This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is a preoperative or recent postoperative evaluation.

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is not suspicion of upper extremity bone or joint infection.; The ordering physician is not an orthopedist or rheumatologist.

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity neoplasm or tumor or metastasis.

pain and limited range of motion; This study is being ordered for trauma or injury.; 03/12/16; There has been treatment or conservative therapy.; pain and limited range of motion; duexis

The request is for an upper extremity non-joint MRI.; This is a preoperative or recent postoperative evaluation.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is an orthopedist.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is not an orthopedist.; There is a history of upper extremity trauma or injury.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is not an orthopedist.; There is not a history of upper extremity trauma or injury.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is suspicion of upper extremity bone or soft tissue infection.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity neoplasm or tumor or metastasis.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; HOME EXERCISE DONE FOR 3 MONTHS WITH NO IMPROVEMENT; PERDISONE, MOBIC.; The patient received medication other than joint injections(s) or oral analgesics.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The requested study is a Shoulder MRI.; The study is not requested for any of the standard indications for Knee MRI; It is not known if the study is requested for shoulder pain.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 2/8/2015; There has been treatment or conservative therapy.; neck pain radiating to both arms, numbness tingling, shoulder pain, limited ROM, inability to raise arm above head; naproxen,hydrocone for 8 weeks, PT for 6 weeks

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 5/16/2016; There has been treatment or conservative therapy.; shoulder pain radiating down left arm, neck pain, numbness, tingling, popping; Back Adjustments, medications, injections

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; 5/20/16 MVA; There has been treatment or conservative therapy.; Shoulder pain, decreased range of motion, positive lift off test, neck x-ray loss of disc space c5-6, C6-7, worsening pain and spasms.; Naper, Tylenol #3, xray was negative on 5/25/16, Changed medications to hydrocodone on office visit #2 5/31/16.

; The requested study is a Shoulder MRI.; The pain is from a recent injury.; It is not know if surgery or arthroscopy is scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient has left shoulder pain that started a couple of weeks ago. She has had an xray which showed which showed mild degenerative changes. Patient is still in alot of pain and not able to lift arm.; There has been treatment or conservative therapy.; Patient Shoulder makes a popping sound, and hurts to lift it up. She continues to have right hip, knee, and ankle pain.; Acute left shoulder pain.; Right leg pain.; Low back pain potentially associated with radiculopathy; Patient was given a steroid shot in office and also continued on Ibuprofen for pain.

; This study is being ordered for trauma or injury.; 2010; There has been treatment or conservative therapy.; chronic neck and right shoulder pain with radiculopathy and decreased ROM, worsened over past month; Physical therapy and has seen chiropractor. Has taken NSAIDS

Also she has right shoulder pain; was sent to Dr. Garlow, orthopedics; we have the initial note from May 2015; states he was going to get an MRI, and she says that never got done.; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.; The patient received oral analgesics.

Arthropathy, unspecified (M12.9).&#x0D; The patient had the following test(s) completed today Antinuclear Antibodies, ANA, IFA and Rheumatoid Factor (RF) IgM.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09/15/2015; There has been treatment or conservative therapy.; Patient complaining of left neck and shoulder pain. Worsened with movement. Primarily in the neck at the current time discussed MRI of the neck as sounds like radiculopathy. Patient does a lot of heavy lifting with his work. Paresthesias with numbness; Mobic 15 mg tablet&#x0D; take 1 tablet by oral route every day&#x0D; 05/12/2015

dresser fell on her shoulder several weeks ago, has been on medication and tried physical therapy, but was too painful, cant sleep, hurting worse, loss of range of motion; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthrscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

He was ran over by a vehicle about ten years ago and has had a lot of pain off and on since then.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; He has a lot of shoulder and Cspine pain. He was ran over by a vechicle ten years ago and has had problems off and on since then but it's been really bad the past week.; Has tried anti-inflammatories, home exercises and alternating between heat and ice.

MVA accident 5/22/16; r/o rotator cuff tear or torn ligament; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthrscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

pain and limited range of motion; This study is being ordered for trauma or injury.; 03/12/16; There has been treatment or conservative therapy.; pain and limited range of motion; duexis

pain at left elbow radiates up to shoulder normal xray.; The pain is not from a recent injury, old injury, chronic pain or a mass.; This is a request for an elbow MRI; The study is requested for evaluation of elbow pain.

pain getting worse tingling down arm and fingers pain from shoulder to fingers can't lift arm without severe pain in shoulder; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

PATIENT C/O PAIN IN LEFT SHOULDER AFTER FALLING DOWN STAIRS.; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

Pt had 1 or 2 seizures as a kid; Pt has a hematoma; Mdo wants to eval for new seizures; No meds for seizure; This study is being ordered for trauma or injury.; 5/31/16; There has been treatment or conservative therapy.;

Headaches; Dizziness; Loratab

R/O ROTATOR CUFF TEAR; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 03/29/2016; There has been treatment or conservative therapy.; NECK PAIN, DECREASED MUSCLE MASS; PHYSICAL THERAPY, MEDICATIONS

tender on the spect wrist and tender on the snuffbox; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; There is a suspicion of tendon or ligament injury.; This request is for a wrist MRI.; This study is requested for evaluation of wrist pain.

The pain is described as chronic; The member has failed a 4 week course of conservative management in the past 3 months.; This is a request for an elbow MRI; The study is requested for evaluation of elbow pain.

The pain is described as chronic; The member has failed a 4 week course of conservative management in the past 3 months.; This request is for a wrist MRI.; This study is requested for evaluation of wrist pain.

The pain is from a known mass.; The diagnosis of Mass, Tumor, or Cancer has not been established.; The patient has had recent plain films, bone scan or ultrasound of the knee.; The imaging studies were abnormal.; This is a request for an elbow MRI; The study is requested for evaluation of elbow pain.

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation.";

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Abnormal right shoulder x ray and shoulder pain for about a month. Tylenol has been used but is not helping with the pain.

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; decreased range of motion, rotation painful

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; evulating for a rotator cuff tear.

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Joint and shoulder pain

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; left shoulder pain that radiates down arm. calcific tendinopathy present. patient states when she lifts or moves her left arm it causes extreme pain to her shoulder. patient tried physicl therapy could not tolerate.

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; MDO requesting to bypass clincials

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; numbess tingling in L arm and hand

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Patient came into clinic with complaints of pain to right shoulder that radiates into neck. Denies any known trauma at this time. Upon examination pain was noted more in rotator cuff with obvious tenderness noted. Decreased strength was noted and patie

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Patient had a motorcycle accident on 05/31/16 and landed on his right shoulder. He continues to have pain and decreased ROM. Xrays were done and negative for a fracture. MRI is to rule out possible rotator cuff tear and/or labral tear

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Patient is having issues of range of motion, not able to lift up her arm or use of her shoulder. Patient had a x-ray that showed Osteoarthritis. She is also hearing popping sounds in her shoulder.

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; r/o rotator cuff tear

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Right shoulder tendinitis.

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; ROTATOR CUFF TEAR

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Shoulder pain started more than a month ago, the pain is located in the left shoulder, Aggravating factors include movement raising arm horizontal, working overhead, rotation of the shoulder, Associated symptoms include limited range of motion, Medicat

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; unknown

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Will fax clinicals

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.;

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.; patient cannot lift left upper limb, ROM restricted severely. Suspected rotator cuff tear.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.; patient is having pain and we did plain films. they showed nothing. patient also has been prescribed tramadol on 4-5; which helped some, and then the patient pain had gotten worse.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.; pt has had an xray, xray showed that there is chronic widening of the right acromioclavicular joint. severe pain.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.; Right shoulder suddenly locked up. shoulder revealed clinking and grating sensation upon physical exam

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.; unknown

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.; x-ray was performed

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is an orthopedist.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; The patient has a documented limited range of motion on physical examination.; It is not known if there is documented findings of severe pain on motion.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; The patient has a documented limited range of motion on physical examination.; There is no documented findings of severe pain on motion.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; There are no documented findings of crepitus.; There are no documented findings of swelling.; The ordering physician is not an orthopedist.; Xray shows mild degenerative changes; The patient is NOT experiencing joint locking or instability.; The patient does not have a documented limited range of motion on physical examination.; There is no documented findings of severe pain on motion.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.;

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; Decreased ROM xray

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; decreased ROM, empty can positive, can not sleep on that side due to pain, r/o rotator cuff tear

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; Left shoulder pain 2/2 to fall, xray neg, Active Range of Motion Left: pain w/ abduction over 90,limited motion and previous injuries

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; MD suspects rotator cuff tear.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; new to mdo; chronic pain w/r shoulder; difficulty picking up things; pain radiates down the right arm into hand

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; pain with active and passive abduction at 110-120 degrees, tenderness, palpation, drop arm with pain,

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; patient had injury about a week ago

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; patient has had prior surgery before on her rotator cuff and patient recently fell causing the pain in her shoulder

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; Pt complaining of left shoulder pain with decreased ROM, numbness and tingling.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; Pt complains of pain, and weakness, increased, naproxen and Ibuprofen, limited range of motion, x-ray on 5/26/16

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; Pt has been referred to orthopedic surgeon, unable to lift his arm and is suspecting a torn rotator cuff

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; Pt has had chronic continued shoulder pain following shoulder pain. Feel this could be due to implant irritation or possible AC joint arthritis. His last scheduled MRI was in 2014

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; pt just started medication, pain has gotten worse recently

The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The plain films were normal.; It is not known if the patient is experiencing joint locking or instability.; The patient has a documented limited range of motion on physical examination.

The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The plain films were normal.; The patient is experiencing joint locking or instability.

The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The plain films were normal.; The patient is NOT experiencing joint locking or instability.; The patient has a documented limited range of motion on physical examination.

The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The plain films were not normal.

The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The results of the plain films is not known.; The patient is experiencing joint locking or instability.

The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has not had recent plain films of the shoulder.; office visit on 5/18/16:Pt presents with complaints of persistent right shoulder pain. It has been bothering him for several years but has been stable. Yesterday he leaned on something with his right arm and felt/heard a loud pop in his right shoulder and

The requested study is a Shoulder MRI.; Study being ordered for post-operative evaluation.; The ordering physician is not an orthopedist.; There are no documented physical or laboratory findings of a joint infection.; There are no documented physical or plain film findings of delayed or failed healing.; It is not known if there are physical or plain film findings of prosthetic device dislocation.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;

The requested study is a Shoulder MRI.; Study being ordered for post-operative evaluation.; The ordering physician is not an orthopedist.; There are no documented physical or laboratory findings of a joint infection.; There are no documented physical or plain film findings of delayed or failed healing.; There are no documented physical or plain film findings of prosthetic device dislocation.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;

The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation; This study is being ordered prior to arthroscopic surgery.; PATIENT HAS A POSSIBLE RIGHT ROTATOR CUFF TEAR

The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation; This study is being ordered prior to arthroscopic surgery.; PATIENT HAS PROBABLE RIGHT ROTATOR CUFF TEAR.

The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation; This study is being ordered prior to arthroscopic surgery.; Rule out rotator cuff tear

The requested study is a Shoulder MRI.; Study being ordered for suspicious mass/tumor/metastasis.; The patient has had recent plain films of the shoulder.; The plain films were not normal.

The requested study is a Shoulder MRI.; Study being ordered for suspicious mass/tumor/metastasis.; There are no physical findings (palpable mass) of a suspicious mass or known primary site of cancer.; The patient has not had a recent bone scan.; The patient has had recent plain films of the shoulder.; The plain films were normal.; ; The patient has not had a recent CT of the shoulder.

The requested study is a Shoulder MRI.; Study being ordered for suspicious mass/tumor/metastasis.; There are physical findings (palpable mass) of a suspicious mass or known primary site of cancer.; The patient has not had a recent bone scan.; The patient has had recent plain films of the shoulder.; The plain films were normal.; The patient has not had a recent CT of the shoulder.

The requested study is a Shoulder MRI.; Study being ordered for suspicious mass/tumor/metastasis.; There are physical findings (palpable mass) of a suspicious mass or known primary site of cancer.; The patient has not had a recent bone scan.; The patient has not had recent plain films of the shoulder.; The patient has not had a recent CT of the shoulder.

The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient received joint injection(s).

The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient received joint injection(s).

The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient received joint injection(s).

The requested study is a Shoulder MRI.; The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The patient has had recent plain films of the shoulder.; The plain films were not normal.; The plain films were not normal.

The requested study is a Shoulder MRI.; This study being ordered for suspected aseptic necrosis.; The ordering physician is not an orthopedist or infectious disease specialist.; The patient has had recent plain films of the shoulder.; The plain films were normal.; /u r shoulder pain. f/u bilateral hand numb in median nerve distribution bilaterally. pain is back worse than what was. was trying to catch trash can and hurt worse. therapy was helping. got camper out of deer camp and hurt it. still with some loss of rom

The requested study is a Shoulder MRI.; This study being ordered for suspected aseptic necrosis.; The ordering physician is not an orthopedist or infectious disease specialist.; The patient has had recent plain films of the shoulder.; The plain films were normal.; Patient has limited ROM and increasing pain in (L) shoulder. He has been running a fever for 4 days. X-rays are normal. Conservative measures and medication have been ineffective in managing pain

The requested study is a Shoulder MRI.; This study being ordered for suspected aseptic necrosis.; The ordering physician is not an orthopedist or infectious disease specialist.; The patient has had recent plain films of the shoulder.; The plain films were normal.; Pt states that he injured his shoulder about a month ago at work. He works installing fire sprinklers and has to lift and carry a lot of heavy objects and works with his hands raised above his head most of the time

The requested study is a Shoulder MRI.; This study being ordered for suspected aseptic necrosis.; The ordering physician is not an orthopedist or infectious disease specialist.; The patient has had recent plain films of the shoulder.; The plain films were normal.; worsening shoulder pain, decreased range of motion, failed PT and NSAIDs

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has not experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has not experienced pain for greater than six weeks.; The patient has not been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has not experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has not been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has not experienced pain for greater than six weeks.; The patient has not been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has not experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has not been treated with anti-inflammatory medication in conjunction with this complaint.; This study is being ordered by the operating surgeon for pre-operative planning.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; There has not been any treatment or conservative therapy.; pain, swelling, inflammation

; This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is not a history of lower extremity joint or long bone trauma or injury.

; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ;

patient has completed 6 weeks pt, anti inflammatories and has had an abnormal xray; This study is being ordered for a neurological disorder.; 01/20/2016; There has been treatment or conservative therapy.; weakness and pain; 6 weeks of PT, anti inflammatories and pain medicine, xray that was abnormal

pt has lipoma on right thigh. need CT to assess if it is growing and pushing on nerves.; This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is not a history of lower extremity joint or long bone trauma or injury.

This is a request for a foot CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.

This is a request for a foot CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.

This is a request for a foot CT.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has an abnormal plain film study of the foot other than arthritis.; The patient has a documented limitation of their range of motion.

This is a request for a foot CT.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.

This is a request for a foot CT.; The patient has not used a cane or crutches for greater than four weeks.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient has an abnormal plain film study of the foot other than arthritis.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion.

This is a request for a hip CT.; This study is not being ordered in conjunction with a pelvic CT.; There is not a suspected infection of the hip.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient has a documented limitation of their range of motion.

This is a request for a hip CT.; This study is not being ordered in conjunction with a pelvic CT.; There is not a suspected infection of the hip.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient had an abnormal plain film study of the hip other than arthritis.; The patient has a documented limitation of their range of motion.

This is a request for a hip CT.; This study is not being ordered in conjunction with a pelvic CT.; There is not a suspected infection of the hip.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass adjacent to or near the hip.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient does not have a documented limitation of their range of motion.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.

This is a request for a hip CT.; This study is not being ordered in conjunction with a pelvic CT.; There is not a suspected infection of the hip.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass adjacent to or near the hip.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient does not have a documented limitation of their range of motion.; The patient has not been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.

This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is a history of lower extremity joint or long bone trauma or injury.

This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is suspicion of lower extremity bone or joint infection.

This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of a lower extremity neoplasm, tumor or metastasis.

This is a request for an ankle CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.

This is a request for an ankle CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.

This is a request for an ankle CT.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; The patient does not have an abnormal plain film study of the ankle other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; There is not a suspected tarsal coalition.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.

x-rays done at Urgent care date of injury. suggest CT to rule out fracture of left femoral neck; This study is being ordered for trauma or injury.; 5/1/16; There has not been any treatment or conservative therapy.; pain in left hip and into thigh Unknown; This study is being ordered for Vascular Disease.; 6/23/2016; There has been treatment or conservative therapy.; Bilateral extremity pain and swelling, low blood flow to ankles and feet; Conservative therapy  
Yes, this is a request for CT Angiography of the lower extremity.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; There is no symptom of locking,Instability, Swelling,Redness,Limited range of motion or pain.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; It is not known if patient has completed and failed a course of conservative treatment.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; no relief after home exercise 6 weeks; The patient received oral analgesics.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; It is not known if there is a suspected meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; It is not known if there is a suspicion of fracture not adequately determined by x-ray.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has not directed conservative treatment for the past 6 weeks.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an Ankle MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The study is requested for ankle pain.; There is a suspicion of tendon or ligament injury.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 8 months ago; There has been treatment or conservative therapy.; weakness, buckling knees, unstable, pain,; chiropractic  
&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/4/2016; It is not known if there has been any treatment or conservative therapy.; back and hip pain

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 years ago; There has been treatment or conservative therapy.; The patient has knee pain & hard time walking & knees are buckling & has swelling to the knees.; patient is on medication & has x-rays & exercise

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; chronic for years; There has been treatment or conservative therapy.; chronic back pain, numbness, tingling throughout back, knee pain behind knees bilateral.; Physical therapy 8 wks

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; 30 years ago; There has been treatment or conservative therapy.; swelling of both knees, pain in both knees, joint pain, stiffness,; in military when happened, they don't have those records, per patient, medication and home exercise

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; 6/7/2016; There has been treatment or conservative therapy.; left and rt knee pai, severe decreased ROM, pain worse when standing, and walking. HX of tear on rt knee. Had Osteoarthritis in both knees. Using a knew brace. Neurological disorder and not a trauma.; X rays were done, recommended mri to rule out for meniscus tear.

. PATIENT SEEN IN PROVIDER OFFICE ON 06/02/2016 FOR COMPLAINT OF PAIN AND SWELLING IN BILATERAL ANKLES AND FOOT DUE TO INJURY, BOTH ANKLES SWOLLEN, RT ANKLE SPRAIN ONE YEAR AGO AND INJURED AGAIN RECENTLY WITH ONSET OFSOME FOOT DROP AND DRAGGING WITH GAIT; This study is being ordered for trauma or injury.; MRI REQUESED DUE TO DIAGNOSIS OF INJURY, FOOT DROP, AND PAIN SWELLING; It is not known if there has been any treatment or conservative therapy.; PAIN, SWELLING, ONSET OF FOOT DROP AND DRAGGING FOOT WITH AMBULATION, INCREASE LAXITY ANKLE

; This is a request for a foot MRI.; The study is being ordered forfoot pain.; The study is being ordered for acute pain.

; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; It is not known if patient has completed and failed a course of conservative treatment.; No, the member do not experience a painful popping, snapping, or giving away of the knee.

; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.; Yes, the member experience a painful popping, snapping, or giving away of the knee.

; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; There is conservative treatment other than physical Therapy, physician directed course of non-steroidal medications, Immobilization or Physical directed exercise.; No, the member do not experience a painful popping, snapping, or giving away of the knee.

; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ;

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3 months ago-January 1, 2016; There has been treatment or conservative therapy.; Swelling, severe pain, instability; Icy hot, ibuprofen, ice/heat, tylenol 4

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Elbow- 1mo ago; Knee-mos ago; There has been treatment or conservative therapy.; Elbow pain x 1mo sharp and severe no improvement with steroids and PT; swelling with joint effusion; Knee pain; abnormal gait; tenderness; moderated degen changes on xray; Anti-inflammatory, Cortisone, Pain Meds and PT

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient has mass on left lower leg and lower extremity pain to touch or palpation below tibial tuberosity just left of the tibia for 3 months. Reports pain 8/10 to touch and 10/10 to palpation. X-ray indicates a prominent soft tissue along the distal ante; It is not known if there has been any treatment or conservative therapy.; Left leg mass and lower extremity pain.  
Broken tibia shown on xray; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has not directed conservative treatment for the past 6 weeks.

chronic knee pain/limited range of motion; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.

his Knee x-ray shows middle compartment syndrome. I do not see soft tissue swelling. pending official x-ray report. &#x0D; failed aspiration of synovial fluid. He got Demerol and Phenergan shot for pain. Rx for hydrocodone/APAP 10/325mg. &#x0D; I will request for; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

ice and heat on her leg; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; There is no conservative treatment of Physical Therapy, physician directed course of non-steroidal medications, Immobilization or Physical directed exercise.; Yes, the member experience a painful popping, snapping, or giving away of the knee.

Joint instability limping swelling; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; 6 weeks failed trx; The patient received oral analgesics.

left foot pain; This is a request for a foot MRI.; The study is being ordered for foot pain.; The study is being ordered for acute pain.

Left medial knee pain (M25.562), Worsening.&#x0D; MRI knee.&#x0D; Today's instructions / counseling include(s) take medications as directed, take medications as directed, RICE and RICE.&#x0D; Low back pain of over 3 months duration (M54.5), Worsening.&#x0D; counseled--try me; This study is being ordered for Inflammatory/ Infectious Disease.; ; There has been treatment or conservative therapy.; knee pain &#x0D; Onset: 3 years ago. Location: left knee. The pain is aggravated by walking and standing. Associated symptoms include joint tenderness, limping, popping, weakness and grinding. Pertinent negatives include numbness, tingling in the arms and t; Patient has been seen by chiropractor,&amp; at home physical therapy

Multiple level sclerosis of the posterior elements. Patient has history of pain and instability of the right knee that makes me concerned of ligamentous or internal derangement of the knee. The patient also complains of pain in the lumbar spine X-ray show; This study is being ordered for trauma or injury.; april 2016; There has been treatment or conservative therapy.; persistent pain and instability in the right knee. And pain in the lumbar spine; medication and steroid injection

none; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

none; This study is being ordered for Inflammatory/ Infectious Disease.; 2/26/2016; There has been treatment or conservative therapy.; Knee pain to both knees. Inflammation to both knees; Steroid injections done to both knees. Meloxicam and Ibuprophen over the counter

Pain in the leg, mass in the leg; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1-2 MONTHS AGO; There has not been any treatment or conservative therapy.; Pain, mass PAIN; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has not directed conservative treatment for the past 6 weeks.

pt c/o left knee pain; intensity worse with exercise. pt denies any trauma, except he might have injured knee during football season.; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.; It is not known if the member experience a painful popping, snapping, or giving away of the knee.

Pt had a prev l lateral meniscus tear and had surgery in 2009; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

Pt had traumatic knee injury to right knee 24 hours ago with an audible pop. The injury resulted in knee pain, swelling, locking, and popping.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

Pt has decreased ROM, swelling, and extreme pain in Lt knee.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

pt rates intensity 8x10. current medications are flexeril, tylenol #3, and mobic.; This study is being ordered for trauma or injury.; lower back -date unknown; right knee -5/15-5/16; There has been treatment or conservative therapy.; lower back pain with tingling and numbness radiating to both lower extremities, more to the right one. right knee pain with swelling, more when ambulating.; pt underwent physical therapy and it made pain worse

R/O MMT; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 05/25/2016; There has been treatment or conservative therapy.; Knee pain bilateral swelling; Xrays

STARTED EXPERIENCING LEFT KNEE PAIN A WEEK AGO. NO INJURY OCCURRED. HAVING INCREASED PAIN WITH WALKING, UNSTEADY GAIT, SWELLING.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is not from a recent injury, old injury, chronic pain or a mass.

tenderness on right knee physical exam, positive mcmurrays and lockmans; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; unknown, but knows patient has not improved; Tylenol with cendene, cannot take any inceds; The patient received medication other than joint injections(s) or oral analgesics.

This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.

This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.

This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has used a cane or crutches for greater than four weeks.; The patient does not have a documented limitation of their range of motion.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has an abnormal plain film study of the foot other than arthritis.; The patient does not have a documented limitation of their range of motion.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is for pre-operative planning.; The patient has a documented limitation of their range of motion.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient has a documented limitation of their range of motion.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient has an abnormal plain film study of the foot other than arthritis.; The patient has a documented limitation of their range of motion.

This is a request for a Knee MRI.; It is not known if the ordering physician is an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; Instability

This is a request for a Knee MRI.; No, the patient did not have a recent ultrasound of the knee.; The patient has not had a recent bone scan.; The plain films were normal.; There are documented physical or laboratory findings of a joint infection.; ; Known or Suspected Joint Infection

This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Non-acute Chronic Pain; Instability

This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Non-acute Chronic Pain; Locking

This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Non-acute Chronic Pain; Swelling greater than 3 days

This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Suspected meniscus, tendon, or ligament injury

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Instability

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Limited range of motion

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Locking

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Swelling greater than 3 days

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Instability; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Limited range of motion; It is not known if the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Limited range of motion; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Locking; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Swelling greater than 3 days; It is not known if the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Swelling greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Instability; It is not known if the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Instability; No, the member do not experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Instability; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; No, the member do not experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Locking; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Swelling greater than 3 days; It is not known if the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Swelling greater than 3 days; No, the member do not experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Swelling greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Instability

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Limited range of motion

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Locking

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Swelling greater than 3 days

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There are documented physical or laboratory findings of a joint infection.; Post-operative Evaluation

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; Instability

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; Limited range of motion

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; Locking

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; Swelling greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; It is not known if the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; No, the member do not experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; Pain greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; &lt;Additional Clinical Information&gt;; Suspicious Mass or Suspected Tumor/ Metastasis

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; Condrocalcinosi bone tumor tibia; Suspicious Mass or Suspected Tumor/ Metastasis

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; Patient has a cyst in the back of his left knee needs to be further evaluated; Suspicious Mass or Suspected Tumor/ Metastasis

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; Pain greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; Pain greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physical Therapy

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physical Therapy

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications

This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications

This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications

This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed exercise program

This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications; No, the member do not experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications; No, the member do not experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The study is not requested for knee pain.; The study is for a mass, tumor or cancer.; The diagnosis of Mass, Tumor, or Cancer has been established.; The study is requested for staging.

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a known mass.; The diagnosis of Mass, Tumor, or Cancer has been established.; The study is requested for follow-up.; The study is not requested to detect residual cancer after a course of treatment has been completed?; The patient is presenting with unresolved or new symptoms

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is scheduled in the next 4 weeks.

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient received joint injection(s).

This is a request for a Knee MRI.; This study is being ordered prior to arthroscopic surgery.; The ordering physician is not an orthopedist.; Pre-operative Evaluation; Locking

This is a request for a Knee MRI.; This study is not being ordered prior to arthroscopic surgery.; "This study is not being ordered prior to a planned or scheduled open surgery (joint replacement, etc.)."; The ordering physician is not an orthopedist.; Pre-operative Evaluation; Locking

This is a request for a lower extremity MRI.; There is a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.

This is a request for a lower extremity MRI.; There is a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is taking antibiotics.

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is a pre-operative study for planned surgery.

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.

This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.

This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a suspected tarsal coalition.

This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.

This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; The patient does not have an abnormal plain film study of the ankle other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; There is not a suspected tarsal coalition.; The patient has been treated with and failed a course of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.

This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; The patient does not have an abnormal plain film study of the ankle other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; There is not a suspected tarsal coalition.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.

This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is a suspected tarsal coalition.

This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.

This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a history of new onset of severe pain in the ankle within the last two weeks.; The patient does not have an abnormal plain film study of the ankle other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; There is not a suspected tarsal coalition.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion.

This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a history of new onset of severe pain in the ankle within the last two weeks.; The patient does not have an abnormal plain film study of the ankle other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; There is not a suspected tarsal coalition.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient has a documented limitation of their range of motion.; This study is being ordered by the operating surgeon for pre-operative planning.

This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a history of new onset of severe pain in the ankle within the last two weeks.; The patient does not have an abnormal plain film study of the ankle other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; There is not a suspected tarsal coalition.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient has a documented limitation of their range of motion.; This study is not being ordered by an operating surgeon for pre-operative planning.

To determine the cause of patient's pain so appropriate treatment can be started.; This study is being ordered for trauma or injury.; June 2, 2016; There has been treatment or conservative therapy.; Patient states she cannot use right shoulder without pain shooting into her neck. Patient states she feels like she has 'pins and needles' in her right foot. Patient describes pain as 'excruciating'; Patient prescribed hydrocodone for pain management. Patient had an injection from orthopedic MD (Dr. Richardson) which patient stated helped for a few days but then wore off.

Xray showed no fracture foot/ankle. Patient has had pain for four months now, not getting better.; This study is being ordered for trauma or injury.; 03/01/2016; There has been treatment or conservative therapy.; Swelling, Weakness, Pain; Ice-elevate foot-NSAIDS

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Feb 2016; There has not been any treatment or conservative therapy.; Pt has is having pain in the hip and thigh that radiates down to the left leg, tender, difficulty ambulating

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; It is not known if there has been any treatment or conservative therapy.;

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown clinicals faxed; It is not known if there has been any treatment or conservative therapy.; chronic back pain, pain in right hip

Pain has increased in severity in the past 2 m. Patient was seen in Dec with x-rays showing arthritis of both hips. Physician has high concern for avascular necrosis. On today's exam pain on weight bearing and decreased range of motion on exam; This study is being ordered for Vascular Disease.; Pain increasing in nature - x-rays in December showed arthritis - pain is worsening causing decreased range of motion on exam and painful weight bearing. High concern for avascular necrosis - pt needs MRI bil hips to evaluate for avascular necrosis; There has been treatment or conservative therapy.; Decreased weight bearing, painful range of motion on exam; In December given home exercises and anti-inflammatories with IM inj and Po steroids

This is a requests for a hip MRI.; The diagnosis of Mass, Tumor, or Cancer has not been established.; The patient has had recent plain films, bone scan or ultrasound of the knee.; The imaging studies were abnormal.; The hip pain is due to a mass.; The request is for hip pain.

This is a requests for a hip MRI.; The member has failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.

This is a requests for a hip MRI.; The member has failed a 4 week course of conservative management in the past 3 months.; The hip pain is due to an old injury.; The request is for hip pain.

This is a requests for a hip MRI.; There is a suspicion of fracture not adequately determined by x-ray.; It is not known if there is a suspicion of tendon or ligament injury.; The hip pain is due to a recent injury.; The request is for hip pain.

This is a requests for a hip MRI.; There is a suspicion of fracture not adequately determined by x-ray.; Tendon or ligament injury is not suspected.; The hip pain is due to a recent injury.; The request is for hip pain.

This is a requests for a hip MRI.; This study is being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient had an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steriod therapy (Prednisone or Cortisone).; The patient had an abnormal plain film study of the hip other than arthritis.; The patient has used a cane or crutches for greater than four weeks.; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has used a cane or crutches for greater than four weeks.; The patient does not have a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steriod therapy (Prednisone or Cortisone).

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is receiving long-term steriod therapy (Prednisone or Cortisone).

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is a mass near the hip.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is for pre-operative planning.; The patient does not have a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient had an abnormal plain film study of the hip other than arthritis.; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient had an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is for pre-operative planning.; The patient does not have a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steriod therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.

UNKNOWN; This study is being ordered for a neurological disorder.; A COUPLE OF MONTHS AGO; There has been treatment or conservative therapy.; RIGH LEG PAIN, RIGHT FOOT NUMBNESS, LOW BACK PAIN; X-RAYS AND MEDICATIONS

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; No, there is not an abdominal and pelvic or retroperitoneal mass that has been confirmed.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; It is not known if this patient is experiencing hematuria.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria,

Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3YRS AGO; There has not been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 4-5-2016; There has not been any treatment or conservative therapy.; pain, and headaches

; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.

; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has not been any treatment or conservative therapy.;

3/8/2016 Ct show multiple abnormalities; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.;

2/23/2016; There has been treatment or conservative therapy.; Pain 10/10, UTI, Renal calculi; Pain medication

Abd swelling hx of Hepatitis elevated LFT's; This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is no evidence of organ enlargement on ultrasound, plain film, or IVP.

Abdominal mass : Patient has a fleshy abdominal mass approximately 5 cm x 3 cm on the lower inferior aspect of the right rib cage. Mass is confined to the fatty tissue just below the level of the skin, there is no involvement into the abdominal wall. Free; This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; No, this is not a request for follow up to a known tumor or abdominal cancer.; This study being ordered for a palpable, observed or imaged abdominal mass.

Abn weight loss family hx of ca change in bowel habits; This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is no evidence of organ enlargement on ultrasound, plain film, or IVP.

Abnormal US of abdomen showing 17 mm circumscribed hypoechoic lesion pancreatic head. Multiphasic; pancreatic mass protocol CT versus MR are recommended.; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.

Calcification of Spleen; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

Evaluate adrenal function after hypertension diagnosis; This is a request for an Abdomen CT.; This study is being ordered for a vascular disease.; The requested studies are not being ordered for known or suspected aneurysms, hematoma, or blood clot, thrombosis, or stenosis and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.; It is not known if there is evidence of vascular abnormality seen on plain film and/or Ultrasound/ Doppler.; There are no symptoms or findings to indicate the member has internal abdominal and or pelvic bleeding such as hematoma or hemorrhage.

Family history of cancer, personal history of lung nodule,make sure there is no underlying cancer causing his weight loss, especially since he smokes.Loss of appetite.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Lesion of right hepatic lobe; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

lesions in the liver noted as incidental finding on CT CHEST W/O CONTRAST; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; The patient has new lab results or other imaging studies including doppler or x-ray (plain film) findings.

Mrs. Gavin has elevated liver functions and ultrasound showed slight irregularity needing further evaluation with CT liver multiphasic.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis

none; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.

none; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis

none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 03/22/2016; There has not been any treatment or conservative therapy.; unknown

Patient with a history of thyroid CA now bloated increasingly r/o partial obstruction.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis pt complaining of abdominal pain for several weeks now.; This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is no evidence of organ enlargement on ultrasound, plain film, or IVP.

PT HAS WORSENING NAUSEA AND DIZZINESS AND UNEXPLAINED LEFT LOWER QUADRANT ABDOMINAL PAIN. PT HAS CHRONIC NAUSEA WITH OCCASSIONAL EMESIS. HAD ABDOMIAL ULTRASOUND DONE IN JULY 2015 WHICH REVEALED GALLSTONES WITHOUT ACUTE CHOLECYSTITIS.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

pt is having abdominal pain x 6 days with nausea and vomiting; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis  
r/o pulmonary embolus, Aneurysm, or liver adenopathy; This study is being ordered for Inflammatory/ Infectious Disease.; 2-3 months ago; There has not been any treatment or conservative therapy.; Dull pain in upper back, unable to sleep, shortness of breath on exertion.

R/O umbilical hernia; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

right abnormal pain for the past 3 months; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

Severe RLQ pain with some guarding and RUQ pain as well but neg murphy; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

swelling , pain,; This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

The patient has abdominal pain with fatigue. She has lost 7 pounds in the last three months. Routine lab work is normal.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis

This is a request for an Abdomen CT.; This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; It is not known if the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an Abdomen CT.; This study is being ordered as a pre-op or post op evaluation.; The requested study is for pre-operative evaluation.; The study is requested by a surgeon, specialist or PCP on behalf of a specialist who has seen the patient.

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is a request for initial staging of a known tumor other than prostate.; No, this is not a request for follow up to a known tumor or abdominal cancer.

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; Caller does not know if there is a known prostate cancer with a PSA greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; No, there has not been a recent abdominal CT scan.

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There are new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; No, there is not an abdominal and pelvic or retroperitoneal mass that has been confirmed.

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There is no known prostate cancer with a PSA greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; No, there has not been a recent abdominal CT scan.

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There is no known prostate cancer with a PSA greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; Yes, there has been a recent abdominal CT scan.; No, this is not a repeat of a CT of the abdomen within 6 weeks.

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; Yes, this is a request for follow up to a known tumor or abdominal cancer.

This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; There is a known or a strong suspicion of kidney or ureteral stones.

This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; This patient is experiencing hematuria.; The hematuria is newly diagnosed.

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Abscess.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; It is not known if the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are clinical findings or indications of Diabetic patient with gastroparesis.

This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are clinical findings or indications of Hematuria.

This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are clinical findings or indications of Lymphadenopathy.

This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are clinical findings or indications of unexplained weight loss of greater than 10% body weight in 1 month

This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.

This is a request for an Abdomen CT.; This study is being ordered for trauma.; This request is not for follow up to abdominal and/or pelvic trauma ordered by a specialist or PCP on behalf of a specialist who has seen the patient.; There is no recent trauma with physical findings or abnormal blood work indicating either peritonitis or abscess.; There are physical findings or lab results indicating an intra-abdominal bleed.

This is a request for an Abdomen CT.; This study is being ordered for trauma.; This request is not for follow up to abdominal and/or pelvic trauma ordered by a specialist or PCP on behalf of a specialist who has seen the patient.; There is recent trauma with physical findings or abnormal blood work indicating either peritonitis or abscess.

this is a three month follow up to a known mass, has 1.5 cm on right lobe of the liver , three follow up is recommend by radiologist, biopsy would be difficult; This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; No, there is not an abdominal and pelvic or retroperitoneal mass that has been confirmed.

Ultrasound shows a questionable small hernia containing fat.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis

Unknown; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.

unknown; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis

This is a request for CT Angiography of the Abdomen and Pelvis.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 04/04/2016; There has not been any treatment or conservative therapy.; type two diabetes,

unknown; This study is being ordered for Vascular Disease.; 12/1/2015; There has not been any treatment or conservative therapy.; Aneurysm they are monitoring it

Unknown; This study is being ordered for Vascular Disease.; 6/23/2016; There has been treatment or conservative therapy.; Bilateral extremity pain and swelling, low blood flow to ankles and feet; Conservative therapy

Yes, this is a request for CT Angiography of the abdomen.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; The reason for the study is renal calculi, kidney or ureteral stone.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The results of the urinalysis were abnormal.; The urinalysis was positive for protein.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; It is not known if the pain is acute or chronic.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; It is not know if this study is being requested for abdominal and/or pelvic pain.; It is not known if the study is requested for hematuria.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; It is not known if this is the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 04/24/2016; It is not known if there has been any treatment or conservative therapy.; Pt has nodule in chest area, chest wall pain and worse when stretching, Pt was in hospital,

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 6/14/16; There has not been any treatment or conservative therapy.; left lower quadrant pain, very tender to palpitations, shortness of breath, R/O kidney stone and evaluate possible pulmonary embolism

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 6/5/2016; It is not known if there has been any treatment or conservative therapy.; dizziness, light headiness, feels drunk

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; 5/7/2016; There has not been any treatment or conservative therapy.; Rib pain, chest pain, shortness of breath, ABD pain ; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

; This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; It is not known if the patient has a fever and elevated white blood cell count or abnormal amylase/lipase.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient does not have Crohn's Disease, Ulcerative Colitis or Diverticulitis.

; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.

; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; It is not known if this is the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.

; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.

; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.

; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were abnormal.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 05/12/16; There has not been any treatment or conservative therapy.; weight loss total is 9lbs. &#x0D; Chronic cough&#x0D; joints hurt worse since weight loss&#x0D; lower abdominal pain , &#x0D; diarrhea &#x0D; &#x0D; chest x-ray results were right costophrenic blunting/ fluid or lateral anterior chest inferior to heart with blunting noted

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Enter date of initial onset here - 10/14/15; It is not known if there has been any treatment or conservative therapy.; pt keep losing weight

42 yo female noted to have RLQ abdominal pain for 5 months. Please evaluate for chronic appy, colitis, inflammatory bowel dz, hernia, etc. Thanks! She has no uterus, has ovaries still; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has been completed.; The results of the contrast/barium x-ray were normal.; The patient did not have an endoscopy.

acute abd pain and LLQ pain with leukocytosis; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

acute periumbilical abdominal pain with nausea and vomiting, she has her appendix and gallbladder. She has a history of diverticulitis.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

CT to assess intra-abdominal status. Records will be faxed; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

diarrhea and abdominal pain for six weeks. needs ct to rule out diverticulitis; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were unknown.

Diarrhea nausea abd pain; This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.

Elevated LFT's; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

Experienced bloody stool Belly pain; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

follow up on ct done prior to being abnormal from accident in 2015; This study is being ordered for trauma or injury.; 2015; There has not been any treatment or conservative therapy.; headaches, abnormal ct of had, right hip pain,

FOLLOW UP TO CT FOR LAST YEAR; This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.

Follow up; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

headaches and RLQ abdominal pain; This study is being ordered for trauma or injury.; He has had this since injury in 2013; There has been treatment or conservative therapy.; persistent headaches and abdominal pain; Patient has been taking butalbital/apap/caffeine but this makes him feel weird. States it makes him feel dizzy and really agitated.

Hx of cancer, enlarged liver on palpation, r/o hepatitis; This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; It is not know if this study is being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.

In regard to the constipation, this has been a problem for several weeks. The stool is hard in consistency. The constipation has been accompanied by abdominal pain, vomiting and recently took laxative that caused diarrhea. saw some blood; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

MASS OF LEFT TESTICLE,SIZE OF AND ORANGE AND DIFFICULT TO PALPATE DISTINCTIVE FEATURES,ATROPHY RIGHT TESTICLE,FATIGUE,WEIGHT LOSS,FEVER; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

mbr has ultrasound 6/16/2016 mass seen surgurey 6/23/2016; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

Metastatic lesions, right upper pain, liver is enlarged and does have a history of hepatitis, abnormal check x ray; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

nausea/vomiting, weight loss, abdominal pain. does have guarding. weight loss. need to r/o appendicitis or diverticulitis; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.

NONE; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.

obease patient with bloody stools, abd pain, family hx of cancer, abnormal weight loss; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

Passing large blood clots; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.

PATIENT HAS A DIAGNOSIS OF RECTAL CANCER ALREADY. DOCTOR WANTS TO LOOK AT ABD/PEL AND CHEST.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

Patient has a personal history of lymphoma and breast cancer. She is in the process of changing oncologist. Her 6 month scans are due.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

Patient has been assessed in clinic, peritoneal signs, fever, significant abdominal in right lower quadrant; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

Patient has Left Lower Quadrant superficial tender nodule over the rectus abdominis muscle; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

Patient is having RUQ pain and rebound tenderness on physical exam. Patient having abnormal elevated pancreatic enzymes; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

patient presents with acute abdominal pain. provider wants to rule out kidney stone.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

patient states he has had this pain for 9 months. It is chronic. It is intermittent and worsens with movement. He complains of Hematuria several days ago. Urinalysis was negative for blood but positive for protein in urine.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for protein.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

Patient with flank pain and abdominal pain x 3 days, some microscopic hematuria; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has NOT been completed.; The patient did not have an endoscopy.

Patient with generalized abdominal pain and abnormal weight loss. Pt states has lost 20 pounds within 3 months and has diarrhea 4x per day. CBC and CMP labwork was essentially normal.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

poddible appendicitis; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.

possible kidney stones left flank pain; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.

PROVIDER REQUESTING CT SCAN TODAY FOR EVAL; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

pt came in for sharp pain in left side and blood in urine.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.

Pt had a normal pap smear in 2015. She came in with abd pain and subsequently had a KUB. A mass in the pelvic area was seen on KUB. While evaluating this further, we would like to take a look at the abdomen and make sure nothing else is going on such as d; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

pt has had chronic abdominal pain for 6 mo with no improvement; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

Pt has had pelvic ultrasound, normal. Pain in abdomen, upper right that seems to get worse when lying down. Mass in abdomen visible.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.

Pt has lost 44 pounds in a year. Pt has had egd/colonoscopy/sbft that are normal. Patient weighs 66 pounds and is 37 years old; This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient did NOT have an abnormal abdominal Ultrasound, CT or MR study.

Pt is dx with stomach cancer. He is having severe abd/ pelvis pain. Fear of changing status of his cx; This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.

Pth had an ABN Upper GI evaluation; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 04/20/2016; There has been treatment or conservative therapy.; Pt has c/o difficulty swelling, cough, muscle spasms, and belching; Pt was given medication for his stomach, and told to stop smoking  
r/o cancer; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

R/O KIDNEY STONES, POSITIVE BLOOD IN THE URINE, FLANK PAIN, TREATED FOR A BLADDER INFECTION, URINARY FREQUENCY AND URGENCY; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

R/O METASTATIC DISEASES, ELEVATED PSA; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09/10/2015; There has been treatment or conservative therapy.; LOSS OF APPETITE, WEIGHT LOSS; UROLOGY REFERRAL

Rebound tenderness in right abdomen and nausea; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

RLQ pain; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.

SEVERE PELVIC PAIN WITH POSITIVE CHANDELIER SIGN; X 4 DAYS CONSTANT AND WORSENING; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.

She is having low back pain, hematuria, urinary frequency, r/o kidney stone.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

small bowel obstruction; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were abnormal.

The patient is having acute diffuse abdominal pain with nausea. The patient also has a history of hernias in and around his abdomen.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.

The Pt has a history of HEP C, smoking, drug abuse, alcohol abuse. Pt has anemia.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were unknown.

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; The reason for the hematuria is not known.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; The reason for the study is renal calculi, kidney or ureteral stone.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were normal.

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an lipase lab test.; The results of the lab test were normal.

This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; It is not known if there is a strong suspicion of kidney or ureteral stones.; It is not known if this patient is experiencing hematuria.; Kidney/Ureteral stone; &lt;Enter Additional Clinical Information&gt;

This is a request for an abdomen-pelvis CT combination.; It is not known if there is a strong suspicion of kidney or ureteral stones.; This patient is experiencing hematuria.; Kidney/Ureteral stone

This is a request for an abdomen-pelvis CT combination.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is not known if there are new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; It is not known if this is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; &lt;Enter Additional Clinical Information&gt;

This is a request for an abdomen-pelvis CT combination.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; It is not known if this is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is a request for initial staging of a known tumor other than prostate.; Known Tumor, Cancer, Mass, or R/O metastases

This is a request for an abdomen-pelvis CT combination.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Diverticulitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.;

This is a request for an abdomen-pelvis CT combination.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; &lt;Enter Additional Clinical Information&gt;

This is a request for an abdomen-pelvis CT combination.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Persistant abdominal pain for grater than 1 year, U/S done 0 findings. Family History of Stomach cancer and ulcers.

