
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is not diabetic.; The patient is less than 45 years old.; The patient has had a recent exercise treadmill test that was positive.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.	5

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for a post myocardial infarction evaluation.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had a nuclear cardiology study since having an MI.	2
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	2
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient's diagnosis was established by a previous stress echocardiogram, nuclear cardiology study, or stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	2
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for known CAD.; The study is being ordered for suspected CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient has congestive heart failure.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	2
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; It is not known if the patient has had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	19
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	3

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for congestive heart failure.; The member does not have known or suspected coronary artery disease	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for known or suspected cardiac septal defect.	1
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for known or suspected valve disorders.	3
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This study is being ordered as a pre-operative evaluation.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	3
Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
Approval	78813 PET IMAGING WHOLE BODY	This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on a more than 1 of the following; diagnostic test, imaging sstudy, or biopsy.; This study is being ordered to establish a cancer diagnosis.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.; This would be the first PET Scan performed on this patient for this cancer.	1
Approval	78813 PET IMAGING WHOLE BODY	This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on an imaging study.; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lymphoma or Myeloma.; This would be the first PET Scan performed on this patient for this cancer.	2
Approval	78813 PET IMAGING WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.	1

Approval	78813 PET IMAGING WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Ovarian or Esophageal Cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; It is unknown how many PET Scans have already been performed on this patient for this cancer.	1
Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.	3
Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; It is unknown why the study is being ordered.; This study is being requested for Breast Cancer.	1
Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on an imaging study.; This study is being ordered to establish a cancer diagnosis.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.; This would be the first PET Scan performed on this patient for this cancer.	2
Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on an imaging study.; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lymphoma or Myeloma.; This would be the first PET Scan performed on this patient for this cancer.	2
Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Breast Cancer.; It is unknown if this is for an evaluation of axillary lymph nodes.	1
Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.	1
Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Lymphoma or Myeloma.; This would be the first PET Scan performed on this patient for this cancer.	2
Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for Brain Cancer/Tumor or Mass.	1

Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	PREVIOUS HISTORY OF STROKE; This study is being ordered for a neurological disorder.; 02/23/2017; There has not been any treatment or conservative therapy.; RIGHT SIDED WEAKNESS	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.	3
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient does not have a history of a recent heart attack or hypertensive heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has high blood pressure	2
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; There has been a change in clinical status since the last echocardiogram.; It is unknown if this is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; There has been a change in clinical status since the last echocardiogram.; This is not for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; There has NOT been a change in clinical status since the last echocardiogram.; This is not for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.	2

Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is an initial evaluation of artificial heart valves.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Known or suspected valve disease.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is an initial evaluation of suspected valve disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Known or suspected valve disease.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; It is unknown if this study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The abnormal symptom, condition or evaluation is not known or unlisted above.	5
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has an enlarged heart; The patient's enlarged heart is not due to any of the listed indications	1

Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Known or suspected pulmonary hypertension	2
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Shortness of breath is not related to any of the listed indications.	2
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; This study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG	2
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; This study is NOT being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of heart failure.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Known or suspected Congestive Heart Failure.	1

Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of cardiac arrhythmias; This study is NOT being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Embolism.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; There has been a change in clinical status since the last echocardiogram.; This request is NOT for initial evaluation of a murmur.; This is a request for follow up of a known murmur.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; It is unknown if there is clinical symptoms supporting a suspicion of structural heart disease.; This is NOT a request for follow up of a known murmur.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease.	5
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is grade III (3) or greater.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is NOT grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease.	2
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; The patient has suspected prolapsed mitral valve.	2
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an evaluation of new or changing symptoms of valve disease.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an initial evaluation of suspected valve disease.	6

Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is NOT for prolapsed mitral valve, suspected valve disease, new or changing symptoms of valve disease, annual review of known valve disease, initial evaluation of artificial heart valves or annual re-eval of artificial heart valves.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for initial diagnosis of congenital heart disease.	4
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for a routine follow up of congenital heart disease.; There has been a change in clinical status since the last echocardiogram.; It has NOT been at least 24 months since the last echocardiogram was performed.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; There has been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; There has NOT been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; This is for the initial evaluation of heart failure.	4
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient does not have a history of a recent heart attack or hypertensive heart disease.	1
Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Pulmonary Hypertension.	6
Approval	93312 TEE R-T IMG 2D W/PRB IMG ACQUIS I&R	This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is being requested after a completed NON diagnostic transthoracic echocardiogram.	1
Approval	93350 ECHO TTHRC R-T 2D +-M-MODE COMPLETE REST&STRS	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/15/2017; There has been treatment or conservative therapy.; chest pains tightness, fam hx of heart attack; lisinopril	1