This is a request for an abdomen-pelvis CT combination.; The hematuria is due to Renal Calculi/kidney/ ureteral stone.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.

This is a request for an abdomen-pelvis CT combination.; The hematuria is due to tumor or mass.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.

This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; The patient has a fever and elevated white blood cell count or abnormal amylase/lipase.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.

This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is not presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The last Abdomen/Pelvis CT was performed more than 10 months ago.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.

This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.

This is a request for an abdomen-pelvis CT combination.; The requested studies are being ordered for known or suspected aneurysms and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.; Vascular disease

This is a request for an abdomen-pelvis CT combination.; The requested study is for post-operative evaluation.; The requested study is a first follow up study for a post operative complication.; Pre-op or post op evaluation

This is a request for an abdomen-pelvis CT combination.; The requested study is for post-operative evaluation.; The requested study is not a first follow up study for a post operative complication.; Pre-op or post op evaluation;

This is a request for an abdomen-pelvis CT combination.; The requested study is for pre-operative evaluation.; The study is NOT requested by a surgeon, specialist or PCP on behalf of a specialist who has seen the patient.; The pre-op evaluation is for planned or possible ventral hernia repair ordered by a surgeon.; Pre-op or post op evaluation

This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; It is not known if the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Diabetic patient with gastroparesis.; Other

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Hematuria.; Other

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Lymphadenopathy.; Other

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of unexplained abdominal pain in patient over 75 years of age.; Other

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of unexplained weight loss of greater than 10% body weight in 1 month; Other

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Abscess.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Diverticulitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Inflammatory bowel disease.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Ulcerative Colitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; It is not known if there are findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; &lt;Enter Additional Clinical Information&gt;

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; It is not known if there are findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; change in bowel habits stool is yellow in color

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; HISTORY OF COLON CANCER, ABDOMINAL AND STOMACH PAIN, HASNT BEEN ABLE TO EAT, HISTORY OF ADENOCARCINOMA OF LARGE INTESTINE

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Inguinal hernia

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; LEFT LOWER QUADRANT PAIN WITH BYSURIA. R/O DIVERTICULITIS.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; left lower quadrant pain

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; LIVER DYSFUNCTION, NEW FINDING, ELEVATED LIVER ENZYMES

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Lower Left Quad Abd Pain, Constipation, Abd tenderness, X-ray shows dilatation of bowel loops due to gas. Pain is ongoing for 2 years, and getting worse.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; none

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; On examination patient has pain along the inguinal lying down into the groin on the right. By palpation he does not have any abdominal wall defect but he does have a small hernia at the inguinal ring.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; pain in R-side of abdomen, ER visit 5/17/16, liver enzymes elevated.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Pain, nausea and fever

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Patient has a knot in the URQ that hurts. She also has abdomen pain on both lower sides of lower abdomen radiating into upper abdomen and feels deep in abdomen. States dropped something and bent over to pick up and had sharp radiating pain for over a min

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Patient has an abdominal aorta aneurysm and this needs to be checked for growth.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Patient has an LP shunt and is having severe abdominal pain that is sharp and stabbing. Patient is having associated severe dizziness. History of intracranial hypertension and pseudo tumor

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; patient has chronic bowel issues, not relieved with antibiotics, provider requesting CT scan for further eval

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Patient has chronic constipation, seen in ER 06/28/2016, R/O impaction/obstruction

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; PATIENT HAS HAD DIARRHEA AND PAIN

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Patient has had LLQ pain for the past 24 hours. Describes the pain as sharp, piercing.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Patient has history of Hep C. Has Severe ab pain along with distention. Bloody stool and weight loss

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Patient has lower abdominal pain (mainly suprapubic). Fat pannus feels like a brick now, pain has worsened.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Patient has nausea for greater than 6 months, abdominal pain for 6 weeks, appetite change, fatigue, and sleep disturbance

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; patient presents for left upper quadrant pain with slight prominence. pain has been present for over two weeks.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; patients liver enzymes are elevated.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; please see attached progress note and ultrasound results

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; positive h pilor

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Pt been having lower abdomen pain for 10+ years

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Pt c/o having bilateral lower ABD pelvic pain. Pt was working out on Friday and heard a pop thought she had strained a muscles. Pt may have a hernia.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; pt complaining of high right side flank pain for several months worse at night when he rolls over

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Pt had chronic constipation, has tenderness, palpitations and guarding

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; pt has abdominal pain, vomiting and diarrhea. pt has US gallbladder and it showed gallbladder polyp

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Pt has an appointment with a urologist but it is not until 7-26-16. But due to the limited urologist in our area, patient's appointment is several months away and pt continues to complain with left flank pain.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Pt has been having abdominal pain for 1 month, symptoms include diarrhea, mid cycle bleeding and acid reflux symptoms, had Ultrasound that shows left ovarian cyst.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; pt has elevated liver enzymes and abnormal US

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Pt has incisional hernia after total pancreatectomy is enlarging and causing significant discomfort. History of hernia, diastasis, recti associated with the hernia.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Pt presented with dizziness & lightheadedness x 1 month, elevated creatinine (2.0), and elevated liver enzymes (ALT 71 AST 59).

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; R/o cancer; Swelling from mid thigh to foot; Jaundice; Anemia; Elevated liver enzymes

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; r/o diverticulitis

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Ref case tracking # 055527676; Patient having continued, sharp pain and swelling in inguinal groin area. Pain increases with movement, bending, sitting and is only relieved if laying down flat.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; reoccurring nausea, vomiting gall bladder dyskinesia

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; right lower abdominal pain , rebound tenderness right lower quadrant - r/o appendicitis

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; right lower quadrant pain, nausea. blockage.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; right sided abdominal pain; Right lower quadrant pain

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; RUQ abdominal pain; onset 1-4wks ago; pain 8/10; constipation; dry heaving

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; see icd 10 codes is what was advised.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; SEVERE (R) UPPER QUADRANT PAIN-UMBILICAL HERNIA- ORDERING CT TO LOOK FOR INTRA-ABDOMINAL PATHOLOGY.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Status post umbilical hernia repair with mesh added in 2015. Pt cont to have peri-umbilical pain. Dr. Yelvington concerned about infected mesh. Pt has had a abdominal ultrasound and abnormal small bowel follow through

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; unknown

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; UPPER QUADRIANT PAIN RIGHT; LIVER BIOPSY ; UPPER QUAD WEAKNESS

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; urology request due to hematuria past hx of cancer

This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone

This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement

This is a request for an abdomen-pelvis CT combination.; There is neither a known nor a strong suspicion of kidney or ureteral stones.; This patient is experiencing hematuria.; Kidney/Ureteral stone

This is a request for an abdomen-pelvis CT combination.; There is no evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement; &lt;Enter Additional clinical information &gt;

This is a request for an abdomen-pelvis CT combination.; There is no evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement; chronic pain and epigastric discomfort

This is a request for an abdomen-pelvis CT combination.; There is no evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement; lower abdomen is swelling and enlarged, pain, nausea, patient is complaining and keep coming back to doctor ,

This is a request for an abdomen-pelvis CT combination.; There is no evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement; mass is bulging above belly button, umbilical enlarges on line down and is now in sitting position.

This is a request for an abdomen-pelvis CT combination.; There is no evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement; Possible infection, organ enlargement noted on Physical exam.

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; It is not known if there are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; &lt;Enter Additional Clinical Information&gt;

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; It is not known if there is a suspicion of an adrenal mass.; It is not known if this is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; &lt;Enter Additional Clinical Information&gt;

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; It is not known if there is a suspicion of an adrenal mass.; This is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; It is not known if there is a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; PAIN ON RIGHT SIDE OF STOMACH AND A BIG KNOT THERE

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is a suspicion of an adrenal mass.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor;

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; Hernia

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; pain going into sacral in back, right hernia in past, hypertension,

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; Palpable mass with history of breast cancer

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; Pt is having abdominal pain, dysuria, urgency since before 4/20-2016. She was treated with antibiotic and she returned in 2 weeks with c/o worsening abdominal pain.

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; suspicious mass seen on CT.

This is a request for an abdomen-pelvis CT combination.; This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Hematuria.; There are clinical findings or indications of Hematuria.; Other; Other

This is a request for an abdomen-pelvis CT combination.; This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone; Kidney/Ureteral stone

This is a request for an abdomen-pelvis CT combination.; This is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis and the patient is undergoing active treatment.; Known Tumor, Cancer, Mass, or R/O metastases

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; It is not known if this is a request for initial staging of a known tumor other than prostate.; There has not been a recent abdominal and or pelvis CT scan.; Caller does not know if there is a known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; yes, there is a palpable or observed abdominal mass.

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; It is not known if this is a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; No, there is not a palpable or observed abdominal mass.; &lt;Enter Additional Clinical Information&gt;

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is a request for initial staging of a known tumor other than prostate.; Known Tumor, Cancer, Mass, or R/O metastases

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There has not been a recent abdominal and or pelvis CT scan.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; yes, there is a palpable or observed abdominal mass.

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is an abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; No, there is not a palpable or observed abdominal mass.

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; It is not known if there are new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; It is not known if there is a palpable or observed abdominal mass.;

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; No, there is not a palpable or observed abdominal mass.

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; No, there is not a palpable or observed abdominal mass.;

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; No, there is not a palpable or observed abdominal mass.;

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; No, there is not a palpable or observed abdominal mass.; labs show elevated enzymes , hx of cancer

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; No, there is not a palpable or observed abdominal mass.; none

This is a request for an abdomen-pelvis CT combination.; This request is for follow up to abdominal and/or pelvic trauma ordered by a specialist or PCP on behalf of a specialist who has seen the patient.; Trauma

This is a request for an abdomen-pelvis CT combination.; This request is not for follow up to abdominal and/or pelvic trauma ordered by a specialist or PCP on behalf of a specialist who has seen the patient.; There is no recent trauma with physical findings or abnormal blood work indicating either peritonitis or abscess.; There are no physical findings or lab results indicating an intra-abdominal bleed.; Trauma; Pt fell in March. Happened to note an extremely tender spot along her lower anterior rib cage. This is very ttp. No bruising. Occ SOB. She did have CXR a few weeks ago that showed elevation of her hemi-diaphragm.

This is a request for an abdomen-pelvis CT combination.; This request is not for follow up to abdominal and/or pelvic trauma ordered by a specialist or PCP on behalf of a specialist who has seen the patient.; There is recent trauma with physical findings or abnormal blood work indicating either peritonitis or abscess.; Trauma

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was abnormal.; The ultrasound showed something other than Gall Stones, Kidney/Renal cyst, Aneurysm or a Pelvis Mass.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; It is unknown if a contrast/barium x-ray has been completed.; The patient had an endoscopy.; The endoscopy was normal.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were abnormal.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an lipase lab test.; The results of the lab test were abnormal.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

Trying to r/o umbilicord hernia; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.

Unknown; This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; It is not know if this study is being requested for abdominal and/or pelvic pain.; It is not known if the study is requested for hematuria.

Unknown; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; October of 2015. Patient has had weight loss and fatigue more than usual.; There has not been any treatment or conservative therapy.; unexplained weight loss, fatigue and anemia

Urinary frequency &#x0D; The patient reports pain in the low back. The patient describes the characteristics of the pain as achy. Patient reports no leakage. Associated symptoms include urinary frequency, incomplete emptying, pain on the left side, slow strea; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.

US previously done, provider now requesting CT for futher evaluation of patient; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

weight loss and abnormal signal of MRI of right upper lung; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 04/19/2016; There has not been any treatment or conservative therapy.; wt loss and abnormal x-ray and MRI

x-ray was abnormal; This study is being ordered for Inflammatory/ Infectious Disease.; 4-11-2016; There has been treatment or conservative therapy.; shortness of breathe, r lower quad pain, cough, orthopenia; chest x-ray, labs, inhaler

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A liver abnormality was found on a previous CT, MRI or Ultrasound.; It is unknown if there is suspicion of metastasis.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 5/16/2016; There has not been any treatment or conservative therapy.; Abdominal pain.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; mass was seen on 5/2/2016; There has not been any treatment or conservative therapy.; Chest pain and thoracic back pain.

; This request is for an Abdomen MRI.; This study is being ordered for organ enlargement.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A liver abnormality was found on a previous CT, MRI or Ultrasound.; There is NO suspicion of metastasis.

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient has had abdomen pain since February 3rd. She has also been diagnosed with IBS and epiploic appendagitis.; There has been treatment or conservative therapy.; persistent abdomen pain; Patient has tried Prilosec with no relief.

CT WAS NEGATIVE AND LABS WERE CRITICAL; This study is being ordered for Inflammatory/ Infectious Disease.; LABS WERE DONE TODAY. PATIENT NEEDS MRI IMMEDIATELY; There has not been any treatment or conservative therapy.; PATIENT HAS LIVER ENZYMES OF &#x0D; ALT 1 1069&#x0D; ALK PHOS 270&#x0D; AST 1 591

Enter answer here - or Type In UnknownMs. Smoke presents with a diagnosis of pheochromocytoma. This was diagnosed 5 years ago. The course has been progressively worsening. It is of moderate intensity. Aggravating factors include outside temp elevation.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Ms. Smoke presents with a diagnosis of pheochromocytoma. This was diagnosed 5 years ago. The course has been progressively worsening. It is of moderate intensity. This was diagnosed 5 years ago. The course has been progressively worsening. It is of moderate intensity. Aggravating factors include outs

nodule on the lung and suspected abdominal cyst; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

Patient has a nontoxic glandular goiter. E40.2. Family hx of cancer Z80.9. Had a lipoma of the back D17.1. (Gloria transferred me to a nurse, who wanted me to give her the patients dob and address, advised I could not give her that because if HIPPA. She ; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered. This request is for an Abdomen MRI.; This study is being ordered for hematuria.; The patient has painful hematuria.; The patient has not had an IVP.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;

This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist."; Has had an abnormal abdomen ct on 3/17/16, showing ascites. Pain, nausea, hx of pancreatitis, family hx of pancreatic cancer.

This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is not a gastroenterologist, urologist, or infectious disease specialist."; "There are not physical findings or abnormal blood work consistent with peritonitis, pancreatitis, or appendicitis."; "There are no active or clinical findings of Crohn's disease, ulcerative colitis, or diverticulitis."; "There is not radiographical or ultrasound findings consistent with abnormal fluid collection, abdominal abscess, or ascites."; patient is having ongoing abdominal pain and it is not getting better .

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is not presenting new symptoms.; The patient has had 3 or fewer follow-up abdomen MRIs.; This study is being ordered for follow-up.; It is not known if the patient is undergoing active treatment for cancer.; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon."; liver lesion; follow up from last scan in 12/2015

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is not presenting new symptoms.; The patient has had 3 or fewer follow-up abdomen MRIs.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon."; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;

This request is for an Abdomen MRI.; This study is being ordered for organ enlargement.; There is an ultrasound or plain film evidence of an abdominal organ enlargement.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study.";

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; HISTORY OF PRESENT ILLNESS: This is a 55-year-old white female who comes in for somewhat acute problem. She is also here for follow up on three chronic medical conditions. First, she had an MRI on her L-spine that was ordered by her orthopedic speciali

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Liver mass

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; LOBULATED HYPERDENSITY WITHIN THE LIVER MEASURING 3.6X2.7.1.9 CM&#x0D; INDETERMINATE MASS IN THE RIGHT LOBE OF THE LIVER POSSIBLE HEMANGIOMA FOLLOW UP MRI RECOMMENDED

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Patient had CT of abdomen and per Dr Jennings pt CT did show possible pancreatitis or possible nonspecific tumor. He suggested she get an MRI to find out for sure what it is

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Right upper quant mass between the liver and stomach could be an accessory hepatic lobe or enlarge lymph node liver MRI recommended 4 by 5 soft tissue mass

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; US done in Hopsital ER 05/06/2016 Shows mass on left lobe liver 5.1x3.3 cm

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; weight loss, abdominal pain,

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has not had an abdominal ultrasound, CT, or MR study.";

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has not had an abdominal ultrasound, CT, or MR study."; Patient had a CT Chest and the results showed a nodule on his liver that requires further evaluation.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; CT Chest finds a 1.9 cm nodule in the left adrenal gland with recommendation to follow up with CT or MRI adrenal mass protocol for further characterization.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Cyst on the pancreas.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; ultrasound liver identified lesion - radiologist recommends MRI abdomen for further evaluation

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; ultrasound showed undetermined mass. lesion has gotten slightly larger compared to 6 mm on ct 6/15. requesting MRI for further evaluation.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study."; Abnormal ultrasound

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study."; Patient had an ultrasound that showed possible liver mass CT was recommended. Patient had CT completed and it was inconclusive. MRI was recommended to further evaluate possible liver mass.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A liver abnormality was found on a previous CT, MRI or Ultrasound.; There is suspicion of metastasis.

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;

The doctor is checking to see if the patient has a Perforated sigmoid colon.; This patient has a medical problem that makes him/her unsuitable for conventional colonoscopy.; The member had colon screening studies completed prior to this request.

This is a request for a heart or cardiac MRI

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Pt suffers with chest pain and SOB.; Yes, there is Chronic Chest Pain.

This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; patient had a lexiscan myocardial perfusion study which came back abnormal for patients age. cardiologist recommends coronary ct angiogram for further evaluation

Yes, this is a request for CT Angiography of the abdominal arteries.  
; Limited or Follow up other than Sinus CT;

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for Breast MRI.; This study is being ordered for known breast lesions.; There are NOT benign lesions in the breast associated with an increased cancer risk.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.

; This is a request for Breast MRI.; This study is being ordered for known breast lesions.; There are NOT benign lesions in the breast associated with an increased cancer risk.

; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.

Abnormal mammogram and nipple drainage with blood; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.

breast cancer risk assessment is 23.9, abnormal mammogram; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.

high risk pathology n60.82; This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this is not a confirmed breast cancer.; No, this patient does not have axillary node adenocarcinoma.; No, there are no anatomic factors (deformity or extreme density) that make a simple mammogram impossible.

Patient has nipple discharge and a breast mass.; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.

This is a request for Breast MRI.; This study is being ordered as a screening examination following genetic testing for breast cancer.; Yes, the patient have a known mutation such as BRCA1, BRCA2, PTEN or TP53.

This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There is a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; Yes, this is a confirmed breast cancer.; Yes, the results of this MRI (size and shape of tumor) affect the patient's further management.

This is a request for Breast MRI.; This study is being ordered for a suspected implant rupture.; Yes, this study is being ordered to evaluate a suspected silicone implant rupture.

This is a request for Breast MRI.; This study is being ordered for known breast lesions.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this is not a confirmed breast cancer.; No, this patient does not have axillary node adenocarcinoma.; Yes, there are anatomic factors (deformity or extreme density) that make a simple mammogram impossible.; It is unknown if there are benign lesions in the breast associated with an increased cancer risk.

This is a request for Breast MRI.; This study is being ordered for known breast lesions.; There are benign lesions in the breast associated with an increased cancer risk.

This is a request for a Bone Density Study.; This patient has not had a bone mineral density study within the past 23 months.; This is a bone density study in a patient with clinical risk of osteoporosis or osteopenia.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Abnormal EKG, shortness of breathe, exertional chest pain, pain at top of back and breasts, wheezing, retaining fluid and dyspnea, exercise intolerance.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Chest pain off and on for last couple of months and shooting pain in ribs.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Chest pain; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Complaints of chest pain and shortness of breath. History of hypertension BP was 150/80 @ office; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

CP; The study is being ordered for a post myocardial infarction evaluation.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; The results of the previous nuclear cardiology study were not normal.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has had a nuclear cardiology study since having an MI.

CTA chest showed coronary artery Disease; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

CURRENT SMOKER AND HISTORY OF ASTHMA; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 4/2/16; There has not been any treatment or conservative therapy.; CHEST PAIN AND NUMBNESS IN NECK AND SHOULDERS, SHORTNESS OF BREATH

Doppler Study showed critical carotid stenosis. Considering the severity of this, Surgery is eminent in the very near future and further work up on his chest pain is needed to make sure he is stable enough for the surgery.; This study is being ordered for Vascular Disease.; presented to office 6/8/16 with lower extremity swelling, pain and weakness. Chest pain (pressure) on exertion. Carotid bruit on the left. Doppler study showed critical carotid stenosis.; There has not been any treatment or conservative therapy.; lower extremity swelling, pain, weakness and chest pain

EKG SHOWED A BUNDLE BRANCH BLOCK; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

EKG shows; Interpretation:; Sinus Rhythm; -Right atrial enlargement .; -Anteroseptal infarct -age undetermined .; -Anterolateral ST-elevation -nondiagnostic -consider injury .; ABNORMAL; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

elevated troponins. intermittent chest fullness with associated dyspnea; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

fire man this office does there physcals pt started stress test but was unable to finish due to techardia; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Known CAD bilateral knee surgery chronic back pain; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

New patient has palpitations, shortness of breath and tachycardia.; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

PATIENT DX W CHEST PAIN. PATIENT HAS HTN AND NEUROPATHY. PCP ORDERING STRESS TEST FOR FURTHER EVAL.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

Patient is a 63 y.o. male with left upper lobe lung mass measuring 3.5 x 2.4 x 3.7 cm. Biopsy proven non small cell cancer, squamous cell. To complete his staging, he is to have a PET/CT on 3/17/2016. He needs to have that and if his cancer is localize; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient will need myocardial perfusion with pharmacologic stress test. Patient isn't able to walk on the treadmill due to shortness of breath. Diagnosis code R07.9 chest pain.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Pt has Thoracic aorta aneurysm; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 05/10/2016; There has been treatment or conservative therapy.; Pt has sinus drainage, pain and sinus pressure. T-spine chronic upper back pain. MPI chest pain with hx of hypertension and cardiac hx; SINUSITIS prescribed ABX and lab work

Shortness of breath &#x0D; Syncope Episodes; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

shortness of breath when walking;; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has diabetes.

The patient is diabetic.; The patient is less than 45 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The patient is not diabetic.; The patient is less than 45 years old.; The patient has had a recent exercise treadmill test that was positive.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.

The study is being ordered for a post myocardial infarction evaluation.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had a nuclear cardiology study since having an MI.

The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient had a previous myocardial infarction.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient's diagnosis was established by a previous stress echocardiogram, nuclear cardiology study, or stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; It is not known if the patient has had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; It is not known if the patient has had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is diabetic.; It is not known if the patient has had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.; The patient has a physical limitation to exercise.

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The member does not have known or suspected coronary artery disease

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for evaluation of the heart prior to non cardiac surgery.

to consider cardiac cause; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

with treadmill.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on an imaging study.; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lymphoma or Myeloma.; 1 PET Scans has already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for Brain Cancer/Tumor or Mass.

This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lung Cancer.

Unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on an imaging study.; This study is being ordered to establish a cancer diagnosis.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on an imaging study.; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lymphoma or Myeloma.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Breast Cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lung Cancer.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient does not have a history of a recent heart attack or hypertensive heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has high blood pressure

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; There has been a change in clinical status since the last echocardiogram.; This is not for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Known or suspected pulmonary hypertension

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Shortness of breath is not related to any of the listed indications.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; This study is NOT being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This request is NOT for initial evaluation of a murmur.; This is NOT a request for follow up of a known murmur.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has abnormal heart sounds

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is grade III (3) or greater.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an evaluation of new or changing symptoms of valve disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an initial evaluation of suspected valve disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for evaluation of change of clinical status.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; There has been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; This is for the initial evaluation of heart failure.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient does not have a history of a recent heart attack or hypertensive heart disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; There is a change in the patient's cardiac symptoms.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Pulmonary Hypertension.

This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; The member does not have known or suspected coronary artery disease

This is a request for a Stress Echocardiogram.; The patient has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The member has known or suspected coronary artery disease.

This request is for a Low Dose CT for Lung Cancer Screening (S8032); This patient has NOT had a Low Dose CT for Lung Cancer Screening (S8032) in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; It is unknown if the patient is presenting with pulmonary signs or symptoms of lung cancer or if there are other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.

This request is for a Low Dose CT for Lung Cancer Screening (S8032); This patient has NOT had a Low Dose CT for Lung Cancer Screening (S8032) in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; It is unknown if the patient is presenting with pulmonary signs or symptoms of lung cancer or if there are other diagnostic test suggestive of lung cancer.; The patient quit smoking less than 15 years ago.

This request is for a Low Dose CT for Lung Cancer Screening (S8032); This patient has NOT had a Low Dose CT for Lung Cancer Screening (S8032) in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.

This request is for a Low Dose CT for Lung Cancer Screening (S8032); This patient has NOT had a Low Dose CT for Lung Cancer Screening (S8032) in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient quit smoking less than 15 years ago.

In remission leukemia -Just go out of hospital- spleen inflamed - HX pancreatic - lipase elevated- Tenderness L lower QUAD; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

pt. R10.11 and R10.13; see description; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; The patient requires evaluation for a congenital defect of the pancreatic or biliary tract.

This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient has an altered biliary tract anatomy that precludes ERCP.

This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has undergone unsuccessful ERCP and requires further evaluation.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a brain/head CT.; It is unknown if the study is being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; None of the above; Mild amount of tenderness in bilateral paraspinal muscle regions around C2-C3. Patient has a rash over her left thenar eminence that is very dry and flaky and itchy and approximately 2" x 3" in diameter.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of paresthesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; None of the above; Pt's MRI of brain was normal. She continues to have severe headaches. She reports headaches begin at base of neck and radiate upwards. Xray of c spine showed degenerative changes. Will obtain MRI of c spine to see if there is stenosis or other problem ; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of paresthesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; None of the above; Tamara Charles is being treated for chronic migraines with Sumatriptan 6mg/0.5ml and the sumatriptan 100 mg tabs. She uses the tablets for acute migraine relief and follows up with the injectable if nausea results from a worsening headache with no more than; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of paresthesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; None of the above; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; &lt;Enter Additional Clinical Information&gt;

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; patient has neck pain and headaches

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; patient is having numbness/pain in neck.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; &lt;Enter Additional Clinical Information&gt;

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; MVA Friday4/22/2016, neck pain stiffness and tenderness and has neck surgery in past

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; pain

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Patient complains of weakness and fatigue and unable to sleep because of pain and tingling.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; patient has been diagnosed with bone spurs in her neck. She recently started having severe neck pain.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Patient has been having neck pain and right shoulder pain, patient had Nerve Studies done, Findings stated that the patient needed to have high tech imaging.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; PATIENT HAS HISTORY OF CERVICAL FUSION. SEVERE PAIN, KEEPING PATIENT UP AT NIGHT. PAIN GETTING WORSE.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Patient has pain that radiates down bil arms.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Patient was given a referral for physical therapy on 5/11/16 she also was prescribed vicoden, Mobic and flexeril with prednisone

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; proscruber requesting MRI for futher evaluation

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.;

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; &lt;Enter Additional Clinical Information&gt;

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; cervical pain with parathesias to left jaw, sharp moderate pain (5-7), point tenderness on the left side

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Neck pain &#xOD; Onset: 3 weeks ago. The problem is severe. The frequency of pain is daily. Location of pain is bilateral posterior neck. There is radiation of pain to the bilateral upper arm and bilateral elbow. The patient describes the pain as sharp.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; pt is c/o neck pain radiating to left shoulder and arm. needing mri to further evaluate

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There is no evidence of tumor or metastasis on a bone scan or x-ray.; Suspected Tumor with or without Metastasis; &lt;Enter Additional Clinical Information&gt;

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; Trauma or recent injury; ; No, the patient does not have new or changing neurological signs or symptoms.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; Trauma or recent injury; none; Yes, the patient have new or changing neurological signs or symptoms.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; Trauma or recent injury; Patient to be evaluated for neck pain. The location of discomfort is posterior. It radiates to the occipital scalp. The pain is characterized as moderate in intensity, severe, constant, sharp, and throbbing. Initial onset was 3 weeks ago. The precipi; No, the patient does not have new or changing neurological signs or symptoms.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; Trauma or recent injury; Strain of muscle versus whiplash of the cervical spine. Unfortunately the patient is not improving, the symptomology has persisted after the standard treatment. Patient had a CT scan that showed no evidence of fractures, x-rays are unremarkable. Given his; Yes, the patient have new or changing neurological signs or symptoms.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

Radiology Services Denied Not Medically Necessary

To determine the cause of patient's pain so appropriate treatment can be started.; This study is being ordered for trauma or injury.; June 2, 2016; There has been treatment or conservative therapy.; Patient states she cannot use right shoulder without pain shooting into her neck. Patient states she feels like she has 'pins and needles' in her right foot. Patient describes pain as 'excruciating'.; Patient prescribed hydrocodone for pain management. Patient had an injection from orthopedic MD (Dr. Richardson) which patient stated helped for a few days but then wore off.

Radiology Services Denied Not Medically Necessary

To get a better look at what is going on with patient cervical and lumbar spine that we can not get from plain films; This study is being ordered for a neurological disorder.; Patient has been complaining of pain in cervical and lumbar spine. Pt also complains of neuropathy in both legs.; There has been treatment or conservative therapy.; Pain and neuropathy; Pt was prescribed pain medication and NSAIDs. Pt was advised to rotate heat and ice as needed for pain and sore muscles. Pt experienced no relief from these medications but was unable to complete physical therapy due to work schedule.

Radiology Services Denied Not Medically Necessary

unknown; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; It is not known was medications were used in treatment.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did not include exercise, prescription medication and follow-up office visits.

Radiology Services Denied Not Medically Necessary

UNKNOWN; This study is being ordered for Inflammatory/ Infectious Disease.; UNKNOWN; There has been treatment or conservative therapy.; PAIN; MEDICATIONS unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 04/20/2016; There has not been any treatment or conservative therapy.; No control of lower extremities and loss of bladder control. Dizziness

Radiology Services Denied Not Medically Necessary

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2008; It is not known if there has been any treatment or conservative therapy.; patient is having neck and back pain.

Radiology Services Denied Not Medically Necessary

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3/1/2016; There has been treatment or conservative therapy.; chronic back pain, numbness, tingling, decrease mobility; medication, prescriptions

Radiology Services Denied Not Medically Necessary

UNKNOWN; This study is being ordered for trauma or injury.; 03/21/2016; There has been treatment or conservative therapy.; RIGHT SHOULDER PAIN, CERVICAL PAIN, SLOW PROGRESS. TENDERNESS IN THE SPINE, DECREASED RANGE OF MOTION IN THE NECK; PHYSICAL THERAPY, X-RAYS

Radiology Services Denied Not Medically Necessary

Radiology Services Denied Not Medically Necessary

Unknown; This study is being ordered for trauma or injury.; November 10th, 2015. Patient fell off of a combine.; There has not been any treatment or conservative therapy.; extreme pain in lower back with radiculopathy of LE's.

weakness back pain; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; unknown; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Radiology Services Denied Not Medically Necessary

will fax clinical info; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/01/2006; There has been treatment or conservative therapy.; severe neck/mid/low back pain; cervical radiculopathy r side numbness and tingling in arms and lumbar radiculopathy difficulty walking; unable to sleep; spasm; pain meds; supervised pain management

Radiology Services Denied Not Medically Necessary

Workup prior to referral to pain management; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3 years ago; There has been treatment or conservative therapy.; Pain in Rt Shoulder, low back, worse after she works all day; Pain management; medications

Radiology Services Denied Not Medically Necessary

Worsening factor(s) include : sitting, looking up and lying flat on back , Other associated symptoms/problems are as follows: difficulty staying asleep due to pain and numbness .; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3-28-16; There has been treatment or conservative therapy.; Pain radiating to bilateral upper extremities and bilateral lower extremities. Turning head from side to side and difficulty sitting for periods of time. Trouble sleeping due to the pain; Epidural Steroid Injections, Medication Therapy and TENS.

Radiology Services Denied Not Medically Necessary

Radiology Services Denied Not Medically Necessary

Worsening headaches; hx of deteriorating disc per patient; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Radiology Services Denied Not Medically Necessary

X-ray of the C-spine shows degeneration and disc space narrowing between C3-C5. This is especially true at the C4-C5 level. She has osteoarthritic findings in the neck. She has obvious severe scoliosis involving the upper thoracic spine. She has scoli; This study is being ordered for Inflammatory/ Infectious Disease.; 10/14/2014; There has been treatment or conservative therapy.; X-ray of the C-spine shows degeneration and disc space narrowing between C3-C5. This is especially true at the C4-C5 level. She has osteoarthritic findings in the neck. She has obvious severe scoliosis involving the upper thoracic spine. She has scoli; Patient has tried meloxicam and cyclobenzaprine

Radiology Services Denied Not Medically Necessary

x-ray performed of cervical spine; diagnosis is neck pain.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.

Radiology Services Denied Not Medically Necessary

XRAY REPORT::3 views of the cervical spine. There is straightening of the normal lordotic curvature. There is vertebral body height loss at see 6 with a small anterior disc space narrowing over the inferior vertebral body margin. There appears to be a soft tissue disc protrusion; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; There is weakness.; NECK/THYROID: ----TENDER----, RIGHT, C5 area tapping causes shooting pains into the forearm, C6 tapping and light pressure causes shooting electric pains down the radial forearm into the thumb, -----WEAKNESS-----, RIGHT, C5/6 weakness in the biceps and triceps; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Radiology Services Denied Not Medically Necessary

XRAY SHOWS STRAIGHTENING OF C SPINE,DJD,FORANIMAL NARROWING R SIDE,STILL HAVING PAIN DOWN NECK LFT SHOULDER ARM W/ NUMBNESS; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.

Radiology Services Denied Not Medically Necessary

There are no documented clinical findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits."

Radiology Services Denied Not Medically Necessary

There are no documented clinical findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is not experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits.";

Radiology Services Denied Not Medically Necessary

There are no documented clinical findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is not experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits."; PATIENT COMPLAINS OF NUMBNESS STARTING IN LEFT SHOULDER BLADE AND GOING AROUND TO MID CHEST WITH LEFT NIPPLE NUMBNESS.

Radiology Services Denied Not Medically Necessary

There are no documented clinical findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is not experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits."; This was diagnosed 6 weeks ago. The course has been progressively worsening. There are no obvious aggravating factors. The patient has not found anything that helps or ameliorates symptoms complains of weakness more so on R side, sore and pain and pres

Painful&#x0D; numbness; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; It is not known if there is x-ray evidence of a lumbar recent fracture.

Radiology Services Denied Not Medically Necessary

Palpable mass on the right side of spine in lumbar region; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Radiology Services Denied Not Medically Necessary

Patient c/o low back pain, states he has been previously diagnosed with spina bifida.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Radiology Services Denied Not Medically Necessary

Patient came in with edema in feet and legs &#x0D; and has pain in the lumbar region in thoracic spine; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Radiology Services Denied Not Medically Necessary

Patient complains of chronic low back pain. The discomfort is most prominent in the lumbar spine. This is a chronic problem, with essentially constant pain. He states that the current episode of pain started years ago. He does not recall any precipita; This study is being ordered for Inflammatory/ Infectious Disease.; Patient complains of chronic low back pain. The discomfort is most prominent in the lumbar spine. This is a chronic problem, with essentially constant pain. He states that the current episode of pain started years ago. He does not recall any precipita; There has not been any treatment or conservative therapy.; Patient complains of chronic low back pain. The discomfort is most prominent in the lumbar spine. This is a chronic problem, with essentially constant pain. He states that the current episode of pain started years ago. He does not recall any precipita

Radiology Services Denied Not Medically Necessary

Patient condition is worsening.; This study is being ordered for trauma or injury.; OFF AND ON FOR 3 YEARS, BUT WORSENING LATELY; There has been treatment or conservative therapy.; Chronic neck and back pain with radiation to right hip and right arm; Patient has had been treated with steroids and anti-inflammatory without improvement.

Radiology Services Denied Not Medically Necessary

Patient continues to complain of back pain after falling at home.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Radiology Services Denied Not Medically Necessary

patient did rec medication; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has not directed conservative treatment for the past 6 weeks.

Radiology Services Denied Not Medically Necessary

Patient had a arterial Doppler , which the results were normal . Patient has been taking Nuycnta for pain with no relief.; This study is being ordered for a neurological disorder.; 2 wks ago ... May 25, 2016; There has not been any treatment or conservative therapy.; Chronic back pain , Bilateral lower extremities edema .

Radiology Services Denied Not Medically Necessary

Patient had a CT scan of cervical spine which resulted in mild degenerative changes , pronounced at C5-6 there is mild canal and bilateral foramina stenosis.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Friday 04/15/16; There has been treatment or conservative therapy.; severe back pain all up and down spine. patient cant lift arms or turn her neck .; patient has 9.5-10 muscle relaxer and 18-20 naproxen and pain medication of hydrocodone acetaminophen 10/325mg.

Radiology Services Denied Not Medically Necessary

patient had MRI's done in 2014 which showed narrowing and disc bulges and protrusions; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; began 2-3 years ago with herination; There has been treatment or conservative therapy.; neck and back pain; patient did six weeks of at home exercises given by doctor

Radiology Services Denied Not Medically Necessary

Patient has a history of back surgery . She was given a muscle relaxer and steroid dose pack. She finish both of the those and back pain is not any better; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Radiology Services Denied Not Medically Necessary

patient has a history of facet disease .; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.; pain; medication and referral to pain management

Radiology Services Denied Not Medically Necessary

Patient has an abnormal x-ray.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3/2015; There has not been any treatment or conservative therapy.; Patient has back pain and swelling, numbness and tingling of the lower extremities.

Radiology Services Denied Not Medically Necessary

patient has back pain on & off for years but is getting worse. The pain goes down his rt leg & into calf. He has tried PT in past without success & they suggested he have an MRI. Xray in clinic shows degenerative changes.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Radiology Services Denied Not Medically Necessary

Patient has been having low back pain for five months, gets worse with strenuous activity, not getting any better, hurting.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Radiology Services Denied Not Medically Necessary

Patient has been having severe pain in her hips and legs, due to her lower back pain.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.;

Radiology Services Denied Not Medically Necessary

Patient has been seen in the clinic twice (6/7/16 and 6/17/16). He was given prescriptions for steroid, anti-inflammatory, muscle relaxer, and pain medication. He had a normal lumbar spine x-ray. Despite the medications, he continues to have pain.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has not directed conservative treatment for the past 6 weeks.

Radiology Services Denied Not Medically Necessary

Patient has chronic lumbar pain with a history of degenerative discs and ruptured discs. Patient is having radiating pain down the left leg.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Radiology Services Denied Not Medically Necessary

patient has extreme back pain radiating down left leg. he cannot raise his legs; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Radiology Services Denied Not Medically Necessary

patient has had an abnormal xray; This study is being ordered for trauma or injury.; patient fell last fall; There has been treatment or conservative therapy.; TSPINE-  
&#x0D; &#x0D; TENDER ALONG THE THE RIGHT PARASPINOUS MUSCLES&#x0D; &#x0D;  
ACTIVE AND PASSIVE ROM TESTED WITH TENDERNESS WITH ACIVE ROM&#x0D;  
&#x0D; &#x0D; &#x0D; LUMBAR SPINAL&#x0D; &#x0D; GAIT IS SHORTENED&#x0D;

LEFT LE STRAIGHT LEG RAISE WITH P; HAS SEEN CHIROPACTER FOR THIS WITHOUT  
IMPROVEMENT&#x0D; &#x0D; PT HAS HAD PROBLEM FOR 6-7 YEARS.

Radiology Services Denied Not Medically Necessary

Patient has had no response to conservative therapy and needs further evaluation.; This study is being ordered for a neurological disorder.; 04/27/16 Patient was first seen with pain and was ordered an xray and physical therapy and patient was seen back in our clinic today for followup with no improvement.; There has been treatment or conservative therapy.; Pain in the thoracic and lumbar spine with radiculopathy.; Physical therapy and rx pain meds.

Radiology Services Denied Not Medically Necessary

patient has ongoing chronic back pain, along with weakness, patient cannot perform daily activities; The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness in left and right legs, patient has to walk with a cane.; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; It is not known if there is x-ray evidence of a lumbar recent fracture.

Radiology Services Denied Not Medically Necessary

patient has pain in lower back radiating down right leg patient can't use right leg; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Radiology Services Denied Not Medically Necessary

Patient has pain in lower back which radiates down the back of his right leg.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Radiology Services Denied Not Medically Necessary

Patient has scoliosis and lower back pain and spondylosis; The study requested is a Lumbar Spine MRI.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient does NOT have acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection; This procedure is being requested for None of the above

Radiology Services Denied Not Medically Necessary

Patient is a candidate for epidural steroid injections and surgery. X-rays on 04/04/2016 indicate: straightening of cervical spine and degenerative changes throughout cervical spine. Lumbar spine x-ray indicates diffuse degenerative changes, loss of disk ; This study is being ordered for a neurological disorder.; 2008; There has been treatment or conservative therapy.; Sharp stabbing pain in low back, numbness and tingling radiating down left leg. Neck and low back pain chronic duration. Worsening neck pain with head movement and moving arms. Worsening neck and low back pain with Physical Therapy.; Physical Therapy- currently enrolled and patient states she is unable to continue due to worsening pain symptoms with therapy.

Radiology Services Denied Not Medically Necessary

PATIENT IS HAVING NUMBNESS IN BILATERAL LEGS AND FEET FOR ALMOST 4 MONTHS.; The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for None of the above

Radiology Services Denied Not Medically Necessary

Patient is having problems with pain in her legs. She states when she is sitting she is comfortable, but when she stands up the pain makes her knees buckle. The patient states that her cardiologist has checked the veins and arteries in her legs but states; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Radiology Services Denied Not Medically Necessary

patient presents with low back pain for unspecified time. pain started while pregnant. pain has not resolved since birth of child. no known treatments done.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Radiology Services Denied Not Medically Necessary

patient reports having numbness in legs that change positions also patients complains of neck pain.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Radiology Services Denied Not Medically Necessary

patient was seen in ER for the pain 5/14/16 &#x0D; &#x0D; pain is getting worse; This study is being ordered for trauma or injury.; 5/14/16; It is not known if there has been any treatment or conservative therapy.; neck pain and lumbar pain

Radiology Services Denied Not Medically Necessary

Patient was seen in ER on 06/22/16, in the office visit all that was evaluated was an xray of her shoulder. Patient is continuing to have pain with no relief from hydrocodone and cyclobenzaprine given in ER.; This study is being ordered for trauma or injury.; 06/21/2016; There has not been any treatment or conservative therapy.; Continued pain in neck, left arm, and left leg following MVA on 06/21/2016

Radiology Services Denied Not Medically Necessary

Patient with chronic back pain. She will be seeing pain management and they will require this imaging for her to be seen. Also, Pt pulled her back out with vomiting spells a few days ago and went to ED. Pain radiating down right leg and with any movement ; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has not directed conservative treatment for the past 6 weeks.

Radiology Services Denied Not Medically Necessary

Patient works as a stone fabricator and is currently treating symptoms with Soma 350 mg and Tylenol #4. Patient expresses concern that the medicines do not work sufficiently and he would like to evaluate additional options. Patient states "I am the bread ; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 05/26/2014; It is not known if there has been any treatment or conservative therapy.; Radiating muscle spasms. Radiating upper back pain that started gradually and worsens with bending and lifting. Mid back pain and lower back pain chronic duration. Diffuse back tightness and soreness.

Radiology Services Denied Not Medically Necessary

Spine is tender to touch, had Xrays were normal, and patient is having low back pain; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has not directed conservative treatment for the past 6 weeks.

Radiology Services Denied Not Medically Necessary

Steroid injections PT; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Radiology Services Denied Not Medically Necessary

The Pt had abnormal x-ray. DDD; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Radiology Services Denied Not Medically Necessary

The Pt has had injections, oral steroids, hydrocodone, PT (June 3, 2016 until...), NSAID, x-ray, and blue emu sab.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.

Radiology Services Denied Not Medically Necessary

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

Radiology Services Denied Not Medically Necessary

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection

Radiology Services Denied Not Medically Necessary

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality

Radiology Services Denied Not Medically Necessary

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has completed Treatment with a facet joint or epidural injection in the past 6 weeks

Radiology Services Denied Not Medically Necessary

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)

Radiology Services Denied Not Medically Necessary

The xray shows mild levoscoliosis degenerative changes throughout the lumbar spine.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.

Radiology Services Denied Not Medically Necessary

This is a chronic back pain that is worsening, with no improvement at all in the past year with physical therapy and medications.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Radiology Services Denied Not Medically Necessary

This patient is complaining of her lower back hurting and the middle of her back (shoulder blade area). Also, this patient is complaining of left leg radiculopathy. She is also going to be seeing a Neurological Surgeon soon, and he will need a MRI of her ; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Radiology Services Denied Not Medically Necessary

This was diagnosed ~20 years ago. The course has been episodic. It is of severe intensity. He estimates that the frequency of symptoms is several times a week. He had surgery on his lower back near the L5 and it took him several years to be able to wa; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Radiology Services Denied Not Medically Necessary

tingling, numbness right lower extremity; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Patient is having severe pain in lower abd which is interfering with her activities of daily living; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

Radiology Services Denied Not Medically Necessary

Patient presents to clinic with RLQ pain x 2 days with nausea and rebound tenderness.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

Radiology Services Denied Not Medically Necessary

Patient presents to our clinic with increased abdominal pain, splenomegaly and a history of Hep C.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

Radiology Services Denied Not Medically Necessary

pelvic pain per pt x2 weeks. dysuria, nausea, vomiting, pelvic pressure. patient has had a hysterectomy. bil flank pain; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

Radiology Services Denied Not Medically Necessary

Pt did not have a pelvic exam due to her having abnormal vaginal bleeding which is a new onset/ Pt was last seen 2-11-2016 prior to last visit of 3-29-2016 and symptoms have worsened; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

Radiology Services Denied Not Medically Necessary

Pt had plain films that showed air fluid levels which concerned the dr.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

Radiology Services Denied Not Medically Necessary

PT has bleeding ulcers dark stools for a month getting worse. Abdominal surgery's.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

Radiology Services Denied Not Medically Necessary

pt has had a hysterectomy and gallbladder removed. chronic abdominal and pelvic pain; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.

Radiology Services Denied Not Medically Necessary

Pt has had persistent right upper quadrant and left lower quadrant pain with vomiting and diarrhea for 3-4 months; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.

Radiology Services Denied Not Medically Necessary

Pt having abdominal pain; Ultrasound showed the spleen to be atrophied.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.

Radiology Services Denied Not Medically Necessary

Pt needs this done because of the re evaluation of the pleurisy, and also the abdominal pain.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/08/2008; patient has been complaining of abdominal pain and chest pain. abdominal tenderness noted as well, as well as guarding to area.; There has been treatment or conservative therapy.; Chest pain and abdominal pain, difficulty breathing at times.; He was treated for pleurisy

Radiology Services Denied Not Medically Necessary

pt. has previous C-section 1 month prior, presents with abdominal pain at cesarean site; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

Radiology Services Denied Not Medically Necessary

pt. with abdominal pain for more than 6 weeks. He is noted to have 17 lb. weight loss in the last 6 weeks.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.

Radiology Services Denied Not Medically Necessary

RLQP; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

Radiology Services Denied Not Medically Necessary

Severe tenderness to right lower quadrant.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.

Radiology Services Denied Not Medically Necessary

Small protusion above umbilicus and swelling in abdomen.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

Radiology Services Denied Not Medically Necessary

Tender abdominal pain that has grown in severity. Patient reports in is tender to touch and abdomen is dissented.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.

Radiology Services Denied Not Medically Necessary

This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

Radiology Services Denied Not Medically Necessary

This is a request for an abdomen-pelvis CT combination.; It is not known if there is evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement; &lt;Enter Additional clinical information &gt;

Radiology Services Denied Not Medically Necessary

This is a request for an abdomen-pelvis CT combination.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; It is not known if there are findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Pain has been present since abdominal mesh was placed. Trying to rule out any infection, fluid build up or any cause to the abdominal pain

Radiology Services Denied Not Medically Necessary

Yes, this is a request for CT Angiography of the abdominal arteries.

Radiology Services Denied Not Medically Necessary

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for Breast MRI.; This study is being ordered for known breast lesions.; There are NOT benign lesions in the breast associated with an increased cancer risk.

Radiology Services Denied Not Medically Necessary

Pt was adopted and does not know her family history. There is no way for her to know if there is a family of history of breast cancer; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetric testing or a suspected implant rupture.

Radiology Services Denied Not Medically Necessary

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Radiology Services Denied Not Medically Necessary

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29

Radiology Services Denied Not Medically Necessary

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 5/27/2016; There has not been any treatment or conservative therapy.; chest pain, dizziness, headache,

Radiology Services Denied Not Medically Necessary

; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Radiology Services Denied Not Medically Necessary

; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

Radiology Services Denied Not Medically Necessary

; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29

Radiology Services Denied Not Medically Necessary

Can't give any info; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

Cardiovascular &#x0D; Palpation: no thrill or palpable murmurs, no displacement of PMI&#x0D; Auscultation: RR WITH " S3 AND A LEFT STERNAL BORDER M&#x0D; Periph. circulation: TRACE BILATERAL EDEMA; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

chest pain tenderness (lower sternum to palpation, 8 months of continuous chest pain. worse with exertion. negative CT scna of chest. unclear etiology,; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

chest pain w/ diaphoresis, smokes 2 packs a day x's 13 years. Normal ekg. Needs to have stress test to r/o angina/mi/pe; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Radiology Services Denied Not Medically Necessary

Chest pain, no SOB or diaphoresis, occurs at rest, EKG normal. Has HTN and diabetes; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Radiology Services Denied Not Medically Necessary

complaint of chest pains, nausea.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

dystonia and hypertension; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

ECG was normal; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

fatigue, palpitations and syncope. awakens from sleep; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Radiology Services Denied Not Medically Necessary

Fatigues easily when doing physical work, muscle weakness, strong family history of heart disease, father had first heart attack at age 44; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

history of CAD s/p CABG. Echo 11/30/15 revealed EF 35-40% improved from echo 8/21/15 revealed EF 25-30% with moderate to severe MR. TEE 8/24/15 revealed trace MR; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

Hypertension and elevated blood pressure, see icd 10 codes.; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

intermittent chest pain with pains that go down L arm. Pt will wake up at in the middle of night with it.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

Radiology Services Denied Not Medically Necessary

none; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

Patient experiencing left sided chest pain intermittently for 2 months.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Radiology Services Denied Not Medically Necessary

patient has been having fatigue and dizziness; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

Patient is having chest pain and palpitations; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

Patient is having chest pain on exertion with shortness of breath.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

Radiology Services Denied Not Medically Necessary

patient is having chest pain, and shortness of breath, ekg performed was normal.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

patient with history of coronary artery stenosis htn, cva, & stent placement with chest pains unrelated to exertion - nightly - carotid non palpable on left, 2+ right and right bruit; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.

Radiology Services Denied Not Medically Necessary

possible MI; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

pt c/o chest pain and in left arm for 1 month. pt states pain is just above the elbow, states pain is always there but will increase in intensity. pt states pain will throb and last for days. pt states for the last few months she will have dizzy spells, h; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

Pt has a history of CAD and is having chest pain.; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

pt is having atypical chest pain that is worsening with negative EKG. pt has DJD of lumbar spine and is unable to walk on treadmill due to this. pt's lipids are also elevated at this time.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

Pt suffering sub sternal chest pain, smoker and palpitations.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

pt. is having chest pain stated about 2 weeks ago; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29

Radiology Services Denied Not Medically Necessary

sent to the ER for chest pain. He had EKG, labs, and Xray and they all came back okay. It was recommended by the Cardiologist, Dr. Tutt at the ER that he have a Stress test done. He has not had one in years. He has hx of HTN.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The member does not have known or suspected coronary artery disease  
This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for known or suspected valve disorders.

Radiology Services Denied Not Medically Necessary

UNKNOWN; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; It is unknown why the study is being ordered.; This study is being requested for Breast Cancer.

Radiology Services Denied Not Medically Necessary

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.

Radiology Services Denied Not Medically Necessary

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The abnormal symptom, condition or evaluation is not known or unlisted above.

Radiology Services Denied Not Medically Necessary

Radiology Services Denied Not Medically Necessary

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Shortness of breath is not related to any of the listed indications.

Radiology Services Denied Not Medically Necessary

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; It is unknown if the patient has a history of a recent heart attack or hypertensive heart disease.

Radiology Services Denied Not Medically Necessary

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient does not have a history of a recent heart attack or hypertensive heart disease.

Radiology Services Denied Not Medically Necessary

This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; The member does not have known or suspected coronary artery disease

Radiology Services Denied Not Medically Necessary

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for Inflammatory/ Infectious Disease.; unknown; It is not known if there has been any treatment or conservative therapy.; cough, weight loss, Vit B12 deficiency, COPD, hypertension

Radiology Services Denied Not Medically Necessary

mdo request no change; xray was inconclusive; This request is for a Low Dose CT for Lung Cancer Screening (S8032); No, I do not want to request a Chest CT instead of a Low Dose CT for Lung Cancer Screening (S8032).; The patient is presenting with pulmonary signs or symptoms of lung cancer or there are other diagnostic test suggestive of lung cancer.

Radiology Services Denied Not Medically Necessary

This request is for a Low Dose CT for Lung Cancer Screening (S8032); This patient has NOT had a Low Dose CT for Lung Cancer Screening (S8032) in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.

Pt had a recent fall; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; on 4/6/16 patient tripped over something while holding a toddler/her arm went straight out during fall and ever since has experienced burning to right fingers and mobility of right shoulder affected.

This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement

This request is for a Low Dose CT for Lung Cancer Screening (S8032); This patient has NOT had a Low Dose CT for Lung Cancer Screening (S8032) in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.

## Radiology Services Denied Not Medically Necessary

; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; ; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

ULTRASOUND FOUND PELVIC MASS 5/17/16; PATH REPORT FOUND ENDOMETRIAL CANCER GRADE 3; PRE SURGERY TESTING.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

UNKNOWN; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

Mass; This is a request for a Pelvis MRI.; It is not known if this is a preoperative study.; The study is being ordered for suspicion of pelvic inflammatory disease or abscess.

This is a request for an abdomen-pelvis CT combination.; The reason for the study is known tumor.; This study is being ordered for follow-up.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient is female.; The patient completed a course of chemotherapy or radiation therapy within the past 90 days.

This is a request for an abdomen-pelvis CT combination.; This is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis and the patient is undergoing active treatment.; Known Tumor, Cancer, Mass, or R/O metastases  
This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

ULTRASOUND FOUND PELVIC MASS 5/17/16; PATH REPORT FOUND ENDOMETRIAL CANCER GRADE 3; PRE SURGERY TESTING.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

UNKNOWN; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Ovarian or Esophageal Cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for Cervical Cancer.

faxing rec; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for Cervical Cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Ovarian or Esophageal Cancer.; This would be the first PET Scan performed on this patient for this cancer.

faxing rec; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for Cervical Cancer.

Radiology Services Denied Not Medically Necessary

; This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.  
; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Evaluation of patient with Breast Cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Evaluation of patient with Cervical Cancer.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Evaluation of patient with Esophageal Cancer.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Evaluation of patient with history of Breast Cancer.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Evaluation of patient with malignant neoplasm of parotid gland.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Faxed records.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

faxing rec; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Faxing records.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

faxing records; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

HODKINS LYMPHOMA RESTAGING; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

none; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

patient with known CLL Rai Stage III. Scans to evaluate response to current treatment.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

patient with known CLL Stage I. Recently presented for visit with scalp lesions concerning for metastatic disease, CT to rule out lesions.; This is a request for a brain/head CT.; None of the listed reasons for the study have been selected.

Pt with known lung Cancer is having intermittent Headaches in the back of head and neck; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

rash on chest, F/O for restaging.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

RESTAGING LEUKEMIA; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

restaging lymphoma; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

restaging post radiation to see if treatment needs to be continued or changed; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

restaging to see if treatment needs to be changed or continued; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

RESTAGING OF KNOWN RECTAL CANCER; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; This study is being ordered for evaluation of known tumor.

This is a request for a brain/head CT.; There is a suspected or known brain tumor.; The study is requested for known or suspected brain tumor, mass or cancer.

This is a request for a brain/head CT.; There is a suspected or known brain tumor.; This study is being requested for known or suspected brain tumor, mass or cancer.

This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has not been established.; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is immune-compromised.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; ; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

; This study is being ordered for Inflammatory/ Infectious Disease.; ; It is not known if there has been any treatment or conservative therapy.;

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; It is not known if there has been any treatment or conservative therapy.;

Cancer has metastasized to lungs, abdominal and pelvic findings of the cancer. The cancer is considered thymicneuroendocrine tumor. Suspicious lymph nodes developing in left side posterior triangle. Findings suspicious in upper thoracic vertebrae continue ; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months. HODKINS LYMPHOMA RESTAGING; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Patient is here for yearly check up of Chronic Lymphocytic Leukemia; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered. patient with known CLL Rai Stage III. Scans to evaluate response to current treatment.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

R carotid acidic cell carcinoma; This is a request for neck soft tissue CT.; It is not known if the patient has been diagnosed with cancer.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was done.

rash on chest, F/O for restaging.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

restaging after chemo; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

restaging chemo therapy; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

RESTAGING LEUKEMIA; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

restaging lymphoma; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

restaging post radiation to see if treatment needs to be continued or changed; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

restaging to see if treatment needs to be changed or continued; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

RESTAGING OF KNOWN RECTAL CANCER; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has not been established.; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

to rule out early lung cancer.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; There has not been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;

unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Unknown; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The study is ordered for suspicion of neoplasm, tumor or metatstasis

"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The study is ordered for trauma or injury of the orbit, face or neck soft tissue

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

There is a suspicion of an infection or abscess.; This is a request for a Face MRI.; There is not a history of orbit or face trauma or injury.

There is not a suspicion of an infection or abscess.; This examination is being requested to evaluate lymphadenopathy or mass.; This is a request for a Face MRI.; There is not a history of orbit or face trauma or injury.

This is a request for a Face MRI.; There is a history of orbit or face trauma or injury. This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has not been established.; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; It is not known if there is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is not a pituitary tumor or pituitary adenoma.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; It is not known if a biopsy has been completed to determine tumor tissue type.; It is not known if there are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; It is not known if there is a new and sudden onset of headache (less than 1 week) not improved by pain medications.; It is not known if the tumor is a pituitary tumor or pituitary adenoma.

; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The headache is not described as a "thunderclap" or the worst headache of the patient's life.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is a new and sudden onset of headache (less than 1 week) not improved by pain medications.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

1.-Headaches, nausea and vomiting; -She has h/o migraine headaches, but last one was 20 years ago; -She does not have neck stiffness; -Will order brain MRI with contrast to rule out meningeal spread vs brain mets; &; 2.-Stage IV breast cancer ER/PR positive; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Evaluate patient for lung cancer.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Evaluate solitary pulmonary nodule prior to surgery.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Evaluation of known metastatic brain cancer; CA 27-29 is 40.9; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is not a pituitary tumor or pituitary adenoma.

Evaluation of patient with a Lung Mass.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3/31/16; There has not been any treatment or conservative therapy.; Evaluation of patient with a Lung Mass.

Evaluation of patient with an enlarging pulmonary nodule with history of renal cell cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Evaluation of patient with Lung Cancer.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Evaluation of patient with Melanoma.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Evaluation of patient with stage IV Lung Cancer.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

faxed rec.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

faxing rec.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

faxing rec; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

faxing rec; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

faxing records.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Follow up scans for her breast ca with mets to the brain. Last scans showed changes.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Follow up scans to evaluate disease.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

follow up scans to imaging that revealed progressive disease and with mets to brain; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.  
follow up to chemo; last CT A/P showed new cystic lesion in spleen and liver lesions; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

has lung cancer and needs initial staging; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.

hypermetabolic left chest wall lesion concerning for metastatic disease. Mass increased in size; C2 vertebral enhancing lesion; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. Initial staging workup for newly diagnosed breast cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Known Stage IV SCC of the supraglottis with known bone mets. Doctor wanting MRI Brain for restaging workup to rule out brain mets.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Known Stage IV small cell lung cancer presenting with acute confusion. Ruling out brain mets.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

mri showing additional masses in cerebellum; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is not a pituitary tumor or pituitary adenoma.

Newly diagnosed breast cancer. MRI is to complete staging workup and rule out brain mets.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Newly diagnosed rectosigmoid cancer, scans for initial staging workup.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

non small cell lung cancer, initial staging; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

none; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

On 5/2/16 MRI brain shows decrease in size and surrounding edema of the enhancing left occipital lobe lesion, CT shows decrease in size of the left axillary lymph node and a left lower lobe pulmonary nodule, stable mediastinal, hilar, and subcarinal lymph; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

One year follow up scans for monitoring malignant neoplasm of lower quadrant of right breast with secondary malignant neoplasm of the brain.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

PATIENT HAS BEEN EXPERIENCING SEIZURES WITH INCREASED BACK PAIN. KNOWN CANCER WITH METS.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Patient is undergoing Chemo Therapy Tx and she is being restaged and to see if it has metastasized any further and to see if she is responding to treatment; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

PATIENT LAST SCANS SHOWED WORSENING DISEASE IN NECK AND LOWER PULMONARY NODULE AS WELL AS LESIONS IN THE LIVER SIGNIFICANTLY WORSE. PATIENT CURRENTLY ON CARBOPLATIN/ABRAXANE AND DR. KOCH WANTING TO RESTAGE. LAST MRI SHOWED A NEW 2MM LESION- CONSISTENT WITH; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Patient with known small cell lung cancer with patient family noting short term memory issues and forgetfulness. Ruling out mets to brain.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Pt has Metastatic melanoma. As of 6/13/2016 Cortisol levels were down to 0.6 from 1.6 on 6/7/2016. Pt was seen in ER late 6/9/2016 and early 6/10/2016 for a seizure.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has been a previous Brain MRI completed.; The brain MRI was normal.

Pt receiving treatment and we are looking to make sure that this continues to be effective. The last studies were done 5/2/16.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Rule out brain mets in a new diagnosis of Lung cancer.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.

This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a “thunderclap” or the worst headache of the patient’s life.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing fatigue or malaise.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing dizziness.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has been a previous Brain MRI completed.; The brain MRI was abnormal.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for a tumor.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has not been established.; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Unknown; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing fatigue or malaise.

Unknown; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is not a pituitary tumor or pituitary adenoma.

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They did not have a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;;

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Dec 2015; There has been treatment or conservative therapy.; Pt has symptoms and this is a f/u of a tumor; Pt had antibiotics and left inguinal orchiectomy ; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

; This study is being ordered for Inflammatory/ Infectious Disease.; ; It is not known if there has been any treatment or conservative therapy.;

; This study is being ordered for Inflammatory/ Infectious Disease.; 01012016; There has been treatment or conservative therapy.; inflammation in lungs and fatty liver; xarelto

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; It is not known if there has been any treatment or conservative therapy.;

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;

; This study is being ordered for Vascular Disease.; ; There has been treatment or conservative therapy.;

1. Findings in the abdomen and pelvis are worrisome for early-stage carcinomatosis. If clinically indicated, one of the retroperitoneal lymph nodes could be biopsied with CT guidance. 2. Groundglass opacity in the right upper lobe of the lung could be due to; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

3mo surveillance follow up; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

6 month follow up treatment; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

61 y.o. male with a hx of metastatic bladder cancer and being followed by MONC. His disease progressed on Carbo Gemzar and later Carbo Taxol. He is currently taking Keytruda. ; ; He is s/p cysto + bladder mass recession with a greenlight on 4/15/16 for a ; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

A Chest/Thorax CT is being ordered.; This study is being ordered for known tumor.

A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient quit smoking in the past 15 years.; The patient does NOT have signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus.

Breast cancer; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

Cancer has metastasized to lungs, abdominal and pelvic findings of the cancer. The cancer is considered thymicneuroendocrine tumor. Suspicious lymph nodes developing in left side posterior triangle. Findings suspicious in upper thoracic vertebrae continue ; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Change in clinical status; restaging.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Enlarging tumor in the tumor bed right sided nephrectomy. Hyperdense cyst associated with the left kidney and small calyceal calculus associated with the lower pole of the left kidney remains stable.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

eval for effectiveness of treatment .; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Evaluate patient with Breast Cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Evaluate solitary pulmonary nodule prior to surgery.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Evaluation for known metastatic disease.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Evaluation of patient with a Lung Mass.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3/31/16; There has not been any treatment or conservative therapy.; Evaluation of patient with a Lung Mass.

Evaluation of patient with an SPN.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

Evaluation of patient with Breast Cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Evaluation of patient with Breast Cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Evaluation of patient with Gastroesophageal Cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Evaluation of patient with Lung Cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Evaluation of patient with Lung Cancer.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Evaluation of patient with Lung Nodules.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

Evaluation of patient with malignant neoplasm of ovary.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Evaluation of patient with malignant neoplasm of the bladder.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Evaluation of patient with malignant neoplasm of the right lung and intra-abd nodes.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Evaluation of patient with Melanoma.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Evaluation of patient with Neuroendocrine Carcinoma.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Evaluation of patient with pulmonary disease.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/5/15; There has not been any treatment or conservative therapy.; Swelling

Evaluation of patient with pulmonary nodules.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 05/23/14; There has not been any treatment or conservative therapy.; Asymptomatic

Evaluation of patient with Rectal Cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Evaluation of patient with stage IV Bladder Cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Evaluation of pt with cervical cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

f/u to see if Tx needs to be changed; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

fatigue, night sweats, 18 pound weight loss, axillary fullness with tenderness; This study is being ordered for Inflammatory/ Infectious Disease.; 2008; There has not been any treatment or conservative therapy.; abdominal pain, enlarged lymph nodes, growing pain

fax rec.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

faxing rec.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

faxing rec.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

faxing rec.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

faxing rec; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

faxing rec; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

faxing rec; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

faxing rec; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

faxing records.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

faxing records.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

faxing records.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

faxing records.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

faxing records; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

faxing records; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Follow up scan to evaluate disease and lung nodules.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Follow up scans for her breast ca with mets to the brain. Last scans showed changes.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Follow up scans to evaluate disease response to current treatment.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Follow up scans to evaluate disease.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Follow up scans to evaluate disease.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

follow up scans to imaging that revealed progressive disease and with mets to brain; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.  
follow up to chemo; last CT A/P showed new cystic lesion in spleen and liver lesions; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

FOLLOWUP POST CHEMO; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

For further monitoring of deteriorating condition.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

He had more symptoms following the last treatment than usual consisting of weakness and slight nausea without vomiting. He has also been more short of breath until the last few days, and that seems to have improved. He has had occasional upper abdominal d; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

HODKINS LYMPHOMA RESTAGING; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Known Stage IV gallbladder cancer. Follow up scans to evaluate disease and also pneumonia noted on previous CT Chest.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Liver mass &#x0D; &#x0D; 44 y.o. WM with HCC.&#x0D; &#x0D; Clinical staging: T2(3.6cm-seg8)N0M0 - stage II&#x0D; &#x0D; Child-pugh-A&#x0D; &#x0D; AFP-pending&#x0D; &#x0D; Alcoholism&#x0D; - reportedly patient has stopped drinking as of 4/2016&#x0D; &#x0D; Hepatitis C&#x0D; - genotype 1a&#x0D; - viral load - 0.4M - 2/3/16; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

lung cancer; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

Melanoma evaluation; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

METASTATIC ANDROGEN SENSITIVE PROSTATE CA. PT HAD 6 CYCLES OF TAXOTERE. PT ASLO HAD 3 DOSES OF PROVENGE. DR WANTING FOLLOW-UP SCANS.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; It is unknown if imaging studies have been performed on the member in the past 3 months.

Monitoring patient undergoing clinical trial therapy.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

New 3.9 mm right upper lobe pulmonary nodule.; Stable right hilar and AP window lymph nodes.; Right external iliac lymph node slightly smaller.; Enlarging right inguinal lymph node, concerning for progression.; PET shows Hypermetabolic right external ilia; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Newly diagnosed colon cancer, CT Chest is to rule out lung mets per NCCN guidelines.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

none; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

On 5/2/16 MRI brain shows decrease in size and surrounding edema of the enhancing left occipital lobe lesion, CT shows decrease in size.; of the left axillary lymph node and a left lower lobe pulmonary nodule, stable mediastinal, hilar, and subcarinal lymph; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Pancreatic Cancer Patient has went through chemo Currently restaging; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

PATIENT HAS BEEN EXPERIENCING SEIZURES WITH INCREASED BACK PAIN. KNOWN CANCER WITH METS.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

PATIENT HAS METASTATIC TRIPLE NEGATIVE BREAST CANCER- SHE IS CURRENTLY ON KEYTRUDA. DR. KOCH REQUESTING RESTAGING CT SCANS AND MRI TO SEE WHERE WE ARE AND WHETHER TO PROCEED WITH KEYTRUDA OR TRADITIONAL CHEMOTHERAPY. PATIENT ALSO RECEIVING XGEVA MONTH; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

Patient has received 1 cycle of chemo. Chemo on hold due to platelet count. Need restaging scans to check the cancer response to chemo.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Patient has rectosigmoid cancer and has completed chemotherapy on 4-14-2016. Requires CT scan of abdomen pelvis and chest with contrast to evaluate the effectiveness of the therapy.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Patient is here for yearly check up of Chronic Lymphocytic Leukemia; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

patient with a known history of rectal cancer from May 2011. Last scans were April 2015. Yearly surveillance.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

Patient with known Breast Cancer with recent PET from 01/2016 showing left lung nodule and left superior mediastinal lymph node. CT to follow up.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.  
patient with known CLL Rai Stage III. Scans to evaluate response to current treatment.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

patient with known history of colon cancer with multiple pulmonary nodules.  
Radiologist recommended six month follow up for continued surveillance.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.  
post chemo eval; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

post chemo/xrt and surgery &#x0D; shoulder and chest pain; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

pt had recurrence of breast cancer in April of 2015 and completed six cycles of Gemzar/Abiraterone in December 2015. CT scan in January of 2016 revealed increase in prominence of the right hilum lymph node chains and prevascular lymph node chains. CT scans a; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Pt has a h/x of rectal cancer.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

Pt receiving treatment and we are looking to make sure that this continues to be effective.The last studies were done 5/2/16.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

PT WITH FOLLICULAR LYMPHOMA: CT CHEST ON 8/13/15 SHOWS DEVELOPING SUBPLEURAL INTERSTITIAL CHANGES JUST ANTERIOR AND SUPERIOR TO THE PRIOR POSTOPERATIVE CHANGES ALONG THE RT LOWER LUNG. NEW ILL-DEFINIED VAGUE NODULAR DENSITY POSTERIOR SEGMENT RT UPPER LOB; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

rash on chest, F/O for restaging.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

rash; right leg calf area- present approx 5 months &#x0D; dysphagia while lying down&#x0D; shortness of breath, cough productive with clear phlegm &#x0D; Reports bilateral LE edema, feels like my heart beats fast sometimes &#x0D; diarrhea&#x0D; night sweats&#x0D; bone pain and R knee ; This study is being ordered for Inflammatory/ Infectious Disease.; Patient with History of Hep C&#x0D; Reactive results from 2/22/16; There has not been any treatment or conservative therapy.; fatigue/lethargy

Reevaluation of chemo treatment.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

restage lymphoma after completion of chemotherapy; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

restage renal cell cancer after completion of chemotherapy; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

restaging after chemo; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Restaging after treatment; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

restaging chemo therapy; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

RESTAGING LEUKEMIA; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

restaging lymphoma; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

restaging post radiation to see if treatment needs to be continued or changed; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

restaging to see if treatment needs to be changed or continued; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

restaging; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

RESTAGING; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

RESTAGING OF KNOWN RECTAL CANCER; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Scan is being requested for a restaging evaluation.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

Scans to establish new baseline; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

She is having ABD pain and cramps, diarrhea; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Stage 1 colon cancer left renal mass; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

STAGE II TRIPLE NEG BREAST CA. STATUS POST BILAT MASTECTOMY FOLLOWED BY CHEMO. PT HAVING SEVERE PAIN TO RT UPPER ARM/LT LOWER EXT. PT ALSO HAVING WORSENING SOB.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms do not indicate that the cancer may be present or reoccurring.

STAGE IV OVARIAN CA: CT SCAN REVEALED A LIKELY LIVER METASTASIS. SHE HAD SIGNIFICANT ABDOMINAL DISEASE. CURRENTLY ON CARBO/TAXOL. DR WANTING CT SCANS TO ASSESS RESPONSE TO TREATMENT.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

There is radiologic evidence of non-resolving pneumonia after at least 4 weeks of treatment.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has not been established.; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has not been established.; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Unknown; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; It is not known if there has been any treatment or conservative therapy.; Unknown

We are going to evaluate her response with repeat CAT scans in about 10 days.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

will fax info; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Will fax records.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.

UNKNOWN; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a Follow-up to a previous angiogram or MR angiogram.; There are new signs or symptoms indicative of a dissecting aortic aneurysm.; Yes, this is a request for a Chest CT Angiography.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

RESTAGING AFTER CHEMO PRIOR TO STEM CELL TRANSPLANT.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; No, the patient did not have six weeks of Chiropractic care related to this episode.; Patient has prostate cancer, non small cell lung cancer, and melanoma now with pain to his left side, spine, shoulder, biceps, and elbow.

PATIENT HAS METASTATIC TRIPLE NEGATIVE BREAST CANCER- SHE IS CURRENTLY ON KEYTRUDA. DR. KOCH REQUESTING RESTAGING CT SCANS AND MRI TO SEE WHERE WE ARE AND WHETHER TO PROCEED WITH KEYTRUDA OR TRADITIONAL CHEMOTHERAPY. PATIENT ALSO RECEIVING XGEVA MONTH; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

RESTAGING AFTER CHEMO PRIOR TO STEM CELL TRANSPLANT; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.  
The patient is presenting new symptoms.; This study is being ordered for follow-up.; This is a request for cervical spine MRI; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; Known Tumor with or without metastasis

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has not been established.; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

It is not known if the study is for follow up or staging.; The patient is undergoing active treatment for cancer.; This is a request for a thoracic spine MRI.; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; The study is being ordered due to known tumor with or without metastasis.

PATIENT HAS METASTATIC TRIPLE NEGATIVE BREAST CANCER- SHE IS CURRENTLY ON KEYTRUDA. DR. KOCH REQUESTING RESTAGING CT SCANS AND MRI TO SEE WHERE WE ARE AND WHETHER TO PROCEED WITH KEYTRUDA OR TRADITIONAL CHEMOTHERAPY. PATIENT ALSO RECIEVING XGEVA MONTH; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

referring physician scheduled a a pet ct that showed spine metastases. need a pre op mri of Lumbar and Thoracic spine so treatment can get started.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

RESTAGING AFTER CHEMO PRIOR TO STEM CELL TRANSPLANT; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

RESTAGING MULTIPLE MYELOMA POST CHEMOTHERAPY; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

The patient does not have any neurological deficits.; It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; There has not been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Patient c/o right sided "achy" pain in arm and side

The patient does not have any neurological deficits.; The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; There has not been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; DCIS (ductal carcinoma in situ) of breast; DCIS (ER, PR +ve, HER 2 negative) S/p Bilateral skin sparing mastectomy comes for follow-up. She had a CT with a sclerotic focus at T5. MRI showed enostosis of T5 but no evidence of tumor activity. ; She presen

The patient is presenting new symptoms.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; This is a request for a thoracic spine MRI.; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; The study is being ordered due to known tumor with or without metastasis.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for staging.; This is a request for a thoracic spine MRI.; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; The study is being ordered due to known tumor with or without metastasis.

Upper lung emphysematous change.&#x0D; Progressive patchy density in the left mid and posterior mid to lower&#x0D; lung could be areas of infiltrate. Neoplastic involvement not&#x0D; excluded. Right anterior chest wall sebaceous cyst. No definite rib&#x0D; fracture but does ; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

He is having trouble sleeping. Pt takes medication but is unresponsive to medications.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.

new complaints of low back pain, imaging recommended to r/o compression; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

PATIENT HAS BEEN EXPERIENCING SEIZURES WITH INCREASED BACK PAIN. KNOWN CANCER WITH METS.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

patient has known Stage IIIA breast cancer.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Do not know initial onset, but she did present with similar complaints during her 03/2016 office visit; There has been treatment or conservative therapy.; Lower back pain and right hip pain.; She has been getting physical therapy since about the end of 05/2016.

PATIENT HAS METASTATIC TRIPLE NEGATIVE BREAST CANCER- SHE IS CURRENTLY ON KEYTRUDA. DR. KOCH REQUESTING RESTAGING CT SCANS AND MRI TO SEE WHERE WE ARE AND WHETHER TO PROCEED WITH KEYTRUDA OR TRADITIONAL CHEMOTHERAPY. PATIENT ALSO RECEIVING XGEVA MONTH; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

referring physician scheduled a a pet ct that showed spine metastases. need a pre op mri of Lumbar and Thoracic spine so treatment can get started.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

RESTAGING AFTER CHEMO PRIOR TO STEM CELL TRANSPLANT; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for Known or suspected tumor with or without metastasis

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Recurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has not been established.; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Upper lung emphysematous change.; Progressive patchy density in the left mid and posterior mid to lower.; lung could be areas of infiltrate. Neoplastic involvement not.; excluded. Right anterior chest wall sebaceous cyst. No definite rib.; fracture but does ; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Pain, rectal tear and abscess; This study is being ordered due to known or suspected infection.; "The ordering physician is a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

Neuropathy in hands and feet decreased concentration; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

RESTAGING AFTER CHEMO PRIOR TO STEM CELL TRANSPLANT.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

RESTAGING MULTIPLE MYELOMA POST CHEMOTHERAPY; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

This is a request for a Pelvis MRI.; The request is for suspicion of tumor, mass, neoplasm, or metastatic disease?

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has not been established.; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is a preoperative or recent postoperative evaluation.

RESTAGING AFTER CHEMO PRIOR TO STEM CELL TRANSPLANT; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

RESTAGING MULTIPLE MYELOMA; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

The requested study is a Shoulder MRI.; Study being ordered for suspicious mass/tumor/metastasis.; The patient has had recent plain films of the shoulder.; The plain films were not normal.

The requested study is a Shoulder MRI.; Study being ordered for suspicious mass/tumor/metastasis.; There are physical findings (palpable mass) of a suspicious mass or known primary site of cancer.; The patient has not had a recent bone scan.; The patient has not had recent plain films of the shoulder.; The patient has not had a recent CT of the shoulder.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

will fax info; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;

This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is not a history of lower extremity joint or long bone trauma or injury.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

6 month follow up treatment; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

This is a request for a Knee MRI.; No, the patient did not have a recent ultrasound of the knee.; The patient has not had recent plain films of the knee.; There are physical findings (palpable mass) of a suspicious mass or known primary site of cancer.; The patient has not had a recent bone scan.; ; Suspicious Mass or Suspected Tumor/ Metastasis

This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Suspected meniscus, tendon, or ligament injury

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Locking

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Instability; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; faxing rec; There has been treatment or conservative therapy.; ; faxing rec

patient has known Stage IIIA breast cancer.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Do not know initial onset, but she did present with similar complaints during her 03/2016 office visit; There has been treatment or conservative therapy.; Lower back pain and right hip pain.; She has been getting physical therapy since about the end of 05/2016. This is a requests for a hip MRI.; The member has failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.

This is a requests for a hip MRI.; This study is being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient has a documented limitation of their range of motion.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

; This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; No, there is not an abdominal and pelvic or retroperitoneal mass that has been confirmed.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

NASH; This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; It is not known if there is evidence of organ enlargement on ultrasound, plain film, or IVP.

Pancreatic Cancer Patient has went through chemo Currently restaging; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Patient has elevated LFT .; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis

PATIENT HAS METASTATIC TRIPLE NEGATIVE BREAST CANCER- SHE IS CURRENTLY ON KEYTRUDA. DR. KOCH REQUESTING RESTAGING CT SCANS AND MRI TO SEE WHERE WE ARE AND WHETHER TO PROCEED WITH KEYTRUDA OR TRADITIONAL CHEMOTHERAPY. PATIENT ALSO RECIEVING XGEVA MONTH; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

restage renal cell cancer after completion of chemotherapy; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Restaging after treatment; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There is no known prostate cancer with a PSA greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; Yes, there has been a recent abdominal CT scan.; No, this is not a repeat of a CT of the abdomen within 6 weeks.

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; Yes, this is a request for follow up to a known tumor or abdominal cancer.

This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; There is a known or a strong suspicion of kidney or ureteral stones.

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.

This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is evidence of organ enlargement on ultrasound, plain film, or IVP. This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Dec 2015; There has been treatment or conservative therapy.; Pt has symptoms and this is a f/u of a tumor; Pt had antibiotics and left inguinal orchiectomy

; This is a request for an abdomen-pelvis CT combination.; The reason for the study is known tumor.; This is a request for evaluation of prostate cancer.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient is male.; The patient had a prior Abdomen/Pelvis CT.

; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were abnormal.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.

; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

; This study is being ordered for Inflammatory/ Infectious Disease.; ; It is not known if there has been any treatment or conservative therapy.;

; This study is being ordered for Inflammatory/ Infectious Disease.; 01012016; There has been treatment or conservative therapy.; inflammation in lungs and fatty liver; xarelto

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ; Describe treatment / IRON conservative therapy here - or Type In Unknown If No Info Given

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; faxing rec; There has been treatment or conservative therapy.; ; faxing rec

; This study is being ordered for Vascular Disease.; ; There has been treatment or conservative therapy.; ;

1. Findings in the abdomen and pelvis are worrisome for early carcinomatosis. If clinically indicated, one of the retroperitoneal lymph nodes could be biopsied with CT guidance.; 2. Groundglass opacity in the right upper lobe of the lung could be due to; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

3mo surveillance follow up; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

61 y.o. male with a hx of metastatic bladder cancer and being followed by MONC. His disease progressed on Carbo Gemzar and later Carbo Taxol. He is currently taking Keytruda. &#x0D; &#x0D; He is s/p cysto + bladder mass recession with a greenlight on 4/15/16 for a ; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Cancer has metastasized to lungs, abdominal and pelvic findings of the cancer. The cancer is considered thymicneuroendocrine tumor. Suspicious lymph nodes developing in left side posterior triangle. Findings suspicious in upper thoracic vertebrae continue ; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Change in clinical status; restaging.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Enlarging tumor in the tumor bed right sided nephrectomy. Hyperdense cyst associated with the left kidney and small calyceal calculus associated with the lower pole of the left kidney remains stable.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

eval for effectiveness of treatment .; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Evaluate patient with Breast Cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Evaluation for known metastatic disease.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Evaluation of patient with Breast Cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Evaluation of patient with Breast Cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Evaluation of patient with Gastroesophageal Cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Evaluation of patient with Lung Cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Evaluation of patient with Lung Cancer.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Evaluation of patient with malignant neoplasm of ovary.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Evaluation of patient with malignant neoplasm of the bladder.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Evaluation of patient with malignant neoplasm of the right lung and intra-abd nodes.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Evaluation of patient with Melanoma.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Evaluation of patient with Neuroendocrine Carcinoma.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Evaluation of patient with pulmonary disease.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/5/15; There has not been any treatment or conservative therapy.; Swelling

Evaluation of patient with stage IV Bladder Cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Evaluation of pt with cervical cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

f/u to see if Tx needs to be changed; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

fatigue, night sweats, 18 pound weight loss, axillary fullness with tenderness; This study is being ordered for Inflammatory/ Infectious Disease.; 2008; There has not been any treatment or conservative therapy.; abdominal pain, enlarged lymph nodes, growing pain

faxing rec.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

faxing rec.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

faxing rec; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

faxing rec; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

faxing rec; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

faxing rec; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Faxing records.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

faxing records.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

faxing records.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

faxing records.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

faxing records; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

faxing records; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

faxing records; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Follow up scans for her breast ca with mets to the brain. Last scans showed changes.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Follow up scans to evaluate disease response to current treatment.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Follow up scans to evaluate disease.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Follow up scans to evaluate disease.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

follow up scans to imaging that revealed progressive disease and with mets to brain; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months. follow up to chemo&#x0D; last CT A/P showed new cystic lesion in spleen and liver lesions; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

FOLLOWUP POST CHEMO; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

For further monitoring of deteriorating condition.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

He had more symptoms following the last treatment than usual consisting of weakness and slight nausea without vomiting. He has also been more short of breath until the last few days, and that seems to have improved. He has had occasional upper abdominal d; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

HODKINS LYMPHOMA RESTAGING; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Known Stage IV gallbladder cancer. Follow up scans to evaluate disease and also pneumonia noted on previous CT Chest.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Melanoma evaluation; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

METASTIC ANDROGEN SENSITIVE PROSTATE CA. PT HAD 6 CYCLES OF TAXOTERE. PT ASLO HAD 3 DOSES OF PROVENGE. DR WANTING FOLLOW-UP SCANS.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; It is unknown if imaging studies have been performed on the member in the past 3 months.

Monitoring patient undergoing clinical trial therapy.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

New 3.9 mm right upper lobe pulmonary nodule. Stable right hilar and AP window lymph nodes. Right external iliac lymph node slightly smaller. Enlarging right inguinal lymph node, concerning for progression. PET shows Hypermetabolic right external ilia; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

none; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

On 5/2/16 MRI brain shows decrease in size and surrounding edema of the enhancing left occipital lobe lesion, CT shows decrease in size of the left axillary lymph node and a left lower lobe pulmonary nodule, stable mediastinal, hilar, and subcarinal lymph; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.  
PATIENT HAS BEEN EXPERIENCING SEIZURES WITH INCREASED BACK PAIN. KNOWN CANCER WITH METS.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Patient has known colon cancer. C77.2, C18.7; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.

Patient has received 1 cycle of chemo. Chemo on hold due to platelet count. Need restaging scans to check the cancer response to chemo.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Patient has rectosigmoid cancer and has completed chemotherapy on 4-14-2016. Requires CT scan of abdomen pelvis and chert with contrast to evaluate the effectiveness of the therapy.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Patient is here for yearly check up of Chronic Lymphocytic Leukemia; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.  
patient with known CLL Rai Stage III. Scans to evaluate response to current treatment.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

post chemo eval; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

post chemo/xrt and surgery &#x0D; shoulder and chest pain; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

pt had recurrence of breast cancer in April of 2015 and completed six cycles of Gemzar/Abraxane in December 2015. CT scan in January of 2016 revealed increase in prominence of the right hilum lymph node chains and prevascular lymph node chains. CT scans a; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Pt receiving treatment and we are looking to make sure that this continues to be effective.The last studies were done 5/2/16.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

rash on chest, F/O for restaging.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

rash; right leg calf area- present approx 5 months &#x0D; dysphagia while lying down&#x0D; shortness of breath, cough productive with clear phlegm &#x0D; Reports bilateral LE edema, feels like my heart beats fast sometimes &#x0D; diarrhea&#x0D; night sweats&#x0D; bone pain and R knee ; This study is being ordered for Inflammatory/ Infectious Disease.; Patient with History of Hep C&#x0D; Reactive results from 2/22/16; There has not been any treatment or conservative therapy.; fatigue/lethargy

Reevaluation of chemo treatment.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

restage lymphoma after completion of chemotherapy; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

restaging after chemo; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

restaging chemo therapy; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

RESTAGING LEUKEMIA; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

restaging lymphoma; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

restaging post radiation to see if treatment needs to be continued or changed; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

restaging to see if treatment needs to be changed or continued; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

RESTAGING; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

RESTAGING OF KNOWN RECTAL CANCER; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Scans to establish new baseline; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

She is having ABD pain and cramps, diarrhea; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Stage 1 colon cancer left renal mass; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

STAGE II TRIPLE NEG BREAST CA. STATUS POST BILAT MASTECTOMY FOLLOWED BY CHEMO. PT HAVING SEVERE PAIN TO RT UPPER ARM/LT LOWER EXT. PT ALSO HAVING WORSENING SOB.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms do not indicate that the cancer may be present or reoccurring.

STAGE IV OVARIAN CA: CT SCAN REVEALED A LIKELY LIVER METASTASIS. SHE HAD SIGNIFICANT ABDOMINAL DISEASE. CURRENTLY ON CARBO/TAXOL. DR WANTING CT SCANS TO ASSESS RESPONSE TO TREATMENT.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; The reason for the study is known tumor.; This is a request for evaluation of prostate cancer.; There is a PSA greater than 10.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient is male.; The patient did not have a prior Abdomen/Pelvis CT.

This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient completed a course of chemotherapy or radiation therapy within the past 90 days.

This is a request for an abdomen-pelvis CT combination.; The requested studies are being ordered for known or suspected blood clot, thrombosis, or stenosis and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.; Vascular disease

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Hematuria.; Other

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Lymphadenopathy.; Other

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of unexplained weight loss of greater than 10% body weight in 1 month; Other

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; rectal bleeding and abdominal pain

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Unknown

This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone

This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; patient with known pancreatic mass seen on CT scan 10-7-2015.; Surveillance.

This is a request for an abdomen-pelvis CT combination.; This is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis and the patient is undergoing active treatment.; Known Tumor, Cancer, Mass, or R/O metastases

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is a request for initial staging of a known tumor other than prostate.; Known Tumor, Cancer, Mass, or R/O metastases

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There has not been a recent abdominal and or pelvis CT scan.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; yes, there is a palpable or observed abdominal mass.

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is an abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; No, there is not a palpable or observed abdominal mass.

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; No, there is not a palpable or observed abdominal mass.

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; No, there is not a palpable or observed abdominal mass.;

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; No, there is not a palpable or observed abdominal mass.; 1 year follow up scan to evaluate known colon cancer.

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; No, there is not a palpable or observed abdominal mass.; 11/24/15 U/S of Testicles and Scrotum&#x0D; 1. There is a left testicular mass consistent with malignancy. This&#x0D; was discussed with Dr. Scroggins.&#x0D; 2. Small right hydrocele.&#x0D; &#x0D; 02/15/2016 CT AB/PEL&#x0D; 1. Positive response to therapy with marked decrease in size

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; No, there is not a palpable or observed abdominal mass.; faxing rec

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; No, there is not a palpable or observed abdominal mass.; Patient with known Stage IV Breast cancer with anal mets. Complaining of RLQ pain, CT to investigate.

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; No, there is not a palpable or observed abdominal mass.; unknown

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has not been established.; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has not been established.; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

Unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Unknown; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; It is not known if there has been any treatment or conservative therapy.; Unknown

We are going to evaluate her response with repeat CAT scans in about 10 days.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Will fax records.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

CT ON 4/26/16 SHOWS NODULAR THICKENING OF THE ENTIRE LEFT ADRENAL GLAND. ABDOMINAL MRI RECOMMENDED FOR FURTHER CHARACTERIZATION.; This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; The abnormality found on a previous CT, MRI or Ultrasound was not in the liver, kidney, pancreas or spleen.

Evaluation of patient with liver cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

faxing rec.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Pt had an abnormal ct; This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A liver abnormality was found on a previous CT, MRI or Ultrasound.; There is NO suspicion of metastasis.

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is not presenting new symptoms.; The patient has had 3 or fewer follow-up abdomen MRIs.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon.";

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is presenting new symptoms.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon.";

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is presenting new symptoms.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for follow-up.; The patient had chemotherapy, radiation therapy or surgery in the last 3 months.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A liver abnormality was found on a previous CT, MRI or Ultrasound.; There is suspicion of metastasis.

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.;

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; Liver function test elevated'&#x0D; ferritin elevated'&#x0D; Fatigue&#x0D; Abdonminal&#x0D; Check to see if liver is storing iron,excess iron

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has not been established.; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

39 y/o female with extremely dense breast tissue on imaging and moderate dense breast tissue on clinical exam. she is experencing right upper outer quadrant breast pain and she has a family history of breast cancer in mother at age 52.; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

follow up scans for lymphoma with radiation to the chest... last scans in 10/15; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.