Approval	93350 ECHO TTHRC R-T 2D --M-MODE COMPLETE REST&STRS	This is a request for a Stress Echocardiogram.; It is unknown if the patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.	1
Approval	93350 ECHO TTHRC R-T 2D --M-MODE COMPLETE REST&STRS	This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; It is not known if the member has known or suspected coronary artery disease.	1
Approval	93350 ECHO TTHRC R-T 2D --M-MODE COMPLETE REST&STRS	This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; The member does not have known or suspected coronary artery disease	1
Approval	93350 ECHO TTHRC R-T 2D --M-MODE COMPLETE REST&STRS	This is a request for a Stress Echocardiogram.; The patient has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The member has known or suspected coronary artery disease.	14
Approval	G0297 Low dose CT scan (LDCT) for lung cancer screening	< Enter answer here - or Type In Unknown If No Info Given. >; This request is for a Low Dose CT for Lung Cancer Screening.; It is unknown if this patient has had a Low Dose CT for Lung Cancer Screening in the past 11 months.; It is unknown if the patient is presenting with pulmonary signs or symptoms of lung cancer or if there are other diagnostic test suggestive of lung cancer.	1
Approval	G0297 Low dose CT scan (LDCT) for lung cancer screening	< Enter answer here - or Type In Unknown If No Info Given. >; This request is for a Low Dose CT for Lung Cancer Screening.; No, I do not want to request a Chest CT instead of a Low Dose CT for Lung Cancer Screening.; The patient is presenting with pulmonary signs or symptoms of lung cancer or there are other diagnostic test suggestive of lung cancer.	1
Approval	G0297 Low dose CT scan (LDCT) for lung cancer screening	59 year old female presents with shortness of breath. History of asthma, COPD-oxygen dependent, former smoker (quit 04/2016), passive smoke exposure. tobacco-years of use:46/1ppd.; This request is for a Low Dose CT for Lung Cancer Screening.; No, I do not want to request a Chest CT instead of a Low Dose CT for Lung Cancer Screening.; The patient is presenting with pulmonary signs or symptoms of lung cancer or there are other diagnostic test suggestive of lung cancer.	1
Approval	G0297 Low dose CT scan (LDCT) for lung cancer screening	This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.	15

Approval	G0297 Low dose CT scan (LDCT) for lung cancer screening	This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient quit smoking less than 15 years ago.	10
Approval	G0297 Low dose CT scan (LDCT) for lung cancer screening	This request is for a Low Dose CT for Lung Cancer Screening.; This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.; The patient has not quit smoking.	1
Approval	G0297 Low dose CT scan (LDCT) for lung cancer screening	This request is for a Low Dose CT for Lung Cancer Screening.; This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient quit smoking less than 15 years ago.; The patient quit smoking less than 15 years ago.	1
Approval	G0297 Low dose CT scan (LDCT) for lung cancer screening	Unknown; This request is for a Low Dose CT for Lung Cancer Screening.; No, I do not want to request a Chest CT instead of a Low Dose CT for Lung Cancer Screening.; The patient is presenting with pulmonary signs or symptoms of lung cancer or there are other diagnostic test suggestive of lung cancer.	1
Approval	S8037 mrcp	abd pain x2wks; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1

Approval	S8037 mrcp		RUQ PAIN IN ABDOMEN WITH NAUSEA, NO VOMITING, US 1/19/17 SHOWS COMMON BILE DUCT MEASURING 7.4 MM. IF SYMPTOMS PERSIST THEY SUGGESTED THE MRCP FOR FURTHER EVALUATION. PT STILL HAVING SYMPTOMS 1/30/17; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
			This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; It is not known if patient requires evaluation for a congenital defect of the pancreatic or biliary tract.; The MRCP will be used to identify a pancreatic or biliary system obstruction that cannot be opened by ERCP.	2
Approval	S8037 mrcp		This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; The patient does not require evaluation for a congenital defect of the pancreatic or biliary tract.; The MRCP will be used to identify a pancreatic or biliary system obstruction that cannot be opened by ERCP.	2
Approval	S8037 mrcp		This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; The patient requires evaluation for a congenital defect of the pancreatic or biliary tract.	1
Approval	S8037 mrcp		This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient has an altered biliary tract anatomy that precludes ERCP.	2
Disapproval	70450 CT BRAIN, HEAD	Radiology Services		1
Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. > Evaluation of a Headache; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; It is unknown if the study is being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.	3

Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; It is unknown if the study is being requested for evaluation of a headache.; The patient has vertigo.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.	1
Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	4
Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.	1
Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	5
Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for Dementia/ Cognitive Impairment; It is unknown why an MRI is not being considered	1
Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for Dementia/ Cognitive Impairment; MRI scanning is not locally available to the patient is the reason an MRI is not being considered	1
Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications	2