This is a request for Breast MRI.; This study is being ordered as a screening examination following genetic testing for breast cancer.; Yes, the patient have a known mutation such as BRCA1, BRCA2, PTEN or TP53.

This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There is a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; Yes, this is a confirmed breast cancer.; Yes, the results of this MRI (size and shape of tumor) affect the patient's further management.

This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; Yes, this is an individual who has known breast cancer in the contralateral (other) breast.

This is a request for Breast MRI.; This study is being ordered for known breast lesions.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this is not a confirmed breast cancer.; No, this patient does not have axillary node adenocarcinoma.; Yes, there are anatomic factors (deformity or extreme density) that make a simple mammogram impossible.; It is unknown if there are benign lesions in the breast associated with an increased cancer risk.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

RESTAGING AFTER CHEMO PRIOR TO STEM CELL TRANSPLANT.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

RESTAGING MULTIPLE MYELOMA; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Restaging; This is a request for an MRI Bone Marrow.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; "There is a change in cardiac signs or symptoms (shortness of breath, etc.)."; The last MUGA scan was performed more than 3 months ago.;

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; "There is a change in cardiac signs or symptoms (shortness of breath, etc.)."; The last MUGA scan was performed more than 3 months ago.; restaging after chemo; to monitor heart stress.

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; "There is a change in cardiac signs or symptoms (shortness of breath, etc.)."; The patient has not had a previous MUGA scan.; RESTAGING MULTIPLE MYELOMA POST CHEMOTHERAPY

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; "There is not a change in cardiac signs or symptoms (shortness of breath, etc.)."; The patient will be undergoing more chemotherapy.; The last MUGA scan was performed more than 3 months ago.;

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; "There is not a change in cardiac signs or symptoms (shortness of breath, etc.)."; The patient will be undergoing more chemotherapy.; The last MUGA scan was performed more than 3 months ago.; Breast cancer, undergoing chemotherapy.

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; "There is not a change in cardiac signs or symptoms (shortness of breath, etc.)."; The patient will be undergoing more chemotherapy.; The last MUGA scan was performed more than 3 months ago.; Clinical Stage II breast cancer Chemotherapy regimen TCH was completed on 5/24/2016 for neoadjuvant chemo. Bilateral Mastectomy with reconstruction is being planned. 11 more cycles of Herceptin every three week after surgery.

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; "There is not a change in cardiac signs or symptoms (shortness of breath, etc.)."; The patient will be undergoing more chemotherapy.; The last MUGA scan was performed more than 3 months ago.; Patient is taking Herceptin a cardiotoxic drug

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; "There is not a change in cardiac signs or symptoms (shortness of breath, etc.)."; The patient will be undergoing more chemotherapy.; The last MUGA scan was performed more than 3 months ago.; Patient is undergoing chemotherapy and has CHF

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; "There is not a change in cardiac signs or symptoms (shortness of breath, etc.)."; The patient will be undergoing more chemotherapy.; The last MUGA scan was performed more than 3 months ago.; unknown

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; "There is not a change in cardiac signs or symptoms (shortness of breath, etc.)."; The patient will be undergoing more chemotherapy.; The patient has not had a previous MUGA scan.;

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; "There is not a change in cardiac signs or symptoms (shortness of breath, etc.)."; The patient will be undergoing more chemotherapy.; The patient has not had a previous MUGA scan.; Elevated alkaline phosphatase

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; "There is not a change in cardiac signs or symptoms (shortness of breath, etc.)."; The patient will be undergoing more chemotherapy.; The patient has not had a previous MUGA scan.; Enter answer here - or Type In Unknown If No IDoug had a second colon cancer diagnosed in July 2007. The other was many years ago. He had surgery and adjuvant chemotherapy. &#x0D; &#x0D; Doug has recurrent ureteral cancer metastatic to bone. This was all origin

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; "There is not a change in cardiac signs or symptoms (shortness of breath, etc.)."; The patient will be undergoing more chemotherapy.; The patient has not had a previous MUGA scan.; unknown  
This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; The last MUGA scan was performed within the last 3 months.;

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has not been initiated or completed.; Chemotherapy is planned.;

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has not been initiated or completed.; Chemotherapy is planned.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has not been initiated or completed.; Chemotherapy is planned.; Also ordered a Pet scan, this is before chemo that may cause heart problems  
This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has not been initiated or completed.; Chemotherapy is planned.; Clearance to start chemo

This is a request for a MUGA scan.; This study is NOT being ordered for Chemotherapy, Known Cardiomyopathy/ Myocarditis, Suspected Cardiomyopathy/ Myocarditis, or Congestive Heart Failure.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Evaluation of patient with Rectal Cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

faxing records; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

follow up to chemo&#x0D; last CT A/P showed new cystic lesion in spleen and liver lesions; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

hypermetabolic left chest wall lesion concerning for metastatic disease. Mass increased in size&#x0D; C2 vertebral enhancing lesion; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Initial staging workup for newly diagnosed breast cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Newly diagnosed rectosigmoid cancer, scans for initial staging workup.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

One year follow up scans for monitoring malignant neoplasm of lower quadrant of right breast with secondary malignant neoplasm of the brain.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

PATIENT LAST SCANS SHOWED WORSENING DISEASE IN NECK AND LOWER PULMONARY NODULE AS WELL AS LESIONS IN THE LIVER SIGNIFICANTLY WORSE. PATIENT CURRENTLY ON CARBOPLATIN/ABRAXANE AND DR. KOCH WANTING TO RESTAGE. LAST MRI SHOWED A NEW 2MM LESION- CONSISTENT WITH; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on a diagnostic/lab test.; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lymphoma or Myeloma.; A lab test other than an SPEP suggests their need for ordering this study.

This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on a more than 1 of the following; diagnostic test, imaging study, or biopsy.; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Ovarian or Esophageal Cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on an imaging study.; This study is being ordered to establish a cancer diagnosis.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.; 1 PET Scans has already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Breast Cancer.; This is for evaluation of axillary lymph nodes.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Breast Cancer.; This is NOT for an evaluation of axillary lymph nodes.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Colo-rectal Cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Lung Cancer.; 1 PET Scans has already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Lymphoma or Myeloma.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Melanoma.; This is NOT for evaluation of regional lymph nodes.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Breast Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Breast Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; 3 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Breast Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; More than 4 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Breast Cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; 1 PET Scans has already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Breast Cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Breast Cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Breast Cancer.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new signs or symptoms.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Colo-rectal Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Colo-rectal Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; More than 4 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Colo-rectal Cancer.; The patient is experiencing new signs, symptoms indicating a reoccurrence of cancer or a rising CEA.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Head/Neck Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; The patient does NOT have Thyroid or Brain cancer.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Head/Neck Cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; The patient does NOT have Thyroid or Brain cancer.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lung Cancer.; It is unknown if the patient has been diagnosed with small cell or non small cell lung cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lung Cancer.; The patient has been diagnosed with NON small lung cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; 1 PET Scans has already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lung Cancer.; The patient has been diagnosed with NON small lung cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; 3 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lung Cancer.; The patient has been diagnosed with NON small lung cancer.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new singns or symptoms.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lung Cancer.; The patient has been diagnosed with small cell lung cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient completed a course of treatment initiated within the last 8 weeks.; 1 PET Scans has already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient completed a course of treatment initiated within the last 8 weeks.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new signs or symptoms.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Melanoma.; The patient completed a course of treatment initiated within the last 8 weeks.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Ovarian or Esophageal Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; 2 PET Scans have already been performed on this patient for this cancer. Will fax records.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months. Evaluate patient for lung cancer.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Evaluate solitary pulmonary nodule prior to surgery.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. Evaluation of patient with an enlarging pulmonary nodule with history of renal cell cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Evaluation of patient with Breast Cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. Evaluation of patient with Cervical Cancer.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Evaluation of patient with Colon Cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. Evaluation of patient with Esophageal Cancer.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Evaluation of patient with Head and Neck Cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Evaluation of patient with history of Breast Cancer.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Evaluation of patient with liver cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Evaluation of patient with Lung Cancer.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Evaluation of patient with malignant neoplasm of left breast; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Evaluation of patient with malignant neoplasm of parotid gland.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Evaluation of patient with malignant neoplasm of the right lung and intra-abd nodes.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Evaluation of patient with Ovarian Cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Evaluation of patient with pulmonary nodules.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 05/23/14; There has not been any treatment or conservative therapy.; Asymptomatic

Evaluation of patient with Rectal Cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Evaluation of patient with stage IV Breast Cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Evaluation of patient with stage IV Lung Cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Evaluation of patient with stage IV Lung Cancer.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

faxed rec.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

faxed rec; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Faxed records.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

faxing rec.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

faxing rec.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

faxing rec.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

faxing rec; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

faxing rec; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Faxing records.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Faxing records.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

faxing records.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

faxing records.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

faxing records; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

faxing records; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Lung Cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

non small cell lung cancer, initial staging; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

none; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Non-small cell carcinoma of right lung; Completed XRT/CT and stable, plan close follow up as RUL activity increased, however no change in size. His shoulder pain resolved. Plan RTC in 3 months with scans.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Patient is undergoing Chemo Therapy Tx and she is being restaged and to see if it has metasisized any further and to see if she is responding to treatment; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

restaging of cancer after chemo; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.; 1 PET Scans has already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was NOT identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.

This is a request for a Tumor Imaging PET Scan; It is unknown why the study is being ordered.; This study is being requested for Breast Cancer.

This is a request for a Tumor Imaging PET Scan; It is unknown why the study is being ordered.; This study is being requested for Colo-rectal Cancer.

This is a request for a Tumor Imaging PET Scan; It is unknown why the study is being ordered.; This study is being requested for Head/Neck Cancer.; The patient does NOT have Thyroid or Brain cancer.

This is a request for a Tumor Imaging PET Scan; It is unknown why the study is being ordered.; This study is being requested for Lung Cancer.

This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on a more than 1 of the following; diagnostic test, imaging sstudy, or biopsy.; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lymphoma or Myeloma.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Head/Neck Cancer.; This study is being requested for Head/Neck Cancer.; The patient does NOT have Thyroid or Brain cancer.; The patient does NOT have Thyroid or Brain cancer.; This would be the first PET Scan performed on this patient for this cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Breast Cancer.; It is unknown if this is for an evaluation of axillary lymph nodes.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Breast Cancer.; This is for evaluation of axillary lymph nodes.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Breast Cancer.; This is NOT for an evaluation of axillary lymph nodes.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Colo-rectal Cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Head/Neck Cancer.; The patient does NOT have Thyroid or Brain cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Head/Neck Cancer.; This is NOT being ordered to distinguish tumor(s) from treatment related tissue necrosis.; The patient has Brain cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Lymphoma or Myeloma.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Melanoma.; This is for evaluation of regional lymph nodes.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Melanoma.; This is NOT for evaluation of regional lymph nodes.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Ovarian or Esophageal Cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Soft Tissue Sarcoma, Pancreatic or Testicular Cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for Cervical Cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Breast Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; 1 PET Scans has already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Breast Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Breast Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; 3 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Breast Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; 4 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Breast Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; More than 4 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Breast Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Breast Cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; 1 PET Scans has already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Breast Cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Breast Cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; 3 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Breast Cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Breast Cancer.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new signs or symptoms.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Colo-rectal Cancer.; It is unknown if the patient completed a course of treatment initiated in the last 8 weeks or are experiencing new signs, symptoms or a rising CEA.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Colo-rectal Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; 1 PET Scans has already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Colo-rectal Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Colo-rectal Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; 3 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Colo-rectal Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; 4 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Colo-rectal Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; More than 4 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Colo-rectal Cancer.; The patient is experiencing new signs, symptoms indicating a reoccurrence of cancer or a rising CEA.; 1 PET Scans has already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Colo-rectal Cancer.; The patient is experiencing new signs, symptoms indicating a reoccurrence of cancer or a rising CEA.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Colo-rectal Cancer.; The patient is experiencing new signs, symptoms indicating a reoccurrence of cancer or a rising CEA.; More than 4 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Colo-rectal Cancer.; The patient is experiencing new signs, symptoms indicating a reoccurrence of cancer or a rising CEA.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Colo-rectal Cancer.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new signs, symptoms or a rising CEA.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Head/Neck Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; The patient does NOT have Thyroid or Brain cancer.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Head/Neck Cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; The patient does NOT have Thyroid or Brain cancer.; 1 PET Scans has already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Head/Neck Cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; The patient does NOT have Thyroid or Brain cancer.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Head/Neck Cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; The patient does NOT have Thyroid or Brain cancer.; It is unknown how many PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Head/Neck Cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; The patient does NOT have Thyroid or Brain cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Head/Neck Cancer.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new signs or symptoms.; The patient does NOT have Thyroid or Brain cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lung Cancer.; It is unknown if the patient has been diagnosed with small cell or non small cell lung cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lung Cancer.; The patient has been diagnosed with NON small lung cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; 1 PET Scans has already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lung Cancer.; The patient has been diagnosed with NON small lung cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lung Cancer.; The patient has been diagnosed with NON small lung cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lung Cancer.; The patient has been diagnosed with NON small lung cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lung Cancer.; The patient has been diagnosed with NON small lung cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; 3 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lung Cancer.; The patient has been diagnosed with NON small lung cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lung Cancer.; The patient has been diagnosed with NON small lung cancer.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new signs or symptoms.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lung Cancer.; The patient has been diagnosed with small cell lung cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; It is unknown if the patient completed a course of treatment initiated in the last 8 weeks or are experiencing new signs or symptoms.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient completed a course of treatment initiated within the last 8 weeks.; 1 PET Scans has already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient completed a course of treatment initiated within the last 8 weeks.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient completed a course of treatment initiated within the last 8 weeks.; 3 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient completed a course of treatment initiated within the last 8 weeks.; It is unknown how many PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient completed a course of treatment initiated within the last 8 weeks.; More than 4 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient completed a course of treatment initiated within the last 8 weeks.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; 1 PET Scans has already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; More than 4 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new signs or symptoms.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Melanoma.; The patient completed a course of treatment initiated within the last 8 weeks.; 1 PET Scans has already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Melanoma.; The patient completed a course of treatment initiated within the last 8 weeks.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Melanoma.; The patient completed a course of treatment initiated within the last 8 weeks.; 4 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Melanoma.; The patient completed a course of treatment initiated within the last 8 weeks.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Melanoma.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; 1 PET Scans has already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Melanoma.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Melanoma.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new signs or symptoms.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Ovarian or Esophageal Cancer.; It is unknown if the patient completed a course of treatment initiated in the last 8 weeks or are experiencing new signs or symptoms.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Ovarian or Esophageal Cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; 1 PET Scans has already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Ovarian or Esophageal Cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Ovarian or Esophageal Cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Ovarian or Esophageal Cancer.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new signs or symptoms.  
This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Soft Tissue Sarcoma, Pancreatic or Testicular Cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Breast Cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lung Cancer.

This is a request for a Tumor Imaging PET Scan; This study is being requested for Head/Neck Cancer.; It is unknown if the patient has Thyroid or Brain cancer.  
This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is grade III (3) or greater.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient does not have a history of a recent heart attack or hypertensive heart disease.

; This request is for a Low Dose CT for Lung Cancer Screening (S8032); This patient has NOT had a Low Dose CT for Lung Cancer Screening (S8032) in the past 11 months.; The patient is 54 years old or younger.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; Patients who are NOT between the ages of 55 and 81 years of age do not meet the criteria for lung cancer screening.

This request is for a Low Dose CT for Lung Cancer Screening (S8032); This patient has NOT had a Low Dose CT for Lung Cancer Screening (S8032) in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.

Neuropathy in hands and feet decreased concentration; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Radiology Services Denied Not Medically Necessary

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

ANEMIA, WEIGHT LOSS, HYPERCALCEMIA; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

Evaluation of patient with malignant neoplasm of the esophagus.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

faxing records; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

ANEMIA, WEIGHT LOSS, HYPERCALCEMIA; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

Radiology Services Denied Not Medically Necessary

Evaluation of patient recently diagnosed with diffuse large-b cell lymphoma.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

Evaluation of patient with Head and Neck Cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. Restaging for cancer; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Radiology Services Denied Not Medically Necessary

Radiology Services Denied Not Medically Necessary

Evaluation of patient with Breast Cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

Evaluation of patient with malignant neoplasm of the lung with secondary malignant neoplasm of the brain.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

faxing records; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has not been established.; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

Radiology Services Denied Not Medically Necessary

"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

Radiology Services Denied Not Medically Necessary

"The ordering physician is not a surgeon, pulmonologist, or cardiologist."; There is no radiologic evidence of mediastinal widening.; ; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.

Radiology Services Denied Not Medically Necessary

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

Radiology Services Denied Not Medically Necessary

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.;

Radiology Services Denied Not Medically Necessary

&lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; ; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;

Radiology Services Denied Not Medically Necessary

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;; Describe treatment / IRON conservative therapy here - or Type In Unknown If No Info Given

Radiology Services Denied Not Medically Necessary

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has not been any treatment or conservative therapy.;

Radiology Services Denied Not Medically Necessary

ANEMIA, WEIGHT LOSS, HYPERCALCEMIA; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

Evaluate patient for lung cancer.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

Evaluation of patient recently diagnosed with diffuse large-b cell lymphoma.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

Evaluation of patient with Breast Cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

Evaluation of patient with Cervical Cancer.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

Evaluation of patient with Colon Cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

Evaluation of patient with Esophageal Cancer.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

Evaluation of patient with Head and Neck Cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

Evaluation of patient with history of Breast Cancer.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

Evaluation of patient with Lung Cancer.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

Evaluation of patient with malignant neoplasm of left breast; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

Evaluation of patient with malignant neoplasm of parotid gland.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

Evaluation of patient with malignant neoplasm of the esophagus.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

Evaluation of patient with malignant neoplasm of the lung with secondary malignant neoplasm of the brain.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

Evaluation of patient with Ovarian Cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

Evaluation of patient with Rectal Cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

Evaluation of patient with stage IV Breast Cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

Evaluation of patient with stage IV Lung Cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

Evaluation of patient with stage IV Lung Cancer.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

faxed rec.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

faxed rec; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

faxing rec.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

faxing rec.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

faxing rec; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

Radiology Services Denied Not Medically Necessary

faxing rec; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

faxing rec; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

faxing records.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

faxing records.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

faxing records; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

faxing records; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

Lung Cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

none; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

Non-small cell carcinoma of right lung; Completed XRT/CT and stable, plan close follow up as RUL activity increased, however no change in size. His shoulder pain resolved. Plan RTC in 3 months with scans.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

pt had abnormal mri and has abnormal blood work; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; weight loss unexplained, night sweats, abnormal labs and pancytopenia; There has not been any treatment or conservative therapy.; weight loss pancytopenia and night sweats

Radiology Services Denied Not Medically Necessary

Restaging for cancer; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Radiology Services Denied Not Medically Necessary

restaging of cancer after chemo; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

to rule out early lung cancer.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; There has not been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;

Radiology Services Denied Not Medically Necessary

UNKNOWN; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Radiology Services Denied Not Medically Necessary

; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known or Suspected Congenital Abnormality.; The abnormality is of a cardiac nature.; There is a known or suspected coarctation of the aorta.; Yes, this is a request for a Chest CT Angiography.

Radiology Services Denied Not Medically Necessary

; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known or Suspected Congenital Abnormality.; The abnormality is of a cardiac nature.; There is no known or suspected coarctation of the aorta.; There is another type of arch anomaly.; Yes, this is a request for a Chest CT Angiography.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.;

Radiology Services Denied Not Medically Necessary

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Radiology Services Denied Not Medically Necessary

faxing records; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Radiology Services Denied Not Medically Necessary

faxing records; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

faxing records; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

none; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

Non-small cell carcinoma of right lung; Completed XRT/CT and stable, plan close follow up as RUL activity increased, however no change in size. His shoulder pain resolved. Plan RTC in 3 months with scans.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

pt had abnormal mri and has abnormal blood work; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; weight loss unexplained, night sweats, abnormal labs and pancytopenia; There has not been any treatment or conservative therapy.; weight loss pancytopenia and night sweats

Radiology Services Denied Not Medically Necessary

restaging of cancer after chemo; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; pt complaining of abdominal pain and palpable mass on physical exam

Radiology Services Denied Not Medically Necessary

This is a request for an abdomen-pelvis CT combination.; This is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis and the patient is undergoing active treatment.; Known Tumor, Cancer, Mass, or R/O metastases

Radiology Services Denied Not Medically Necessary

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

Radiology Services Denied Not Medically Necessary

to rule out early lung cancer.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; There has not been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;

Radiology Services Denied Not Medically Necessary

unknown; This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient did NOT have an abnormal abdominal Ultrasound, CT or MR study.

Radiology Services Denied Not Medically Necessary

UNKNOWN; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Radiology Services Denied Not Medically Necessary

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

Radiology Services Denied Not Medically Necessary

This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and asymptomatic (no significant symptoms)?;

Radiology Services Denied Not Medically Necessary

; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Radiology Services Denied Not Medically Necessary

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; "There is not a change in cardiac signs or symptoms (shortness of breath, etc.)."; The patient will be undergoing more chemotherapy.; The last MUGA scan was performed more than 3 months ago.; Post cycle 4 of Rituxan and ferreri regimen for CNS Lymphoma.

Radiology Services Denied Not Medically Necessary

Evaluation of patient recently diagnosed with diffuse large-b cell lymphoma.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

Evaluation of patient with malignant neoplasm of the esophagus.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Breast Cancer.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new sings or symptoms.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Head/Neck Cancer.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new sings or symptoms.; The patient does NOT have Thyroid or Brain cancer.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lung Cancer.; The patient has been diagnosed with NON small lung cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; 3 PET Scans have already been performed on this patient for this cancer.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lung Cancer.; The patient has been diagnosed with small cell lung cancer.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Ovarian or Esophageal Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; More than 4 PET Scans have already been performed on this patient for this cancer.

Radiology Services Denied Not Medically Necessary

Evaluation of patient with a Lung Mass.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3/31/16; There has not been any treatment or conservative therapy.; Evaluation of patient with a Lung Mass.

Radiology Services Denied Not Medically Necessary

Evaluation of patient with Breast Cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

Evaluation of patient with malignant neoplasm of the bladder.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

Evaluation of patient with malignant neoplasm of the lung with secondary malignant neoplasm of the brain.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

Evaluation of patient with stage IV Bladder Cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

Evaluation of pt with cervical cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

faxing rec; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

faxing records.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

faxing records.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

faxing records.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

faxing records; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

faxing records; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Radiology Services Denied Not Medically Necessary

faxing records; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Head/Neck Cancer.; This is NOT being ordered to distinguish tumor(s) from treatment related tissue necrosis.; The patient has Brain cancer.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Lymphoma or Myeloma.; 1 PET Scans has already been performed on this patient for this cancer.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Lymphoma or Myeloma.; This would be the first PET Scan performed on this patient for this cancer.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Melanoma.; This is for evaluation of regional lymph nodes.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Breast Cancer.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new sings or symptoms.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Colo-rectal Cancer.; It is unknown if the patient completed a course of treatment initiated in the last 8 weeks or are experiencing new signs, symptoms or a rising CEA.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Head/Neck Cancer.; The patient has Brain cancer.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lung Cancer.; The patient has been diagnosed with NON small lung cancer.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new sings or symptoms.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient completed a course of treatment initiated within the last 8 weeks.; 3 PET Scans have already been performed on this patient for this cancer.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient completed a course of treatment initiated within the last 8 weeks.; 4 PET Scans have already been performed on this patient for this cancer.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient completed a course of treatment initiated within the last 8 weeks.; This would be the first PET Scan performed on this patient for this cancer.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; 3 PET Scans have already been performed on this patient for this cancer.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new signs or symptoms.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Melanoma.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new signs or symptoms.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Soft Tissue Sarcoma, Pancreatic or Testicular Cancer.

troponin elevated; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

Possible Brain Abscess. Currently in treatment for MRSA, does c/o frequent migraines (which are new for her) and fevers are becoming more frequent (though not as high as they have been in the past). Last dose of Vancomycin was Monday or Tuesday, but she ; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for Inflammatory/ Infectious Disease.; 9/7/15; There has been treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; Rx and IV/ 2 surgeries/ Pt/ hyperbaric therapy/ swelling/ previous CT

This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks)

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for Inflammatory/ Infectious Disease.; 2/2016; There has been treatment or conservative therapy.; low grade fever, chills, sweats, aches, pains.. Lymphnode swelling and soreness. low grade nutraphilic phylosicosis. Temperatures are intermittent ranging around 100.3. fatigue. Began in February. Several infectons. HX of IGA deficiency and Mannose binding; meds, triaxone and orasephalesporin, topical steroids for a rash, anti hypertensive cladadine.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for Inflammatory/ Infectious Disease.; 9/7/15; There has been treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; Rx and IV/ 2 surgeries/ Pt/ hyperbaric therapy/ swelling/ previous CT

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for Inflammatory/ Infectious Disease.; 2/2016; There has been treatment or conservative therapy.; low grade fever, chills, sweats, aches, pains.. Lymphnode swelling and soreness. low grade nutraphilic phylosicosis. Temperatures are intermittent ranging around 100.3. fatigue. Began in February. Several infectons. HX of IGA deficiency and Mannose binding; meds, triaxone and orasephalesporin, topical steroids for a rash, anti hypertensive cladadine.

Pt had MRI of his thoracic spine on 3/26/16 in March where the radiologist noted that multiple lung nodules were seen and recommended that patient needed Chest CT for full evaluation.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

The Cat Scan of chest with iv contrast is for a 6 month followup on a lung lesion.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

The patient has had a chest x-ray recently.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for hemoptysis.

There is radiologic evidence of non-resolving pneumonia after at least 4 weeks of treatment.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

His left hip is really hurting, and he's not been able to walk without a walker since d/c. it's been hurting since the wreck. no back pain; This study is being ordered as a follow-up to trauma.; There is NO laboratory or physical evidence of a pelvic bleed.; There are no physical or abnormal blood work consistent with peritonitis or pelvic abscess.; There is NO physical or radiological evidence of a pelvic fracture.; "The ordering physician is not a gastroenterologist, urologist, gynecologist, or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for Inflammatory/ Infectious Disease.; 2/2016; There has been treatment or conservative therapy.; low grade fever, chills, sweats, aches, pains.. Lymphnode swelling and soreness. low grade nutraphilic phylosicosis. Temperatures are intermittent ranging around 100.3. fatigue. Began in February. Several infectons. HX of IGA deficiency and Mannose binding; meds, triaxone and orasephalesporin, topical steroids for a rash, anti hypertensive cladadine.

This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; abdominal pain, Patient with end-stage renal disease, diabetes mellitus and labile hypertension with recurrent episodes of CAPD associated peritonitis over the last few months. These episodes reportedly up and with different organisms. She says that she

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is a request for initial staging of a known tumor other than prostate.; Known Tumor, Cancer, Mass, or R/O metastases

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Abnormal CT, radiologist recommended f/u MRI

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;&#x0D; NO; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for Vertigo; Severe Claustrophobia is the reason an MRI is not being considered

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.

; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.

failure of conservative medical therapy; This study is being ordered for Inflammatory/ Infectious Disease.; August 21, 2015; There has been treatment or conservative therapy.; persistent facial pain and fever, along with blurry vision and headaches and drowsiness; multiple courses of antibiotics including steroid and probiotic therapy. Allergy testing and immunotherapy also

HEADACHE WORSENING HEADACHE, ATAXIA.HX OF CHIARI MALFORMATION TYPE 1,DIZZINESS,OCCIPITAL HEADACHE,SUDDEN SEVERE HEADACHE; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.

none; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications

Patient having severe headache related to recent trauma.; This is a request for a brain/head CT.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for recent head trauma or injury.

Patient lost vision for a short period of time. All other senses were intact. Testing requested to rule out stroke or any other abnormalities.; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for Abnormalities of the eye; It is unknown why an MRI is not being considered

PT CONFUSED, SEVERE HEADACHES SINCE LAST NIGHT, SEEING THINGS BP 190/100...GAVE ASPERIN; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; Metallic implants such as Pacemakers, ICD (cardioverter/defibrillator), vascular clips, prosthesis or joint replacement is the reason why an MRI is not being considered

pt has ear pain with jaw pain and bruise to area. pt is on aspirin; This study is being ordered for trauma or injury.; 04/23/2016 fall; There has not been any treatment or conservative therapy.;

right sided facial pain, pain meds not helping; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications

Syncope, increased headaches; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

This is a request for a brain/head CT.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for recent head trauma or injury.

This is a request for a brain/head CT.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a recent head trauma or injury.

This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The headache is described as a "thunderclap" or the worst headache of the patient's life.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.

This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or aneurysm.; This study is being ordered for neurological deficits.

This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; This study is being ordered for evaluation of known tumor.

This is a request for a brain/head CT.; The study is requested for history of stroke, (CVA) known or follow-up.

This is a request for a brain/head CT.; The study is requested for known or suspected bleed such as subdural hematoma or subarachnoid bleed.

This is a request for a brain/head CT.; There is a suspected or known brain tumor.; The study is requested for known or suspected brain tumor, mass or cancer.

This is a request for a brain/head CT.; There is a suspected or known brain tumor.; This study is being requested for known or suspected brain tumor, mass or cancer.

This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.

This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.

This is a request for a brain/head CT.; This study is being requested for a history of stroke, (CVA) known or follow-up.

This is a request for a brain/head CT.; This study is being requested for Hydrocephalus or congenital abnormality.

This is a request for a brain/head CT.; This study is requested for known or suspected bleed such as subdural hematoma or subarachnoid bleed.

unknow; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

UNKNOWN; This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.

"This request is for face, jaw, mandible CT.239.8"; "There is a history of serious facial bone or skull, trauma or injury.fct"

Chronic sinusitis; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks)

failure of conservative medical therapy; This study is being ordered for Inflammatory/ Infectious Disease.; August 21, 2015; There has been treatment or conservative therapy.; persistent facial pain and fever, along with blurry vision and headaches and drowsiness; multiple courses of antibiotics including steroid and probiotic therapy. Allergy testing and immunotherapy also

pt has ear pain with jaw pain and bruise to area. pt is on aspirin; This study is being ordered for trauma or injury.; 04/23/2016 fall; There has not been any treatment or conservative therapy.;

R/O cellulitis; This study is not being ordered for trauma, tumor, sinusitis, osteomyelitis, pre operative or a post operative evaluation.; This is a request for a Sinus CT.

This has been a problem for the past 5 plus years. The pattern of symptoms is described as perennial, with virtually year-round symptoms. His primary symptoms include ear complaints, facial pressure, headache, nasal congestion, nasal itching, ocular tea; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been 14 or more days since onset AND the patient failed a course of antibiotic treatment

This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is immune-compromised.

This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks)

This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year)

; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The size of the neck mass is unknown.; The neck mass has been examined twice at least 30 days apart.; The lump did not get smaller.; A fine needle aspirate was NOT done.

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is not a suspicion of an infection or abscess.; This is not being ordered by an ENT specialist.

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; sudden onset; There has not been any treatment or conservative therapy.; dizziness, off balance, lightheadedness, hx of carotid artery disease along with orthostatic hypotension

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; 2/2016; There has not been any treatment or conservative therapy.; headache, vertigo, decreased range of motion  
Yes, this is a request for CT Angiography of the brain.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; sudden onset; There has not been any treatment or conservative therapy.; dizziness, off balance, lightheadedness, hx of carotid artery disease along with orthostatic hypotension

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; 2/2016; There has not been any treatment or conservative therapy.; headache, vertigo, decreased range of motion  
Yes, this is a request for CT Angiography of the Neck.

"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The study is ordered for suspicion of infection or abscess

"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The study is ordered for suspicion of neoplasm, tumor or metastasis

"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The study is ordered for the evaluation of lymphadenopathy or mass

had mri of brain, depression and memory loss.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Jan 4 2016; It is not known if there has been any treatment or conservative therapy.; Diarrhea, weight loss, abdominal pain. swelling in the neck. chest pains. abnormal ultrasound. had a fall and injured his chest. Patient has stints.

R/O trigeminal neuralgia; This study is being ordered for a neurological disorder.; May 2016; There has been treatment or conservative therapy.; Jaw, teeth and neck pain, headaches, popping in left ear when yawning; Medications  
There is a suspicion of an infection or abscess.; This is a request for an Orbit MRI.; There is not a history of orbit or face trauma or injury.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 3/31/16; There has not been any treatment or conservative therapy.; Facial , paralysis , dizziness , ischemia  
None; This study is being ordered for a neurological disorder.; 3 months ago; There has not been any treatment or conservative therapy.; Family hx of aneurysm severe H/a x 3 months

There is an immediate family history of aneurysm.; This is a request for a Brain MRA.

There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has had a recent MRI or CT for these symptoms.; There has been a stroke or TIA within the past 2 weeks.; This is a request for a Brain MRA. to evaluate her symptoms and to rule out any abnormal brain functions; This study is being ordered for a neurological disorder.; 6/24/16; There has not been any treatment or conservative therapy.; confusion, syncope episodes, palpitations, not feeling well at all

The patient has had a recent MRI or CT for these symptoms.; This is a request for a Neck MR Angiography.

The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; "There is not a sudden onset of one-sided weakness, speech impairment, vision defects or severe dizziness."; This is a request for a Neck MR Angiography.; The patient has had an abnormal ultrasound of the neck.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; It is not known if there is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is not a pituitary tumor or pituitary adenoma.

; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; It is unknown if there recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; It is not known if there is a new and sudden onset of a headache less than 1 week not improved by medications.; It is not known if there is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)

; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient is experiencing dizziness.

; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The results of the lab tests are unknown.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has not undergone treatment for multiple sclerosis.; There are not intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.

; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has a loss of smell.; It is unknown why this study is being ordered.

; This study is being ordered for a neurological disorder.; ; It is not known if there has been any treatment or conservative therapy.;

Abnormal involuntary movement of hands and legs. Checked labs and negative so MRI brain is necessary to rule out Parkinsons; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Berry cerebral aneurysm - headaches, memory lapses or changes. emotional lability; high irritability; depression; ; retroorbital pain ; ; htn; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

brain: neuro defects ; cervical: radiculopathy; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;;

Chronic headache not relieved by medication. Has been treated with Imitrex, ibuprofen last 2 years. Patient having vertigo, dizziness and loss of coordination.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

had mri of brain, depression and memory loss.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Jan 4 2016; It is not known if there has been any treatment or conservative therapy.; Diarrhea, weight loss, abdominal pain. swelling in the neck. chest pains. abnormal ultrasound. had a fall and injured his chest. Patient has stints.

limited ROM (L shoulder, reduced passive ROM for abduction past 90 deg. pos empty can test, neg neer, normal drop test.). Extremities: no cyanosis or edema. normal xrays. MRI to be done L shoulder due to concern about rotator cuff injury.; headache, memory loss; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1 month ago for the headaches- approx 3/15/16.; 2 months ago for the shoulder pain- approx. 1/15/16; There has not been any treatment or conservative therapy.; L shoulder aching pain for about 2 months. ; Injury while lifting overhead and pushing box at work. ; Initially thought it was a sprain and managed supportively but has been worsening. ; Trouble lifting arm overhead. ; about 1 month h/o R sided pressu

MD wants to see if tumor is shrinking after radiation; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is not a pituitary tumor or pituitary adenoma.

NA; This study is being ordered for a neurological disorder.; Unknown; There has not been any treatment or conservative therapy.; Malaise; Takotsubo cardiomyopathy; Hypercortisolism; Vomiting; Dysphagia

new dx cognitive impairment, meeting criteria for dementia. memory changes and depression; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

None; This study is being ordered for a neurological disorder.; 3 months ago; There has not been any treatment or conservative therapy.; Family hx of aneurysm severe H/a x 3 months

Patient blacked out while driving. Reports dizziness and headache.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a sudden and severe headache.; The patient has NOT had a recent onset (within the last 3 months) of neurologic symptoms.

patient had hit her head on a brick in falling accident.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; patient has been getting headaches from a motor vehicle accident since 1972, and headaches are worsening since then.; There has been treatment or conservative therapy.; loss of appetite , loss of feeling ,body numbness , when these headaches occur, sharp continuous pain in head. patient had fallen last year.; medicine, including Tramadol. to help with pain relief

Patient has repeated falls, progressive tremor of the head, gait instability, cant walk straight.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing dizziness.

Patient has sudden severe headache, currently has brain cancer.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)

Patient is having memory loss, mental status changes, depression, and fatigue.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are not recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.; It is not known if there a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

patient used migraine medication; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)

Patient was newly diagnosed with lung cancer of unknown type. This is for staging of lung cancer and to see if the cancer has spread.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

post trauma to head patient reports headache, trauma due to patient getting dizzy and falling down hitting head on hard surface; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a sudden and severe headache.; The patient has NOT had a recent onset (within the last 3 months) of neurologic symptoms.

Pt Fell and hit head.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

PT has been DX with scoliosis.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

R/O trigeminal neuralgia; This study is being ordered for a neurological disorder.; May 2016; There has been treatment or conservative therapy.; Jaw, teeth and neck pain, headaches, popping in left ear when yawning; Medications

START:01/17/2016,; Preliminary Procedures Lab Work ; Already Completed:normal; Referrals: Referrals to Specialists:Referred to Dr. Kaplan ; Reason for Study: mass or tumor, trigeminal; Conntinues to have spells of Rt shoulder pain referred to t; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.  
This is a request for an Internal Auditory Canal MRI.; There is a suspected Acoustic Neuroma or tumor of the inner or middle ear.

This is a request for an Internal Auditory Canal MRI.; There is not a suspected Acoustic Neuroma or tumor of the inner or middle ear.; There is not a suspected cholesteatoma of the ear.; The patient has not had a recent brain CT or MRI within the last 90 days.; There are no neurologic symptoms or deficits such as one-sided weakness, speech impairments, vision defects or sudden onset of severe dizziness.; This is not a pre-operative evaluation for a known tumor of the middle or inner ear.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a “thunderclap” or the worst headache of the patient’s life.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient had a thunderclap headache or worst headache of the patient's life (within the last 3 months).

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing dizziness.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing fatigue or malaise.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing vertigo

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of infection or inflammation; The patient has a fever, stiff neck AND positive laboratory findings (like elevated WBC or abnormal Lumbar puncture fluid examination that indicate inflammatory disease or an infection.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has not undergone treatment for multiple sclerosis.; There are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has been a previous Brain MRI completed.; The brain MRI was abnormal.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are not recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.; There a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are physical findings or laboratory values indicating abnormal pituitary hormone levels.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack).

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; There has been a recent assessment of the patient's visual acuity.; This study is being ordered for stroke or TIA (transient ischemic attack).

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for seizures.; There has been a change in seizure pattern or a new seizure.

to evaluate her symptoms and to rule out any abnormal brain functions; This study is being ordered for a neurological disorder.; 6/24/16; There has not been any treatment or conservative therapy.; confusion, syncope episodes, palpitations, not feeling well at all

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 04/02/2016; There has been treatment or conservative therapy.; double vision/ neck pain /; was also seen by eye Dr

Unknown; This study is being ordered for trauma or injury.; 4/26/2016; There has not been any treatment or conservative therapy.; Patient is experiencing altered mental status with confusion left upper and lower weakness and numbness left sided vision defects.

"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.  
; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.  
; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; It is unknown if this patient is a smoker or has a history of smoking.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; It is not known if there has been any treatment or conservative therapy.;

3 months ago.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

3/29/16 chest x-ray was abnormal; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

6mos follow up for lung nodule thyroid mass, multiple small nodules in both lungs found on 10/15/15 patient has increased risk of malignancy; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

A Chest/Thorax CT is being ordered.; This study is being ordered for known tumor.

A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient does NOT have signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient quit smoking in the past 15 years.; The patient does NOT have signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus.

abdominal pain, diarrhea, lesion in ultrasound, nausea; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Chest pain, pressure, palpitations , nausea; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

chronic cough, weight loss, shortness of breath; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

cough; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

DR WANTING TO START PT ON A NEW MEDICATION(ERIBULIN) IF PT HAS PROGRESSION UPON THE FOLLOWING SCANS.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

evaluation follow up of chest mass and 3 nodules, chest discomforts, head aches; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

f/u for 2 nodules; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

Follow up. Pt had a previous Abnormal CT.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.

given zanaflex PRN; This study is being ordered for trauma or injury.; ; It is not known if there has been any treatment or conservative therapy.; Unable to perform abduction of right arm; positive empty can test; unable to perform internal rotation on active or passive ROM

Her cough seems to be chronic now and more than occasional. She seems to feel its allergic due to the fact that it was absent in Mexico and much less intense at her daughters house. She was seen for right facial swelling (apparently marked) in addition to; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; patient with chronic cough and right facial swelling needs ct sinuses and ct chest; There has been treatment or conservative therapy.; chronic cough; right facial swelling; medication

large mass showed on x ray and pneumonia; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

On 8/21/14, Patient had ct of abdomen and pelvis performed due to elevated liver enzymes and abdominal pain. Two small noncalcified soft tissue pulmonary nodules measuring up to 4mm in diameter were found on the right lung base. Radiologist recommended ; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; It is unknown if the patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

patient had pneumonia a few months ago; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

PATIENT HAD SCANS ON 3/7/16 WHICH SHOWED MIXED RESPONSE- THEN SCANS ON 4/15/16 THAT SHOWED SLIGHT IMPROVEMENT IN METASTATIC DISEASE. THIS PATIENT HAS COMPLETED 6 CYCLES OF DOXORUBICIN. DR. ROBERTSON WANTS SCANS TO SEE IF DISEASE IS IN STABLE CONDITION T; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Patient has finished a round of steroids and is taking an anti-inflammatory without relief.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 months prior; There has been treatment or conservative therapy.; Patient c/o pain in his ribs and LUQ abdominal pain; Patient was started on Celexoxic and a Medrol Dosepak at the last office visit. Patient had an X-ray done with no fractures or masses

PT HAD A CT OF CHEST ON 03/01/2016 THAT SHOWED LUNG NODULES. FU FOR STABILITY. PT ALSO WAS HAVING A COUGH AND COUGHING UP BLOOD. COUGHING UP BLOOD HAS SINCE RESOLVED; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

pulmonary nodule; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months. SUSPICIOUS LESIONS FOUND ON A CHEST X-RAY PERFORMED TODAY; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

Suspicious pulmonary nodule\* Pt has pulmonary nodule all over and MDO wants to check\* &lt;/= 8 mm\*; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

the patient had a ct chest in Jan and this is a follow up; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

The patient has had a chest x-ray recently.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for hemoptysis.

There is no radiologic evidence of non-resolving pneumonia.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is radiologic evidence of a lung abscess or empyema.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; "The caller doesn't know if the ordering physician is a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Cough &#x0D; Onset: 4 months ago. The patient describes the cough as dry and non-productive. Symptoms are aggravated by allergens. There are no relieving factors. Associated symptoms include cough, dyspnea, fatigue, fever, hoarseness, post-nasal drainage a; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Enter answer here - Dyspnea on exertion, basilar crackles on left, history of pneumonia 20 years ago with breathing difficulties ever since. cough. smoker.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

There is radiologic evidence of non-resolving pneumonia after at least 4 weeks of treatment.; "The caller doesn't know if the ordering physician is a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

There is radiologic evidence of non-resolving pneumonia after at least 4 weeks of treatment.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

UNKNOWN; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

wheezing, respiratory problems; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.

had mri of brain, depression and memory loss.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Jan 4 2016; It is not known if there has been any treatment or conservative therapy.; Diarrhea, weight loss, abdominal pain. swelling in the neck. chest pains. abnormal ultrasound. had a fall and injured his chest. Patient has stints.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a work-up of a suspicious mass.; There is radiographic or physical evidence of a lung or chest mass.; This is a request for a chest MRI.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.

; The patient has not failed a course of anti-inflammatory medication or steroids.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to neurological deficits.; There has not been a supervised trial of conservative management for at least 6 weeks.; "The caller indicated that the patient is not experiencing or presenting symptoms of Abnormal Gait, Lower Extremity Weakness, Asymmetric Reflexes, Cauda Equina Syndrome, Bowel or Bladder Dysfunction, New Foot Drop, or Radiculopathy."; The patient is experiencing sensory abnormalities such as numbness or tingling.; There is a reason why the patient cannot have a Cervical Spine MRI.

Had previous back surgery; This study is being ordered for Inflammatory/ Infectious Disease.; 2/2016; There has been treatment or conservative therapy.; Back pain, neck pain, limited ROM.; steroids, pain meds

mva 6 days ago. neck pain/stiffness since then. with pain radiating into left shoulder and arm; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

NECK PAIN,RADICULOPATHY OF LEGS,CERVICAL INFUSION,PAIN IN NECK.DULL IN NATURE,SUDDEN ONSET OF SYMPTOMS.NUMBNESS IN LEGS.NECK STIFFNESS.RANGE OF MOTION TO NECK DECREASED.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.

Pt had back surgery about 20 years ago and now is experiencing pain, numbness, tingling in legs and hands; This study is being ordered for a neurological disorder.; unknown; There has been treatment or conservative therapy.; numbness, tingling, pain in legs and hands; nerve blocking

R/O spinal cord stenosis; There are no documented clinical findings of immune system suppression.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; None of the options listed is the reason for the study.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is not experiencing cervical neck pain not improving despite treatment.

The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; The patient is experiencing sensory abnormalities such as numbness or tingling.; There is a reason why the patient cannot have a Cervical Spine MRI.; This study is being ordered for another reason besides Abnormal gait, Lower extremity weakness, Asymmetric reflexes, Documented evidence of Multiple Sclerosis, Bowel or bladder dysfunction, Evidence of new foot drop, etc...

The patient does not have any neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; There is a reason why the patient cannot have a Cervical Spine MRI.

This is a request for a thoracic spine CT.; There is evidence of tumor or metastasis on a bone scan or x-ray.; The study is being ordered due to suspected tumor with or without metastasis.; There is a reason why the patient cannot undergo a thoracic spine MRI.

Had previous back surgery; This study is being ordered for Inflammatory/ Infectious Disease.; 2/2016; There has been treatment or conservative therapy.; Back pain, neck pain, limited ROM.; steroids, pain meds

Patient has chronic post surgical pelvic pain. Patient has numbness, tingling, paresthesias left lower extremity. Has been treated with antibiotics, oxycodone, valium, tens unit, prednisone. Patient needs to be seen again by a specialist and these CT scan; This study is being ordered for a neurological disorder.; 9/26/2013; There has been treatment or conservative therapy.; Pelvic pain, left leg paresthesias, left leg numbness, post surgical pelvic pain.; Oxycodone, valium, prednisone, Tens unit, antibiotics, pelvic surgery

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is to be part of a myelogram or discogram.

This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness and reflex abnormality bilateral hand and finger; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 2/2016; There has not been any treatment or conservative therapy.; leg jerking, numbness in left arm, weakness, sensation changes like arms and legs are in warm water, unable to control hands, unable to reach spot she wants to touch when reaching for face, unable to type, looks at the floor when walking because she's not

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1-6mos ago; There has been treatment or conservative therapy.; brain- memory loss cervical- tremors and paresthesia; medication for heart condition

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; 4/8/2016; There has been treatment or conservative therapy.; decrease of motion, right arm numbness, neck pain; physical therapy ; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; ;  
Abn xray; This study is being ordered for a neurological disorder.; 05/13/2016; There has not been any treatment or conservative therapy.; Frequent falls bilateral arm dysesthesia bilateral arm weakness

History / Dx: Woman with migraines on occasion in past. Not much for last few yrs.; c/o loss of hunger and thirst feelings in ~2011. Noted loss of urge to void and defecate then. May get a tiny amount of stress incont. Progressed to fatigue in colle; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/29/2015; There has not been any treatment or conservative therapy.; INCONTINENCE, LOSS OF BLADDER AND BOWEL SENSATION, MIGRAINES, FATIGUE, ; MRI L SPINE-DISC BULDGE AT L5/S1, WITH MLD BILATERAL NEURAL FORMINAL STENOSIS

numbness and tingling down both arms and in both hands. Sharp pain when she turns her head to the side. Worse the past 3 weeks.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; The pain is radiating down both arms. she's losing grip and dropping things. Getting more frequent within last 3 weeks.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Patient has history of cervical spine fusion at c6 and 7, decreased range of motion in neck, cant make fist with either hand and has cervical spondylosis; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Decreased grip strength of left, difficultly tying shoes, numbness of shoulders down to fingers; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Patient not getting better with concervative treatment and is needing further study to identify problem; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; ; has been seeing chiropractor and streching exercise for over 6 weeks and not getting better. has had Nsaids and Muscle relaxer and not helping.

She has narrowing seen on Xray of C4 and C5 (neck degeneration). I think this may be her problem. She needs MRI of cervical spine. Her upper back shows some arthritis, MRI would not be helpful here. This could explain her symptoms.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; MUSCULOSKELETAL: Positive for arthralgias, back pain ( chronic ) and neck pain. Negative for myalgias. ; INTEGUMENTARY/BREAST: Positive for extremely dry skin. Negative for jaundice or pruritis. ; NEUROLOGICAL: Positive for headaches ( see HPI. P; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.; Yes, the patient had six weeks of Chiropractic care related to this episode.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.

This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; Neurological deficits; ; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

This is a request for cervical spine MRI; None of the above; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Patient is having some neck pain which radiate down her right arm alot and sometimes the left. There has been no injury to it. But has played basketball growing up.

This is a request for cervical spine MRI; Trauma or recent injury; Yes, the patient have new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 04/02/2016; There has been treatment or conservative therapy.; double vision/ neck pain /; was also seen by eye Dr

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3/7/2012; There has been treatment or conservative therapy.; neck and back pain with radiculopathy, decreased strength, bilateral shoulder pain; physical therapy, pain meds, muscle reazes

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for Congenital Anomaly.; unknown; There has been treatment or conservative therapy.; pain&#x0D; radiating down left lower extremity; x rays,

History / Dx: Woman with migraines on occasion in past. Not much for last few yrs.&#x0D; c/o loss of hunger and thirst feelings in ~2011. Noted loss of urge to void and defecate then. May get a tiny amount of stress incont. Progressed to fatigue in colle; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/29/2015; There has not been any treatment or conservative therapy.; INCONTINENCE,LOSS OF BLADDER AND BOWEL SENSATION,MIGRAINES,FATIGUE,&#x0D; MRI L SPINE-DISC BULDGE AT L5/S1,WITH MLD BILATERAL NEURAL FORMINAL STENOSIS

Patient has had an x-ray of the shoulder and spine which came out ok but the patient is still in a lot of pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has been treatment or conservative therapy.; shoulder and back pain; Patient has been doing some Physical therapy. Has been doing otc tylenol, ect.

The patient does have neurological deficits.; The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; The patient has had 3 or fewer thoracic spine MRIs.; There has not been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of abnormal gait.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to trauma or acute injury within 72 hours.; ; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to trauma or acute injury within 72 hours.; The patient is experiencing or presenting symptoms of abnormal gait.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.

The patient does not have any neurological deficits.; The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; The patient has had 3 or fewer thoracic spine MRIs.; It is not known if there has been a supervised trial of conservative management for at least six weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.

The patient does not have any neurological deficits.; The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; The patient has had 3 or fewer thoracic spine MRIs.; There has not been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.

The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to trauma or acute injury within 72 hours.; xray on 5/8/16 shows compression fx, pain, thrown from a horse

The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pain in the left leg. Had surgery on heels in the past year. Had x-rays on hips and knees in past, results were ok.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Abn xray; This study is being ordered for a neurological disorder.; 05/13/2016; There has not been any treatment or conservative therapy.; Frequent falls bilateral arm dysesthesia bilateral arm weakness

Chronic pain, numbness, weakness, positive straight leg raise. Symptoms since March 2015. Conservative care has not helped. May need to see a neurosurgeon or pain management; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; chronic pain, numbness, weakness, positive straight leg raise. symptoms since March 2015. Conservative care has not helped. May need to see a neurologist or pain management.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

DEGENERATIVE JOINT DISEASE AND RADICULOPATHY DOWN BOTH LEGS; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

He has chronic lower back pain with sciatic nerve symptoms. he has been going to physical therapy for a month with minimal improvements in fact worsening indeed neuropathic symptoms. His numbness and tingling in his feet is much worse. and he reports weakness; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; He has chronic lower back pain with sciatic nerve symptoms. he has been going to physical therapy for a month with minimal improvements in fact worsening indeed neuropathic symptoms. His numbness and tingling in his feet is much worse. and he reports weakness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Lower back pain.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

none; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; It is not known what medications were used in treatment.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; Not improved

none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; NONE; There has not been any treatment or conservative therapy.; Numbness and weakness with pain  
pain in right leg, not improving with pain medications; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

patient has been having off and on numbness in the legs past couple of months which has lately worsened past 2 weeks she feels numb and tingly on the side of the legs . she has h/o chronic back pain past 5 yrs she has been to chiropractors in the past as; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Patient has had 4 weeks of physical therapy without relief.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

patient is having back pain with little relief from medication; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Patient not getting better with conservative treatment and is needing further study to identify problem; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; ; has been seeing chiropractor and stretching exercise for over 6 weeks and not getting better. has had Nsaids and Muscle relaxer and not helping.

Patient with worsening lumbar radiculopathy for the past year. She reports pain to left lower back that is constant, with radiating pain into left leg, down to her ankle. She reports the pain is 8 out of 10, and is described as throbbing, and sharp. ; Pat; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

POSITIVE STRAIGHT LEG RAISES ON LEFT,HAD SEVERAL WEEKS OF EXERCISES AND CHIROPRACTIC CARE WITH NO IMPROVEMENT,MUSCLE RELAXERS AND STERIODS AND PAIN MEDS NOT WORKING,LEFT SIDED LOW BACK PAIN; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Physical Exam Findings: positive straight leg raise on the left &#x0D; Already Completed:has had several weeks of exercises and chiropractic care,&#x0D; R/O:HNP,STENOSIS&#x0D; MEDS:CYCLOBENZAPRINE AND STERIODS,IBUPROFEN; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

r/o Parkinson's disease.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/01/2015; There has been treatment or conservative therapy.; weakness getting worse, b-12 deficiency,, b-12 replacement,

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI.; None of the above; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.

The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; The patient has Neurological abnormalities; This procedure is being requested for Trauma or recent injury

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal nerve study involving the lumbar spine

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has completed Treatment with a facet joint or epidural injection in the past 6 weeks

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)

The study requested is a Lumbar Spine MRI.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection

This patient has continuing lower back pain with sciatica that radiates down the left leg. He has tried and failed on steroids, pain medication (couldn't tolerate) and anti-inflammatory drugs. He has done home exercise program, has been walking and att; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

unknown; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above  
unknown; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3/7/2012; There has been treatment or conservative therapy.; neck and back pain with radiculopathy, decreased strength, bilateral shoulder pain; physical therapy, pain meds, muscle reazes

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.  
; This study is being ordered due to known or suspected infection.; "The ordering physician is a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.

; This study is being ordered due to organ enlargement.; There is no ultrasound or plain film evidence of a pelvic organ enlargement.; This is a request for a Pelvis CT.

Patient has a history of kidney stones, having flank pain and has tried increased fluids, walking, and not getting any relief. Small left kidney stone on KUB; The patient has painful hematuria.; The patient has not had an IVP.; This study is being ordered due to hematuria.; This is a request for a Pelvis CT.

Patient has an elevated erythrocyte sedimentation rate. Dr. Porter is looking at pts right hip and pelvis where pt is having left hip and pelvis pain. Patient had a normal pelvic/ hip x ray.; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.

Patient has chronic post surgical pelvic pain. Patient has numbness, tingling, paresthesias left lower extremity. Has been treated with antibiotics, oxycodone, valium, tens unit, prednisone. Patient needs to be seen again by a specialist and these CT scan; This study is being ordered for a neurological disorder.; 9/26/2013; There has been treatment or conservative therapy.; Pelvic pain, left leg paresthesias, left leg numbness, post surgical pelvic pain.; Oxycodone, valium, prednisone, Tens unit, antibiotics, pelvic surgery

PT NEEDS SACRALPLASTY. RADIOLOGIST CANNOT DETERMINE EXACT PROCEDURE NEEDED UNTIL CT IS DONE TO SHOW WHERE FX ENDS. CT NEEDS TO EXTEND FROM PELVIS THRU S3 AREA.; There is not a known tumor.; This study is being ordered as pre-operative evaluation.; "The ordering physician is NOT an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; There is NO known pelvic infection.; This is a request for a Pelvis CT.

; This is a request for a Pelvis MRI.; The request is not for any of the listed indications. multiple myeloma; annual f/u; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; NONE; There has not been any treatment or conservative therapy.; Numbness and weakness with pain

This is a request for a Pelvis MRI.; The request is for pelvic trauma or injury.

This is a request for a Pelvis MRI.; The request is for suspicion of pelvic inflammatory disease or abscess.

This is a request for a Pelvis MRI.; The request is for suspicion of tumor, mass, neoplasm, or metastatic disease?

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is a history of upper extremity joint or long bone trauma or injury.

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is not suspicion of upper extremity bone or joint infection.; The ordering physician is not an orthopedist or rheumatologist.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is not an orthopedist.; There is not a history of upper extremity trauma or injury.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is suspicion of upper extremity bone or soft tissue infection.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; 4/8/2016; There has been treatment or conservative therapy.; decrease of motion, right arm numbness, neck pain; physical therapy given zanaflex PRN; This study is being ordered for trauma or injury.; ; It is not known if there has been any treatment or conservative therapy.; Unable to perform abduction of right arm; positive empty can test; unable to perform internal rotation on active or passive ROM

limited ROM (L shoulder, reduced passive ROM for abduction past 90 deg. pos empty can test, neg neer, normal drop test.). Extremities: no cyanosis or edema. normal xrays. MRI to be done L shoulder due to concern about rotator cuff injury.&#x0D; headache, memor; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1 month ago for the headaches- approx 3/15/16.&#x0D; 2 months ago for the shoulder pain- approx. 1/15/16; There has not been any treatment or conservative therapy.; L shoulder aching pain for about 2 months. &#x0D; Injury while lifting overhead and pushing box at work. &#x0D; Initially thought it was a sprain and managed supportively but has been worsening. &#x0D; Trouble lifting arm overhead. &#x0D; about 1 month h/o R sided pressu

Patient has had an x-ray of the shoulder and spine which came out ok but the patient is still in a lot of pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has been treatment or conservative therapy.; shoulder and back pain; Patient has been doing some Physical therapy. Has been doing otc tylenol, ect.

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; No clinicals available

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; It is not known if there are documented findings of crepitus.; There are no documented findings of swelling.; The ordering physician is not an orthopedist.; patient has had an xray performed and it came back negative for abnormalities, pain persists.; It is not known if the patient is experiencing joint locking or instability.; It is not known if the patient has a documented limited range of motion on physical examination.; There is no documented findings of severe pain on motion.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is an orthopedist.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; The patient has a documented limited range of motion on physical examination.; It is not known if there is documented findings of severe pain on motion.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; fax/ICR

The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The plain films were normal.; The patient is experiencing joint locking or instability.

The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The plain films were not normal.

The requested study is a Shoulder MRI.; Study being ordered for post-operative evaluation.; The ordering physician is not an orthopedist.; There are no documented physical or laboratory findings of a joint infection.; There are documented physical or plain film findings of delayed or failed healing.

The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation; This study is being ordered prior to arthroscopic surgery.; internal derangement

The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is not a history of lower extremity joint or long bone trauma or injury.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 4/11/16; There has been treatment or conservative therapy.; clottication, Coronary Artery Disease; u/s,  
This is a request for a Lower Extremity CT.; This is a preoperative or recent postoperative evaluation.

This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is suspicion of lower extremity bone or joint infection.

This is a request for an ankle CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.

Yes, this is a request for CT Angiography of the lower extremity.

"There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.; This is a request for bilateral foot MRI.;

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/30/2015; There has been treatment or conservative therapy.; pain; 6 weeks pt

; This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; It is not known if patient has completed and failed a course of conservative treatment.; Yes, the member experience a painful popping, snapping, or giving away of the knee.

1. R knee pain&#x0D; Patient fell a few weeks ago and landed on her R knee. Her R leg slipped out from under her on pavement and she landed on the medial side. She heard a "pop" when she fell and her knee immediately became painful and swollen. She saw Dr. Pee; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; The patient received oral analgesics.

had physical therapy and injections; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; knee pain began about 5 months ago; There has been treatment or conservative therapy.; joint swelling, irregular gait, sleep disturbance; home therapy

LEFT KNEE XRAY SHOWS 5.3MM DENSITY IN SUPERIOR ASPECT OF HOFFA'S FAT PAD JUST INFERIOR TO THE PATELLA.LEFT KNEE PAIN WITH MOVEMENT AND WEIGHT BEARING,LEFT KNEE EDEMA.LEFT KNEE INJURY 5/13/2016; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

Pt had an xray and ULTRA but nothing was conclusive; This study is being ordered for trauma or injury.; a year ago; There has been treatment or conservative therapy.; Pt has pain in right hip and right leg and right groin area; medications, anti inflammatory, home exercise program

This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.

This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Instability

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Swelling greater than 3 days

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Instability; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; It is not known if the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; No, the member do not experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Locking; No, the member do not experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Locking; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Swelling greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Instability

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Limited range of motion

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Swelling greater than 3 days

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There are documented physical or laboratory findings of a joint infection.; Post-operative Evaluation

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There are no documented physical or laboratory findings of a joint infection.; There are documented physical or plain film findings of delayed or failed healing.; Post-operative Evaluation

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; Instability

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; Swelling greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; There is no symptom of locking,Instability, Swelling,Redness,Limited range of motion or pain.

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications

This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications; No, the member do not experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has completed 6 weeks or more of Chiropractic care.; The patient received oral analgesics.

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a known mass.; The diagnosis of Mass, Tumor, or Cancer has been established.; The study is requested for follow-up.; The study is not requested to detect residual cancer after a course of treatment has been completed?; The patient is presenting with unresolved or new symptoms

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.

This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.

This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a suspected tarsal coalition.

This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.

This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; The patient does not have an abnormal plain film study of the ankle other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; There is not a suspected tarsal coalition.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;;

Pt had an xray and ULTRA but nothing was conclusive; This study is being ordered for trauma or injury.; a year ago; There has been treatment or conservative therapy.; Pt has pain in right hip and right leg and right groin area; medications, anti inflammatory, home exercise program

This is a requests for a hip MRI.; The member has failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has used a cane or crutches for greater than four weeks.; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient had an abnormal plain film study of the hip other than arthritis.; The patient has a documented limitation of their range of motion.

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient had an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is a mass near the hip.; The patient does not have a documented limitation of their range of motion.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; It is not known if there are findings that confirm hepatitis C.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection. ; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is unknown if the patient has new symptoms including hematuria, new lab results or other imaging studies including ultrasound, doppler or x-ray (plain film) findings, suspicion of an adrenal mass or suspicion of a renal mass.

Abdomen pain after eating; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

ABDOMINAL PAIN, PREVIOUS CT SHOWED A LESION IN THE KIDNEY, RENAL ULTRASOUND WAS NO HELP; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

Enter answer here - Pt. has liver lesion found 6 months ago and radiologist recommended a 6 month follow up ct.&#x0D; Patient has a yearly echo due to his high blood pressure.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Enter date of initial onset here - or Type In Unknown UNKNOWN; There has been treatment or conservative therapy.;;

NA; This study is being ordered for a neurological disorder.; Unknown; There has not been any treatment or conservative therapy.; Malaise&#x0D; Takotsubo cardiomyopathy&#x0D; Hypercortisolism&#x0D; Vomiting&#x0D; Dysphagia

Patient has finished a round of steroids and is taking an anti-inflammatory without relief.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 months prior; There has been treatment or conservative therapy.; Patient c/o pain in his ribs and LUQ abdominal pain; Patient was started on Celecoxib and a Medrol Dosepak at the last office visit. Patient had an X-ray done with no fractures or masses

Patient was admitted to hospital in S. Carolina for 10 days for severe abdominal pain. "CT of abdomen normal". Since discharge still has some mild pain, no n/v and stools 1 per day, normal. Lost 10 pounds. No fever. On physical exam: bowel sounds pr; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is a request for initial staging of a known tumor other than prostate.; No, this is not a request for follow up to a known tumor or abdominal cancer.

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; Yes, this is a request for follow up to a known tumor or abdominal cancer.

This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; There is a known or a strong suspicion of kidney or ureteral stones.

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are known or endoscopic findings of Diverticulitis.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Acute Non-ulcerative Colitis.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

unknown; This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; No, this is not a request for follow up to a known tumor or abdominal cancer.; This study being ordered for a palpable, observed or imaged abdominal mass.

This is a request for CT Angiography of the Abdomen and Pelvis.

Yes, this is a request for CT Angiography of the abdomen.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for Inflammatory/ Infectious Disease.; 2002/2003; There has not been any treatment or conservative therapy.; Pain in chest

; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

abdominal pain, diarrhea, lesion in ultrasound, nausea; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

doctor notes that a mass was felt, patient has abdominal hernias that are becoming more painful.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

DR WANTING TO START PT ON A NEW MEDICATION(ERIBULIN) IF PT HAS PROGRESSION UPON THE FOLLOWING SCANS.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.  
f/u for 2 noduls; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

hematuria, flank pain; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

HPI Patient is a 53 y/o WF with h/o Hypothyroidism, GERD, Gastroparesis, and Obesity who presents with multiple episodes of emesis. She says that her symptoms began in the middle of March when her husband was in the hospital. She's lost about 15 lbs. S; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have an amylase or lipase lab test.

PATIENT HAD SCANS ON 3/7/16 WHICH SHOWED MIXED RESPONSE- THEN SCANS ON 4/15/16 THAT SHOWED SLIGHT IMPROVEMENT IN METASTATIC DISEASE. THIS PATIENT HAS COMPLETED 6 CYCLES OF DOXORUBICIN. DR. ROBERTSON WANTS SCANS TO SEE IF DISEASE IS IN STABLE CONDITION T; This study is being ordered for a metastatic disease.; There are 2 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

patient is having pain that is worsen in left upper and lower radiates into flank back pain and light headed; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

pt has a wound that's leaking fluid and positive culture for mrsa; This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; The patient does not have a fever and elevated white blood cell count or abnormal amylase/lipase.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient does not have Crohn's Disease, Ulcerative Colitis or Diverticulitis.

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; The reason for the hematuria is not known.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; It is not known if there is a suspicion of an adrenal mass.; This is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; The hematuria is due to Renal Calculi/kidney/ ureteral stone.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.

This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is not presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The last Abdomen/Pelvis CT was performed more than 10 months ago.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.

This is a request for an abdomen-pelvis CT combination.; The requested studies are being ordered for known or suspected aneurysms and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.; Vascular disease

This is a request for an abdomen-pelvis CT combination.; The requested studies are being ordered for known or suspected blood clot, thrombosis, or stenosis and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.; Vascular disease

This is a request for an abdomen-pelvis CT combination.; The requested study is for post-operative evaluation.; The requested study is a first follow up study for a post operative complication.; Pre-op or post op evaluation

This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Diabetic patient with gastroparesis.; Other

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Hematuria.; Other

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Lymphadenopathy.; Other

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of unexplained weight loss of greater than 10% body weight in 1 month;  
Other

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Abscess.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Diverticulitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; It is not known if the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Diverticulitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; It is not known if there are findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; abdominal pain for several weeks, tenderness on exam

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; pain

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Patient has upper abdominal pain, fever, nausea, changes in bowel patterns. Suspect diverticulitis.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; &lt;Enter Additional Clinical Information&gt;

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Abnormal pelvic ultrasound - R93.8

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Constitutional: Constitutional: no significant weight gain or loss and no fever, night sweats, or exercise intolerance. &#xOD; &#xOD; &#xOD; Eyes: Eyes: no irritation, dry eyes, or visual changes. &#xOD; &#xOD; &#xOD; ENMT: Ears: no difficulty hearing or ear pain. Nose: no frequent

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Hernia felt upon physical examination.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; IBS

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Left lower quad pain and rectal bleeding

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; one month history of left upper pain, recent abnormal liver function studies, other abnormal lab results, lost of appetite , tenderness

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; right upper pain, went to ER and had a questioning thickening of a wall of a bowel loop and recommend a cat scan

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; unknown

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Worsening abdominal pain with increased pain and tenderness since previous CT exam on 5/20/16 - MRI is contraindicated for this patient due to metal implant. Surgeon recommended additional imaging via CT Abd and Pelvis.

This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone

This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement

This is a request for an abdomen-pelvis CT combination.; There is no evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement;

This is a request for an abdomen-pelvis CT combination.; There is no evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement; PT HAD LAPROSCOPY FOR PELVIC PAIN BY OBGYN, DURING THAT PROCEDURE THE NOTED A FATTY LIVER.

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; It is not known if there are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; It is not known if there is a suspicion of an adrenal mass.; It is not known if this is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; CT requested due to pelvic pain and pelvic mass, patient has history of gynecological surgery's

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; It is not known if there is a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; &lt;Enter Additional Clinical Information&gt;

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; Psoas muscle mass, 1.8x2 cm Ovoid non enhancing hypo density mass. 3 month F/U for stability, R/O neoplasm DZ, CT 01/19/2016. Flank pain

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; Right inguinal hernia and right inguinal pain with tissue mass

This is a request for an abdomen-pelvis CT combination.; This is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis and the patient is undergoing active treatment.; Known Tumor, Cancer, Mass, or R/O metastases

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; It is not known if this is a request for initial staging of a known tumor other than prostate.; There is an abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; Caller does not know if there is a known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; No, there is not a palpable or observed abdominal mass.

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is a request for initial staging of a known tumor other than prostate.; Known Tumor, Cancer, Mass, or R/O metastases

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; No, there is not a palpable or observed abdominal mass.

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; No, there is not a palpable or observed abdominal mass.;

R/O Abscess

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

To further evaluate cause of her pain.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

unknown; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

had mri of brain, depression and memory loss.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Jan 4 2016; It is not known if there has been any treatment or conservative therapy.; Diarrhea, weight loss, abdominal pain. swelling in the neck. chest pains. abnormal ultrasound. had a fall and injured his chest. Patient has stints.

This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist."; BLOOD IN STOOL,BACK PAIN,NAUSEA,VOMITING,ABDOMINAL PAIN

This request is for an Abdomen MRI.; This study is being ordered for pre-operative evaluation.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; Patient is currently listed for a liver transplant. Imaging is to be evaluated for tumors/lesions.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study.";

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; This is a 3 month follow up for stability. recommend by the radiologist

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; The patient had elevated liver enzymes and an abnormal US of the abdomen.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; this is a 1 year follow-up of known pancreatic cysts

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.;

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;  
This is a request for a MR Angiogram of the abdomen.  
This is a request for a heart or cardiac MRI

The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Non diagnostic exercise treadmill stress test due to inadequate peak heart rate. However, also noted ST changes and significant dyspnea; Duke Treadmill Score 0 (moderate risk). CTA cardiac to evaluate primarily for anomalous coronaries.&#x0D; &#x0D; Mrs. Walker is a; Yes, there is Chronic Chest Pain.

Yes, this is a request for CT Angiography of the abdominal arteries.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.

hx of hodkins disease. Will need to monitor for secondary cancers due to mantle cell radiation treatment which include yearly MRI breasts.; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.

Pt informed that her F/U diag mammo/US is abnormal-That Dr Tripped wants her to have a bil. MRI because of architectural distortion. Pt states that he had talked to her about this. MRI sch for 5-4-16 at 1pm.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 03/16/2016; There has not been any treatment or conservative therapy.; Pt informed that her F/U diag mammo/US is abnormal-That Dr Tripped wants her to have a bil. MRI because of architectural distortion. Pt states that he had talked to her about this. MRI sch for 5-4-16 at 1pm.

This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There is a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

This is a request for Breast MRI.; This study is being ordered for known breast lesions.; There are benign lesions in the breast associated with an increased cancer risk.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; ; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Abnormal EKG, essential hypertension, smokes 1-2 packs of cigarettes a day.; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

new onset exertional chest pain; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

patient had hit her head on a brick in falling accident.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; patient has been getting headaches from a motor vehicle accident since 1972, and headaches are worsening since then.; There has been treatment or conservative therapy.; loss of appetite , loss of feeling ,body numbness , when these headaches occur, sharp continuous pain in head. patient had fallen last year.; medicine, including Tramadol. to help with pain relief

patient with history of HTN; obesity: DM has Calcium score of 496 needs to have nuclear medicine stress test done; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Sinus Bradycardia, chest, jaw, arm pain, sweating and shortness of breath; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2008; There has been treatment or conservative therapy.; 44 y.o.male here for follow-up.He is struggling with fatigue, SOB, and some chest pain recently. He states that his chest pain is left sided and radiates to his neck and down his left arm occasionally. This will occur with exertion or at rest. He has had ; Heart cath in 2008, no stints placed started o Lipitor 20mg recently and albuterol

stress echo showed abnormal ST segments; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The patient is diabetic.; The patient is less than 45 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The patient is not diabetic.; The patient is less than 45 years old.; The patient has had a recent exercise treadmill test that was positive.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.

The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient had previous cardiac surgery or angioplasty.; There are new symptoms or changing EKG findings.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The member does not have known or suspected coronary artery disease

This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise. ; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on a more than 1 of the following; diagnostic test, imaging study, or biopsy.; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Colorectal Cancer.; This would be the first PET Scan performed on this patient for this cancer.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on a biopsy.; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lymphoma or Myeloma.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on a more than 1 of the following; diagnostic test, imaging study, or biopsy.; This study is being ordered to establish a cancer diagnosis.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Breast Cancer.; This is for evaluation of axillary lymph nodes.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient completed a course of treatment initiated within the last 8 weeks.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lung Cancer.

Enter answer here - Pt. has liver lesion found 6 months ago and radiologist recommended a 6 month follow up ct.; Patient has a yearly echo due to his high blood pressure.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Enter date of initial onset here - or Type In Unknown UNKNOWN; There has been treatment or conservative therapy.; ; This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; It is unknown if there been a change in clinical status since the last echocardiogram.; It is unknown if this is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an evaluation of new or changing symptoms of valve disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an initial evaluation of suspected valve disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; It is unknown if there been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; This is for the initial evaluation of heart failure.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient does not have a history of a recent heart attack or hypertensive heart disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Pulmonary Hypertension.

Unknown; This study is being ordered for Vascular Disease.; 06/10/2016; There has been treatment or conservative therapy.; edema in the lower extremities due to patient had hypertension, leg swelling; medications/HCTZ, compression stockings for edema

This request is for a Low Dose CT for Lung Cancer Screening (S8032); This patient has NOT had a Low Dose CT for Lung Cancer Screening (S8032) in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; It is unknown if the patient is presenting with pulmonary signs or symptoms of lung cancer or if there are other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.

This request is for a Low Dose CT for Lung Cancer Screening (S8032); This patient has NOT had a Low Dose CT for Lung Cancer Screening (S8032) in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.

This request is for a Low Dose CT for Lung Cancer Screening (S8032); This patient has NOT had a Low Dose CT for Lung Cancer Screening (S8032) in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient quit smoking less than 15 years ago.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for Brain Cancer/Tumor or Mass.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lung Cancer.; The patient has been diagnosed with small cell lung cancer.

Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new signs or symptoms.

Radiology Services Denied Not Medically Necessary

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; It is unknown if there been a change in clinical status since the last echocardiogram.; It is unknown if this is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.

Radiology Services Denied Not Medically Necessary

This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; The member does not have known or suspected coronary artery disease

Radiology Services Denied Not Medically Necessary

Unknown; This study is being ordered for Vascular Disease.; 06/10/2016; There has been treatment or conservative therapy.; edema in the lower extremities due to patient had hypertension, leg swelling; medications/HCTZ, compression stockings for edema

lung mass; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

Burning; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3/2015; There has been treatment or conservative therapy.; Pt c/o numbness and tingling.; PT and injections with no help This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; Yes, this is a request for follow up to a known tumor or abdominal cancer.

ABD Abscess purpose of the test to see if abscess has been resolved.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.

This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This request is for a Low Dose CT for Lung Cancer Screening (S8032); This patient has NOT had a Low Dose CT for Lung Cancer Screening (S8032) in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.

Unknown; This study is being ordered for a neurological disorder.; 13 years ago, started again 1 year ago; There has been treatment or conservative therapy.; Carotid Stenosis; CT head or Brain w/Contrast 03/07/16 was abnormal; RICA angioplasty and stenting on 03/25/16

UNKNOWN; This study is being ordered for a neurological disorder.; SEPTEMBER 2015; There has been treatment or conservative therapy.; HEADACHES, BLURRED AND DOUBLE VISION, HEMIANOPSIA LEFT AND RIGHT, LOSS OF CONSCIENCES, NAUSEA, NECK STIFFNESS, VERTIGO; MEDICATIONS

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.; &lt;Document exam findings&gt;

Radiology Services Denied Not Medically Necessary

Burning; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3/2015; There has been treatment or conservative therapy.; Pt c/o numbness and tingling.; PT and injections with no help There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.

none; This study is being ordered for a neurological disorder.; 01/11/2016; There has been treatment or conservative therapy.; Pt suffers with muscle weakness (Left side); enable to walk and vision problems.; Medication therapy

Old cva in 2014; vertigo and dizziness; h/a; possible seizure; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

R/O cause of vertigo; This study is being ordered for a neurological disorder.; 03/31/16; There has not been any treatment or conservative therapy.; Headache , weakness , pain in both legs , , nausea,

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus.

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.

none; This study is being ordered for a neurological disorder.; 01/11/2016; There has been treatment or conservative therapy.; Pt suffers with muscle weakness (Left side); enable to walk and vision problems.; Medication therapy

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is not known if there are new symptoms including hematuria.; It is not known if there are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.

This is a request for CT Angiography of the Abdomen and Pelvis.  
Yes, this is a request for CT Angiography of the abdomen.

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Hematuria.; Other

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other;

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Pt has an adrenal mass

This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;" &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;" CT of abdomen showed lesion on left kidney and requested MRI

R/O cause of vertigo; This study is being ordered for a neurological disorder.; 03/31/16; There has not been any treatment or conservative therapy.; Headache , weakness , pain in both legs , , nausea,

R/O cause of vertigo; This study is being ordered for a neurological disorder.; 03/31/16; There has not been any treatment or conservative therapy.; Headache , weakness , pain in both legs , , nausea,

This is a request for CT Angiography of the Abdomen and Pelvis.

This request is for an Abdomen MRI.; This study is being ordered for organ enlargement.; There is no ultrasound or plain film evidence of an abdominal organ enlargement.; ammonia levels are high

Patient is listed for kidney transplant, preoperative testing; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.

; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.

Bypass Clinicals; ; This is a request for a brain/head CT.; This is a request for a brain/head CT.; None of the listed reasons for the study have been selected.; None of the listed reasons for the study have been selected.

Mrs. Darrough continues to have daily headaches, this scan is to f/u on her left frontal craniotomy with meningioma resection on 12/15/15; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.

This is a request for a brain/head CT.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a recent head trauma or injury.

This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has the inability to speak.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or aneurysm.; This study is being ordered for a previous stroke or aneurysm.  
This is a request for a brain/head CT.; The study is requested for Hydrocephalus or congenital abnormality.

This is a request for a brain/head CT.; The study is requested for known or suspected bleed such as subdural hematoma or subarachnoid bleed.

This is a request for a brain/head CT.; There is a suspected or known brain tumor.; The study is requested for known or suspected brain tumor, mass or cancer.

This is a request for a brain/head CT.; There is a suspected or known brain tumor.; This study is being requested for known or suspected brain tumor, mass or cancer.

This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.

This is a request for a brain/head CT.; There is not a suspected or known brain tumor.; The patient currently does not have cancer.; This is a evaluation for a bone tumor or abnormality of the skull.; This study is being requested for known or suspected brain tumor, mass or cancer.

This is a request for a brain/head CT.; This study is being requested for a history of stroke, (CVA) known or follow-up.

This is a request for a brain/head CT.; This study is being requested for Hydrocephalus or congenital abnormality.

This is a request for a brain/head CT.; This study is requested for known or suspected bleed such as subdural hematoma or subarachnoid bleed.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/26/16; It is not known if there has been any treatment or conservative therapy.; Pt suffers with headaches.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

constant pain, loss of balance, numbness and tingling. constant headache w/ aura, seizures.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

Recommended by Neuroradiologist Dr. Vanessa Hardin, after reviewing her pervious MRI and PET scan, there is a possible residual tumor.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

Yes, this is a request for CT Angiography of the brain.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/26/16; It is not known if there has been any treatment or conservative therapy.; Pt suffers with headaches.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Patient has severe scoliosis and severe ankylosing spondylitis and require surgical correction.; This study is being ordered for a neurological disorder.; Unknown; There has been treatment or conservative therapy.; Weakness, pain and cervical radiculopathy.; Patient has seen a chiropractor

Recommended by Neuroradiologist Dr. Vanessa Hardin, after reviewing her pervious MRI and PET scan, there is a possible residual tumor.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

Yes, this is a request for CT Angiography of the Neck.

"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The study is ordered for trauma or injury of the orbit, face or neck soft tissue

There is an immediate family history of aneurysm.; This is a request for a Brain MRA. There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.

This is a request for a head and neck MR Angiogram.; There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; "There is not a sudden onset of one-sided weakness, speech impairment, vision defects or severe dizziness."; This patient does not have an abnormal ultrasound of the neck.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/23/15; There has been treatment or conservative therapy.; Christie is here for an unscheduled office visit. She is 4-1/2 months out from her L5-S1 TLIF and laminectomy. She comes in today stating that she has been having recurring numbness in both hands and a stocking glove distribution for about the last 3 week; She is 4-1/2 months out from her L5-S1 TLIF and laminectomy  
ANNUAL FOLLOW UP; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

avm, hemorrhage; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Brain- check for any abnormalities- leg weakness/general weakness.&#x0D; &#x0D;  
LBP; This study is being ordered for a neurological disorder.; Nov 2015; There has been  
treatment or conservative therapy.; Low back pain/leg weakness/foot numbness;  
physical therapy/medicines/Lumbar epidural spine injections

CHECK FOR SHUNT MALFUNCTION AND EVALUATE THE TETHERED SPINAL CORD  
ALONG WITH ANY OTHER SPINAL ABNORMALITIES AS HE IS MAINLY WHEELCHAIR  
BOUND.; This study is being ordered for Congenital Anomaly.; 2/21/2010; There has  
been treatment or conservative therapy.; CT HEAD DEMONSTRATED THE LEFT  
OCCIPITAL HOLE IS SLIGHTLY BIGGER THAN IT WAS PREVIOUSLY.;  
MYELOMENINGOCELE REPAIRED, HAD VP SHUNT IMPLANTED, NEUROGENIC BOWEL  
AND BLADDER

CONTINUED FOLLOW UP; This study is being ordered for a neurological disorder.;  
11/2006; There has been treatment or conservative therapy.; SEIZURES, HEADACHES,  
NECK PAIN IN THE ANATOMIC CENTER OF NECK, SNORING; DIAZEPAM,  
OXCARBAZEPINE

CONTINUED FOLLOW UP; This study is being ordered for something other than: known  
trauma or injury, metastatic disease, a neurological disorder, inflammatory or  
infectious disease, congenital anomaly, or vascular disease.; 2004; There has been  
treatment or conservative therapy.; FOLLOW UP OF CHIARI MALFORMATION, SYRINX;  
CHIARI DECOMPRESSION X 3, OT, PT

Diagnosed Pilocytic astrocytoma follow up to Surgery done Oct 17 2011 checking for  
reoccurrence of tumor; This request is for a Brain MRI; The study is NOT being  
requested for evaluation of a headache.; Requested for evaluation of seizures; There  
has been a previous Brain MRI completed.; The brain MRI was normal.

FOLLOW UP FOR SHUNT MALFUNCTION; This study is being ordered for Congenital  
Anomaly.; 1/7/2015; There has been treatment or conservative therapy.; FEVER,  
FUSSINESS; SPINA BIFIDA CLOSURE AT BIRTH, SHUNTED HYDROCEPHALUS

MEMBER WITH HISTORY OF SEIZURES, AND CHOROID PLEXUS CYST.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is not a pituitary tumor or pituitary adenoma.

need follow up MRI of brain. pt with known brain tumor and time for yearly MRI to make sure it isn't getting bigger.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is not a pituitary tumor or pituitary adenoma.

Need to rule out demyelinating disease, tumor, mass, or cord compression.; This study is being ordered for a neurological disorder.; February 1, 2016; There has been treatment or conservative therapy.; Headache, neck pain, right arm numbness, weakness; Patient with physical therapy, gabapentin, flexeril, naproxen.

patient had recent mri of brain without contrast and a lesion was found in right parietal lobe, it is suspected calcification vs meningioma; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is not a pituitary tumor or pituitary adenoma.

Patient has evidence of bilateral ulnar nerve compression on EMG. We will start with conservative treatments including bracing to see if this helps him with his symptoms. He will also need to modify his job duties. He has what is likely hydromyelia of the; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Pituitary cyst, Radiculitis, cervical right, Degenerative disc disease cervical, tinnitus, blurred vision, neck pain, dizziness, tingling, tremors and headaches, nervous/anxious, insomnia, head swelling; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

post op; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Return of dull headaches post operative from Chiari I decompression and associated neck pain.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Chiari I malformation diagnosed 20 years ago. She is post-operative from suboccipital Chiari decompression on 12/03/2015; There has been treatment or conservative therapy.; Patient with dull constant headache worse with activity. Reports nausea and neck pain. Reduced mobility of neck due to pain.;

She had MRI brain 12/31/2014 that demonstrates unchanged mass of the pituitary gland with no evidence of major optic nerve or chiasm impingement or other symptoms. She neurologically appears to be quite stable. She has been having a flurry of headaches ; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

She has some cervical radiculopathy and neck pain which is still lingering. She does have some small disc bulges at C4-5 and C6-C7 changes on EMG probably related to her previous herniated disc. I don't think there is much we can do with that. She has ; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

She is a Chiari patient; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

She is here to go over the results of her recent MRI scans of her brain, cervical thoracic and lumbar spine. She continues to have upper, mid and lower back pain with variable dysesthesias into both upper extremities. She notices slight unsteadiness when ; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.  
Spinal tumor. Pre-op.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

The key findings in her cervical, thoracic, and lumbar exam includes slight decreased range of motion of the cervical and lumbar spine about 10% in all planes otherwise, unremarkable. The rest of her detailed exam is normal and outlined above. &#x0D; &#x0D; Ms. Gh; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This 61-year-old female presents with intermittent episodes of electric shock like pain in the left side of her face. This runs beginning of the left V3 area down into the mandible and intermittently back up into her maxilla and nasolabial fold on the left; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo. This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; This study is being ordered for a tumor.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing dizziness.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing dizziness.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient has not undergone treatment for a congenital abnormality (such as hydrocephalus or craniosynostosis).; There are not recent neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.; Surgery is not planned within the next 4 weeks.; An operation for shunt placement (for brain fluid drainage) is being considered or a non-metalic shunt is not functioning correctly.; The patient has a congenital abnormality.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient has not undergone treatment for a congenital abnormality (such as hydrocephalus or craniosynostosis).; There are recent neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.; The patient has a congenital abnormality.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient has undergone treatment for a congenital abnormality (such as hydrocephalus or craniosynostosis).; The patient has a congenital abnormality.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are not physical findings or laboratory values indicating abnormal pituitary hormone levels.; There has been a previous Brain MRI completed.; The brain MRI was abnormal.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; It is not known if a biopsy has been completed to determine tumor tissue type.; It is not known if there are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; It is not known if there is a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are physical findings or laboratory values indicating abnormal pituitary hormone levels.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; It is not known if a biopsy has been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack).; This study is being ordered as a 12 month annual follow up.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has the inability to speak.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for an aneurysm.; This study is being ordered for neurological deficits.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for a tumor.

"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

ABNORMAL MRI'S; This study is being ordered for a neurological disorder.; 3/26/16; There has not been any treatment or conservative therapy.; ABNORMAL MRI'S  
This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.  
; This study is being ordered for a neurological disorder.; ; It is not known if there has been any treatment or conservative therapy.;

This study is being ordered for follow-up to trauma.; "The ordering physician is a surgeon, pulmonologist, or cardiologist."; This is a request for a chest MRI.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; There has been treatment or conservative therapy.; Neck and back pain, numbness in hand , spondylosis at 3 different levels;; PT, medications,

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 12/2014; There has been treatment or conservative therapy.; Back and neck pain, weakness; Surgery, anti inflammatory

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 12/2015; There has been treatment or conservative therapy.; back pain, neck pain, arm and leg weakness,; physical therapy, home exercises, anti-inflammatory medications

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 6/2014; There has been treatment or conservative therapy.; low back and neck pain bilateral arm n hip pain weakness; PT

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 02/06/2016; It is not known if there has been any treatment or conservative therapy.; neck pain, left side lower back pain, numbness and tingling in arms and legs. Treated with physical therapy, oral medications, seen back on 04/21/2016, not any better.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 07/2015; There has been treatment or conservative therapy.; back pain; PT

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/2014; There has been treatment or conservative therapy.; back pain neck pain ad arm and leg weakness difficulty amulating; PT/ anti inflammatory products pain meds/muscle relaxers

; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.;

; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

Based on the MRI and X-Ray from May 2015 she has a pronounced thoracic kyphosis with the apex of the curve at approximately T8.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/01/2014; There has not been any treatment or conservative therapy.; Neck and thoracic pain.

FRACTURE AT C6 WITH MRI SHOWING SIGNIFICANT DISK HERNIATION AND THE PATIENT HAVING SEVERE MYELOPATHY.; This study is being ordered for trauma or injury.; 03/29/2016; There has been treatment or conservative therapy.; SEVERE WEAKNESS OF HIS LOWER EXTRMITIES, SEVERE WEAKNESS OF THE LEFT UPPER EXTREMITY. HE HAS HYPER REFLEXES INDICATIVE OF MYELOPATHY. SENSORY LOSS IS NOTED AS WELL.; PATIENT HAD SURGERY ON 04/02/2016 DUE TO TRAUMA

HPI Comments: 59 y/o female here today for follow up evaluation. Had a C4-6 ACDF in 2014. Had some neck pain and radiculopathy after surgery. That has improved from baseline but she continues to have some neck pain, arm tingling, and occasional difficulty; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Had a C4-6 ACDF in 2014. Had some neck pain and radiculopathy after surgery.; There has not been any treatment or conservative therapy.; some neck pain, arm tingling, and occasional difficulty walking

It is not known if there are documented findings of immune system suppression.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; None of the options listed is the reason for the study.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing cervical neck pain not improving despite treatment.

neck pain, sagging, pain radiating to specular region; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

Need to follow up on fracture of the occipital and also the T spine; This study is being ordered for trauma or injury.; 10/2015; There has been treatment or conservative therapy.; continued localized thoracic stabbing pain despite TLSO brace. Aggravating factors include moving arms above head/removing TLSO brace. Relieving factors include brace/pain medications. Associated symptoms include localized thoracic pain.; kyphoplasty 2/2/16

Onset: 25 years ago. The problem is severe. Duration: varies. The problem has worsened. The frequency of pain is constant. Location of pain is left posterior neck, left shoulder and bilateral mid back. The patient describes the pain as aching, burni; This study is being ordered for trauma or injury.; 2005; There has been treatment or conservative therapy.; low back pain, n/t BLE; PT

PATIENT COMES IN WITH COMPLAINTS OF SEVERE NECK PAIN AND PAIN RADIATING DOWN HER ARM. THE MRI SHE HAD CLEARLY SHOW SEVERE FORAMINAL STENOSIS AND ALSO CERVICAL CANAL STENOSIS.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

Patient had previous surgery and we're evaluating hardware and the bony anatomy prior to surgery. Severe pain in the past several months, and right arm radiculopathy. - or Type In Unknown If No Info Given.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to pre-operative evaluation.; There is no known condition of tumor, infection, or neurological deficits.; There is a reason why the patient cannot have a Cervical Spine MRI.

Patient has severe scoliosis and severe ankylosing spondylitis and require surgical correction.; This study is being ordered for a neurological disorder.; Unknown; There has been treatment or conservative therapy.; Weakness, pain and cervical radiculopathy.; Patient has seen a chiropractor

PATIENT PRESENT WITH RECENT MRI OF HER CERVICAL SPINE ALONG WITH COMPLAINTS OF SEVERE PAIN AND STIFFNESS. PAIN PRIMARILY PRESENTS ON HER RIGHT SIDE, SHE ALSO HAS COMPLAINTS OF SHARP SHOOTING PAIN UP INTO THE RIGHT SIDE OF HER HEAD. PATIENT CAN NOT LOOK DO; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

physician is looking for possible spine fluid leakage; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 4-29-16; There has been treatment or conservative therapy.; patient is having dizziness and dyspnea after a Anterior Cervical Fusion; anti-inflammatory medicines and pain medications

R/O ADEMMA; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

r/o nerve root compression - studies being done in part of myelgram; This study is being ordered for a neurological disorder.; ongoing since 12/1/2015; There has been treatment or conservative therapy.; back and neck pain radiates into extremities n/t also noted - injections; OTC nsaid PT and Traction

SHE IS MORE SEVERE PAIN THAN SHE WAS DURING HER FIRST INITIAL VISIT. HER EMG/NCV SHOWS THAT SHE HAD MILD ABNORMALITY OF THE RIGHT LEG SUGGESTIVE OF THE PRESENCE OF AN L5 RADICULOPATHY. HER XRAY OF THE CERVICAL SPINE SHOWED STATUS POST ACDF FROM C5/7 WITH; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2015-4-2; There has been treatment or conservative therapy.; SHARP SHOOTING PAIN FROM HER BACK DOWN HER LEG TO THE OUTSIDE OF HER FOOT, ALONG WITH DISTURBED BALANCE, EXTREMITY WEAKNESS, SPASMS, NUMBNESS IN EXTREMITIES, LOSS OF BALANCE, AS WELL AS LEG NUMBNESS.; PATIENT HAS HAD EMG AND NCV STUDIES AND HAS BEEN PRESCRIBED MEDICATION.

The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; The patient is experiencing sensory abnormalities such as numbness or tingling.; There is a reason why the patient cannot have a Cervical Spine MRI.; This study is being ordered for another reason besides Abnormal gait, Lower extremity weakness, Asymmetric reflexes, Documented evidence of Multiple Sclerosis, &#x0D; Bowel or bladder dysfunction, Evidence of new foot drop, etc...

The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Abnormal gait.

The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Bowel or bladder dysfunction.

The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Evidence of a recent fracture on previous imaging studies.

The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Evidence of new foot drop.

The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Lower extremity weakness.

The patient does not have any neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; There is a reason why the patient cannot have a Cervical Spine MRI.

This is a patient that underwent a C3-7 decompression and fusion in 9/2015 who was doing well until he developed new N/T and pain in his right shoulder and arm about 2.5 months ago. He is not myelopathic on exam. He has trace right grip weakness. His MRI ; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.

This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to follow-up surgery or fracture within the last 6 months.; "The patient has been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."; There is a reason why the patient cannot have a Cervical Spine MRI.

This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to neurological deficits.; The patient is experiencing or presenting symptoms of radiculopathy.; There is a reason why the patient cannot have a Cervical Spine MRI.

This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to pre-operative evaluation.; The patient is experiencing or presenting symptoms of a new foot drop.; There is a known condition of neurological deficits.; There is a reason why the patient cannot have a Cervical Spine MRI.

This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to pre-operative evaluation.; The patient is experiencing or presenting symptoms of abnormal gait.; There is a known condition of neurological deficits.; There is a reason why the patient cannot have a Cervical Spine MRI.

This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to pre-operative evaluation.; The patient is experiencing or presenting symptoms of lower extremity motor weakness documented on physical exam.; There is a known condition of neurological deficits.; There is a reason why the patient cannot have a Cervical Spine MRI.

This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to pre-operative evaluation.; There has been a supervised trial of conservative management for at least 6 weeks.; "The caller indicated that the patient is not experiencing or presenting symptoms of Abnormal Gait, Lower Extremity Weakness, Asymmetric Reflexes, Cauda Equina Syndrome, Bowel or Bladder Dysfunction, New Foot Drop, or Radiculopathy."; The patient is experiencing sensory abnormalities such as numbness or tingling.; There is a known condition of neurological deficits.; There is a reason why the patient cannot have a Cervical Spine MRI.

This study is to be part of a Myelogram.; This is a request for a Cervical Spine CT

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 12/2014; There has been treatment or conservative therapy.; Back and neck pain, weakness; Surgery, anti inflammatory

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 12/2015; There has been treatment or conservative therapy.; back pain, neck pain, arm and leg weakness,; physical therapy, home exercises, anti-inflammatory medications

; This study is being ordered for a neurological disorder.; HPI: Billy W Reed is a pleasant 52 y.o. gentleman who suffered a MVC in 2004 resulting in a fracture at L1. Patient had surgery followed by 1 revision and continues to have back and left leg pain in the anterior thigh along with numbness. He states his ba; There has been treatment or conservative therapy.; Chief Complaint: back and left leg pain &#x0D; &#x0D; &#x0D; HPI: Billy W Reed is a pleasant 52 y.o. gentleman who suffered a MVC in 2004 resulting in a fracture at L1. Patient had surgery followed by 1 revision and continues to have back and left leg pain in the anteri; A/P: 52 y.o. m w/ recurrent back pain s/p 2 lumbar spinal fusion surgeries. Patient is a poor candidate for surgery. Radicular pain on left side with proximal weakness and back pain distal to previous fusion. &#x0D; - CT thoracic and lumbar at home&#x0D; - scolio

Based on the MRI and X-Ray from May 2015 she has a pronounced thoracic kyphosis with the apex of the curve at approximately T8.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/01/2014; There has not been any treatment or conservative therapy.; Neck and thoracic pain.

Need to follow up on fracture of the occipital and also the T spine; This study is being ordered for trauma or injury.; 10/2015; There has been treatment or conservative therapy.; continued localized thoracic stabbing pain despite TLSO brace. Aggravating factors include moving arms above head/removing TLSO brace. Relieving factors include brace/pain medications. Associated symptoms include localized thoracic pain.; kyphoplasty 2/2/16

Patient has a T4 fracture that he sustained when he fell on ice in January 2016. This is a 2 month followup to check on the healing of the fracture.; This is a request for a thoracic spine CT.; There is no reason why the patient cannot undergo a thoracic spine MRI.

This is a patient that underwent a C3-7 decompression and fusion in 9/2015 who was doing well until he developed new N/T and pain in his right shoulder and arm about 2.5 months ago. He is not myelopathic on exam. He has trace right grip weakness. His MRI ; This is a request for a thoracic spine CT.; Caller does not know whether there is a reason why the patient cannot undergo a thoracic spine MRI.

This is a request for a thoracic spine CT.; "The patient has been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."; The study is being ordered due to follow-up to surgery or fracture within the last 6 months.; There is a reason why the patient cannot undergo a thoracic spine MRI.

This is a request for a thoracic spine CT.; There is evidence of tumor or metastasis on a bone scan or x-ray.; The study is being ordered due to suspected tumor with or without metastasis.; There is a reason why the patient cannot undergo a thoracic spine MRI.

This is a request for a thoracic spine CT.; There is no evidence of tumor or metastasis on a bone scan or x-ray.; The study is being ordered due to suspected tumor with or without metastasis.; There is a reason why the patient cannot undergo a thoracic spine MRI.

SHE IS MORE SEVERE PAIN THAN SHE WAS DURING HER FIRST INITIAL VISIT. HER EMG/NCV SHOWS THAT SHE HAD MILD ABNORMALITY OF THE RIGHT LEG SUGGESTIVE OF THE PRESENCE OF AN L5 RADICULOPATHY. HER XRAY OF THE CERVICAL SPINE SHOWED STATUS POST ACDF FROM C5/7 WITH; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2015-4-2; There has been treatment or conservative therapy.; SHARP SHOOTING PAIN FROM HER BACK DOWN HER LEG TO THE OUTSIDE OF HER FOOT, ALONG WITH DISTURBED BALANCE, EXTREMITY WEAKNESS, SPASMS, NUMBNESS IN EXTREMITIES, LOSS OF BALANCE, AS WELL AS LEG NUMBNESS.; PATIENT HAS HAD EMG AND NCV STUDIES AND HAS BEEN PRESCRIBED MEDICATION.

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is a preoperative or recent post-operative evaluation.

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is not experiencing symptoms of radiculopathy for six weeks or more.; There is no neurologic symptoms of bowel or urinary bladder dysfunction.; There is no suspicion of lumbar spine infection.; There is no suspicion of lumbar spine neoplasm or tumor or metastasis.

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is to be part of a myelogram or discogram.

This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; ; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Document exam findings; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;;

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 01/2015; There has not been any treatment or conservative therapy.;

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 05/18/2015; There has been treatment or conservative therapy.; Neck and thoracic pain; numbness; also lower back issues; anti-inflammatories; muscle relaxers; past injections and PT ordered by PCP

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 11/2015; There has been treatment or conservative therapy.; Neck and left arm shoulder pain numbness, and leg numbness with right being worse than left.; medication and steroid injection.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/01/15; There has been treatment or conservative therapy.; Numbness and tingling down arms, and both legs; Surgery on neck, xrays and injections on back, medications

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/26/2015; There has been treatment or conservative therapy.; neck and right upper extremity pain, burning, numbness. &#xOD; back pain, leg pain, tingling; block on lower back, cervical spine surgery

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/13/15; There has been treatment or conservative therapy.; Neck pain and Radiation Back pain and radiating to the back of bilateral legs; PT injections and medications

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2012; There has not been any treatment or conservative therapy.; neck pain, back pain, decreased range of motion, nerve pain, numbness, tingling

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; August 2010; There has been treatment or conservative therapy.; Pain New symptoms since 2012 Radiating to left hip Trouble walking; Hydrocodone Steroid dose pack Home exercise

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Oct. 2014; There has been treatment or conservative therapy.; Pain in left shoulder, ache in right hand and spine.; Meds Flexerall, Lisinopril, Morphine sulphate, Oxycodone.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; 8/22/15; There has been treatment or conservative therapy.; severe pain left foot weakness axial back pain intermitant hip pain groin pain and bylateral arm weakness and pain; lumbar radio frequency/

; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

; This study is being ordered for a neurological disorder.; ; It is not known if there has been any treatment or conservative therapy.;

; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.;

; This study is being ordered for a neurological disorder.; 1/11/2016; There has been treatment or conservative therapy.; Neck pain, back pain, and radiculopathy; PT, injections, medication and home exercise

; This study is being ordered for a neurological disorder.; 4/1/16. Date of surgery.; There has been treatment or conservative therapy.; pain in neck and left shoulder; Medrol Dosepak after surgery. Gave on 4/11/16 and saw back 4/18/16 with no improvement

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 04/14/2016; There has not been any treatment or conservative therapy.; Radicular symptoms on left side, cervical and thoracic pain, decreased motor strength.

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/25/15; It is not known if there has been any treatment or conservative therapy.; He is 6 weeks out from discectomy at T8-T9. He's doing much better. He had quite a lot of pain in the first week after surgery but it has steadily declined since then. He still notices some numbness and tingling across the lower lumbar spine as well as so

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/23/15; There has been treatment or conservative therapy.; Christie is here for an unscheduled office visit. She is 4-1/2 months out from her L5-S1 TLIF and laminectomy. She comes in today stating that she has been having recurring numbness in both hands and a stocking glove distribution for about the last 3 week; She is 4-1/2 months out from her L5-S1 TLIF and laminectomy

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient states years.; There has been treatment or conservative therapy.; Reported by patient. &#x0D; Duration: years &#x0D; Frequency Frequently &#x0D; Severity: Average pain level over the last week 8/10 &#x0D; Location: headache &#x0D; Quality: Dull; Stabbing &#x0D; Timing: Abrupt onset &#x0D; Context/Mechanism: Cannot identify &#x0D; Aggravating Factors: Cannot i; She is a chiari patient.

; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.;

ANNUAL FOLLOW UP; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Based on her MRI and X-Ray from May 2015 she has a pronounced thoracic kyphosis with the apex of the curve at approximately T8.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/01/2014; There has not been any treatment or conservative therapy.; Neck and thoracic pain

Cervical MRI: Patient has been experiencing symptoms of cervical myelopathy. Symptoms include. Incoordination, loss of balance. She has a history of falling. She is having difficulty with holding and grasping items. She has a difficult time with buttons/z; This study is being ordered for a neurological disorder.; Symptoms have been gradually worse for 1 year; There has been treatment or conservative therapy.; She is showing signs of myelopathy. Dropping items in her hands, gait disturbance, falling, incoordination; Thoracic spine she had a T4 kyphoplasty. &#x0D; &#x0D; No conservative management on her cervical spine

CHECK FOR SHUNT MALFUNCTION AND EVALUATE THE TETHERED SPINAL CORD ALONG WITH ANY OTHER SPINAL ABNORMALITIES AS HE IS MAINLY WHEELCHAIR BOUND.; This study is being ordered for Congenital Anomaly.; 2/21/2010; There has been treatment or conservative therapy.; CT HEAD DEMONSTRATED THE LEFT OCCIPITAL HOME IS SLIGHTLY BIGGER THAN IT WAS PREVIOUSLY.; MYELOMENINGOCELE REPAIRED, HAD VP SHUNT IMPLANTED, NEUROGENIC BOWEL AND BLADDER

constant pain, loss of balance, numbness and tingling. constant headache w/ aura, seizures.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

CONTINUED FOLLOW UP; This study is being ordered for a neurological disorder.; 11/2006; There has been treatment or conservative therapy.; SEIZURES, HEADACHES, NECK PAIN IN THE ANATOMIC CENTER OF NECK, SNORING; DIAZEPAM, OXCARBAZEPINE

CONTINUED FOLLOW UP; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2004; There has been treatment or conservative therapy.; FOLLOW UP OF CHIARI MALFORMATION, SYRINX; CHIARI DECOMPRESSION X 3, OT, PT

FOLLOW UP FOR SHUNT MALFUNCTION; This study is being ordered for Congenital Anomaly.; 1/7/2015; There has been treatment or conservative therapy.; FEVER, FUSSINESS; SPINA BIFIDA CLOSURE AT BIRTH, SHUNTED HYDROCEPHALUS

FRACTURE AT C6 WITH MRI SHOWING SIGNIFICANT DISK HERNIATION AND THE PATIENT HAVING SEVERE MYELOPATHY.; This study is being ordered for trauma or injury.; 03/29/2016; There has been treatment or conservative therapy.; SEVERE WEAKNESS OF HIS LOWER EXTRMITIES, SEVERE WEAKNESS OF THE LEFT UPPER EXTREMITY. HE HAS HYPER REFLEXES INDICATIVE OF MYELOPATHY. SENSORY LOSS IS NOTED AS WELL.; PATIENT HAD SURGERY ON 04/02/2016 DUE TO TRAUMA

I spoke with the patient and he complains of pain in his neck and bilateral arms, left worse than the right. He states he has intermittent numbness and tingling in bilateral arms, worse on the left. His left arm "feels real heavy". He states that he saw n; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Need to rule out demyelinating disease, tumor, mass, or cord compression.; This study is being ordered for a neurological disorder.; February 1, 2016; There has been treatment or conservative therapy.; Headache, neck pain, right arm numbness, weakness; Patient with physical therapy, gabapentin, flexeril, naproxen.

old mri showed disc herniation in the lumbar, weak in the grip strength; This study is being ordered for a neurological disorder.; 11/2015; There has been treatment or conservative therapy.; back and neck pain, arm weakness, leg weakness, numbness and tingling of the extremities; physical therapy, tramadol, over the counter nsids

Patient has a history of NF who presents with main complaint of low back pain. He also reports left lateral leg pain and N/T in his right hand. He is grossly myelopathic on exam. His MRI lumbar spine w/o shows scalloping of the lumbar vertebra, possible l; This study is being ordered for a neurological disorder.; He states he has been having low back pain for about 10 years and it has progressively worsened in the last 3 years. He also complains of intermittent right arm pain and numbness that has been present for three years.; There has been treatment or conservative therapy.; Patient has a history of NF who presents with main complaint of low back pain. He also reports left lateral leg pain and N/T in his right hand. He is grossly myelopathic on exam. His MRI lumbar spine w/o shows scalloping of the lumbar vertebra, possible l; He has been treated by a chiropractor which he states gave him no relief. He is taking OTC medications for his pain which gives him very mild, temporary relief.

patient is starting left leg numbness.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

Patient was in a accident and the last and has left shoulder and arm pain. Radiating to shoulder and to the arm.; This is a request for cervical spine MRI; Trauma or recent injury; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Return of dull headaches post operative from Chiari I decompression and associated neck pain.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Chiari I malformation diagnosed 20 years ago. She is post-operative from suboccipital Chiari decompression on 12/03/2015; There has been treatment or conservative therapy.; Patient with dull constant headache worse with activity. Reports nausea and neck pain. Reduced mobility of neck due to pain.; Spinal tumor. Pre-op.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; No, the patient did not have six weeks of Chiropractic care related to this episode.; Patient has a diagnosed meningioma and spondylosis

The patient is not presenting new symptoms.; This study is being ordered for follow-up.; This is a request for cervical spine MRI; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; The last spine MRI was performed more than 6 months ago.; Known Tumor with or without metastasis

The patient is presenting new symptoms.; This study is being ordered for follow-up.; This is a request for cervical spine MRI; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; Known Tumor with or without metastasis

This is a request for cervical spine MRI; "The patient has been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."; Follow-up to Surgery or Fracture within the last 6 months

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is x-ray evidence of a recent cervical spine fracture.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.

This is a request for cervical spine MRI; Follow-up to Surgery or Fracture within the last 6 months; The patient has been seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.

This is a request for cervical spine MRI; Neurological deficits; The patient had a Posterior cervical decompression from C3 to C7 with fusion from C4 to C6 with right foraminotomies at C5-6 and C6-7 by Dr Rubin on 9/2/16. The patient is now having pain in his right shoulder blade down his arm that is intermidient that i; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

This is a request for cervical spine MRI; None of the above; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; Yes, the patient is experiencing or presenting new symptoms of Bowel or bladder dysfunction.

This is a request for cervical spine MRI; None of the above; Pt with history of chiari malformation experiencing neck and arm pain and arm numbness. Pt referred to Dr Raja for neurosurgical evaluation; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; None of the above; Pt with MRI brain evidence of low-lying cerebellar tonsils. MRI C Spine needed to evaluate for Chiari Malformation; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; None of the above; re-evaluating chiari 1 malformation, headaches, left sided numbness/tingling; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; Yes, the patient is experiencing new onset of parathesia diagnosed by a neurologist.; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; None of the above; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

This is a request for cervical spine MRI; Pre-Operative Evaluation; No, the last Cervical spine MRI was not performed within the past two weeks.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; &lt;Enter Additional Clinical Information&gt;

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Tingling H/A

This is a request for cervical spine MRI; There is evidence of tumor or metastasis on a bone scan or x-ray.; Suspected Tumor with or without Metastasis

This is a request for cervical spine MRI; There is no laboratory or x-ray evidence of osteomyelitis.; Known or Suspected Multiple Sclerosis, Infection or abscess; No, there are no documented clinical findings of Multiple sclerosis.; No, there is not a laboratory or x-ray evidence of Meningitis.; No, there is not a laboratory or x-ray evidence of an infected disc, septic arthritis or “discitis”.; Yes, there is laboratory or x-ray evidence of a paraspinal abscess.

This is a request for cervical spine MRI; There is no laboratory or x-ray evidence of osteomyelitis.; Known or Suspected Multiple Sclerosis, Infection or abscess; No, there are no documented clinical findings of Multiple sclerosis.; No, there is not a laboratory or x-ray evidence of Meningitis.; Yes, there is a laboratory or x-ray evidence of an infected disc, septic arthritis or “discitis”.

TO RULE OUT SYRINX AND OTHER SPINAL ABNORMALITIES; This study is being ordered for a neurological disorder.; AUGUST 2015; There has not been any treatment or conservative therapy.; LEFT RETINAL HEMORRHAGE, SEVERE HEADACHES, MRI BRAIN 3/24/16 SHOWED CHIARI I MALFORMATION, MRI ENTIRE SPINE RECOMMENDED TO RULE OUT SYRINX AND OTHER SPINAL ABNORMALITIES.

Unable to stand for long periods unable to elevate arms above shoulders abn straight leg raise abn limited ROM; This study is being ordered for a neurological disorder.; Unknown; There has been treatment or conservative therapy.; Back and neck pain bilateral arm weakness left leg pain; S/P surgery rx medication PT 3-6 weeks

Worsening symptoms since seen in June 2015. Now has positive Hoffmans bilaterally that was not present on last exam.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; It is not known if there has been any treatment or conservative therapy.; Symptoms have been progressive over the past three to four months. She continues to have neck pain as well as right upper extremity pain which runs from the shoulder to her hand. She is also complaining of numbness and tingling affecting the hands bilat

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 05/18/2015; There has been treatment or conservative therapy.; Neck and thoracic pain; numbness; also lower back issues; anti-inflammatories; muscle relaxers; past injections and PT ordered by PCP

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;;

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; 11/2011; There has been treatment or conservative therapy.; low and mid back pain; PT and anti-inflammatories  
; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.  
; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; ;

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; It is not known if there has been any treatment or conservative therapy.;

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 04/14/2016; There has not been any treatment or conservative therapy.; Radicular symptoms on left side, cervical and thoracic pain, decreased motor strength.

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/29/12; It is not known if there has been any treatment or conservative therapy.; Ms. Adcock is a 77-year-old female referred to the neurosurgery clinic by Dr. Johnson. She resides in Bryant. She presents with long-standing chronic posterior neck pain that she has had for a number of years. She also has chronic right shoulder and back

ANNUAL FOLLOW UP; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Based on her MRI and X-Ray from May 2015 she has a pronounced thoracic kyphosis with the apex of the curve at approximately T8.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/01/2014; There has not been any treatment or conservative therapy.; Neck and thoracic pain

Cervical MRI: Patient has been experiencing symptoms of cervical myelopathy. Symptoms include. Incoordination, loss of balance. She has a history of falling. She is having difficulty with holding and grasping items. She has a difficult time with buttons/z; This study is being ordered for a neurological disorder.; Symptoms have been gradually worse for 1 year; There has been treatment or conservative therapy.; She is showing signs of myelopathy. Dropping items in her hands, gait disturbance, falling, incoordination; Thoracic spine she had a T4 kyphoplasty. &#x0D; &#x0D; No conservative management on her cervical spine

CHECK FOR SHUNT MALFUNCTION AND EVALUATE THE TETHERED SPINAL CORD ALONG WITH ANY OTHER SPINAL ABNORMALITIES AS HE IS MAINLY WHEELCHAIR BOUND.; This study is being ordered for Congenital Anomaly.; 2/21/2010; There has been treatment or conservative therapy.; CT HEAD DEMONSTRATED THE LEFT OCCIPITAL HOLE IS SLIGHTLY BIGGER THAN IT WAS PREVIOUSLY.; MYELOMENINGOCELE REPAIRED, HAD VP SHUNT IMPLANTED, NEUROGENIC BOWEL AND BLADDER

CONTINUED FOLLOW UP; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2004; There has been treatment or conservative therapy.; FOLLOW UP OF CHIARI MALFORMATION, SYRINGA; CHIARI DECOMPRESSION X 3, OT, PT

enlarging cyst in lumbar spine&#x0D; Location: Patient found to have the cyst 3 years ago when she was being worked up for back pain. Patient has numbness from the buttocks to the little toe on the right side. She has some slight burning nerve pain under the r; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

FOLLOW UP FOR SHUNT MALFUNCTION; This study is being ordered for Congenital Anomaly.; 1/7/2015; There has been treatment or conservative therapy.; FEVER, FUSSINESS; SPINA BIFIDA CLOSURE AT BIRTH, SHUNTED HYDROCEPHALUS

It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Caller does not know whether the patient is experiencing sensory abnormalities such as numbness or tingling.; Thoracic pain in a Chiari patient

It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.

L1 & 27 fracture from a ct; This study is being ordered for trauma or injury.; 05/10/2016; There has been treatment or conservative therapy.; back pain; medications

Ms. Lincoln returns 18 weeks post-discharge from her inpatient stay for lumbar epidural abscess and appears to be experiencing some new thoracic and lumbar radicular pain. I believe he may benefit from muscle relaxers and a short course of physical ther; This study is being ordered for Inflammatory/ Infectious Disease.; 07/2015; There has been treatment or conservative therapy.; worsening back pain, described as sharp, stabbing, shooting over the last 6 weeks. Radiation of pain is under both breasts, bilateral upper abdomen and bilateral lateral thighs and left medial thigh. Symptoms are aggravated by all positions and improv; iv antibiotics

Patient could potentially have a lesion higher up; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has been treatment or conservative therapy.; Lower back pain radiates into left lower extremity, numbness and tingling in left groin region and anterior thigh; Pain management- Epidural steroid injections

Patient has a history of NF who presents with main complaint of low back pain. He also reports left lateral leg pain and N/T in his right hand. He is grossly myelopathic on exam. His MRI lumbar spine w/o shows scalloping of the lumbar vertebra, possible I; This study is being ordered for a neurological disorder.; He states he has been having low back pain for about 10 years and it has progressively worsened in the last 3 years. He also complains of intermittent right arm pain and numbness that has been present for three years.; There has been treatment or conservative therapy.; Patient has a history of NF who presents with main complaint of low back pain. He also reports left lateral leg pain and N/T in his right hand. He is grossly myelopathic on exam. His MRI lumbar spine w/o shows scalloping of the lumbar vertebra, possible I; He has been treated by a chiropractor which he states gave him no relief. He is taking OTC medications for his pain which gives him very mild, temporary relief.

patient is starting left leg numbness.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

Spinal tumor. Pre-op.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; ; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Ms Williams is a 29 year old that has been having low back pain for about 10 years. She previously worked as a CNA. She has a burning pain bilaterally at her bra strap level that is constant. She has a shooting pain down into her hips and has "catches" th; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of abnormal gait.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of bowel or bladder dysfunction.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.

The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.

The patient is presenting new symptoms.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; This is a request for a thoracic spine MRI.; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; The study is being ordered due to known tumor with or without metastasis.

The patient is undergoing active treatment for cancer.; This is a request for a thoracic spine MRI.; There is a known condition of tumor.; The study is being ordered due to pre-operative evaluation.; Follow-up

This is a request for a thoracic spine MRI.; "The caller indicated that there is not a known condition of: Tumor, Infection or Neurological deficits."; The study is being ordered due to pre-operative evaluation.;

This is a request for a thoracic spine MRI.; "The caller indicated that there is not a known condition of: Tumor, Infection or Neurological deficits."; The study is being ordered due to pre-operative evaluation.; Patient is having thoracic pain and had an MRI of lumbar spine that incidentally Dr Campbell notes on the scout images what appears to be a fairly large central T7T8 disc herniation

This is a request for a thoracic spine MRI.; "The patient has been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."; The study is being ordered due to follow-up to surgery or fracture within the last 6 months.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of abnormal gait.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of recent fracture on previous imaging studies.

This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to Neurological deficits.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.

This is a request for a thoracic spine MRI.; There is a known condition of neurological deficits.; The study is being ordered due to pre-operative evaluation.; Pt with history of chiari 1 malformation and cervicothoracic syringomyelia; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

TO RULE OUT SYRINX AND OTHER SPINAL ABNORMALITIES; This study is being ordered for a neurological disorder.; AUGUST 2015; There has not been any treatment or conservative therapy.; LEFT RETINAL HEMORRHAGE, SEVERE HEADACHES, MRI BRAIN 3/24/16 SHOWED CHIARI I MALFORMATION, MRI ENTIRE SPINE RECOMMENDED TO RULE OUT SYRINX AND OTHER SPINAL ABNORMALITIES.

old mri showed disc herniation in the lumbar, weak in the grip strength; This study is being ordered for a neurological disorder.; 11/2015; There has been treatment or conservative therapy.; back and neck pain, arm weakness, leg weakness, numbness and tingling of the extremities; physical therapy, tramadol, over the counter nsids

Onset: 25 years ago. The problem is severe. Duration: varies. The problem has worsened. The frequency of pain is constant. Location of pain is left posterior neck, left shoulder and bilateral mid back. The patient describes the pain as aching, burni; This study is being ordered for trauma or injury.; 2005; There has been treatment or conservative therapy.; low back pain, n/t BLE; PT

Patient could potentially have a lesion higher up; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has been treatment or conservative therapy.; Lower back pain radiates into left lower extremity, numbness and tingling in left groin region and anterior thigh; Pain management- Epidural steroid injections

Patient has a history of NF who presents with main complaint of low back pain. He also reports left lateral leg pain and N/T in his right hand. He is grossly myelopathic on exam. His MRI lumbar spine w/o shows scalloping of the lumbar vertebra, possible l; This study is being ordered for a neurological disorder.; He states he has been having low back pain for about 10 years and it has progressively worsened in the last 3 years. He also complains of intermittent right arm pain and numbness that has been present for three years.; There has been treatment or conservative therapy.; Patient has a history of NF who presents with main complaint of low back pain. He also reports left lateral leg pain and N/T in his right hand. He is grossly myelopathic on exam. His MRI lumbar spine w/o shows scalloping of the lumbar vertebra, possible l; He has been treated by a chiropractor which he states gave him no relief. He is taking OTC medications for his pain which gives him very mild, temporary relief.

Patient has low back pain that is constant and worsening. She complains of falling and of left foot numbness.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

patient is starting left leg numbness.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

PATIENT IS STILL COMPLAINING OF PAIN AFTER SURGERY AND NOW PRESENTS WITH MUSCLE SPASMS (MORE ON THE RIGHT THAN LEFT); The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Patient was in a car accident and is now experiencing low back pain with pain radiating into his left leg. Patient can't sit for long periods nor can he bend forward significant pain.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Possible spine surgery for fusion; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; central disc herniation L4-5 as well as L5-S1. Patient presents today with an increased symptoms. Instead of having pain in bilateral anterior thighs now is having pain in the left hip. He's having weakness as he described in his left leg with numbness in ; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.  
post op issues -- less than 2 weeks r/o infection; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

POST SURGICAL 12/1/15; spoke with the patient today.(4/22/2016) (He said that he can't tolerate any activity w/o pressure and weakness in his right leg. He can hardly move his legs at times. Right leg is numb, toes on the right foot "don't function right"; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Progressively worsening low back pain over the past 3 years. He states he has radicular pain to his right leg. Pain is described as sharp and shooting and constant. he complains of numbness and tingling in his lower extremities.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

r/o any abnormalities of the lumbar and sacral/SI joints of the spine; This study is being ordered for a neurological disorder.; January 2015; There has been treatment or conservative therapy.; Low back pain radiating into the sacral area, painful to sit. Bilateral buttock pain, and leg pain; Physical therapy; Lumbar epidural steroid injections; RF ablation of lumbar nerves.; Prescription therapy

REQUESTING MRI FOR REVIEW FOR POSSIBLE INJECTIONS OR SURGERY; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Document exam findings PATIENT HAS BILATERAL LEG WEAKNESS AND NUMBNESS; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The patient had a right L5/S1 Decompression and Fusion on 2/26/16 at St. Vincent's Hospital by Dr Schlesinger. The patient stated since his surgery he is having pain in his right foot by his toes by the knuckles. He stated it feels like a cramp and it wi; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

The patient states she has pain to her right hip, lower back, shooting pains to RLE and right foot numbness. She states pain is daily. She said she continues to have pain to her left shoulder that radiates down LUE and left numbness, pain mostly occurs at; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The patient underwent a left side approach for L3-5 Decompression and L3-5 Fusion on 05/18/2016 at St. Vincent Infirmary with Dr. Schlesinger. The patient called today stating that he was in so much pain yesterday that he went to the ER in Newport where h; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI.; Follow-up to Surgery or Fracture within the last 6 months; The patient has been seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.

The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for Follow-up to surgery or fracture within the last 6 months; The patient been seen by or the ordering physician is a neuro-specialist, orthopedist, or oncologist.

The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for Neurologic deficits

The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for Pre-operative evaluation; The patient has not had a Lumbar Spine MRI performed within the past 2 weeks.

The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.

The study requested is a Lumbar Spine MRI.; Pre-Operative Evaluation; No, the last Lumbar spine MRI was not performed within the past two weeks.; Surgery is scheduled within the next 4 weeks.

The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for Follow-up to surgery or fracture within the last 6 months; The patient been seen by or the ordering physician is a neuro-specialist, orthopedist, or oncologist.

The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for Known or suspected infection or abscess

The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for Pre-operative evaluation; The patient has not had a Lumbar Spine MRI performed within the past 2 weeks.

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal nerve study involving the lumbar spine

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has completed Treatment with a facet joint or epidural injection in the past 6 weeks

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)

The study requested is a Lumbar Spine MRI.; There is laboratory or x-ray evidence of osteomyelitis.; Known or Suspected Infection or abscess

The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is x-ray evidence of a recent lumbar fracture.

Unable to stand for long periods unable to elevate arms above shoulders abn straight leg raise abn limited ROM; This study is being ordered for a neurological disorder.; Unknown; There has been treatment or conservative therapy.; Back and neck pain bilateral arm weakness left leg pain; S/P surgery rx medication PT 3-6 weeks

Unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Difficulty with walking; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; She reports she has constant lower back pain that she describes as a dull ache and occasionally sharp pain. The pain is her back radiates to both hips and BLE. She states walking, sitting, or standing for long periods of time make her pain worse. She stat; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/9/2015; There has been treatment or conservative therapy.; low back pain radiates to left hip and left leg down to knee. sharp, consistent pain 4/10. Takes Aleve and is no help. Pain is worse with movement. Difficulty sleeping d/t not being able to find a comfortable position.; facet and rhizotomy x2

Will fax clinical information.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.

radiating pain down left leg into foot, paresthesia, occasionally drags foot, undergoing treatment for prostate cancer,; This study is being ordered as pre-operative evaluation.; "The ordering physician is an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;

r/o any abnormalities of the lumbar and sacral/SI joints of the spine; This study is being ordered for a neurological disorder.; January 2015; There has been treatment or conservative therapy.; Low back pain radiating into the sacral area, painful to sit. Bilateral buttock pain, and leg pain; Physical therapy&#x0D; Lumbar epidural steroid injections&#x0D; RF ablation of lumbar nerves.&#x0D; Prescription therapy  
This is a request for a Pelvis MRI.; The request is for evaluation of the pelvis prior to surgery or laparoscopy.

This is a request for a Pelvis MRI.; The request is for pelvic trauma or injury.

This is a request for a Pelvis MRI.; The request is for suspicion of joint or bone infection.

This is a request for a Pelvis MRI.; The request is for suspicion of pelvic inflammatory disease or abscess.

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is a history of upper extremity joint or long bone trauma or injury.

; This study is being ordered for a neurological disorder.; 4/1/16. Date of surgery.; There has been treatment or conservative therapy.; pain in neck and left shoulder; Medrol Dosepak after surgery. Gave on 4/11/16 and saw back 4/18/16 with no improvement

The pain is from an old injury.; The member has failed a 4 week course of conservative management in the past 3 months.; This is a request for an elbow MRI; The study is requested for evaluation of elbow pain.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.

The requested study is a Shoulder MRI.; Study being ordered for post-operative evaluation.; The ordering physician is not an orthopedist.; There are no documented physical or laboratory findings of a joint infection.; There are documented physical or plain film findings of delayed or failed healing.

The requested study is a Shoulder MRI.; Study being ordered for post-operative evaluation.; The ordering physician is not an orthopedist.; There are no documented physical or laboratory findings of a joint infection.; There are no documented physical or plain film findings of delayed or failed healing.; There are no documented physical or plain film findings of prosthetic device dislocation.; S/P neck surgery radiculopathy shoulder pain

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.

This is a requests for a hip MRI.; This study is being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steriod therapy (Prednisone or Cortisone).

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient had an abnormal plain film study of the hip other than arthritis.; The patient has a documented limitation of their range of motion.

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/9/2015; There has been treatment or conservative therapy.; low back pain radiates to left hip and left leg down to knee. sharp, consistent pain 4/10. Takes Aleve and is no help. Pain is worse with movement. Difficulty sleeping d/t not being able to find a comfortable position.; facet and rhizotomy x2

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

ABNORMAL MRI'S; This study is being ordered for a neurological disorder.; 3/26/16; There has not been any treatment or conservative therapy.; ABNORMAL MRI'S

This is a request for an abdomen-pelvis CT combination.; The requested study is for pre-operative evaluation.; The study is requested by a surgeon, specialist or PCP on behalf of a specialist who has seen the patient.; Pre-op or post op evaluation

This is a request for a brain/head CT.; This study is requested for known or suspected bleed such as subdural hematoma or subarachnoid bleed.

Patient was approved for brain MRI, but has an aneurysm clip installed so MD wants to request a CT; This study is being ordered for a neurological disorder.; 07/21/2015; There has been treatment or conservative therapy.; stroke; diagnostic testing, medications

Possible dissection seen on MRI; This study is being ordered for a neurological disorder.; unknown; There has not been any treatment or conservative therapy.; new on set headaches, tremor, dizziness , ataxia

Repeat MRI Brain with and without contrast for follow up evaluation of persistent headaches. Would also like to send him for an EEG to rule out possible seizure activity considering his reports of two episodes of passing out. Will also consult Dr. Doyle t; This study is being ordered for a neurological disorder.; 2015; It is not known if there has been any treatment or conservative therapy.; Headaches and dizziness. Headaches that begin behind his left eye. He reports that this is throbbing in nature. Passed out twice and experienced difficulty with word finding during these headaches. vision to left eye has been some what blurry

Stroke work-up to exclude any other possible cause of the visual changes; This study is being ordered for a neurological disorder.; March, 2016 - problems with visual disturbance and headaches. Diagnosed with bigeminy. Started on medication, no benefit. Schedule for ablation therapy. CTA to rule out stroke; There has been treatment or conservative therapy.; Vision disturbance for the last two months, last from 2-20 minutes followed by a generalized headache; Medication therapy

Suspected TIA; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/01/2011; There has been treatment or conservative therapy.; Episodic vertigo, nausea, ataxia, hearing loss in left ear, expressive aphasia, blurred vision; Meclizine was taken for Vertigo symptoms.

The latest carotid ultrasound, 7/2014, showed right 50-79% stenosis with lesser left stenosis. A follow-up ultrasound is ordered.; This study is being ordered for Vascular Disease.; 07/2014; There has been treatment or conservative therapy.; System&#x0D; Neg/Pos&#x0D; Details&#x0D; Constitutional&#x0D; Negative&#x0D; Weight loss.&#x0D; Neuro&#x0D; Positive&#x0D; Gait disturbance, Numbness in extremity.&#x0D; Neuro&#x0D; Negative&#x0D; Dizziness, headache, memory impairment, seizures and tremors.&#x0D; Psych&#x0D; Positive&#x0D; Anxiety.&#x0D; Psych&#x0D; Negative&#x0D; Depres; Dexilant 60 mg capsule, delayed release&#x0D; take 1 capsule by oral route every day for 8 weeks&#x0D; Aspir-81 81 mg tablet, delayed release&#x0D; take 1 tablet by oral route every day&#x0D; Vitamin D3 2,000 unit tablet&#x0D; 1 po qd&#x0D; Restasis 0.05 % eye drops in a dropperette&#x0D;

The patient had the following test(s) completed today Anticardiolipin Ab, IgG/M, Qn, Antinuclear Antibodies, ANA, IFA, Antithrombin III, Func/Immunol, BUN, CREATININE, Lupus Anticoagulant Comp, Protein C Functional & Protein S Antigen, RPR, SEDIMENTATION ; This study is being ordered for a neurological disorder.; Episodic left weakness and numbness since 2014 - probable TIAs - uncertain cause.; There has been treatment or conservative therapy.; Comments&#x0D; VS noted. Afebrile&#x0D; Well groomed, well nourished&#x0D; Carotids: no bruit&#x0D; Heart: no murmur, regular rate&#x0D; Lungs: clear&#x0D; Mood: not depressed, not anxious&#x0D; Affect: not depressed, not anxious&#x0D; Cognitive function: memory - ; VITAMIN D SOFTGEL 50,000 units (1.25 mg) ORAL&#x0D; take one a week for&#x0D; 09/26/2013&#x0D; &#x0D; &#x0D; N&#x0D; Flintstones Plus Iron 15 mg iron chewable tablet&#x0D; take 2 po qd&#x0D; 01/07/2014&#x0D; &#x0D; &#x0D; N&#x0D; albuterol sulfate HFA 90 mcg/actuation aerosol inhaler&#x0D; inhale 2 puff by inhalation r

The patient is a pleasant 44 year old female with complaints of dizziness over the past three years. She had an ENT workup and was sent to rehab but had no improvement. Therefore the patient was sent for an MRI scan of her brain with and without contrast. This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 03/16/16; There has been treatment or conservative therapy.; Dizziness, Left sided weakness for which she underwent rehab.; she underwent rehab. Currently taking aspirin twice a day along with her listed of med's Omeprazole , amitriptyline, clonidine , lisinopril, hydrocodone, flexeril and zanaflex

this is a follow up study for the patient to check for any changes; This study is being ordered for trauma or injury.; September 2011; There has been treatment or conservative therapy.; intracerebral hemorrhage and cerebral aneurysm; patient has been treated with surgery and medications since traumatic brain injury occurred.

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/2015; There has been treatment or conservative therapy.; stroke, numbness R side and weakness. speech issues. cerebral edema, Aphasia; meds. PT. Speech and occupational therapy  
Yes, this is a request for CT Angiography of the Neck.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;

Patient has papilledema that with obesity raises concern of Pseudotumor Cerebri, therefore will proceed with spinal tap and MRI; This study is being ordered for Vascular Disease.; October 2015; There has been treatment or conservative therapy.; Migraines, papilledema, blurred vision; Several medications

There is not a suspicion of an infection or abscess.; This examination is being requested to evaluate lymphadenopathy or mass.; This is a request for an Orbit MRI.; There is not a history of orbit or face trauma or injury.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; headache

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; January 2016; There has not been any treatment or conservative therapy.; complaints of syncope and light headedness. sensations described as everything shifting beneath her feet. Happens through out the day. Exasperated by walking, sitting. Heart rate feels increased. She can no longer do her aerobics because of dizziness and

; There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.

; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; ;

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/11//2015; There has not been any treatment or conservative therapy.; HA, SYNCOPÉ

discomforted is focused to the left side alone.; This study is being ordered for a neurological disorder.; Several years ago; There has been treatment or conservative therapy.; Headaches - Migraines, ringing in her ears, dizziness, numbness, tingling, weakness, vision changes including double vision. The most sever headache she has experienced in March.; Topamax

Evaluate TIA stroke risk.; This study is being ordered for Vascular Disease.; 2001; There has been treatment or conservative therapy.; migraine headaches. blurred vision nausea. Photophobia and visual aura. Speech difficulty. Right sided Paresthesia; Prescription medications. Sumatriptin Fiorinal. Immitrex

Facial numbness, confusion, slurred speech, and r/o stroke. See attached clinicals.; This study is being ordered for a neurological disorder.; 02/2016; It is not known if there has been any treatment or conservative therapy.; Right sided facial numbness, confusion, slurred speech, and r/o stroke. C/o laser surgery on bilateral eyes and since then right sided facial numbness. Patient reports some problems swallowing and feels speech is a little off. Denies any ringing in ears o

I'm seeing her for migraine headaches.&#x0D; She is describing a recent severe headache associated with a pop in her right hand. We will need an MR angiogram to rule out aneurysm &#x0D; History / Dx: &#x0D; Duration of Symptoms:Start: 03/28/2016 &#x0D; Physical Exam Findin; There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.

NAUSEA,FEELS HOT,FELT ILL,SENSATION RIGHT ARM TO NECK,CONFUSION,NECK DISCOMFORT,SPELLS,LEFT EYE IRITIS RIGHT FACE AND LIPS NUMB,2t CAROTIDS; This study is being ordered for a neurological disorder.; 2013 TO 2014; There has been treatment or conservative therapy.; FEELS HOT,SPELLS TRAVELING UP RIGHT ARM TO NECK,SHOULDER AND HEAD.CONFUSION,NUMB IN RIGHT FACE,LIPS,TIRED,IRITIS LEFT EYE,2t CAROTIDS,FEELING ILL,NECK DISCOMFORT; ATIVAN,ASPIRIN

Pain; This study is being ordered for a neurological disorder.; 01/16/2016; It is not known if there has been any treatment or conservative therapy.; Pt suffers with left side weakness.

R/O structural lesions.; This study is being ordered for a neurological disorder.; 2006; There has been treatment or conservative therapy.; Pt suffers with headaches; impaired vision; history of cerebral tumors.; unknown therapy.

r/o:aneurysms; History / Dx: Transient cerebral ischemia, unspecified type  
History / Dx: Memory loss and brain fog. Overall improved. MRI showed some atrophy. Episodes of confusion - even noticed while driving. 3-4/week at times. She's under a lot of stress; There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.

rule out aneurysm; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

The doctor wants to have an MRI brain and MRA brain to rule out any mass or occlusion.; This study is being ordered for a neurological disorder.; January 1, 2016 and headaches all her life; There has been treatment or conservative therapy.; Headaches in the right occipital and right frontal regional. Sharp and dull throbbing pain. The headache can last a whole week.; The vision change had been going on for 3-4 months with headaches. It consist of "blurry" vision with the headache.; BC powder 4/12/2016.; amitriptyline 1/12/2016.; Excedrin prn

The patient has what appears to be classic migraine. At this point in time, the visual disturbance seems to be more severe. If the headaches get to the point that they are more frequent, the doctor is a little concerned with her family history with her mother. This study is being ordered for a neurological disorder.; April 25, 2016; There has been treatment or conservative therapy.; She will lose her peripheral vision with these episodes. She states it is like tunnel vision on both sides and states it is not black. Her first episode lasted about an hour. The second lasted a little bit longer and the vision would kind of come and go. She is taking Ibuprofen

There is an immediate family history of aneurysm.; This is a request for a Brain MRA. There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.

There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past 2 weeks.; This is a request for a Brain MRA.

There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.

There is not an immediate family history of aneurysm.; The patient has a known aneurysm.; This is a request for a Brain MRA.

This is a request for a head and neck MR Angiogram.; There is an immediate family history of aneurysm.

This is a request for a head and neck MR Angiogram.; There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; "There is a sudden onset of one-sided weakness, speech impairment, vision defects or severe dizziness."

This is a request for a head and neck MR Angiogram.; There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; "There is a sudden onset of one-sided weakness, speech impairment, vision defects or severe dizziness."; This patient does not have an abnormal ultrasound of the neck.

This is a request for a head and neck MR Angiogram.; There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; "There is not a sudden onset of one-sided weakness, speech impairment, vision defects or severe dizziness."; This patient does not have an abnormal ultrasound of the neck.

Trigeminal Neuralgia and headache both new onset; This study is being ordered for a neurological disorder.; 10/20/2015; There has not been any treatment or conservative therapy.; Headache with jaw pain

Will send for repeat MRI of brain w/wo to compare to previous study, Concerns of TIA, Vasculitis, Vertebral basilar insufficiency due to pulsatile tinnitus and vertigo; This study is being ordered for a neurological disorder.; unknown; There has been treatment or conservative therapy.; Headaches and facial/temple pain, numbness, problems with balance and shooting pains in his neck. facial and jaw pain, numbness in his left arm and leg, ringing in ears blurred vision with balance. neck pain, chest pain tightness, memory loss, itching; Nortriptyline 25 mg q hs &#x0D; Robaxin 750 mg q 8 hours PRN

Facial numbness, confusion, slurred speech, and r/o stroke. See attached clinicals.; This study is being ordered for a neurological disorder.; 02/2016; It is not known if there has been any treatment or conservative therapy.; Right sided facial numbness, confusion, slurred speech, and r/o stroke. C/o laser surgery on bilateral eyes and since then right sided facial numbness. Patient reports some problems swallowing and feels speech is a little off. Denies any ringing in ears o

Pain; This study is being ordered for a neurological disorder.; 01/16/2016; It is not known if there has been any treatment or conservative therapy.; Pt suffers with left side weakness.

rule out aneurysm; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

The patient has had a recent MRI or CT for these symptoms.; This is a request for a Neck MR Angiography.

The patient has not had a recent MRI or CT for these symptoms.; There has been a stroke or TIA within the past 2 weeks.; This is a request for a Neck MR Angiography. This is a request for a head and neck MR Angiogram.; There is an immediate family history of aneurysm.

This is a request for a head and neck MR Angiogram.; There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; "There is a sudden onset of one-sided weakness, speech impairment, vision defects or severe dizziness."

This is a request for a head and neck MR Angiogram.; There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; "There is a sudden onset of one-sided weakness, speech impairment, vision defects or severe dizziness."; This patient does not have an abnormal ultrasound of the neck.

This is a request for a head and neck MR Angiogram.; There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; "There is not a sudden onset of one-sided weakness, speech impairment, vision defects or severe dizziness."; This patient does not have an abnormal ultrasound of the neck.

This is a request for a Neck MR Angiography.; The patient has one sided arm or leg weakness.; The patient had an onset of neurologic symptoms within the last two weeks.; The patient has NOT had an ultrasound (doppler) of the neck or carotid arteries.; The patient does not have carotid (neck) artery surgery.

Will send for repeat MRI of brain w/wo to compare to previous study, Concerns of TIA, Vasculitis, Vertebral basilar insufficiency due to pulsatile tinnitus and vertigo; This study is being ordered for a neurological disorder.; unknown; There has been treatment or conservative therapy.; Headaches and facial/temple pain, numbness, problems with balance and shooting pains in his neck. facial and jaw pain, numbness in his left arm and leg, ringing in ears blurred vision with balance. neck pain, chest pain tightness, memory loss, itching; Nortriptyline 25 mg q hs &#x0D; Robaxin 750 mg q 8 hours PRN

2 years since MRI scans of her head and neck have been done to see if there is any significant disease progression; This study is being ordered for a neurological disorder.; January 2012; There has been treatment or conservative therapy.; numbness and tingling weakness some coordination difficulties of her left arm and swelling of her left arm; Rebif 3 times a week

21 year old male with alteration of awareness, tremor, dream acting behavior, recent PSG with ABN spike & wave discharge, concern for nocturnal frontal lobe epilepsy, 1 hour EEG WNL; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has been a previous Brain MRI completed.; The brain MRI was normal.

27-year-old gentleman with previous history of seizure now with electrical shocks. I like to check his brain and his spinal cord. Could be degenerative spine disease. Also would like to check for any demyelinating lesions that could be causing these.; This study is being ordered for a neurological disorder.; 10 years ago but a recent increase in symptoms started about 3 years ago.; There has been treatment or conservative therapy.; He describes more of staring off into space or moving his hands mindlessly or sometimes small myoclonic jerks. frequent electrical jolts Jolts will go from the back of his head down through his arms and occasionally into his legs. Occasionally an electric patient has been treated with various medications in the past. He was tried on Topamax and Keppra.

33 year-old right-handed male who has been referred to me for evaluation and management of headaches and seizure-like spells since a child, but didn't seek treatment until 2014. His last episode was 6/13/16. The average episode could last for a few minu; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; It is not known if there has been a previous Brain MRI completed.

50-year-old lady with migraine headaches and low back pain. I'm going to get an MRI of her brain and her lumbar spine. Greater occipital nerve blocks today. Bring her back in for the neuropathic symptoms in her feet with allodynia EMG. I'll also like ; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; January 2016; There has been treatment or conservative therapy.; Low back pain, She has allodynia in her feet. She has some left arm numbness as well as pain in her head. The pain yesterday was frontal and posterior. She is concerned that she drops things out of her left hand very frequently. She often has posterior h; She's been tried on Imitrex. She has also tried amitriptyline. and Topamax.

Abnormal MRI Brain without contrast that showed small focus of abnormal signal in the deep white matter of the posterior right frontal lobe with suggestion of similar tiny focus of signal and near the gray white junction of the same region. Considering he; This study is being ordered for a neurological disorder.; 3/16/16; It is not known if there has been any treatment or conservative therapy.; Headaches, numbness and tingling. Occasional neck pain, balance problems and dizziness. History of inner ear problems. Abnormal MRI Without contrast.

Acute onset (5/6/16) of spatial and directional orientation. Dysphasia with word finding difficulty. Dizziness and vertigo. Associated with headaches.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack).

Also, gets very dizzy (vertigo); This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

attention to pituitary protocol patient is having visual changes; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Benign physiological tremor, responded previously to Inderal. The patient does not want treatment for it at this time. &#x0D; Multiple nonspecific complaints consisting of fatigue, parenthesis, cognitive dysfunction. The patient appears to have some benign ey; This study is being ordered for a neurological disorder.; August 1, 2015; There has not been any treatment or conservative therapy.; Fatigue, muscle spasms, eye twitching, tremor

Brain MRI with and without contrast to rule out demyelination, tumor, ischemia, C spine MRI without contrast to rule out cervical myelopathy.; This study is being ordered for a neurological disorder.; January 2016; It is not known if there has been any treatment or conservative therapy.; headache, neck pain, blurry vision with headaches. sensitivity to light and noises with nausea daily. when she is driving she gets an electrical shock and her legs and hands don't work.

Clinical Information; History / Dx: R51 Headache disorder ; History / Dx: He was in a car accident in 2003. She was rear-ended. He had lower back pain. There was a disc herniation at L5-S1. Had surgery with a spinal surgeon in pulse. He didn't di; This study is being ordered for a neurological disorder.; 2003; There has been treatment or conservative therapy.; HEADACHES WORSENING,LOW BACK PAIN THAT ARE WORSENING,SEVERE AND DIBILITATING,NUMBNESS IN FEET AND LEGS,; History / Dx: SENSATION: Proprioception and vibratory sense intact in the toes. Light touch diminished in the left leg along the back of the calf an; FLEXERIL,TYLENOL #3 PRN,CLARITIN,PROAIR,UNISOM; CHIROPRACTIC CARE AND PHYSICAL THERAPY; EPIDURAL STERIOD INJECTIONS BUT DEVELOPED SPINAL HEADACHES WITH THESE.

Closed head injury w/ mild concussion. Headaches are post traumatic headache from injury.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Complaining of pain in the right side of her face and behind her right ear. Constant pain but has some shooting pain.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Considering her complaints of memory loss with increase in falls would like to get an MRI Brain to further diagnostic evaluation. MRI C Spine due to her complaints of neck pain with associated numbness and tingling.; This study is being ordered for a neurological disorder.; two years ago; There has been treatment or conservative therapy.; feeling of falling forward, clumsy and bumping into things. restless legs, numbness and tingling to her arms. dizziness, complaints of memory loss and increase falls. staring spells and syncope.; Physical Therapy for her neck pain

Considering her complaints of persistent headaches with associated facial pain and vision changes, would like to send her for MRI Brain with contrast for diagnostic evaluation rule out possible demyelinating process such as Multiple Sclerosis. Would like ; This study is being ordered for a neurological disorder.; 2014; There has been treatment or conservative therapy.; Pressure to head and neck with associated facial pain, Pressure begins at her cheek bones and radiates up her head. complains of ringing in ears, dizziness, and numbness to both hands and feet that also occurs daily. she feels generally weak all over with; gabapentin

Considering her symptoms of fatigue to her lower extremities would like to send her for a MRI Brain to rule out possible demyelinating process such as Multiple Sclerosis. Would like to send her for a MRI C Spine to rule out Possible Multiple Sclerosis.; This study is being ordered for a neurological disorder.; 2/01/2016; It is not known if there has been any treatment or conservative therapy.; Numbness and tingling to both lower extremities. Both legs feeling fatigued and heavy. Pinched nerve in her neck

Considering the persistence of these symptoms, would like to send her for a MRI Brain, Cervical and Thoracic Spine with Contrast for further diagnostic evaluation to rule out possible underlying demyelinating process as Multiple Sclerosis.; This study is being ordered for a neurological disorder.; unknown; There has been treatment or conservative therapy.; muscle spasms and weakness, Difficulty hearing, ringing in ears, occasional difficulty with swallowing. difficulty with controlling her bladder. occasional double vision, tremors to both hands.; Prednisone 20 Mg daily, &#x0D; Mestinon 60 mg TID for treatment for MG, Tizanidine 4 Mg.

CVA vs anxiety vs. cervical myelopathy, MRI brain w/wo contrast to rule out demyelination, ischemia or tumor; MRI C Spine wo contrast to rule out myelopathy as evidenced by right triceps weakness.; This study is being ordered for a neurological disorder.; unknown; It is not known if there has been any treatment or conservative therapy.; chest pain, Right sided weakness in leg and arm, trouble picking up his child with his right arm.

Daily Headache for a month. She states the headache is all over her head, with qualities of throbbing pulsating sensitivity to light and noises, nausea. She has almost daily migraine symptoms. She has had several years of headaches. MRI Brain with and w; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).  
daily intractable headaches upon awakening; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

demyelinating disease; This study is being ordered for a neurological disorder.; 5-5-16; There has been treatment or conservative therapy.; leg pain and weakness, numbness, gait disturbance, abnormal brain mri; medication

developmental delay, intention tremors and speech delay; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

discomforted is focused to the left side alone.; This study is being ordered for a neurological disorder.; Several years ago; There has been treatment or conservative therapy.; Headaches - Migraines, ringing in her ears, dizziness, numbness, tingling, weakness, vision changes including double vision. The most sever headache she has experienced in March.; Topamax

dizziness,; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Enter answer here - or Type In Unknown If No Info Given; . Probable MS exacerbation with vertigo, left leg numbness and weakness, and numbness both hands (the latter could be from thoracic outlet syndrome; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.;

Enter answer here - or Type In Unknown If No Info Given; fatigue, headache,tingling tremor weakness.; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.;

Episodic left numbness and weakness suggest the possibility of TIA. The differential would include migraine aura without headache..; This study is being ordered for a neurological disorder.; , Ms. Carroll form age 5 to 16 suffered trance-like episodes of unresponsiveness. These were not evaluated and were not treated with medications. They cease to their own only to apparently resume in about January 2016.; There has not been any treatment or conservative therapy.;

Evaluate TIA stroke risk.; This study is being ordered for Vascular Disease.; 2001; There has been treatment or conservative therapy.; migraine headaches. blurred vision nausea. Photophobia and visual aura. Speech difficulty. Right sided Paresthesia; Prescription medications. Sumatriptin Fiorinal. Immitrex

Evaluated for epilepsy surgery due to increase in seizures.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has been a previous Brain MRI completed.; The brain MRI was normal.

Exam is worrisome for a central process such as multiple sclerosis or possible cervical or thoracic spine myelopathy. Will send her MRI of the brain, cervical spine, and thoracic spine to look for evidence of a demyelinating process or spinal cord stenosis; This study is being ordered for a neurological disorder.; unknown; It is not known if there has been any treatment or conservative therapy.; chronic headaches, right leg stiff, neck pain, muscle spasms and hyperactive bladder.

Facial droop; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation); Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The patient has Bell's Palsy.

Facial numbness, confusion, slurred speech, and r/o stroke. See attached clinicals.; This study is being ordered for a neurological disorder.; 02/2016; It is not known if there has been any treatment or conservative therapy.; Right sided facial numbness, confusion, slurred speech, and r/o stroke. C/o laser surgery on bilateral eyes and since then right sided facial numbness. Patient reports some problems swallowing and feels speech is a little off. Denies any ringing in ears o

FOLLOW UP MRI FOR MULTIPLE SCLEROSIS BEFORE HER APPT IN HOUSTON, TX. &#x0D;  
DURATION OF SYMPTOMS NOW: 04/28/2016; This study is being ordered for a  
neurological disorder.; 02/12/2015; There has been treatment or conservative  
therapy.; Gait issues, weakness, CTS, drops things, feet and hands are chronically  
numb, fine motor skills are difficult for her. Fatigue, bladder issues. Burning legs.;  
AMPYRA, SOMA, TECFIDERA, EPITOL, PREDNISON, ESTRADIOL &#x0D; LABS DRAWN FOR  
FOLLOW UP, LAST MRI 1 YEAR AGO, HAS APPT IN Houston, Texas in July, does exercises.  
follow up; This study is being ordered for a neurological disorder.; unknown; There has  
been treatment or conservative therapy.; MS; unknown  
FOLLOW UP; This study is being ordered for something other than: known trauma or  
injury, metastatic disease, a neurological disorder, inflammatory or infectious disease,  
congenital anomaly, or vascular disease.; 2013; There has been treatment or  
conservative therapy.; DAILY HEADACHES, MODERATE HEADACHES 3 TIMES A WEEK,  
VERY SEVERE HEADACHES 1-2 TIMES PER MONTH, MODERATE HEADACHES ARE  
SEVERE ENOUGH TO KEEP HER FROM EATING OR DRINKING, DIZZINESS, BLURRED  
VISION, NAUSEA, VOMITING,; VERAPAMIL, DEPAKOTE, TORADOL, DHE INTRANASALLY,  
ACUPUNCTURE  
GENERALIZED TONIC-CLONIC SEIZURE, VERTIGO, BLACKING  
OUT, N/V, CONFUSION, CHEEK BITE, SHAKING, STIFFNESS; This request is for a Brain MRI;  
The study is NOT being requested for evaluation of a headache.; Requested for  
evaluation of seizures; There has been a previous Brain MRI completed.; The brain MRI  
was normal.

Given patient new concern of hemi numbness with pain and spasm. will send her for an MRI of her brain with and without contrast MS protocol which should compare to her previous normal scan during her hospitalization in August. Will also check an MRI of he; This study is being ordered for a neurological disorder.; Unknown; It is not known if there has been any treatment or conservative therapy.; Muscle spasms and numbness along her upper back and over her right leg, thigh and calf over the past several weeks. Occasional tremors, problems with walking and balance, occasional numbness and tingling in her extremities. episodes of dizziness and occas

He had and EMG/NCV on 6/09/2016 which was normal. The doctor would like to proceed with an MRI of the brain and MRI c-spine to rule out anything cervical or demyelinating.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; MARCH 1, 2016; There has been treatment or conservative therapy.; He states he is not sure if it came on suddenly or has been gradually coming on, but he just noticed that he had numbness three months ago. It started out kind of in his index finger of the right hand and then progressed to the middle and sometimes the ri; He has had a CT of his head without contrast which was normal as well as a CBX and a PSA which were normal.

Headaches began at least 10 years ago but have increased in frequency over the past year. She reports 2 migraines per month with each lasting about 3 days. They are left retro-orbital and radiate to the left side of her head and down her neck. does repo; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

HEADACHES HAVE INCREASED IN FREQUENCY AND DURATION; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Her history and physical would suggest the presence of central nervous system disease involving either the brain or spinal cord. Examination would be supportive of that with her hyperreflexia especially in someone who has had a history of chemotherapy. Th; This study is being ordered for a neurological disorder.; March 5, 2016; There has been treatment or conservative therapy.; Visual disturbance, right arm numbness; Her primary doctor did some studies on her; echocardiogram, carotid Doppler study, and Holter monitor which were all within normal limits

his patient is being evaluated today in regards to memory loss primarily noticed by his wife. The patient appears to have primarily short-term memory difficulties. He did not score well on a recently administered mini-mental status examination in his pr; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

History / Dx:H53.2 Diplopia Woman on medication for anxiety and depression complains of 6m/h/o intermittent diplopia. Initially just when tired, but now daily, at any time of day. Sometimes horizontal, rarely vertical. Binocular. Lasts 30-60 min. Look; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.

History of unresponsiveness. Light-headed. Losses consciousness. Nauseous. Twitching.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing dizziness.

History:Marcell is here today for a follow visit today for his problems with neuromyelitis optica. He does not have any new symptoms or problems, last infusion of Rituxan was February 2015. He continues to have skin disorder that causes itching and uses t; This study is being ordered for a neurological disorder.; History:Marcell is here today for a follow visit today for his problems with neuromyelitis optica. He does not have any new symptoms or problems, last infusion of Rituxan was February 2015. He continues to have skin disorder that causes itching and uses t; There has been treatment or conservative therapy.; Plan/Assessment: 1. NMO, relapsing remitting, stable on Rituxan. Will schedule next infusion and then will infuse every 6 months. 2. Lab: PBLD, CBC, CMP, TSH, Vitamin B12, Vitamin D today; 3. Call infusion center to schedule next Rituxan; 4. MRI-Brai; MS treatment history:Imuran 150mg daily. 4/13/2012-stop Imuran, start Rituximab 1000mg in 2 weeks, and will repeat 2 weeks later then every 6 months. I will ask Joanne Conley our financial counselor to have preapproved prior to infusion. 5/21/2012-tolerat

I have advised him to have an MRI of brain and C-Spine to determine the extent of degenerative disc disease and he would be started on appropriate treatment after reviewing the results of the study. In the meantime he has to avoid any abrupt movements of ; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Impatience, lack of concentration, difficulty with crowds, difficulty keeping a job, unable to live alone, head injury at age 3, went flying off the handlebars of his sister's bike when she hit the curb and "broke his skull like an egg". Spent two year in; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are not new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; The trauma or injury to the head occurred more than 1 week ago.

Intractable chronic migraine without aura and with status migrainosus &#x0D; History / Dx: Woman c RA and OA in lots of joints, waiting to get in c new rheum. Also sarcoidosis involving skin and cervical lymph nodes.&#x0D; c/o HAs since teen, used to be several; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

INTRACTABLE EPISODIC HEADACHE,PAIN IS BILATERAL,BEHIND EYES AND ON TOP OF HEAD,,THROBBING,SEVERE PRESSURE,NAUSEA,VOMTING,ORTHOSTATIC SYNCOPE,ABD PAIN; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is not described as a "thunderclap" or the worst headache of the patient's life.

Left leg numbness. Tingling and burning in the left leg.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient is experiencing vertigo

Left leg pain, tingling and numbness, Burning pain in both sides of her feet.; This study is being ordered for a neurological disorder.; about 1 month ago; It is not known if there has been any treatment or conservative therapy.; Numbness and pain in her legs limb numbness and gait change, fatigue, cant control bowel or bladder, blurred vision, falls;; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; It is not known if there has been a previous Brain MRI completed.

Memory loss and confusion progressively worsening; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

MEMORY LOSS GOING ON FOR 1.5 YEARS AND IS GETTING WORSE. HAVING SOME BEHAVIOR ABNORMALITIES WITH MOOD SWINGS. R/O ANY BRAIN ABNORMALITY.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Memory loss, worsening. Change in personality. Involuntary twitching of both legs, movements worsen at night. Loss of balance. Numbness and tingling.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

MEMORY LOSS,DIFFICULTY FINDING WORDS,HEADACHES,CONFUSION,DIZZINESS,UNSTEADINESS,FATIGUE,JOINT PAIN,INSOMNIA,RULE OUT CVA; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are not recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Mild cognitive impairment worsening recently/MRI Brain ordered to exclude a structural cause for the memory loss; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Mr Sanders presents for new patient evaluation for numbness from chest, arms, hands and fingers. He states it can happen once a week, or sometimes a few days a week. He states at times it goes up into his neck. He states he can still function but it makes ; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Mr Sherman is a 49 year old right handed male who presents for follow up post CVA. Since his last visit he has undergone neck surgery on 2/10/16 and is back at work. He states his job is making his neck hurt. He states that overall he is doing better but ; This study is being ordered for a neurological disorder.; 4/27/16; There has been treatment or conservative therapy.; Dragging his left leg and states he is in pain , He states a few times after his surgery he looked up and then down and then his eyes vibrated left and right and he states the room was spinning. Low back pain with radicular pain to left leg,; Home exercises and communicate with his surgeon

Mr. Castillo presents for memory loss. He states his wife is a licensed professional counselor and feels he has ADD. He states in February he could not remember what a restroom was called. He has thought he turned an oven off and left food in it to finish; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

MRI Brain and C Spine with contrast MS protocol, To check for new lesions.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2004; There has been treatment or conservative therapy.; hurting all over, and she has optic neuritis in left eye and is legally blind; Tysabri

MRI Brain w/wo contrast to rule out tumor, ischemia, demyelination, MRA Head to rule out aneurysm severe unilateral new headache with feature of complex migraine tinnitus.; This study is being ordered for a neurological disorder.; 05/13/2016; There has been treatment or conservative therapy.; Headaches happens all day every day. Sensitivity to light and noises and the left side of her body went weak and she could not stand up. She complains of tinnitus a low steady buzz at times. Her pain is always on the left side of her head; Butalbital &#x0D; Hydrocodone and naproxen &#x0D; Topamax per protocol titrate up to 100 mg BID &#x0D; Zipsor

MRI Brain with contrast and c spine with MS protocol, to r/o demyelination. Her PCP sent her to get an MRI of her brain without contrast and was told she had demyelinating, ventricular changes.; This study is being ordered for a neurological disorder.; 4-5 months patient office visit was on 4/6/16; There has been treatment or conservative therapy.; Balance changes and falls. complains of shaking, losing her balance and falling. Complains of weakness blurred vision ringing in ears, double vision. Complains of stiffness and locked knees.; she is taking Xanax for tremors 2 q am and 1 q pm, &#x0D; she takes Hydrocodone 5-325 mg 1 tablet PRN pain, &#x0D; Lyrica 150 mg 1 tablet BID, Flexeril 10 mg Q hs

MRI Brain with contrast to rule out ischemia, tumor, seizure focus, and MRA Head and Neck to r/o aneurysm/dissection patient complains of tinnitus on left side, no family history of aneurysm. MRI C Spine to rule out degenerative disc disease, radiculopath; This study is being ordered for a neurological disorder.; November 2015; It is not known if there has been any treatment or conservative therapy.; Nausea, Dizziness and headache. Blurriness, tremoring on the left side of her head and describes it as happening at night and had swelling in her head. left side of face felt like it was spasming. Tinnitus in her left ear. history of neck pain with radi

MRI of the brain 2013 for headache was normal; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has been a previous Brain MRI completed.; The brain MRI was normal.

Ms King presents for new patient evaluation of headaches. She states they started in high school. She states she has worsening headaches on her cycle and when she eats pork. She has frequent headaches even when not eating pork. She states it is worse on ; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Ms Rose is a 54, year old female who presents for numbness in hands and feet pain, shooting down legs and across back. She states this started in 2012 and occurs daily. She fell Yesterday and is in pain 10/10 in low back but she did not go to ER. She states; This study is being ordered for a neurological disorder.; 2012; It is not known if there has been any treatment or conservative therapy.; Numbness in hands and feet, pain shooting down legs and across back, Falls, Hyperreflexia

Ms Tidwell presents for new patient appointment post CVA. she states she has sleeping problems. She was worked up for MS. She is on aspirin for blood thinner. Her MS panel on LP was negative. She had brain C and T Spine MRIs. She was treated with Steroids; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.

Multiple sclerosis (G35).&#x0D; Probably has exacerbation, the question is where in CNS--brain or cord. Had new enhancing brain lesion in July 2015 but it was felt to wait before changing meds. Went over data re PML with orals. Will try IV steroids without ; This study is being ordered for a neurological disorder.; 3/2014; There has been treatment or conservative therapy.; RRMS,GAIT ISSUES,DRAGGING RIGHT FOOT,FEELS UNSTEADY,RIGHT THIGH NUMB,INCREASED FATIGUE,EXHAUSTED,VERY CONCERNED RE PML; COPAXONE,GABAPENTIN,MOBIC,TYLENOL,BACLOFEN,CLONAZEPAM,TYSABRI IN THE PAST,JC+.,STEROID MEDS,SEEING DR OUT OF STATE IN ST LOUIS,

Multiple sclerosis (G35).&#x0D; She will require follow-up MRI imaging of her brain and cervical spine. She will have a CMP and CBC. She might require follow-up with hematology depending on those results. We will try to reestablish her with Dr. Haws as her ; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 03/22/2016 THIS ONSET; There has been treatment or conservative therapy.; INJECTION SITE REACTIONS WITH MED,LEGS HAVE LESS DEXERITY AND POSSIBLE SPASTICITY&#x0D; MULTIPLE SCLEROSIS FOLLOW UP&#x0D; GAIT DISTURBANCE,NECK PAIN; PATIENT IS ON BETASERON INJECTIONS&#x0D; REESTABLISH WITH HER PRIMARY CARE&#x0D; LABWORK DRAWN&#x0D; MRI BRAIN,MRI C SPINE ORDERED&#x0D; FOLLOW UP VISIT IN 1 MONTH

Multiple sclerosis (G35).&#x0D; we are rechecking MRIs of her brain , C and T spine this week. She is having urinary retention and has an indwelling catheter now, she is going to see Dr.Pickleman Friday at 10:30 and having the MRIs friday morning..; This study is being ordered for a neurological disorder.; The symptoms are reported as being severe. The symptoms occur constantly.; There has been treatment or conservative therapy.; Constitutional&#x0D; \*&#x0D; Overall appearance - chronically ill-appearing.&#x0D; Extremity&#x0D; Normal&#x0D; No edema.&#x0D; Neurological&#x0D; \*&#x0D; Memory - mildly impaired short term memory. R eye deviates lateral while Left eye is looking forward at times then moves back into center Ba; She is taking Tecfidera daily and we plan to check a CBC today.

MULTIPLE SCLEROSIS FOLLOW UP; This study is being ordered for a neurological disorder.; 1/2011; There has been treatment or conservative therapy.; MULTIPLE SCLEROSIS, BRAINSTEM LESION, LESION IN THE SUBCORTICAL WHITE MATTER IN THE LEFT POSTERIOR FRONTAL REGION, LESION IN THE RIGHT ANTERIOR CORPUS CALLOSUM, LEG PARESTHESIAS,EXTREMITY NUMBNESS,; HIGH DOSE STEROIDS, IVIG, COPAXONE

Multiple Sclerosis; This study is being ordered for a neurological disorder.; 2011; There has been treatment or conservative therapy.; patient has been diagnosed with Multiple Sclerosis; patient has been closely monitored on MS medications and has yearly imaging to check her disease burden.

Multiple Sclerosis; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2005; There has been treatment or conservative therapy.; Muscle spasms, numbness, tingling , Cognitive slowing , Disequilibrium; medication . pain management , sees a psychiatrist . Physical therapy

Natasha Northweather is a 32 year old female who comes in today for episodes of waking up feeling paralyzed. She reports a total of three episodes over the past two years. The first episodes occurred during an afternoon nap. When she woke up she felt like; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

NEUROSARCOIDOSIS,SHORTNESS OF BREATH,DIZZINESS,DEBILATING FATIGUE,NAUSEA,HEADACHES, WHOLE BODY PAINS,BACK PAIN,NECK PAIN,R/O REOCCURENCE; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of infection or inflammation; Is is not known if the patient has a fever, stiff neck AND positive laboratory findings (like elevated WBC or abnormal Lumbar puncture fluid examination that indicate inflammatory disease or an infection.; The doctor does not note on exam that the patient has delirium or acute altered mental status.; The patient does not have a Brain CT showing abscess, brain infection, meningitis or encephalitis.

New onset headache, abnormal CT; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a sudden and severe headache.; The patient has NOT had a recent onset (within the last 3 months) of neurologic symptoms.

NON CEPHALGIC MIGRAINE WITH LEFT FORTIFICATION SPECTRA AND RIGHT FACIAL DROOP.; History of Present Illness:; 1. Vision Changes ; The symptoms began 1 week ago. had dental procedure on the left last week that last 2 hours in chair. Now having trouble focu; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

None; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

None; This study is being ordered for a neurological disorder.; 10/2015; There has not been any treatment or conservative therapy.; Pt c/o muscle spasm of both legs, question of lesion in central nervous system. Numbness and tingling down BILAT legs.

none; This study is being ordered for a neurological disorder.; 3/11/2016; There has not been any treatment or conservative therapy.; Left sided numbness weakness Pain; This study is being ordered for a neurological disorder.; 01/16/2016; It is not known if there has been any treatment or conservative therapy.; Pt suffers with left side weakness.

Patient has been referred to me for evaluation and management of headaches that have bothered her for the last several years which has worsened in the last several months. It would usually start in posterior head radiating to Lt temporal then across for; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Patient 23 year old woman with several odd episodes. She said that for the last few months she has had episodes where her legs will become shaky and jittery and her legs won't work. When she got into the hallway she was cognizant of her surrounding but not; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo. patient complains of fatigue, high anxiety and dizziness. would like to get an MRI to rule out demyelination, tumor or ischemia; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; It is unknown why this study is being ordered.

Patient complaints of memory loss that began about 5 years ago however is getting increasingly worse. Considering his complaints of worsening memory would like to start with a Neuro-psych evaluation for further diagnostic evaluation of this memory loss. C; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Patient had a CT done on 03/29/16. CT was read as showing moderate atrophy and a low density area in the basal ganglia on the left consistent with encephalomalacia. The patient does drink heavily and admits to drinking half a pint a day.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Patient has been falling. Leg pain, back pain, and weakness. looking for neurologic reason for falls.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing vertigo

Patient has been having more headaches 2 to 3 days per week and just got more and more frequent and more intense over the past 3 months. She started having headaches every single day and has had headaches every single day for 2 or 3 weeks and then on Apr; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache. patient has more cognitive issues, more difficulty with balance; This study is being ordered for a neurological disorder.; august 5-2015; There has been treatment or conservative therapy.; left hemiparesis, difficulty with balance, dizziness, chronic daily headaches; Copaxone

patient has multiple sclerosis.; This study is being ordered for a neurological disorder.; 2010; There has been treatment or conservative therapy.; patient has multiple sclerosis. this is a confirmed diagnosis.; medication management and continuous monitoring with imaging.

Patient has papilledema that with obesity raises concern of Pseudotumor Cerebri, therefore will proceed with spinal tap and mri; This study is being ordered for Vascular Disease.; October 2015; There has been treatment or conservative therapy.; Migraines, papilledema, blurred vision; Several medications

Patient has severe pain in the middle top of her head. Pain also radiates to neck and into her back. Also while having headache she gets nose bleeds that last about 5 minutes. On occasion patient gets an aura with headache and when this happens she gets s; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is not described as a "thunderclap" or the worst headache of the patient's life.

Patient is having increased memory disturbance with a diagnosis of Neurofibromatosis. They areas are on his forehead and we are trying to make sure that this disease has not spread to the nerves in his brain to cause memory disturbance.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing fatigue or malaise.

Patient is here today to review recent MRI C Spine results. He complains of numbness and tingling his neck, feet and fingers as well as frequent headaches. He also complains of frequent neck pain and further explains that when he looks down he feels as th; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; It is unknown why this study is being ordered.

Patient of 32 yo lh female with 2 years h/o episodes of pain, numbness, and tingling sensation in all her extremities that usually is worse in the left hemibody. She also stated itchy sensation in all her body. Sometimes she has imbalance gait, and some i; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 years ago; It is not known if there has been any treatment or conservative therapy.; Patient of 32 yo lh female with 2 years h/o episodes of pain, numbness, and tingling sensation in all her extremities that usually is worse in the left hemibody. She also stated itchy sensation in all her body. Sometimes she has imbalance gait, and some i

Patient with a bell's palsy, papilledema and papillitis needs MRI to r/o intracranial cause; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation); Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient has Bell's Palsy.

Patient with stroke on CT, headache and memory loss; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are not recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Plan/Assessment: 1. Multiple Sclerosis, relapsing remitting, restart Aubagio while waiting on Lemtrada to be approved by her insurance 2. Recommend permanent disability within a reasonable medical certainty related to MS fatigue that renders her unable; This study is being ordered for a neurological disorder.; Here today for a follow up visit for her problems with multiple sclerosis. In past few days new onset of numbness on left side of face that comes and goes. She continues to struggle with severe fatigue and had to quit work in January due to disabling fati; There has been treatment or conservative therapy.; Plan/Assessment: 1. Multiple Sclerosis, relapsing remitting, restart Aubagio while waiting on Lemtrada to be approved by her insurance 2. Recommend permanent disability within a reasonable medical certainty related to MS fatigue that renders her unable; Here today for a follow up visit for her problems with multiple sclerosis. In past few days new onset of numbness on left side of face that comes and goes. She continues to struggle with severe fatigue and had to quit work in January due to disabling fati

PROBLEM #1: Memory loss and brain fog. Overall improved. MRI showed some atrophy but no worrisome neurological diseases. She is on B12 replacement. Level was 424. She feels her memory loss and brain fog did get a bit better on the B12. EEG testing wa; This study is being ordered for a neurological disorder.; December 2014; There has been treatment or conservative therapy.; PROBLEM #1: Memory loss and brain fog. Overall improved. MRI showed some atrophy but no worrisome neurological diseases. She is on B12 replacement. Level was 424. She feels her memory loss and brain fog did get a bit better on the B12. EEG testing wa; B12 replacement

Pt c/o paresphesias in feet and arm and L side of face, headache (r51); This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation). Pt is having frequent seizures on a monthly basis; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has been a previous Brain MRI completed.; The brain MRI was normal.

pt. complains of headaches, memory loss, and now has ataxia; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

R/O Aneurysm; This study is being ordered for trauma or injury.; headaches 2003; injury unknown date; There has not been any treatment or conservative therapy.; headaches, facial pain, ringing in ears

R/O structural lesions.; This study is being ordered for a neurological disorder.; 2006; There has been treatment or conservative therapy.; Pt suffers with headaches; impaired vision; history of cerebral tumors.; unknown therapy.

R/O TUMOR, HEADACHE DISORDER BRAIN FOG, POSITIVE FATIGUE, DIZZINESS, SICCA SYNDROME, POSS. SIOGGRENS, HEARING BLUNTED; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is not described as a "thunderclap" or the worst headache of the patient's life.

Repeat MRI Brain June 2016. Questionable Demyelination: MRI Brain 1/7/16  
Impression Few small FLAIR hyper intensities in the deep white matter of the left cerebral Hemisphere, seen on image #14 of series 4. This is very nonspecific and may represent a si; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Repeat MRI Brain with and without contrast for follow up evaluation of persistent headaches. Would also like to send him for an EEG to rule out possible seizure activity considering his reports of two episodes of passing out. Will also consult Dr. Doyle t; This study is being ordered for a neurological disorder.; 2015; It is not known if there has been any treatment or conservative therapy.; Headaches and dizziness. Headaches that begin behind his left eye. He reports that this is throbbing in nature. Passed out twice and experienced difficulty with word finding during these headaches. vision to left eye has been some what blurry

Review of Systems &#x0D; Constitutional: Positive for fatigue. &#x0D;  
Musculoskeletal: Positive for back pain, gait problem and neck pain. &#x0D;  
Neurological: Positive for dizziness and weakness. &#x0D; Psychiatric/Behavioral:  
Positive for sleep disturbance. &#x0D; All other sys; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; It is unknown why this study is being ordered.  
rule out aneurysm; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

Rule out seizures.; This study is being ordered for a neurological disorder.; 5/10/2016;  
There has not been any treatment or conservative therapy.; trimmers numbness,  
dizziness, weakness, difficulty speaking, difficulty walking, head bobbing, jerking,  
stiffening, back pain. neck pain, insomnia.

She complains of pain in her face that has spread to her tongue and lip on the right.  
She has tried lyrica that is not helping. She has tried carbamazepine that did not help as  
well. She states the procedure at Arkansas Spine and Pain did not help. She co; This  
request is for a Brain MRI; The study is NOT being requested for evaluation of a  
headache.; Requested for evaluation of Multiple Sclerosis; It is not known if the patient  
has undergone treatment for multiple sclerosis.; There are not intermittent or new  
neurological symptoms or deficits such as one-sided weakness, speech impairments, or  
vision defects.

She states she went to ER for pericarditis bronchitis 1 month ago and had absence seizures on 4/19/16, and 4/21/16. She states she had several PCP appointments and was told to come back if she was worse. She went to ER on Thursday night due to feeling like ; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Since her MRI in January, the radiologist recommended repeat study 3 months down the road, so that would be in April. To clarify these issues we will go ahead with the CT angiogram and a repeat MRI scan to see if the evolution of that right cerebellar peduncle; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; JANUARY 11, 2016; There has not been any treatment or conservative therapy.; The pt got dizzy and nauseated. She also had problems writing which she is right handed and she couldn't walk very well. She then went to her primary doctor and they did a ct and mri and it showed evidences of a right cerebellar peduncle ischemic lesion

Started after her pregnancy in 2007. They have gotten worse over time. It is hard for her to describe the headache. Not really pounding or throbbing. Positive nausea. Her eyes are usually closed when the headaches come on, but does not seem to clearly ; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Suspected TIA; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/01/2011; There has been treatment or conservative therapy.; Episodic vertigo, nausea, ataxia, hearing loss in left ear, expressive aphasia, blurred vision; Meclizine was taken for Vertigo symptoms.

The doctor wants to have an MRI brain and MRA brain to rule out any mass or occlusion.; This study is being ordered for a neurological disorder.; January 1, 2016 and headaches all her life; There has been treatment or conservative therapy.; Headaches in the right occipital and right frontal regional. Sharp and dull throbbing pain. The headache can last a whole week.; The vision change had been going on for 3-4 months with headaches. It consist of "blurry" vision with the headache.; BC powder 4/12/2016.; amitriptyline 1/12/2016.; Excedrin prn

The doctors would like these studies to rule out tumor or lesion since the headaches have only been going on for a couple of weeks.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; June 6, 2016; There has been treatment or conservative therapy.; Pt has been having sever headaches for two weeks. In the bilateral occipital area. The headaches are increasing over an hour period. Sneezing, nodding makes the headache worse. Photophobia and phonophobia along with blurry vision.; Ibuprofen

The patient has Multiple Sclerosis, on Tecfidera and needs follow up MRI studies of the brain and neck to evaluate for any new MS lesions of the brain or cervical spine; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Multiple Sclerosis diagnosed around May, 2012. The patient is currently on Tecfidera. Requesting yearly MRI of the brain to evaluate for any new lesions and MRI of the cervical spine to also evaluate for any new MS lesions; There has been treatment or conservative therapy.; The patient will have occasional headaches and some numbness and tingling in her upper extremities; Patient has been treated in the past with oral steroids, Rebif and is currently taking Tecfidera.

The patient has what appears to be classic migraine. At this point in time, the visual disturbance seems to be more severe. If the headaches get to the point that they are more frequent, the doctor is a little concerned with her family history with her mother; This study is being ordered for a neurological disorder.; April 25, 2016; There has been treatment or conservative therapy.; She will lose her peripheral vision with these episodes. She states it is like tunnel vision on both sides and states it is not black. Her first episode lasted about an hour. The second lasted a little bit longer and the vision would kind of come and go. She is taking Ibuprofen

The patient is a 43 year old male with complaints of transient episodes in which his arms and legs become jumping or spasm. He had EMG and nerve conduction studies showing mild carpal tunnel syndrome but no evidence of a large fiber neuropathy. He continues; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.

The patient is a 45 year old woman who was in her attic on 2/17/16 when she fell through the plasterboard. The ceiling of the floor below her was ten feet below the floor. She fell at least ten feet. She tried to catch herself and ended up landing on her ; This study is being ordered for a neurological disorder.; 2/17/16; There has been treatment or conservative therapy.; Headaches, pain in lower back; Amitriptyline 25mg going to 75mg and Meclizine 25mg P.O t.i.d p.r.n

The patient is a 54 year old woman who come in with tremor. The patient says that he tremor occurs mostly when she is trying to do something. She also has spastic speech. This has been going on for twenty years and has been getting worse. She was original; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.

The patient is a pleasant 63 year old female with a history of a prior stroke due to atrial fibrillation who is now on Eliquis.. There was also a concern of a possible demyelinating process given the area of enhancement on her scan, but this was felt to b; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are not recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

The patient is having numbness on the right chin, breast, elbow and right hand. She is also having some vision problems along with the numbness. The doctor wants to rule out Multiple Sclerosis with and MRI of the brain also an MRI of the c-spine.; This study is being ordered for Inflammatory/ Infectious Disease.; JUNE 1, 2015; It is not known if there has been any treatment or conservative therapy.; NUMBNESS IN THE CHIN, RIGHT ELBOW, BREAST AND RIGHT HAND.

The patient isn't having any MS flare-ups or exacerbations. She is tolerating her Copaxone well. No injection site reaction or side effects. Repeat MRI's in June of this year, which will actually be 2 years, and to see the patient back in clinic after the; This study is being ordered for Inflammatory/ Infectious Disease.; October 15, 2012; There has been treatment or conservative therapy.; yearly MS follow up on the patient's MRI and to return to clinic after her image; Copaxone 20 mg subcu daily

The patient underwent a MRI of the brain performed on 5/6/15. The study revealed a small foci of increased FLAIR signal in the left posterior periventricular white matter. There is a possibility that this could represent mild, early multiple sclerosis a; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.

This is a request for an Internal Auditory Canal MRI.; There is a suspected Acoustic Neuroma or tumor of the inner or middle ear.

This patient describes memory loss and transient apraxia which is getting worse. In addition, she has a rightsided tremor and a right facial tremor which seems to be getting worse. She has some difficulty with following commands in her left foot. She is; This study is being ordered for a neurological disorder.; 6 years ago; It is not known if there has been any treatment or conservative therapy.; Memory Loss, Tremors, Falls

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a “thunderclap” or the worst headache of the patient’s life.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient had a thunderclap headache or worst headache of the patient's life (within the last 3 months).

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing dizziness.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing dizziness.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing fatigue or malaise.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing vertigo

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient has not undergone treatment for a congenital abnormality (such as hydrocephalus or craniosynostosis).; There are recent neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.; The patient has a congenital abnormality.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient has undergone treatment for a congenital abnormality (such as hydrocephalus or craniosynostosis).; The patient has a congenital abnormality.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has not undergone treatment for multiple sclerosis.; There are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has undergone treatment for multiple sclerosis.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has been a previous Brain MRI completed.; The brain MRI was abnormal.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; It is not known if a biopsy has been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack).

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has the inability to speak.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; There has been a recent assessment of the patient's visual acuity.; This study is being ordered for stroke or TIA (transient ischemic attack).

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for a tumor.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for Multiple Sclerosis.; The patient is taking Tysabri (Natalizumab).

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for Multiple Sclerosis.; This study is being ordered as a 12 month annual follow up.; This is a routine follow up.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for Parkinson's disease.; This study is being ordered for a new patient to this office.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for seizures.; It is unknown if there has there been a change in seizure pattern or a new seizure.; This is a new patient.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for seizures.; There has been a change in seizure pattern or a new seizure.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for seizures.; There has NOT been a change in seizure pattern or a new seizure.; This is a new patient.

Thus far no clear evidence for MS. I have seen cases where an MS panel is positive prior to changes on MRI. Will send her for MRI brain, cervical spine, and thoracic spine all with and without contrast to look for any evidence of a demyelinating disease.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 years ago; There has not been any treatment or conservative therapy.; headaches, vision changes and dizziness. blurred vision. pressure like pain all over head. occasional nausea with headaches. history of vision loss of one eye

To complete her workup she will be sent for a VER given her visual disturbances. Will start on Baclofen for her spasticity and Amantadine for her fatigue. She is to restart her B12 injections and start a vitamin D supplement. She will need a follow up MRI; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 05/2015; There has been treatment or conservative therapy.; History of numbness and tingling in her lower extremities for the past eight years. She was having symptoms of difficulty walking and problems with her bladder control. She is still having a lot of weakness in her lower extremities with spasticity. She st; Prednisone taper, &#x0D; Aubagio for the past four months along with Zolof. &#x0D; Baclofen &#x0D; Amantadine for fatigue

To follow up evaluation of Multiple Sclerosis.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2014; There has been treatment or conservative therapy.; Headaches, and ringing in ears as well as dizziness. difficulty with speaking, swallowing, and occasional incontinence. and double vision; Tecfidera and Plegridy

to rule out demyelination, ischemia or tumor; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Trigeminal Neuralgia and headache both new onset; This study is being ordered for a neurological disorder.; 10/20/2015; There has not been any treatment or conservative therapy.; Headache with jaw pain

unknown; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Unknown; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; It is unknown if there recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; It is not known if there is a new and sudden onset of a headache less than 1 week not improved by medications.; It is not known if there is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation) unknown; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has dizziness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

Unknown; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; It is not known if there has been a previous Brain MRI completed.

unknown; This study is being ordered for a neurological disorder.; 01/2016; There has been treatment or conservative therapy.; dizziness, vertigo, ABN gait, problems with lower extremities; cardiology

unknown; This study is being ordered for a neurological disorder.; 03-28-2016; There has been treatment or conservative therapy.; Numbness, tingling, blurred vision, facial droop, double vision,; Medications, PT,

Unknown; This study is being ordered for a neurological disorder.; 3 to 6 months ago; There has been treatment or conservative therapy.; burning pain on the right side of her body; Neurotin 300 mg. p.o. t.i.d.&#x0D; nerve conduction velocity of both arms unknown; This study is being ordered for a neurological disorder.; unknown; It is not known if there has been any treatment or conservative therapy.; Muscle cramps, right hand shaking,

Vertigo, Headache; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has dizziness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

We have recently done an MRI brain without contrast, which revealed several different possible diagnosis. The interpreting radiologist states that further evaluation is needed and that an MRI Brain with contrast should give better and additional images fo; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; It is not known if the tumor is a pituitary tumor or pituitary adenoma.

Weakness &#x0D; Onset was 2 months ago. Location includes right foot. Additional information: No pain and numb or tingling. Big toe extensor ok but ant tib weak. Foot drags. No LBP. No othe neuro issues. Torn meniscus right knee-Arnold.EMG/NCV-NEG DIAGN; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of infection or inflammation; The patient does not have a fever, stiff neck AND positive laboratory findings (like elevated WBC or abnormal Lumbar puncture fluid examination that indicate inflammatory disease or an infection.; The doctor does not note on exam that the patient has delirium or acute altered mental status.; The patient does not have a Brain CT showing abscess, brain infection, meningitis or encephalitis.

weakness in her lower left extremity; This study is being ordered for a neurological disorder.; 7/2013; There has been treatment or conservative therapy.; FATIGUE, memory impairment, balance and gait, tremors; yearly check up to check progress of the disease, last MRI was a year ago, follow up for MS

WHITE MATTER DISEASE,LOWER LIMB SWELLING,TOES PURPLE,NARCOLEPSY,NIGHT SWEATS,R/O MS,EXCESSIVE HYPERSOMNOLENCE,COMPARE TO OLD SCAN; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has not undergone treatment for multiple sclerosis.; There are not intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.

Will send for repeat MRI of brain w/wo to compare to previous study, Concerns of TIA, Vasculitis, Vertebral basilar insufficiency due to pulsatile tinnitus and vertigo; This study is being ordered for a neurological disorder.; unknown; There has been treatment or conservative therapy.; Headaches and facial/temple pain, numbness, problems with balance and shooting pains in his neck. facial and jaw pain, numbness in his left arm and leg, ringing in ears blurred vision with balance. neck pain, chest pain tightness, memory loss, itching; Nortriptyline 25 mg q hs &#x0D; Robaxin 750 mg q 8 hours PRN WORSENING HEADACHES,MORE FREQUENT HEADACHES,THROBBING HEADACHES WITH PHOTO AND PHONOPHOBIA,PATTERN CHANGE,NAUSEA; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is not described as a “thunderclap” or the worst headache of the patient’s life.

Would like to get a brain MRI to rule out central process such as multiple Sclerosis. Will also send for cervical MRI w/wo to rule out reoccurring disc or infection or MS Lesion in her cord. Will send her for labs to check for an autoimmune disease, for h; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 5/26/15; There has been treatment or conservative therapy.; Neck pain, Stiffness, and difficulty walking over the past few years. She has had surgery over her cervical and lumbar region by Dr. Burson few years prior. States she continues to have numbness and weakness in her arms and legs, right greater than left, ; Neurontin 600mg, &#x0D; Flexeril 10mg , &#x0D; Norco 10/325mg q4hrs PRN&#x0D; Meloxicam 15mg daily &#x0D; Klonopin 1mg BID Seizure disorder; Yes, this is a Functional MRI Brain.

"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Doctor wants to rule aneurysm, chest pain on the left side on 4/16; There has been treatment or conservative therapy.; weakness and numbness.; EKG Stress test on 4/10.

A Chest/Thorax CT is being ordered.; This study is being ordered for known tumor. Abnormal MRI possible tumor; This study is being ordered for a neurological disorder.; September 2015; There has been treatment or conservative therapy.; Paresthesias fatigue weakness;

IPSILATERAL HORNER'S SYNDROME Headache &#x0D; Onset: 2 weeks ago. It occurs intermittently. Location is ocular right. The describes it as sharp. Context: history of migraine. Relieving factors include OTC meds and prescription drugs. Additional informa; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

More lesions were discovered Test needed to rule out tumor; This study is being ordered for a neurological disorder.; September 2015; There has been treatment or conservative therapy.; Headaches paresthas weakness fatigue; MS medications

Ms Rose is a 54, year old female who presents for numbness in hands and feet pain, shooting down legs and across back. She sates this started in 2012 and occurs daily. She fell Yesterday and is in pain 10/10 in low back but she did not go to ER. She sates; This study is being ordered for a neurological disorder.; 2012; It is not known if there has been any treatment or conservative therapy.; Numbness in hands and feet, pain shooting down legs and across back, Falls, Hyperreflexia

pt has a dx of MG and and has parathyroid recurrence and currently on Mestinon; It is not known if there is radiologic evidence of mediastinal widening.; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.

The patient is presenting new signs or symptoms.; "There is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;&#x0D; PATIENT UNDER WENT SURGERY ROTATOR CUFF, SUREGERY TO THE LEFT ARM, HAS ALOT OF PAIN TO THE SHOULDER AND BACK ABDUCTIONG HIS LEFT THUMB.; This study is NOT being ordered for a Work-up for Suspicious Mass, Known Tumor, Known or Suspected Inflammatory Disease, etc...; This is a request for a chest MRI.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; There has not been any treatment or conservative therapy.; unknown

This study is being ordered for inflammatory disease.; The ordering physician is a surgeon or pulmonologist.; This is a request for a chest MRI.

Pt has a cold compression and deformity found on MRI. MDO is wanting to r/o radiculopathy for possible surgery. Also going to do spinal fluids to check for MS.; This study is being ordered for a neurological disorder.; March 2015; There has been treatment or conservative therapy.; Pt has leg weakness, lower back pain, radicular pain going into her legs, migraines, parasthesia in her extremities.; pain medication, Tylenol, several different medications

radiculopathy; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.

The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Lower extremity weakness.

This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to neurological deficits.; The patient is experiencing or presenting symptoms of lower extremity motor weakness documented on physical exam.; There is a reason why the patient cannot have a Cervical Spine MRI.

Pt has a cold compression and deformity found on MRI. MDO is wanting to r/o radiculopathy for possible surgery. Also going to do spinal fluids to check for MS.; This study is being ordered for a neurological disorder.; March 2015; There has been treatment or conservative therapy.; Pt has leg weakness, lower back pain, radicular pain going into her legs, migraines, parasthesia in her extremities.; pain medication, Tylenol, several different medications

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is a preoperative or recent post-operative evaluation.

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.

This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 01/20/2016; There has not been any treatment or conservative therapy.; MS

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 04/21/2016; There has been treatment or conservative therapy.; blurred vision, fatigue; iv steroids for three days.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 1 year; There has been treatment or conservative therapy.; extremity weakness/blurred vision in right eye/right foot drop/muscle weakness/radiculopathy/gait difficulty; physical therapy

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 3/18/16; There has not been any treatment or conservative therapy.; weakness in lower extremities , migraine headaches, cluster headache, r/o spinal stenosis ,

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; one year history; There has not been any treatment or conservative therapy.; progressive weakness, abnormal gait, evaluating for multiple sclerosis

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; patient diagnosed with MS 2007; There has been treatment or conservative therapy.; blurred vision, lower extremity weakness and gait disturbance.; patient is on copaxon 3xs / week. 40 mg

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;

; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.;

; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; Mr.Rosenbaum reports to clinic today for follow up. She reports that she continues to have multiple spells per day. Spells consist mostly of left arm extension with her right leg "coming up." She states these are brief lasting just a few seconds but can b;

; This study is being ordered for a neurological disorder.; 03/31/2016; There has been treatment or conservative therapy.; RECENT EXACERBATION OF MS WITH TUMEFACTIVE TX WITH STEROIDS.MS NEW SYMPTOMS OF VERTIGO.; RIZATRIPTAN 10MG.

; This study is being ordered for a neurological disorder.; Last visit date:10/12/2005; Date Diagnosed:2008; Last MRI:1/21/2015; Last Lab:10/12/2015; MS treatment history:Avonex, started Tecfidera 1/2015; There has been treatment or conservative therapy.;

; This study is being ordered for a neurological disorder.; Unknown; It is not known if there has been any treatment or conservative therapy.; Migraines

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Doctor wants to rule aneurysm, chest pain on the left side on 4/16; There has been treatment or conservative therapy.; weakness and numbness.; EKG Stress test on 4/10.

2 years since MRI scans of her head and neck have been done to see if there is any significant disease progression; This study is being ordered for a neurological disorder.; January 2012; There has been treatment or conservative therapy.; numbness and tingling weakness some coordination difficulties of her left arm and swelling of her left arm; Rebif 3 times a week

ABN MRI today w/o contrast and contrast is needed to look at the lesion to see what type of lesion it is.; This is a request for cervical spine MRI; None of the above; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Weakness in the R hand; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Abnormal MRI Brain without contrast that showed small focus of abnormal signal in the deep white matter of the posterior right frontal lobe with suggestion of similar tiny focus of signal and near the gray white junction of the same region. Considering he; This study is being ordered for a neurological disorder.; 3/16/16; It is not known if there has been any treatment or conservative therapy.; Headaches, numbness and tingling. Occasional neck pain, balance problems and dizziness. History of inner ear problems. Abnormal MRI Without contrast.

Benign physiological tremor, responded previously to Inderal. The patient does not want treatment for it at this time. &#x0D; Multiple nonspecific complaints consisting of fatigue, parenthesis, cognitive dysfunction. The patient appears to have some benign ey; This study is being ordered for a neurological disorder.; August 1, 2015; There has not been any treatment or conservative therapy.; Fatigue, muscle spasms, eye twitching, tremor

Brain MRI with and without contrast to rule out demyelination, tumor, ischemia, C spine MRI without contrast to rule out cervical myelopathy,; This study is being ordered for a neurological disorder.; January 2016; It is not known if there has been any treatment or conservative therapy.; headache, neck pain, blurry vision with headaches. sensitivity to light and noises with nausea daily. when she is driving she gets an electrical shock and her legs and hands don't work.

CHECKING FOR STROKE; This is a request for cervical spine MRI; None of the above; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Considering her complaints of persistent headaches with associated facial pain and vision changes, would like to send her for MRI Brain with contrast for diagnostic evaluation rule out possible demyelinating process such as Multiple Sclerosis. Would like ; This study is being ordered for a neurological disorder.; 2014; There has been treatment or conservative therapy.; Pressure to head and neck with associated facial pain, Pressure begins at her cheek bones and radiates up her head. complains of ringing in ears, dizziness, and numbness to both hands and feet that also occurs daily. she feels generally weak all over with; gabapentin

Considering her symptoms of fatigue to her lower extremities would like to send her for a MRI Brain to rule out possible demyelinating process such as Multiple Sclerosis. Would like to send her for a MRI C Spine to rule out Possible Multiple Sclerosis.; This study is being ordered for a neurological disorder.; 2/01/2016; It is not known if there has been any treatment or conservative therapy.; Numbness and tingling to both lower extremities. Both legs feeling fatigued and heavy. Pinched nerve in her neck

Considering the persistence of these symptoms, would like to send her for a MRI Brain, Cervical and Thoracic Spine with Contrast for further diagnostic evaluation to rule out possible underlying demyelinating process as Multiple Sclerosis.; This study is being ordered for a neurological disorder.; unknown; There has been treatment or conservative therapy.; muscle spasms and weakness, Difficulty hearing, ringing in ears, occasional difficulty with swallowing. difficulty with controlling her bladder. occasional double vision, tremors to both hands.; Prednisone 20 Mg daily, &#x0D; Mestinon 60 mg TID for treatment for MG, Tizanidine 4 Mg.

CVA vs anxiety vs. cervical myelopathy, &#x0D; MRI brain w/wo contrast to rule out demyelination, ischemia or tumor &#x0D; MRI C Spine wo contrast to rule out myelopathy as evidenced by right triceps weakness.; This study is being ordered for a neurological disorder.; unknown; It is not known if there has been any treatment or conservative therapy.; chest pain, Right sided weakness in leg and arm, trouble picking up his child with his right arm.

Decreased pinprick sensation in median nerve, C5, C8 dermatome, left. Decreased pinprick sensation in the median nerve, C3, C4, C5, C6 dermatome, right. Abnormal EMG/NCV tests; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

demyelinating disease; This study is being ordered for a neurological disorder.; 5-5-16; There has been treatment or conservative therapy.; leg pain and weakness, numbness, gait disturbance, abnormal brain mri; medication

Enter answer here - or Type In Unknown If No Info Given . Probable MS exacerbation with vertigo, left leg numbness and weakness, and numbness both hands (the latter could be from thoracic outlet syndrome; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; ;

Enter answer here - or Type In Unknown If No Info Given fatigue, headache, tingling tremor weakness.; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; ;

Exam is worrisome for a central process such as multiple sclerosis or possible cervical or thoracic spine myelopathy. Will send her MRI of the brain, cervical spine, and thoracic spine to look for evidence of a demyelinating process or spinal cord stenosis; This study is being ordered for a neurological disorder.; unknown; It is not known if there has been any treatment or conservative therapy.; chronic headaches, right leg stiff, neck pain, muscle spasms and hyperactive bladder.

FOLLOW UP MRI FOR MULTIPLE SCLEROSIS BEFORE HER APPT IN HOUSTON, TX. DURATION OF SYMPTOMS NOW: 04/28/2016; This study is being ordered for a neurological disorder.; 02/12/2015; There has been treatment or conservative therapy.; Gait issues, weakness, CTS, drops things, feet and hands are chronically numb, fine motor skills are difficult for her. Fatigue, bladder issues. Burning legs.; AMPYRA, SOMA, TECFIDERA, EPITOL, PREDNISON, ESTRADIOL; LABS DRAWN FOR FOLLOW UP, LAST MRI 1 YEAR AGO, HAS APPT IN Houston, Texas in July, does exercises.

follow up with MRI for optic neuritis, vision loss, r/o: myelitis, CNS demyelination; This study is being ordered for Inflammatory/ Infectious Disease.; 12/23/2015 DURATION OF SYMPTOMS; Physical Exam Findings: About 1-1/2-2 weeks ago the vision in her left eye started to deteriorate. It is now to the point where she can hardly read out of the left eye. Visual acuity seems to be 20/200. Importantly she ; There has been treatment or conservative therapy.; Physical Exam Findings: About 1-1/2-2 weeks ago the vision in her left eye started to deteriorate. It is now to the point where she can hardly read out of the left eye. Visual acuity seems to be 20/200. Importantly she says by the time she came off pre; Other: At this point were going to restart prednisone at 40 mg daily, for a dx of recurrent optic neuritis. Her case was discussed with Dr. Clay and she is going to bump up her metformin dose to 500 twice a day. She is going to keep close track of her b

follow up; This study is being ordered for a neurological disorder.; unknown; There has been treatment or conservative therapy.; MS; unknown

FOLLOW UP; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2013; There has been treatment or conservative therapy.; DAILY HEADACHES, MODERATE HEADACHES 3 TIMES A WEEK, VERY SEVERE HEADACHES 1-2 TIMES PER MONTH, MODERATE HEADACHES ARE SEVERE ENOUGH TO KEEP HER FROM EATING OR DRINKING, DIZZINESS, BLURRED VISION, NAUSEA, VOMITING,; VERAPAMIL, DEPAKOTE, TORADOL, DHE INTRANASALLY, ACUPUNCTURE

Given patient new concern of hemi numbness with pain and spasm. will send her for an MRI of her brain with and without contrast MS protocol which should compare to her previous normal scan during her hospitalization in August. Will also check an MRI of her; This study is being ordered for a neurological disorder.; Unknown; It is not known if there has been any treatment or conservative therapy.; Muscle spasms and numbness along her upper back and over her right leg, thigh and calf over the past several weeks. Occasional tremors, problems with walking and balance, occasional numbness and tingling in her extremities. episodes of dizziness and occas

having radicular leg pain back pain left side weakness doctor wants to r/o MS; This study is being ordered for a neurological disorder.; 6 years ago; There has been treatment or conservative therapy.; numbness extremity pain migraine; several meds several primary care was referred to a Neurologist

He had an EMG/NCV on 6/09/2016 which was normal. The doctor would like to proceed with an MRI of the brain and MRI c-spine to rule out anything cervical or demyelinating.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; MARCH 1, 2016; There has been treatment or conservative therapy.; He states he is not sure if it came on suddenly or has been gradually coming on, but he just noticed that he had numbness three months ago. It started out kind of in his index finger of the right hand and then progressed to the middle and sometimes the ri; He has had a CT of his head without contrast which was normal as well as a CBX and a PSA which were normal.

Her history and physical would suggest the presence of central nervous system disease involving either the brain or spinal cord. Examination would be supportive of that with her hyperreflexia especially in someone who has had a history of chemotherapy. Th; This study is being ordered for a neurological disorder.; March 5, 2016; There has been treatment or conservative therapy.; Visual disturbance, right arm numbness; Her primary doctor did some studies on her; echocardiogram, carotid Doppler study, and Holter monitor which were all within normal limits

History:Marcell is here today for a follow visit today for his problems with neuromyelitis optica. He does not have any new symptoms or problems, last infusion of Rituxan was February 2015. He continues to have skin disorder that causes itching and uses t; This study is being ordered for a neurological disorder.; History:Marcell is here today for a follow visit today for his problems with neuromyelitis optica. He does not have any new symptoms or problems, last infusion of Rituxan was February 2015. He continues to have skin disorder that causes itching and uses t; There has been treatment or conservative therapy.; Plan/Assessment:&#x0D; 1. NMO, relapsing remitting, stable on Rtiuxan. Will schedule next infusion and then will infuse every 6 months. &#x0D; 2. Lab: PBLD, CBC, CMP, TSH, Vitamin B12, Vitamin D today.&#x0D; 3. Call infusion center to schedule next Rituxan.&#x0D; 4. MRI-Brai; MS treatment history:Imuran 150mg daily. 4/13/2012-stop Imuran, start Rituximab 1000mg in 2 weeks, and will repeat 2 weeks later then every 6 months. I will ask Joanne Conley our financial counselor to have preapproved prior to infusion. 5/21/2012-tolerat

It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; It is not known if this patient had a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.; Patient is a pleasant 55 year female with complaints of numbness and tingling in both hands. She mentioned that the symptoms have remained the same since her last visit. She said that the numbness and tingling has been going on a few years. She has had tw

It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.; Yes, the patient had six weeks of Chiropractic care related to this episode.

It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; It is not known if this patient had a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.; hx of cervical disc disease

Left leg pain, tingling and numbness, Burning pain in both sides of her feet.; This study is being ordered for a neurological disorder.; about 1 month ago; It is not known if there has been any treatment or conservative therapy.; Numbness and pain in her legs

Mr Hodge is a 39 year old male that presents to the clinic at the request of Dr Cazano. He states that he is experiencing right hand hand pain, numbness and tingling; numbness and tingling affect all digits. He further reported that he has RLE pain with n; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Mr Hodge is a 39 year old male that presents to the clinic at the request of Dr Cazano. He states that he is experiencing right hand hand pain, numbness and tingling; numbness and tingling affect all digits. He further reported that he has RLE pain with n; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if there is x-ray evidence of a recent cervical spine fracture.

MRI Brain and C Spine with contrast MS protocol, To check for new lesions.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2004; There has been treatment or conservative therapy.; hurting all over, and she has optic neuritis in left eye and is legally blind; Tysabri

MRI Brain with contrast and c spine with MS protocol, to r/o demyelination. Her PCP sent her to get an MRI of her brain without contrast and was told she had demyelinating, ventricular changes.; This study is being ordered for a neurological disorder.; 4-5 months patient office visit was on 4/6/16; There has been treatment or conservative therapy.; Balance changes and falls. complains of shaking, losing her balance and falling. Complains of weakness blurred vision ringing in ears, double vision. Complains of stiffness and locked knees.; she is taking Xanax for tremors 2 q am and 1 q pm, &#x0D; she takes Hydrocodone 5-325 mg 1 tablet PRN pain, &#x0D; Lyrica 150 mg 1 tablet BID, Flexeril 10 mg Q hs

Ms Rose is a 54, year old female who presents for numbness in hands and feet pain, shooting down legs and across back. She states this started in 2012 and occurs daily. She fell Yesterday and is in pain 10/10 in low back but she did not go to ER. She states; This study is being ordered for a neurological disorder.; 2012; It is not known if there has been any treatment or conservative therapy.; Numbness in hands and feet, pain shooting down legs and across back, Falls, Hyperreflexia

Multiple sclerosis (G35).&#x0D; Probably has exacerbation, the question is where in CNS--brain or cord. Had new enhancing brain lesion in July 2015 but it was felt to wait before changing meds. Went over data re PML with orals. Will try IV steroids without ; This study is being ordered for a neurological disorder.; 3/2014; There has been treatment or conservative therapy.; RRMS,GAIT ISSUES,DRAGGING RIGHT FOOT,FEELS UNSTEADY,RIGHT THIGH NUMB,INCREASED FATIGUE,EXHAUSTED,VERY CONCERNED RE PML; COPAXONE,GABAPENTIN,MOBIC,TYLENOL,BACLOFEN,CLONAZEPAM,TYSABRI IN THE PAST,JC+.,STEROID MEDS,SEEING DR OUT OF STATE IN ST LOUIS,

Multiple sclerosis (G35).&#x0D; She will require follow-up MRI imaging of her brain and cervical spine. She will have a CMP and CBC. She might require follow-up with hematology depending on those results. We will try to reestablish her with Dr. Haws as her ; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 03/22/2016 THIS ONSET; There has been treatment or conservative therapy.; INJECTION SITE REACTIONS WITH MED,LEGS HAVE LESS DEXERITY AND POSSIBLE SPASTICITY&#x0D; MULTIPLE SCLEROSIS FOLLOW UP&#x0D; GAIT DISTURBANCE,NECK PAIN; PATIENT IS ON BETASERON INJECTIONS&#x0D; REESTABLISH WITH HER PRIMARY CARE&#x0D; LABWORK DRAWN&#x0D; MRI BRAIN,MRI C SPINE ORDERED&#x0D; FOLLOW UP VISIT IN 1 MONTH

Multiple sclerosis (G35).; we are rechecking MRIs of her brain , C and T spine this week. She is having urinary retention and has an indwelling catheter now, she is going to see Dr.Pickleman Friday at 10:30 and having the MRIs friday morning..; This study is being ordered for a neurological disorder.; The symptoms are reported as being severe. The symptoms occur constantly.; There has been treatment or conservative therapy.; Constitutional.; Overall appearance - chronically ill-appearing.; Extremity.; Normal.; No edema.; Neurological.; Memory - mildly impaired short term memory. R eye deviates lateral while Left eye is looking forward at times then moves back into center Ba; She is taking Tecfidera daily and we plan to check a CBC today.

MULTIPLE SCLEROSIS FOLLOW UP; This study is being ordered for a neurological disorder.; 1/2011; There has been treatment or conservative therapy.; MULTIPLE SCLEROSIS, BRAINSTEM LESION, LESION IN THE SUBCORTICAL WHITE MATTER IN THE LEFT POSTERIOR FRONTAL REGION, LESION IN THE RIGHT ANTERIOR CORPUS CALLOSUM, LEG PARESTHESIAS,EXTREMITY NUMBNESS,, HIGH DOSE STEROIDS, IVIG, COPAXONE

Multiple Sclerosis; This study is being ordered for a neurological disorder.; 2011; There has been treatment or conservative therapy.; patient has been diagnosed with Multiple Sclerosis; patient has been closely monitored on MS medications and has yearly imaging to check her disease burden.

Multiple Sclerosis; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2005; There has been treatment or conservative therapy.; Muscle spasms, numbness, tingling , Cognitive slowing , Disequilibrium; medication . pain management , sees a psychiatrist . Physical therapy

None; This study is being ordered for a neurological disorder.; 10/2015; There has not been any treatment or conservative therapy.; Pt c/o muscle spasm of both legs, question of lesion in central nervous system. Numbness and tingling down BILAT legs.

none; This study is being ordered for a neurological disorder.; 2014; There has been treatment or conservative therapy.; Pt is having gait issues, falling. Numbness, tingling, headaches everyday, dizziness, imbalance, double vision, muscle twitching and cramping, abnormal reflexes.; PT, medication,

none; This study is being ordered for a neurological disorder.; 3/11/2016; There has not been any treatment or conservative therapy.; Left sided numbness weakness

Patient complains of headaches, neck pain and pain with N/T in his left arm. He also reports that he has a hard time holding objects with his left hand. He says this started in 2012 but got worse after an MVA in 2014. He has some brisk left knee reflexes ; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Patient complains of neck pain with numbness and weakness in arms - unsteady gait and frequent falls . MRI of brain revealed Parsinuosities . X-ray of c-spine Multi level spondylosis most severe at C3-C4 and C4-C5.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Patient Is weak in the arms - unsteady gait and frequent falls; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

patient has more cognitive issues, more difficulty with balance; This study is being ordered for a neurological disorder.; august 5-2015; There has been treatment or conservative therapy.; left hemiparesis, difficulty with balance, dizziness, chronic daily headaches; Copaxone

patient has multiple sclerosis.; This study is being ordered for a neurological disorder.; 2010; There has been treatment or conservative therapy.; patient has multiple sclerosis. this is a confirmed diagnosis.; medication management and continuous monitoring with imaging.

Patient is experiencing b/l upper and lower extremities, numbness, tingling and weakness. Patient has tried to do a prednisone taper dose, but is still experiencing weakness in all extremities. Want to rule out any multiple sclerosis exacerbation of spina; This study is being ordered for a neurological disorder.; 2/2014; There has been treatment or conservative therapy.; Multiple sclerosis, bilateral upper and lower extremities weakness, numbness and ataxic gait.; Patient is on copaxone, zonegran, ampyra, tizanidine and is doing physical therapy

Patient of 32 yo lh female with 2 years h/o episodes of pain, numbness, and tingling sensation in all her extremities that usually is worse in the left hemibody. She also stated itchy sensation in all her body. Sometimes she has imbalance gait, and some i; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 years ago; It is not known if there has been any treatment or conservative therapy.; Patient of 32 yo lh female with 2 years h/o episodes of pain, numbness, and tingling sensation in all her extremities that usually is worse in the left hemibody. She also stated itchy sensation in all her body. Sometimes she has imbalance gait, and some i

Plan/Assessment: 1. Multiple Sclerosis, relapsing remitting, restart Aubagio while waiting on Lemtrada to be approved by her insurance 2. Recommend permanent disability within a reasonable medical certainty related to MS fatigue that renders her unable; This study is being ordered for a neurological disorder.; Here today for a follow up visit for her problems with multiple sclerosis. In past few days new onset of numbness on left side of face that comes and goes. She continues to struggle with severe fatigue and had to quit work in January due to disabling fati; There has been treatment or conservative therapy.; Plan/Assessment: 1. Multiple Sclerosis, relapsing remitting, restart Aubagio while waiting on Lemtrada to be approved by her insurance 2. Recommend permanent disability within a reasonable medical certainty related to MS fatigue that renders her unable; Here today for a follow up visit for her problems with multiple sclerosis. In past few days new onset of numbness on left side of face that comes and goes. She continues to struggle with severe fatigue and had to quit work in January due to disabling fati

Progressive numbness in the lower and upper extremities. Severely ataxic gait. His neuro exam revealed decreased sensation in both lower extremities up to mid thighs, hyper reflexia in all extremities, increased muscle tone and spasticity in the lower extr; This study is being ordered for a neurological disorder.; February 2016; There has been treatment or conservative therapy.; Myelopathy, ataxic gait and numbness in all extremities.; Patient was given Neurontin 300 mg twice daily to help.

R/O Multiple Sclerosis.; This study is being ordered for a neurological disorder.; 4/24/2016; There has been treatment or conservative therapy.; Pt suffers with numbness and tingling in hands and feet; trembling; peripheral neuropathy; unsteadiness and dizziness.; medication

R/O pinched nerves; This study is being ordered for a neurological disorder.; December 2015; There has been treatment or conservative therapy.; Pain in neck and back, parathesia and neuropathy; Physical therapy

Right C7 Radiculopathy with hand numbness, weakness and neck pain; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; C7 Radiculopathy found on EMG numbness and weakness in hand noted; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

rule out abnormalites on scans; This study is being ordered for a neurological disorder.; pt was seen 3-28-2016 with complaints paresthesias and her lower extremities. worsening balance and abnormality; There has been treatment or conservative therapy.; neck pain, paresthesias, abnormal gait, worsening pain, abnormal gait and balance; pt tried cynbalta and gabapentin with no relief

Rule out demyelinating process such a multiple sclerosis.; This study is being ordered for a neurological disorder.; approximately one month ago; There has been treatment or conservative therapy.; Vision changes to right eye, cramping to both legs, swelling of ankles; MRI Brain and Orbits with and without contrast 04/22/16

Rule out seizures.; This study is being ordered for a neurological disorder.; 5/10/2016; There has not been any treatment or conservative therapy.; trimmers numbness, dizziness, weakness, difficulty speaking, difficulty walking, head bobbing, jerking, stiffening, back pain. neck pain, insomnia.

several falls; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has Multiple Sclerosis, on Tecfidera and needs follow up MRI studies of the brain and neck to evaluate for any new MS lesions of the brain or cervical spine; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Multiple Sclerosis diagnosed around May, 2012. The patient is currently on Tecfidera. Requesting yearly MRI of the brain to evaluate for any new lesions and MRI of the cervical spine to also evaluate for any new MS lesions; There has been treatment or conservative therapy.; The patient will have occasional headaches and some numbness and tingling in her upper extremities; Patient has been treated in the past with oral steroids, Rebif and is currently taking Tecfidera.

The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; No, the patient did not have six weeks of Chiropractic care related to this episode.; Abnormal EMG; numbness and tingling in the hands w/pain; extremity pain; neck pain; patient is unable to work

The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; No, the patient did not have six weeks of Chiropractic care related to this episode.; looking for cervical radiculopathy &#x0D; ulner neuropathy from compression on left elbow

The patient isn't having any MS flare-ups or exacerbations. She is tolerating her Copaxone well. No injection site reaction or side effects. Repeat MRI's in June of this year, which will actually be 2 years, and to see the patient back in clinic after the; This study is being ordered for Inflammatory/ Infectious Disease.; October 15, 2012; There has been treatment or conservative therapy.; yearly MS follow up on the patient's MRI and to return to clinic after her image; Copaxone 20 mg subcu daily  
This is a request for cervical spine MRI; "The patient has been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."; Follow-up to Surgery or Fracture within the last 6 months

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.

This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; Known or Suspected Multiple Sclerosis, Infection or abscess; ; No, the patient does not have new or changing neurological signs or symptoms.; yes, there are documented clinical findings of Multiple sclerosis.

This is a request for cervical spine MRI; Known or Suspected Multiple Sclerosis, Infection or abscess; Patient with increased spasm and lhermitte's symptom reminiscent of previous cervical spine lesions.; Yes, the patient have new or changing neurological signs or symptoms.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; Yes, the patient is experiencing new onset of parathesia diagnosed by a neurologist.; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.; yes, there are documented clinical findings of Multiple sclerosis.

This is a request for cervical spine MRI; Known or Suspected Multiple Sclerosis, Infection or abscess; Yes, the patient have new or changing neurological signs or symptoms.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; Yes, the patient is experiencing or presenting new symptoms of Bowel or bladder dysfunction.; yes, there are documented clinical findings of Multiple sclerosis.

This is a request for cervical spine MRI; Known or Suspected Multiple Sclerosis, Infection or abscess; Yes, the patient have new or changing neurological signs or symptoms.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; Yes, the patient is demonstrating unilateral muscle wasting.; yes, there are documented clinical findings of Multiple sclerosis.

This is a request for cervical spine MRI; Known or Suspected Multiple Sclerosis, Infection or abscess; Yes, the patient have new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.; yes, there are documented clinical findings of Multiple sclerosis. This is a request for cervical spine MRI; Neurological deficits; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; Yes, the patient is demonstrating unilateral muscle wasting.

This is a request for cervical spine MRI; Neurological deficits; Patient presents with bilateral upper extremity numbness. Had an abnormal EMG done 3/15/2016, which was suggestive for C7 radiculopathy.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; Neurological deficits; Patient said that his neuropathic pain started with left testicular pain which got worse and then got better as it spread mainly to his left thigh. From there, it ended up in his left foot. He does have severe burning pain in both feet.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; Yes, the patient is experiencing new onset of parathesia diagnosed by a neurologist.; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

This is a request for cervical spine MRI; None of the above; Neck stiffness &#x0D; History / Dx: dizziness coming in waves. Improved.&#x0D; burning in his teeth and tongue. Etiology uncertain.&#x0D; brain MRI showed white matter changes. Etiology uncertain. We'll consider repeating this toward the end of the year&#x0D; Neck Stiff; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; None of the above; NUMBNESS IN EXTREMITY,&#x0D; 1. \*paresthesias &#x0D; The patient presents with a history of paresthesias. She had an evaluation in our clinic in 2011 because of right leg paresthesias. This included an MRI of the brain, cervical and thoracic spine. She had som; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; Yes, the patient is experiencing new onset of parathesia diagnosed by a neurologist.; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; None of the above; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

This is a request for cervical spine MRI; Pre-Operative Evaluation; No, the last Cervical spine MRI was not performed within the past two weeks.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; arm pain x 8 mos.constant and fluctuating,burnin pain,aggravated by movement.otc meds aspirin helps with pain.hurts to sleep on right shoulder,scapular burning,shoulder to 5th finger,gradually getting worse.&#x0D; Cervical spine pain (M54.2).&#x0D; symptoms suggest

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; &lt;Enter Additional Clinical Information&gt;

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Mr. Drake is a 35-year-old man with history of seizure disorder, neck pain, carpal tunnel syndrome, depression and anxiety, and hypertension, who is here for follow up. Currently he is on Lamictal 200 mg twice a day and Keppra 500 mg twice a day. He toler

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; NEW Patient evaluation of neck and arm pain. She sates the problem started in the 1990s and is constant. She sates she had a previous diagnosis of carpal tunnel syndrome and had xrays repeated recently She states she worked at the sewing factor and her fi

This is a request for cervical spine MRI; There is no evidence of tumor or metastasis on a bone scan or x-ray.; Suspected Tumor with or without Metastasis; worse with neck extension - numbness with radiculopathy post bBabinski

This is a request for cervical spine MRI; There is no laboratory or x-ray evidence of osteomyelitis.; Known or Suspected Multiple Sclerosis, Infection or abscess; Patient has been passing out with complete loss of consciousness without memory of the spell. Patient gets confused, vision goes black, and a numb feeling over entire body. Arms and legs go numb. Weakness all over.; No, there are no documented clinical findings of Multiple sclerosis.; No, there is not a laboratory or x-ray evidence of Meningitis.; No, there is not a laboratory or x-ray evidence of an infected disc, septic arthritis or "discitis" .; No, there is no laboratory or x-ray evidence of a paraspinal abscess.

This is a request for cervical spine MRI; Trauma or recent injury; ; Yes, the patient have new or changing neurological signs or symptoms.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This patient describes memory loss and transient apraxia which is getting worse. In addition, she has a rightsided tremor and a right facial tremor which seems to be getting worse. She has some difficulty with following commands in her left foot. She is; This study is being ordered for a neurological disorder.; 6 years ago; It is not known if there has been any treatment or conservative therapy.; Memory Loss, Tremors, Falls

Thus far no clear evidence for MS. I have seen cases where an MS panel is positive prior to changes on MRI. Will send her for MRI brain, cervical spine, and thoracic spine all with and without contrast to look for any evidence of a demyelinating disease.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 years ago; There has not been any treatment or conservative therapy.; headaches, vision changes and dizziness. blurred vision. pressure like pain all over head. occasional nausea with headaches. history of vision loss of one eye

To complete her workup she will be sent for a VER given her visual disturbances. Will start on Baclofen for her spasticity and Amantadine for her fatigue. She is to restart her B12 injections and start a vitamin D supplement. She will need a follow up MRI; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 05/2015; There has been treatment or conservative therapy.; History of numbness and tingling in her lower extremities for the past eight years. She was having symptoms of difficulty walking and problems with her bladder control. She is still having a lot of weakness in her lower extremities with spasticity. She st; Prednisone taper,&#x0D; Aubagio for the past four months along with Zoloft. &#x0D; Baclofen &#x0D; Amantadine for fatigue

To follow up evaluation of Multiple Sclerosis.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2014; There has been treatment or conservative therapy.; Headaches, and ringing in ears as well as dizziness. difficulty with speaking, swallowing, and occasional incontinence. and double vision; Tecfidera and Plegridy

Unknown; This study is being ordered for a neurological disorder.; 3 to 6 months ago; There has been treatment or conservative therapy.; burning pain on the right side of her body; Neurotin 300 mg. p.o. t.i.d.&#x0D; nerve conduction velocity of both arms unknown; This study is being ordered for a neurological disorder.; unknown; It is not known if there has been any treatment or conservative therapy.; Muscle cramps, right hand shaking,

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; It is not known if there has been any treatment or conservative therapy.; unknown

weakness in bilateral upper and lower extremities, easily fatigued; This study is being ordered for a neurological disorder.; 3 years Ago; There has been treatment or conservative therapy.; She complains of intermittent episodes of lightheadness. if she's walking. She complains of vertigo sensation.; Physical Therapy and medication Therapy

weakness in her lower left extremity; This study is being ordered for a neurological disorder.; 7/2013; There has been treatment or conservative therapy.; FATIGUE, memory impairment, balance and gait, tremors; yearly check up to check progress of the disease, last MRI was a year ago, follow up for MS

Will send for repeat MRI of brain w/wo to compare to previous study, Concerns of TIA, Vasculitis, Vertebral basilar insufficiency due to pulsatile tinnitus and vertigo; This study is being ordered for a neurological disorder.; unknown; There has been treatment or conservative therapy.; Headaches and facial/temple pain, numbness, problems with balance and shooting pains in his neck. facial and jaw pain, numbness in his left arm and leg, ringing in ears blurred vision with balance. neck pain, chest pain tightness, memory loss, itching; Nortriptyline 25 mg q hs &#x0D; Robaxin 750 mg q 8 hours PRN

Woman with onset in fall 2015 of various neurological symptoms including tingling paresthesias, non-spinning dizziness, nystagmus, twitching of the right hand and eye.&#x0D; Exam just shows slightly brisk reflexes.&#x0D; MRI brain 4/11/16 normal, but partly obscure; This study is being ordered for a neurological disorder.; October 2015; There has been treatment or conservative therapy.; Woman with onset in fall 2015 of various neurological symptoms including tingling paresthesias, non-spinning dizziness, nystagmus, twitching of the right hand and eye.&#x0D; Exam just shows slightly brisk reflexes.&#x0D; MRI brain 4/11/16 normal, but partly obscure; metoprolol tartrate 25 mg tablet

Would like to get a brain MRI to rule out central process such as multiple Sclerosis. Will also send for cervical MRI w/wo to rule out reoccurring disc or infection or MS Lesion in her cord. Will send her for labs to check for an autoimmune disease, for h; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 5/26/15; There has been treatment or conservative therapy.; Neck pain, Stiffness, and difficulty walking over the past few years. She has had surgery over her cervical and lumbar region by Dr. Burson few years prior. States she continues to have numbness and weakness in her arms and legs, right greater than left, ; Neurontin 600mg, &#x0D; Flexeril 10mg , &#x0D; Norco 10/325mg q4hrs PRN&#x0D; Meloxicam 15mg daily &#x0D; Klonopin 1mg BID

Would like to send her for MRI Cervical and Lumbar Spine without contrast for further diagnostic evaluation of the numbness and tingling with associated back pain to rule out possible Radiculopathy; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.; worsening Peripheral Neuropathy, lower back pain that radiates around to her hips. Complains of numbness and tingling as well as a burning sensation to both feet and hands that occasionally radiates up her left arm. she also complains of balance disturban; Lyrica, Cymbalta, Injections

There are no documented clinical findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is not experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits."; Patient with MS with new symptoms of MS hug with spasm

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.

The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.

The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for Neurologic deficits

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal nerve study involving the lumbar spine

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has completed Treatment with a facet joint or epidural injection in the past 6 weeks

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s) thoracic/lumbar radicular symptoms with increased numbness, difficulties with balance, loss of bladder control.; This study is being ordered for a neurological disorder.; 2013; It is not known if there has been any treatment or conservative therapy.; numbness and pain down right leg, difficulties with balance, frequent falls. loss of bladder control.

unknown; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

unknown; This study is being ordered for a neurological disorder.; 01/2016; There has been treatment or conservative therapy.; dizziness, vertigo, ABN gait, problems with lower extremities; cardiology

weakness in bilateral upper and lower extremities, easily fatigued; This study is being ordered for a neurological disorder.; 3 years Ago; There has been treatment or conservative therapy.; She complains of intermittent episodes of lightheadness. if she's walking. She complains of vertigo sensation.; Physical Therapy and medication Therapy

Would like to send her for MRI Cervical and Lumbar Spine without contrast for further diagnostic evaluation of the numbness and tingling with associated back pain to rule out possible Radiculopathy; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.; worsening Peripheral Neuropathy, lower back pain that radiates around to her hips. Complains of numbness and tingling as well as a burning sensation to both feet and hands that occasionally radiates up her left arm. she also complains of balance disturban; Lyrica, Cymbalta, Injections

Description; Lumbago w/ sciatica of rt side (M54.41).; We discussed differential diagnostic considerations. At this point I am not able to attribute her right leg symptoms specifically to a particular localization. She could've a lumbosacral radicular i; This is a request for a Pelvis MRI.; The study is being ordered for something other than suspicion of tumor, mass, neoplasm, metastatic disease, PID, abscess, Evaluation of the pelvis prior to surgery or laparoscopy, Suspicion of joint or bone infect

This is a request for a Pelvis MRI.; The request is for evaluation of the pelvis prior to surgery or laparoscopy.

This is a request for a Pelvis MRI.; The request is for suspicion of pelvic inflammatory disease or abscess.

looking for the ulnar nerve and to check to see if a spur or fracture or bone is broken; This study is being ordered for trauma or injury.; unknown; It is not known if there has been any treatment or conservative therapy.; pain in elbows, cant move his arms in, very painful with lifting

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Swelling greater than 3 days

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 4.4.2016; There has been treatment or conservative therapy.; RIDICULOPATHY /LEFT HIP PAIN /WEAKNESS /DECREASE IN RANGE OF MOTION WORSENING; IBPROFEN /PHYSICAL THERAPY /CONSERVATIVE THERAPY

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steriod therapy (Prednisone or Cortisone).

Abnormal MRI possible tumor; This study is being ordered for a neurological disorder.; September 2015; There has been treatment or conservative therapy.; Paresthasias fatigue weakness;

More lesions were discovered Test needed to rule out tumor; This study is being ordered for a neurological disorder.; September 2015; There has been treatment or conservative therapy.; Headaches paresthasias weakness fatigue; MS medications

This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

Yes, this is a request for CT Angiography of the abdominal arteries.

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; The last MUGA scan was performed within the last 3 months.; repeat MUGA scan is needed before next infusion to assess for stability of EF.

Early onset Alzheimer or front dementia. Hx memory loss. MSA 22 out of 30. Imaging was done, and the mri was inconclusive.; This is a request for a Metabolic Brain PET scan; This study is being ordered for dementia.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.

The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.; No, the patient did not have six weeks of Chiropractic care related to this episode.; The patient has to increase her intake of pain medication as well as muscle relaxors. The patient has noticed with any type of movement her neck will pop and then a sharp, burning pain runs up behind the left ear.

Radiology Services Denied Not Medically Necessary

The patient is having numbness on the right chin, breast, elbow and right hand. She is also having some vision problems along with the numbness. The doctor wants to rule out Multiple Sclerosis with and MRI of the brain also an MRI of the c-spine.; This study is being ordered for Inflammatory/ Infectious Disease.; JUNE 1, 2015; It is not known if there has been any treatment or conservative therapy.; NUMBNESS IN THE CHIN, RIGHT ELBOW, BREAST AND RIGHT HAND.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is x-ray evidence of a recent cervical spine fracture.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; Neurological deficits; ; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; Yes, the patient is experiencing new onset of parathesia diagnosed by a neurologist.; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; None of the above; scoliosis xray in 2016; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Pt was in a car accident on May 20 &#x0D; She has tried some conservative management since the accident but no relief

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.;

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There is no laboratory or x-ray evidence of osteomyelitis.; Known or Suspected Multiple Sclerosis, Infection or abscess; Ms Mills presents for tremors. She states she had tremors for a few years but didn't notice them until she went back to work after being laid off. She states when typing or going through papers her hands will shake. She states Dr. Wilkerson did blood work; It is not known if there are documented clinical findings of Multiple sclerosis.; No, there is not a laboratory or x-ray evidence of Meningitis.; No, there is not a laboratory or x-ray evidence of an infected disc, septic arthritis or "discitis".; No, there is no laboratory or x-ray evidence of a paraspinal abscess.
